given toward applying a horizontal handhold on the uppermost portion of the doorframe interior as an alternate compliance, but after further analysis Amtrak determined that this would pose a greater safety risk during the ingress and egress of personnel at this location. Therefore, permanent relief from the requirement that the vertical handhold continue to a point equal to the top edge of the control cab door is requested.

• Requirements of § 238.429(e)(4) & 231.14(b)(2)—"The minimum clear depth of the sill step shall be 8 inches".

Regarding the sill steps, to decrease the distance in the vertical rise measurement from the original 21 inches it was necessary to raise the upper step. This revised design maintains the clear depth measurement at 7.5 inches. Amtrak believes that decreasing the vertical rise while maintaining the depth between the step and the carbody ensures a safer sill step area.

• Requirements of § 238.429(e)(6) & § 231.14(b)(4)—"Sill steps shall not have a vertical rise between treads exceeding 18 inches".

Proposed alternate compliance—The original sill step configuration had a vertical rise of 21 inches due to constraints with the design of the carbody's side sill. This alternate design lowers this distance to approximately 20 inches. However, further decrease of this dimension would result in a corresponding decrease of the 7.5-inch clear depth of the sill step.

• Requirements of § 238.429(e)(10)— "50% of the tread surface area of each sill step shall be open space".

Proposed alternate compliance— Amtrak believes that the current serrated design for the lower step, with 2.25-inch high foot guards on each side, combined with a non-skid surface material would provide a safer tread surface than a more traditional open space design.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (Waiver Petition Docket Number FRA–2003–14444) and must be submitted to the Docket Clerk, DOT Central Docket Management Facility, Room PL–401,

Washington, DC, 20590–0001. Communications received within 45 days of the date of this notice will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m.—5 p.m.) at the above facility. All documents in the public docket are also available for inspection and copying on the Internet at the docket facility's Web site at http://dms.dot.gov.

FRA wishes to inform all potential commenters that anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the Federal Register published on April 11, 2000 (Volume 65, Number 70; Pages 19477–78) or you may visit http://dms.dot.gov.

Issued in Washington, DC on June 11, 2003.

Grady C. Cothen, Jr.,

Deputy Associate Administrator for Safety Standards and Program Development.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System or Relief From the Requirements of Title 49 Code of Federal Regulations Part 236

Pursuant to Title 49 Code of Federal Regulations (CFR) part 235 and 49 U.S.C. 20502(a), the following railroad has petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of the signal system or relief from the requirements of 49 CFR part 236 as detailed below.

Docket No. FRA-2003-15301

Applicant: Burlington Northern and Santa Fe Railway, Mr. William G. Peterson, Director Signal Engineering, 4515 Kansas Avenue, Kansas City, Kansas 66106.

Burlington Northern and Santa Fe Railway (BNSF) seeks approval of the proposed modification of the traffic control system, on the two main tracks at Burlington, Iowa, milepost 205.48, on the Nebraska Division, Ottumwa Subdivision. The proposed changes consist of the conversion of the power-operated switch to hand operation, equipped with an electric lock, and removal of the three associated absolute controlled signals on Main Track No. 2, and the discontinuance and removal of the back to back intermediate signals on Main Track No. 1.

The reasons given for the proposed changes are that the switch at one time was used for passenger service to the depot, but now the track is used to tie up a switch engine once or twice a week, and due to the short blocks on Main Track No. 1.

Any interested party desiring to protest the granting of an application shall set forth specifically the grounds upon which the protest is made, and include a concise statement of the interest of the party in the proceeding. Additionally, one copy of the protest shall be furnished to the applicant at the address listed above.

All communications concerning this proceeding should be identified by the docket number and must be submitted to the Docket Clerk, DOT Central Docket Management Facility, Room PL-401 (Plaza Level), 400 7th Street, SW., Washington, DC 20590-0001. Communications received within 45 days of the date of this notice will be considered by the FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m.-5 p.m.) at the above facility. All documents in the public docket are also available for inspection and copying on the internet at the docket facility's Web site at http://dms.dot.gov.

FRA wishes to inform all potential commenters that anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70; Pages 19477–78) or you may visit http://dms.dot.gov.

FRA expects to be able to determine these matters without an oral hearing. However, if a specific request for an oral hearing is accompanied by a showing that the party is unable to adequately present his or her position by written statements, an application may be set for public hearing.

Issued in Washington, DC on June 11, 2003.

Grady C. Cothen, Jr.,

Deputy Associate Administrator for Safety Standards and Program Development. [FR Doc. 03–15393 Filed 6–17–03; 8:45 am] BILLING CODE 4910–06–P

Federal Railroad Administration

Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System or Relief From the Requirements of Title 49 Code of Federal Regulations Part 236

Pursuant to title 49 Code of Federal Regulations (CFR) part 235 and 49 U.S.C. 20502(a), the following railroad has petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of the signal system or relief from the requirements of 49 CFR part 236 as detailed below.

Docket No. FRA-2003-15145

Applicant: Burlington Northern and Santa Fe Railway, Mr. William G. Peterson, Director Signal Engineering, 4515 Kansas Avenue, Kansas City, Kansas 66106.

Burlington Northern and Santa Fe Railway (BNSF) seeks approval of the proposed discontinuance and removal of the automatic block signal system, between Hettinger, North Dakota, milepost 926.0 and Terry, Montana, milepost 1078.9, on the Montana Division, Hettinger Subdivision, a distance of approximately 153 miles, with governance of train movements by Track Warrant Control.

The reason given for the proposed changes is that due to an ice storm which disabled about 35 percent of the pole line on the Subdivision, the signal pole line is in need of large amounts of replacement capital to restore and rehabilitate this line. BNSF believes that this scarce capital would be much better spent on other lines with greater track density, because this line averages only four trains per day.

Any interested party desiring to protest the granting of an application shall set forth specifically the grounds upon which the protest is made, and include a concise statement of the interest of the party in the proceeding. Additionally, one copy of the protest shall be furnished to the applicant at the address listed above.

All communications concerning this proceeding should be identified by the docket number and must be submitted

Pursuant to Title 49 Code of Federal Regulations (CFR) Part 235 and 49 U.S.C. 20502(a), the following railroad has petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of the signal system or relief from the requirements of 49 CFR part 236 as detailed below.

Docket No. FRA-2003-15194

Applicant: CSX Transportation, Incorporated, Mr. Eric G. Peterson, Assistant Chief Engineer, Signal Design and Construction, 4901 Belfort Road, Suite 130 (S/C J–370), Jacksonville, Florida 32256.

CSX Transportation, Incorporated seeks approval of the proposed modification of the traffic control system at South Wye, milepost ANA 587.80, near Waycross, Georgia, on the Jesup Subdivision, Jacksonville Service Lane. The proposed change consists of the discontinuance and removal of controlled absolute signal 220RD, associated with the addition of aspects to controlled absolute signal 222RA to govern southward diverging routes from Rice Yard to the Main Track.

The reason given for the proposed changes is to eliminate facilities no longer needed in present day operation.

Any interested party desiring to protest the granting of an application shall set forth specifically the grounds upon which the protest is made, and include a concise statement of the interest of the party in the proceeding. Additionally, one copy of the protest shall be furnished to the applicant at the address listed above.

All communications concerning this proceeding should be identified by the docket number and must be submitted to the Docket Clerk, DOT Central Docket Management Facility, Room PL-401 (Plaza Level), 400 7th Street, SW., Washington, DC 20590-0001.
