Approval and Promulgation of Implementation Plans; Texas; Control of Emission of Oxides of Nitrogen (NO_x) From Cement Kilns

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The EPA is approving revisions to the Texas State Implementation Plan (SIP). These revisions concern Control of Air Pollution from Nitrogen Compounds— Cement Kilns. The affected sources are major cement kilns that were in service before December 31, 1999. The EPA is approving these SIP revisions for cement kilns as they will contribute to attainment of the 1-hour ozone National Ambient Air quality Standards (NAAQS). Today's action does not intend to address any aspect(s) of the implementation of the 8-hour ozone NAAQS. The EPA is approving control of emissions of NO_X from cement kilns in accordance with the requirements of the Federal Clean Air Act (the Act).

DATES: This rule is effective on April 26, 2004.

The April 30, 2000 SIP submittal specifically addressed revisions to the following sections of Chapter 117.

In CEMEX USA (CEMEX) and TXI Operations, LP (TXI) v. TCEQ, Case No. GN001480 (Travis Co. Dist. Ct. April 30, 2003), CEMEX and TXI challenged the State for adopting the above revision to Chapter 117. As a part of a negotiated settlement of the case, TCEQ issued a reproposal to revise 30 TAC, Chapter 117, on October 24, 2002.

On December 9, 2002, EPA submitted comments to TCEQ concerning reproposed revisions to Chapter 117.

On April 2, 2003, TCEQ submitted a revised Chapter 117, Control of Air Pollution from Nitrogen Compounds rule concerning cement kilns operations as a revision to the SIP (April 2, 2003 SIP submittal). The April 2, 2003 SIP submittal specifically addressed revisions to the following sections of Chapter 117.

The EPA received relevant adverse comments on the July 30, 2003 (68 FR 44631), rulemaking action during the public comment period.
