Notice of Consideration of Amendment Request for the U.S. Army's Jefferson Proving Ground Facility at Madison, IN, and Opportunity for Providing Comments and Requesting a Hearing

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of a license amendment to Material License No. SUB-1435 issued to the U.S. Army (the licensee), to authorize decommissioning of its Jefferson Proving Ground (JPG) facility in Madison, Indiana.

The U.S. Army submitted a revised decommissioning plan (DP) on June 27, 2002, to decommission JPG with restricted release. An NRC administrative review, documented in a letter to the U.S. Army dated October 1, 2002, found the DP acceptable to begin a technical review.

If the NRC approves the DP, the approval will be documented in an amendment to NRC License No. SUB-

1435. However, before approving the proposed amendment, the NRC will need to make the findings required by the Atomic Energy Act of 1954, as amended, and NRC's regulations. These findings will be documented in a Safety Evaluation Report and either an Environmental Assessment or Environmental Impact Statement.

II. Opportunity To Provide Comments

In accordance with 10 CFR 20.1405, the NRC is providing notice to individuals in the vicinity of the site that the NRC is in receipt of a DP, and will accept comments concerning this decommissioning proposal and its associated environmental impacts. Comments with respect to this action should be provided in writing within 30 days of this notice and addressed to Tom McLaughlin, Decommissioning Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. NUCLEAR REGULATORY COMMISSION

[Docket No. 040-08794]

Notice of Consideration of Amendment Request for the Molycorp Facility at York, PA, and Opportunity for Providing Comments and Requesting a Hearing

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of a license amendment to Source Materials License SMB-1408 issued to Molycorp, Inc., (Molycorp), to allow for an alternate decommissioning schedule for its York, PA, site. Molycorp's license required Molycorp to decommission by June 2002, which is within 2 years of the date that the decommissioning plan was approved. Molycorp was granted a three month extension from the regulatory requirements of the Timeliness Rule in order to determine if there is a more efficient way to complete decommissioning the remaining portion of the site. Molycorp submitted an alternate decommissioning schedule in a letter dated September 30, 2002. Molycorp proposes to use a phased approach where a new site characterization plan is developed and submitted to NRC for concurrence prior to the resumption of remediation. Molycorp is to submit a revised remediation schedule by February 15, 2003.

If the NRC approves this request, the approval will be documented in a license amendment to NRC License SMB-1408. However, before approving the proposed amendment, the NRC will need to make the findings required by the Atomic Energy Act of 1954, as amended, and NRC's regulations. These findings will be documented in a safety evaluation report.
