Associate Administrator for Commercial Space Transportation Notice of Availability and Request for Comment on a Draft Supplemental Environmental Assessment (EA) for the East Kern Airport District (EKAD) Launch Site Operator License for the Mojave Airport, CA

AGENCY: Federal Aviation Administration (FAA), Associate Administrator for Commercial Space Transportation (AST) prepared the Draft Supplemental EA.

ACTION: Notice of availability and request for comment.

SUMMARY: In accordance with National Environmental Policy Act (NEPA) regulations, the FAA is initiating a public review and comment period for a Draft Supplemental EA. In February 2004, the FAA released a Final Environmental Assessment for the East Kern Airport District Launch Site Operator License for the Mojave Airport, which analyzed the environmental impacts of operating a launch site at the Mojave Airport in Mojave, California. The February 2004 EA was prepared to support an application from EKAD to operate a licensed launch facility at the Mojave Airport. Two types of launch vehicles were included in the analysis as typical vehicles that would operate from the Mojave Airport. The first vehicle type, referred to in the EA as Concept A, includes air-drop designs where two vehicles, an airplane and a launch vehicle are mated together, and the airplane carries the launch vehicle to a predetermined altitude where the launch vehicle is dropped and its rocket engines ignite. The second vehicle type referred to in the EA as Concept B includes horizontally launched vehicles, which use rocket power to takeoff from a standard aviation runway.

The FAA issued a launch license to Scaled Composites, Limited Liability Corporation (LLC) on April 7, 2004 for launches of the SpaceShipOne vehicle, which is similar to Concept A launch vehicles described and analyzed in the February 2004 EA. The February 2004 EA considered the environmental impacts of launching up to six (6) Concept A launch vehicles from the Mojave Airport in 2004. To ensure that Scaled Composites and other potential Concept A vehicle operators would have maximum flexibility in using the Mojave Airport to support their launch programs, the Draft Supplemental EA considers the environmental impacts of
