

ineligible for Federal funding that could encourage their development. The principal purpose of a Federal project would be the reduction of damages associated with hurricane and storm events and beach erosion. Potential benefits from the project would include protection of the towns' structures and related infrastructure (*i.e.*, roads, utility lines, *etc.*), as well as improvements in aesthetic qualities and recreational opportunities at the beaches.

The feasibility studies will evaluate several alternatives to address shore protection and related issues. These alternatives may include: (1) Construction of berms and dunes along all or portions of the oceanfront within the study area; (2) Removal and/or relocation of threatened structures; and (3) No Federal action. The maximum potential project length is approximately 10 miles (the 17 miles from New River Inlet south to the Surf City-Topsail Beach town limits exclusive of approximately 7 miles within the CBRS). The selection of final project features and reaches for inclusion in a recommended plan will be based on a maximization of net benefits.

During the feasibility studies, potential estuarine, inlet, offshore, and upland sources of borrow material will be investigated, and quantities of sand required for berm and dune construction will be determined. Estimated sand volumes and placement frequency for project maintenance will also be developed.

Alternative methods of beach nourishment and dredging of offshore borrow areas will be evaluated, including the use of ocean-certified hydraulic pipeline and/or hopper dredges.

All private parties and Federal, State, and local agencies having an interest in the study are hereby notified of the study and are invited to comment at this time. A scoping letter requesting input to the study was sent to all known interested parties on February 14, 2001.

A formal scoping meeting is not planned at this time but may be held if it is determined that new information may be obtained that would not otherwise be available. All comments received as a result of this notice of intent and the previous scoping letter will be considered in the preparation of the DEIS.

Significant environmental resources to be addressed during project studies and in the DEIS include: (1) Endangered and threatened species; (2) Fish and wildlife and their habitats, including essential fish habitat; (3) Water quality; (4) Socioeconomic resources; and (5)

Cultural resources. Efforts will be made to enhance resource conditions and minimize adverse impacts.

The lead agency for this project is the U.S. Army Corps of Engineers District, Wilmington. Cooperating agency status has not been assigned to any other agency. The DEIS is being prepared in accordance with the requirements of the National Environmental Policy Act of 1969, as amended, and will address the relationship of the proposed action to all other applicable Federal and State Laws and Executive Orders. The DEIS is currently scheduled for distribution to the public in the winter of 2005.

Dated: December 2, 2003.

W. Eugene Tickner, P.E.,

Deputy District Engineer, Programs and Project Management.

DEPARTMENT OF EDUCATION

Office of Postsecondary Education

Developing Hispanic-Serving Institution (HSI) Program

ACTION: Correction; notice reopening application deadline for certain applicants.

SUMMARY: We correct the postmark date listed in the *Transmittal of Applications* section of the notice published on December 16, 2003 (68 FR 70008).

SUPPLEMENTARY INFORMATION: On December 16, 2003, we published a notice in the **Federal Register** reopening the application deadline for certain applicants under the HSI Program. The postmark date listed in the *Transmittal of Applications* section of the notice published was incorrect. The last sentence under *Transmittal of Applications* should read, "Your submittals must be postmarked no later than December 29, 2003."

FOR FURTHER INFORMATION CONTACT: Ms. Darlene B. Collins, U.S. Department of Education, 1990 K Street, NW., 6th Floor, Washington, DC 20006-8513. Telephone: (202) 502-7576 or via Internet: *Darlene.Collins@ed.gov*.

If you use a telecommunications device for the deaf (TDD), you may call the Federal Information Relay Service (FIRS) at 1-800-877-8339.

Individuals with disabilities may obtain this document in an alternative format, (*e.g.* Braille, large print, audiotape, or computer diskette) on request to the contact person listed under **FOR FURTHER INFORMATION CONTACT**.

Electronic Access to This Document

BILLING CODE 4000-01-P

DEPARTMENT OF ENERGY

Office of Science; Biological and Environmental Research Advisory Committee Renewal

AGENCY: Department of Energy.

ACTION: Notice of renewal.

SUMMARY: Pursuant to section 14(a)(2)(A) of the Federal Advisory Committee Act, and in accordance with section 102-3.60, title 41 of the Code of Federal Regulations, and following consultation with the Committee Management Secretariat, General Services Administration, notice is hereby given that the Biological and Environmental Research Advisory Committee has been renewed for a two-year period beginning in December 2003. The Committee will provide advice to the Director, Office of Science, on the Biological and Environmental Research Program managed by the Office of Biological and Environmental Research.

The renewal of the Biological and Environmental Research Advisory Committee has been determined to be essential to the conduct of the Department of Energy business and to be in the public interest in connection with the performance of duties imposed upon the Department of Energy by law. The Committee will operate in
