SUPPLEMENTARY INFORMATION:

I. Background

The Office of Workers' Compensation Programs (OWCP) administers the Federal Employees' Compensation Act (FECA). Section 8104(a) of the Act provides vocational rehabilitation services to eligible injured Federal employees that are paid from the Employees' Compensation Fund. The information collected on Form CA-2231 provides OWCP with the necessary remittance information for the employer, documents the hours of work, certifies the payment of wages to the claimant for which reimbursement is sought, and summarizes the nature and costs of the wage reimbursement program for a prompt decision by OWCP. This information collection is currently approved for use through June 30, 2004.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-346]

Davis-Besse Nuclear Power Station; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of FirstEnergy Nuclear Operating Company (the licensee) to withdraw its December 17, 2001, as supplemented by letter dated June 4, 2002, application for proposed amendment to Facility Operating License No. NPF-3 for the Davis-Besse Nuclear Power Station, Unit No. 1, located in Ottawa County, Ohio.

The proposed amendment would have modified the facility technical specifications (TS) pertaining to TS 3/4.3.1, "Reactor Protection System (RPS) Instrumentation," to delete an Action involving either reducing core thermal power and the high neutron flux reactor trip setpoint, or monitoring quadrant power tilt when an RPS channel is inoperable. Additionally, changes were

proposed to the content and format of TS Tables 3.3-1 and 4.3-1 to enhance TS clarity.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on November 25, 2003 (68 FR 66136). However, by letter dated November 26, 2003, the licensee withdrew the amendment request.

For further details with respect to this action, see the application for amendment dated December 17, 2001, as supplemented by letter dated June 4, 2002, and the licensee's letter dated November 26, 2003, which withdrew the application for license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-275 and 50-323]

Pacific Gas and Electric Company, Diablo Canyon Power Plant, Unit Nos. 1 and 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an exemption from title 10 of the Code of Federal Regulations (10 CFR) part 50, section 50.68 for Facility Operating License Nos. DPR-80 and DPR-82, issued to Pacific Gas and Electric Company (the licensee), for operation of the Diablo Canyon Power Plant (DCPP), Unit Nos. 1 and 2, respectively, located in San Luis Obispo County, California. Therefore, as required by 10 CFR 51.21, the NRC is issuing this environmental assessment and finding of no significant impact.

Environmental Assessment

Identification of the Proposed Action

The proposed action would exempt the licensee from the requirements of 10 CFR 50.68, "Criticality Accident Requirements," for handling the 10 CFR part 72 licensed contents of the Holtec HI-STORM 100 Cask System.

The proposed action is in accordance with the licensee's application dated October 8, 2003, as supplemented on November 25, 2003.

The Need for the Proposed Action

10 CFR 50.68(b)(1) sets forth the following requirement that must be met, in lieu of a monitoring system capable of detecting criticality events:

Plant procedures shall prohibit the handling and storage at any one time of more fuel assemblies than have been determined to be safely subcritical under the most adverse moderation conditions feasible by unborated water.

The licensee is unable to satisfy the above requirement for handling of the 10 CFR part 72 licensed contents of the Holtec HI-STORM 100 Cask System. Section 50.12(a) allows licensees to apply for an exemption from the requirements of part 50 if the regulation is not necessary to achieve the underlying purpose of the rule and other conditions are met. The licensee has stated that compliance with 10 CFR 50.68(b)(1) is not necessary for handling the 10 CFR part 72 licensed contents of the cask system to achieve the underlying purpose of the rule.

Environmental Impacts of the Proposed Action

The NRC has completed its evaluation of the proposed action and concludes
