AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability and receipt of application.

SUMMARY: This notice advises the public that the Livermore Area Landowners Group, The Nature Conservancy and the State of Colorado (Applicants) have applied to the U.S. Fish and Wildlife Service (Service) for an incidental take permit pursuant to section 10(a)(1)(B) of the Endangered Species Act (Act) of 1973, as amended. The proposed permit would authorize the incidental take of the Preble's meadow jumping mouse (*Zapus hudsonius preblei*) (Preble's), federally listed as threatened, through loss and modification of its habitat associated with development of new agricultural and residential structures and ongoing agricultural activities in the Livermore Area of northern Larimer County, Colorado. The duration of the permit would be 30 years from the date of issuance.

We announce the receipt of the Applicant's incidental take permit application, which includes an Environmental Assessment (EA) and the Livermore Area Habitat Conservation Plan (LAHCP) for the Preble's in the Livermore Area of Larimer County, Colorado. The proposed EA and LAHCP are available for public review and comment. They fully describe the proposed project and the measures the Applicants would undertake to minimize and mitigate project impacts to the Preble's.

The Service requests comments on the EA and LAHCP and associated documents for the proposed issuance of the incidental take permit. Background

Section 9 of the Act and Federal regulations prohibit the "take" of a species listed as endangered or threatened. Take is defined under the Act, in part, as to kill, harm, or harass a federally listed species. However, the Service may issue permits to authorize "incidental take" of listed species under limited circumstances. Incidental take is defined under the Act as take of a listed species that is incidental to, and not the purpose of, the carrying out of an otherwise lawful activity under limited circumstances. Regulations governing permits for threatened species are promulgated in 50 CFR 17.32.

The Livermore Planning Area encompasses 114,634 hectares (283,266 acres) of land utilized primarily for agricultural purposes with a limited amount proposed for development. The applicants are making participation in the LAHCP available to all landowners within the Livermore Planning Area who voluntarily agree to participate. Within the planning area, the LAHCP proposes a 8,626.3-hectare (21,316-acre) conservation zone (CZ) consisting of corridors along 323.5 kilometers (201 miles) of streams.

The applicants have determined that the activities covered by the LAHCP could impact 1,358.4 hectares (3,356.7 acres) of Preble's habitat along 46.3 stream kilometers (28.8 stream miles), if all lands containing potential Preble's habitat within the CZ of the planning area are enrolled in the LAHCP.
