Total Annual Burden: 200 hours.

Total Annual Cost: \$604,000.

Privacy Act Impact Assessment: Not applicable.

Needs and Uses: FCC Form 304 is used by existing Multipoint Distribution (MDS) operators to modify their stations or to add a signal booster station. It is also used by some winning bidders in the competitive bidding process to propose facilities to provide wireless cable service over any usable MDS channels within their Basic Trading Area (BTA). This collection of information also includes the burden for the technical rules involving the interference or engineering analysis and service requirements under Sections 21.902, 21.913, and 21.938. These analyses will not be submitted with the application but will be retained by the operator and must be made available to the Commission upon request. The data is used by FCC staff to ensure that the applicant is legally, technically and otherwise qualified to become a Commission licensee. MDS/ITFS applicants/licensees will need this information to perform the necessary analyses of the potential for harmful interference to their facility.

The Commission is now revising this form to request additional information to complete the Universal Licensing Service (ULS) data elements since MDS/ITFS has been implemented into ULS. Additional information such as the licensee's email address, fax number, type of applicant, contact's email address and fax number will be added to this form. The Commission is also clarifying data elements, instructions and correction of mailing addresses and Web sites. The increase in the annual cost burden is due to hourly wage and fees within the past three years.

Each licensee must specify as a condition that upon the completion of construction, the licensee file with the Commission a FCC Form 304A, certifying that the facilities as authorized have been completed, the station is operational, and ready to provide service to the public. The conditional license shall be automatically forfeited upon the expiration of the construction period specified in the license within five days after the date an FCC Form 304A has been filed with the Commission.

Additional information such as the licensee's email address, fax number, type of applicant, contact's email address and fax number will be added to this collection. The Commission is also clarifying data elements, instructions, and corrections of mailing addresses and Web sites.
