

nominated for consideration: (1) A letter of nomination that clearly states the name and affiliation of the nominee, the basis for the nomination (i.e., specific attributes which qualify the nominee for service in this capacity), and a statement that the nominee is willing to serve as a member of the Committee; (2) the nominator's name, address and daytime telephone number, and the home and/or work address, telephone number, and email address of the individual being nominated; and (3) a current copy of the nominee's curriculum vitae. The names of Federal employees should not be nominated for consideration of appointment to this Committee.

The Department makes every effort to ensure that the membership of HHS Federal advisory committees is fairly balanced in terms of points of view represented and the committee's function. Every effort is made to ensure that a broad representation of geographic areas, females, ethnic and minority groups, and the disabled are given consideration for membership on HHS Federal advisory committees. Appointment to this Committee shall be made without discrimination on the basis of age, race, ethnicity, gender, sexual orientation, disability, and cultural, religious, or socioeconomic status. Nominations must state that the nominee is willing to serve as a member of SACHRP and appears to have no conflict of interest that would preclude membership. Potential candidates are required to provide detailed information concerning such matters as financial holdings, consultancies, and research grants or contracts to permit evaluation of possible sources of conflict of interest.

Dated: October 19, 2004.

Bernard A. Schwetz,

Executive Secretary, Secretary's Advisory Committee on Human Research Protections, Director, Office for Human Research Protections.

[60Day-05AA]

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call 404-498-1210 or send comments to Seleda Perryman, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS-E11, Atlanta, GA 30333 or send an email to omb@cdc.gov.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

EHDI Hearing Screening and Follow-up Survey—New—National Center on Birth Defects and Developmental Disabilities (NCBDDD), Centers for Disease Control and Prevention (CDC).

Background and brief description: CDC, National Center on Birth Defects

and Developmental Disabilities promotes the health of babies, children, and adults with disabilities. As part of the mission of CDC, the National Center on Birth Defects and Developmental Disabilities is actively involved in addressing hearing loss (HL) among newborns and infants. HL is a common birth defect that affects approximately 12,000 infants each year and, when left undetected, can result in developmental delays. As awareness about infant HL increases, so does the demand for accurate information about rates of screening, referral, loss to follow-up, and incidence. This information is important for helping to ensure infants and children are receiving recommended screening and follow-up services, documenting the occurrence and etiology of differing degrees of HL among infants, and determining the overall impact of infant HL on future outcomes, such as cognitive development, and family dynamics. These data will also assist state EHDI programs with quality improvement activities and provide information that will be helpful in assessing the impact of Federal initiatives. The public will be able to access this information via the CDC-EHDI Web site <http://www.cdc.gov/ncbddd/ehdi/>.

Given the lack of a standardized and readily accessible source of data, CDC's Early Hearing Detection and Intervention (EHDI) program has developed a survey to be used annually that utilizes uniform definitions to collect aggregate, standardized EHDI data from states and territories. This survey is based on a form developed by the Directors of Speech and Hearing Programs in State Health and Welfare Agencies (DSHPSHWA), which is a nongovernmental agency that gave CDC-EHDI permission to use their survey form. After year 2004, DSHPSHWA no longer plans to disseminate this or any other EHDI-related data collection form. There are no costs to respondents other than their time.

ANNUALIZED BURDEN TABLE

Respondents	Number of respondents	Number of responses per respondent	Average burden per response (in hrs.)	Total burden hours
State and territory EHDI Program Coordinators	53	1	4	212
Total	212

Dated: October 18, 2004.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Iowa Ordnance Plant

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Department of Health and Human Services gives notice of a decision to evaluate a petition to designate a class of employees at the Iowa Ordnance Plant, also known as the Iowa Army Ammunition Plant, in Burlington, Iowa to be included in the Special Exposure Cohort under the Energy Employees Occupational Illness Compensation Program Act of 2000. The initial proposed definition for the class being evaluated, subject to revision as warranted by the evaluation, is as follows:

Facility: Iowa Ordnance Plant, Burlington, Iowa.

Locations: Line 1 (which includes Yard C, Yard G, Yard L, Firing Site Area, Burning Field "B", and Storage Sites for Pits and Weapons including Buildings 73 and 77).

Job Titles and/or Job Duties: All Technicians (Laboratory, Health Physics, Chemical, X-ray, etc.), Production Personnel (hourly and salaried), Engineers, Inspectors, Safety Personnel, Physical Security Personnel, and Maintenance Persons. Period of Employment: 1947-1974.

FOR FURTHER INFORMATION CONTACT:

Larry Elliott, Director, Office of Compensation Analysis and Support, National Institute for Occupational Safety and Health, 4676 Columbia Parkway, MS C-46, Cincinnati, OH 45226, telephone 513-533-6800 (this is not a toll-free number). Information requests can also be submitted by e-mail to OCAS@CDC.GOV.

Dated: October 18, 2004.

James D. Seligman,

*Associate Director for Program Services,
Centers for Disease Control and Prevention.*

Public Health Service

National Toxicology Program; Call for Additional Public Comments on 21 Substances, Mixtures and Exposure Circumstances Proposed for Review for Listing or Changing the Current Listing in the Report on Carcinogens, Twelfth Edition

Background

The National Toxicology Program (NTP) initially announced its intent to review additional agents, substances, mixtures and exposure circumstances for possible listing or changing the current listing in the Report on Carcinogens (RoC), Twelfth Edition in a May 19, 2004 **Federal Register** notice (69 FR 28940 (May 19, 2004)). Based on some of the comments received in response to this notice, the NTP is concerned that there might have been confusion about the procedures that will be used for review of nominations to the 12th RoC. A detailed description of the current review procedures, including the steps in the formal review process, is available on the Web at <http://ntp-server.niehs.nih.gov> (select on Report on Carcinogens) or can be obtained by contacting: Dr. C.W. Jameson, National Toxicology Program, Report on Carcinogens, 79 Alexander Drive, Building 4401, Room 3118, PO Box 12233, Research Triangle Park, NC 27709; phone: (919) 541-4096, fax: (919) 541-0144, e-mail: jameson@niehs.nih.gov.

Public Comment Requested

Because of the possibility of confusion over the review procedures for the 12th RoC nominations, additional comments concerning the nominations for listing or changing the current listing in the 12th RoC will be accepted by the NTP for a period of 30 days from the publication date of this announcement in the **Federal Register**. The following table identifies the 21 nominations the NTP may consider for

review in 2004 or 2005, as either a new listing in or changing the current listing in the 12th RoC. These nominations are provided with their Chemical Abstracts Services (CAS) Registry numbers (where available) and pending review action. Additional nominations for the 12th RoC or modifications to the nominations in the attached table may be identified and would be announced in future **Federal Register** notices. The NTP solicits public input on these 21 nominations and asks for relevant information concerning their carcinogenesis, as well as current production data, use patterns, or human exposure information. The NTP also invites interested parties to identify any scientific issues related to the listing of a specific nomination in the RoC that they feel should be addressed during the reviews.

Individuals who submitted comments in response to the May 19, 2004 **Federal Register** (69 FR 28940 (May 19, 2004)) that initially announced the 12th RoC nominations need not re-submit their comments as they are already part of the public record. Individuals submitting new or additional public comments are asked to include relevant contact information (name, affiliation (if any), address, telephone, fax, and e-mail). Comments or questions should be directed to Dr. C.W. Jameson at the address listed above.

Additional Nominations Encouraged

The NTP solicits and encourages the broadest participation from interested individuals or parties in nominating agents, substances, or mixtures for review for the Twelfth and future RoCs. Nominations should contain a rationale for review. Appropriate background information and relevant data (e.g., journal articles, NTP Technical Reports, IARC listings, exposure surveys, release inventories, etc.), which support the review of a nomination, should be provided or referenced when possible. Contact information for the nominator should also be included (name, affiliation (if any), address, telephone, fax, and email). Nominations should be sent to Dr. Jameson's attention at the address given above.

Dated: October 15, 2004.

Samuel Wilson,

*Deputy Director, National Institute of
Environmental Health Sciences.*
