National Highway Traffic Safety Administration

[Docket No. NHTSA 2003-15819; Notice 1]

Mitsubishi Motors North America, Inc.,
Receipt of Application for Decision of
Inconsequential Noncompliance

Mitsubishi Motors North America, Inc. (MMNA) has determined that approximately 25,832 vehicles equipped with new pneumatic tires failed to comply with certain provisions mandated by Federal Motor Vehicle Safety Standard (FMVSS) No. 110, "Tire selection and rims", regarding the vehicle normal load.

Pursuant to 49 U.S.C. 30118(d) and 30120(h), MMNA has petitioned for a determination that this noncompliance is inconsequential to motor vehicle safety and has filed an appropriate report pursuant to 49 CFR part 573, "Defect and Noncompliance Reports."

This notice of receipt of an application is published under 49 U.S.C. 30118 and 30120 and does not represent any agency decision or other exercise of judgment concerning the merits of the application.

Mitsubishi Motors Sales Caribbean, Inc., and DaimlerChrysler Corporation (at that time, Chrysler Corporation) imported and distributed approximately 25,832 vehicles (Mitsubishi Mirages and Eagle Summit passenger vans), during the periods of September 22, 1994, through May 9, 1996. FMVSS No. 110, "Tire selection and rims," S4.2.2, mandates that the vehicle's normal load on each tire must not exceed the test load for the high speed performance test as specified in FMVSS No. 109, "New pneumatic tires," paragraph S5.5. Paragraph S5.5.1 requires that the tire and wheel assembly be pressed against the test wheel, with a load of 88 percent of the tire's maximum load rating as marked on the tire sidewall.

As requested by MMNA, the affected vehicles, when loaded at the vehicle normal load slightly, exceed 88 percent of the maximum load rating. Specifically, the vehicle's normal load exceeds 88 percent of the maximum load rating by approximately 12kg, which means that the normal load is 89.5 percent of the maximum load rating. The noncompliance resulted from a running change during the 1995 model year that added a three-speed automatic transmission that increased the curb weight by 15kg. FMVSS No. 110 requires that the vehicle's normal load on each tire must not be greater than the high speed performance test load, which is 88 percent of the

maximum load rating as stated on the tire sidewall. Compliance with FMVSS No. 110, S4.2.2, was calculated, by MMNA, based on the original curb weight (without the three-speed transmission) at the vehicle normal load.

MMNA does not believe that the foregoing noncompliance will adversely impact motor vehicle safety. MMNA argues that the tires exceed the FMVSS No. 109 high-speed performance requirements "even at loading conditions significantly above the maximum normal vehicle load."

Union Pacific Railroad Company (UP), pursuant to a written trackage rights agreement entered into between UP and The Burlington Northern and Santa Fe Railway Company (BNSF), has agreed to grant certain trackage rights to BNSF on UP's Corpus Christi Subdivision in and near San Antonio, TX, between milepost 3.14 and a point to be determined by mutual written agreement (existing trackage); on new trackage to be constructed by UP between UP's Corpus Christi Subdivision and a point on the western side of Leon Creek for the purpose of serving a new automotive manufacturing plant (Toyota Plant) and associated facilities for the benefit of Toyota Motor Sales, USA, Inc. (TMS), and TMS affiliated companies, as defined in the agreement, near San Antonio, Bexar County, TX (new trackage); and along certain properties needed by BNSF to construct certain connections, sidings and capacity improvements to the described Corpus Christi Subdivision (those properties, the existing trackage, and the new trackage are collectively referred to as joint trackage). The total distance over the existing trackage and the new trackage, depending on the final design and construction, will be approximately 5 to 10 miles. BNSF will operate its own trains with its own crews over UP's line under the trackage rights agreement.

The transaction was scheduled to be consummated on September 5, 2003, and operations will begin upon completion of the new trackage line.

The purpose of the trackage rights is to allow BNSF to provide competitive rail service to the Toyota Plant and other facilities described in the trackage rights agreement.

As a condition to this exemption, any employees affected by the trackage rights will be protected by the conditions imposed in *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).
