

the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects' staff has prepared an Environmental Assessment (EA) for an application requesting Commission approval to permit Georgia Power Company (licensee) to construct a non-project electric transmission line that will cross a portion of the lands and waters of the Wallace Dam Project. The Wallace Dam Project is located on the Oconee and Altamaha Rivers in Putnam, Morgan, Oglethorpe, Greene and Hancock Counties, Georgia.

The EA contains the staff's analysis of the potential environmental impacts of the proposal and concludes that approval of the proposal would not constitute a major federal action that would significantly affect the quality of the human environment.

A copy of the EA is available for review at the Commission in the Public Reference Room, or it may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link.
