BILLING CODE 7570-01-M

Facility Operating License No. DPR-35 for the Pilgrim Nuclear Power Station, located in Plymouth County, Massachusetts. The licensee's application was supplemented by letters dated February 24 and April 17, 2003.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on March 18, 2003 (68 FR 12952). However, by letter dated April 17, 2003, the licensee withdrew a portion of the original amendment request pertaining to the proposed change to note (1) of Technical Specification (TS) Table 3.2.B.

The Commission issued License Amendment No. 200 on April 22, 2003, which revised the TSs pertaining to requirements for the emergency core cooling system during shutdown conditions. The change modified the core spray and low pressure injection system's TS requirements to be applicable during the Run, Startup, and Hot Shutdown Modes. The change also modified the high drywell pressure instrumentation TSs to require the instrumentation to be Operable during the Run, Startup and Hot Shutdown Modes. Unnecessary TS requirements were removed based on the plant's operating Mode. Other changes were administrative in nature.

For further details with respect to this action, see the application for amendment dated January 23, 2003, as supplemented February 24, 2003; and the licensee's April 17, 2003, letter that withdrew a portion of the application for license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North,

Neighborhood Reinvestment Corporation

Annual Board of Directors Meeting

TIME AND DATE: 2 p.m., Wednesday, May 28, 2003.

PLACE: Neighborhood Reinvestment Corporation, 1325 G Street, NW., Suite 800, Washington DC 20005.

STATUS: Open.

FOR FURTHER INFORMATION CONTACT: Jeffrey T. Bryson, General Counsel/Secretary 202-220-2372; jbryson@nw.org.

AGENDA:

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-293]

Entergy Nuclear Generation Company, Entergy Nuclear Operations, Inc.; Notice of Partial Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (NRC or Commission) has granted the request of Entergy Nuclear Operations, Inc. (the licensee), to withdraw a portion of its January 23, 2003, application for amendment to

Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management Systems (ADAMS) Public Electronic Reading Room on the internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams/html>. Persons who do not have access to ADAMS, or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR reference staff by telephone at 1-800-397-4209, or 301-415-4737, or by email to pdr@nrc.gov.

Dated in Rockville, Maryland, this 19th day of May, 2003.

For the Nuclear Regulatory Commission.

Travis L. Tate,

Project Manager, Section 2, Project Directorate I, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7710-12-M

RAILROAD RETIREMENT BOARD

Proposed Collection; Comment Request

SUMMARY: In accordance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 which provides opportunity for public comment on new or revised data collections, the Railroad Retirement Board (RRB) will publish periodic summaries of proposed data collections.

Comments are invited on: (a) Whether the proposed information collection is necessary for the proper performance of the functions of the agency, including whether the information has practical utility; (b) the accuracy of the RRB's estimate of the burden of the collection of the information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden related to the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Title and Purpose of Information Collection

Employer Reporting; OMB 3220-0005

Under Section 9 of the Railroad Retirement Act (RRA), and section 6 of the Railroad Unemployment Insurance Act (RUIA), railroad employers are required to submit reports of employee service and compensation to the RRB as needed for administering the RRA and RUIA. To pay benefits due on a deceased employee's earnings records or determine entitlement to, and amount of annuity applied for, it is necessary at times to obtain from railroad employers current (lag) service and compensation not yet reported to the RRB through the annual reporting process. The reporting requirements are specified in 20 CFR part 209.

The RRB currently utilizes Form G-88a.1, Notice of Retirement and Verification of Date Last Worked, Form G-88a.2, Notice of Retirement and Request for Service Needed for Eligibility, and Form AA-12, Notice of Death and Compensation, to obtain the required lag service and related information from railroad employers. Form G-88a.1 is a computer-generated listing sent by the RRB to railroad

employers and used for the specific purpose of verifying information previously provided to the RRB regarding the date last worked by an employee. If the information is correct, the employer need not reply. If the information is incorrect, the employer is asked to provide corrected information. Form G-88a.2 is used by the RRB to secure lag service and compensation information when it is needed to determine benefit eligibility. Form AA-12 obtains a report of lag service and compensation from the last railroad employer of a deceased employee. This report covers the lag period between the date of the latest record of employment processed by the RRB and the date an employee last worked, the date of death or the date the employee may have been entitled to benefits under the Social Security Act. The information is used by the RRB to determine benefits due on the deceased employee's earnings record. No changes are proposed to Form G-88a.1, Form G-88a.2 or Form AA-12.

In addition, 20 CFR 209.12(b) requires all railroad employers to furnish the RRB with the home address of all employees hired within the last year (new-hires). Form BA-6a, BA-6 Address Report, is used by the RRB to obtain home address information of employees from railroad employers that do not have the home address information computerized and who submit the information in a paper format. The form also serves as an instruction sheet to railroad employers who submit the information electronically by magnetic tape, cartridge, or PC diskette. No changes are proposed to the approved Form BA-6a currently in use.

In accordance with the Government Paperwork Elimination Act (GPEA) of 1998, which directed Federal agencies to develop electronic service delivery instruments as an alternative to traditional paper-based processes, the RRB is proposing the addition of an Internet equivalent of current Form BA-6a, BA-6 Address Report, to the information collection.

The completion time for the Proposed Form G-88a.1 is estimated at 5 to 20 minutes. Form G-88a.2 is estimated at 5 minutes per response. The estimated completion time for Form AA-12 is 6½ minutes per response. The estimated completion time for Form BA-6a is 10 to 30 minutes. Completion is mandatory. The RRB estimates that approximately 800 Form AA-12's, 400 Form G-88a.1's, 1,200 Form G-88a.2's and 900 Form BA-6a's are completed annually.
