BILLING CODE 4710-45-P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

Supplemental Environmental Impact Statement (SEIS), Salt Lake and Davis Counties, UT

AGENCIES: Federal Highway Administration (FHWA), DOT. Army Corps of Engineers (USACE), DoD.

ACTION: Notice of intent.

SUMMARY: FHWA and USACE, as Federal joint lead agencies, are issuing this notice to inform the public and affected public agencies that an SEIS will be prepared in accordance with the National Environmental Policy Act of 1969 (NEPA) for Utah Department of Transportation's proposed construction of the Legacy Parkway project in Salt Lake and Davis Counties, Utah.

FHWA is a lead agency because it must approve the connection of the proposed project to Interstate 215 (I-215) and Interstate 15 (I-15); the USACE is a lead agency because it must issue a 404 permit pursuant to the Clean Water Act. The U.S. Environmental Protection Agency (EPA), U.S. Fish and Wildlife Service (USFWS) and Federal Transit Administration (FTA) have agreed to serve as "cooperating agencies" in the preparation and review of the SEIS.

FOR FURTHER INFORMATION CONTACT: Greg Punske, Environmental Program Manager, FHWA, 2520 West 4700 South, Suite 9A, Salt Lake City, Utah 84118 or Nancy Kang, Chief, Utah Office, USACE, 533 West 2600 South, Suite 150, Bountiful, Utah 84010. Written comments on the scope and content of the SEIS should be submitted to the above contacts by June 1, 2003.

SUPPLEMENTARY INFORMATION: The proposed action is the construction of the Legacy Parkway in the corridor from I-215 at 2100 North in Salt Lake City northward to I-15 and U.S. 89 near Farmington (approximately 14 miles). A multiple-use trail for pedestrians, bicyclists, and equestrians would parallel the highway. The proposed action is related to the three-part

"Shared Solution" to 2020 transportation problems, which includes: (1) Constructing the Legacy Parkway; (2) improving and expanding I-15; and (3) expanding the public transit system, including transit, intelligent transportation systems (ITS), travel demand management (TDM) and transportation systems management (TSM). Separate environmental studies pursuant to NEPA are being prepared for improving and expanding I-15 and expansion of the public transit system.

The SEIS will supplement the June 2000 Legacy Parkway Final EIS (FEIS) (FHWA-UT-EIS-98-02-F), which was the subject of litigation and a court decision in *Utahns for Better Transportation et al. v. U.S. Department of Transportation et al.* (305 F.3d 1152 (10th Cir. 2002)). In accordance with that decision, several specific aspects of the FEIS require further study. Additionally, the FEIS will be re-evaluated to determine if any other information should be updated and revised as part of the SEIS process in accordance with FHWA NEPA regulations 23 CFR 771.129.

FHWA and USACE have made a preliminary determination to consider the following alternatives in the SEIS based on the court ruling: (1) The Denver and Rio Grande railroad (D&RG) alignment, which involves locating a portion of the Legacy Parkway within the railroad regional alignment corridor defined in the FEIS; (2) a narrower right-of-way for the proposed alignment; (3) alternative sequencing of the Shared Solution; (4) concurrent integration of the construction of the Legacy Parkway with expansion of public transit and (5) the No Build alternative. The SEIS will also consider impacts to wildlife, as required by the court.

To ensure that a full range of issues related to the proposed action are addressed and all significant issues are identified, comments and suggestions are invited from all interested parties. Comments or questions concerning the proposed action and the SEIS should be directed to the FHWA and USACE at the addresses given above. Scoping will be accomplished through public and interagency scoping meetings, as well as correspondence and meetings with interested persons, organizations, and Federal, State, and local agencies. Informational displays and written material will also be available throughout the time periods given.

An initial scoping meeting will be held on April 17, 2003, at the Woods Cross High School, 600 West 2200 South in Woods Cross from 4 p.m. to 8 p.m. Public notice will be given of the time and place of additional meetings.

(Catalog of Federal and Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program)

Issued on: March 26, 2003.

Gregory S. Punske,

*Environmental Program Manager, FHWA,
Salt Lake City, Utah.*

Nancy Kang,

*Chief, Utah Office, USACE, Salt Lake City,
Utah.*

BILLING CODE 4910-22-M

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Federal Railroad Administration, DOT.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 and its implementing regulations, the Federal Railroad Administration (FRA) hereby announces that it is seeking renewal of the following currently approved information collection activities. Before submitting these information collection requirements for clearance by the Office of Management and Budget (OMB), FRA is soliciting public comment on specific aspects of the activities identified below.

DATES: Comments must be received no later than June 2, 2003.

ADDRESSES: Submit written comments on any or all of the following proposed activities by mail to either: Mr. Robert Brogan, Office of Safety, Planning and Evaluation Division, RRS-21, Federal Railroad Administration, 1120 Vermont Ave., NW., Mail Stop 17, Washington, DC 20590, or Ms. Debra Steward, Office of Information Technology and Productivity Improvement, RAD-20, Federal Railroad Administration, 1120 Vermont Ave., NW., Mail Stop 35, Washington, DC 20590. Commenters requesting FRA to acknowledge receipt of their respective comments must include a self-addressed stamped postcard stating, "Comments on OMB control number ____". Alternatively, comments may be transmitted via facsimile to (202) 493-6265 or (202) 493-6170, or E-mail to Mr. Brogan at robert.brogan@fra.dot.gov, or to Ms. Steward at debra.steward@fra.dot.gov. Please refer to the assigned OMB control number in any correspondence

submitted. FRA will summarize comments received in response to this notice in a subsequent notice and include them in its information collection submission to OMB for approval.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Brogan, Office of Planning and Evaluation Division, RRS-21, Federal Railroad Administration, 1120 Vermont Ave., NW., Mail Stop 17, Washington, DC 20590 (telephone: (202) 493-6292) or Debra Steward, Office of Information Technology and Productivity Improvement, RAD-20, Federal Railroad Administration, 1120 Vermont Ave., NW., Mail Stop 35, Washington, DC 20590 (telephone: (202) 493-6139). (These telephone numbers are not toll-free.)

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act of 1995 (PRA), Pub. L. No. 104-13, § 2, 109 Stat. 163 (1995) (codified as revised at 44 U.S.C. 3501-3520), and its implementing regulations, 5 CFR part 1320, require Federal agencies to provide 60-days notice to the public for comment on information collection activities before seeking approval for reinstatement or renewal by OMB. 44 U.S.C. 3506(c)(2)(A); 5 CFR 1320.8(d)(1), 1320.10(e)(1), 1320.12(a). Specifically, FRA invites interested respondents to comment on the following summary of proposed information collection activities regarding (i) whether the information collection activities are necessary for FRA to properly execute its functions, including whether the activities will have practical utility; (ii) the accuracy of FRA's estimates of the burden of the information collection activities, including the validity of the methodology and assumptions used to

determine the estimates; (iii) ways for FRA to enhance the quality, utility, and clarity of the information being collected; and (iv) ways for FRA to minimize the burden of information collection activities on the public by automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (e.g., permitting electronic submission of responses). See 44 U.S.C. 3506(c)(2)(A)(i)-(iv); 5 CFR 1320.8(d)(1)(i)-(iv). FRA believes that soliciting public comment will promote its efforts to reduce the administrative and paperwork burdens associated with the collection of information mandated by Federal regulations. In summary, FRA reasons that comments received will advance three objectives: (i) Reduce reporting burdens; (ii) ensure that it organizes information collection requirements in a "user friendly" format to improve the use of such information; and (iii) accurately assess the resources expended to retrieve and produce information requested. See 44 U.S.C. 3501.

Below are brief summaries of eight currently approved information collection activities that FRA will submit for clearance by OMB as required under the PRA:

Title: Filing of Dedicated Cars.

OMB Control Number: 2130-0502.

Abstract: Title 49, Part 215 of the Code of Federal Regulations, prescribes certain conditions to be followed for the movement of freight cars that are not in compliance with this Part. These cars must be identified in a written report to FRA before they are assigned to dedicated service, and the words "Dedicated Service" must be stenciled on each side of the freight car body.

FRA uses the information to determine whether the equipment is safe to operate and that the operation qualifies for dedicated service. See 49 CFR 215.5 (c) (2), 215.5 (d).

Form Number(s): N/A.

Affected Public: Businesses.

Respondent Universe: 685 railroads.

Frequency of Submission: On occasion.

Total Responses: 6.

Estimated Annual Burden: 6 hours.

Status: Regular Review.

Title: Remotely Controlled Railroad Switch Operations.

OMB Control Number: 2130-0516.

Abstract: Title 49, Section 218.30 of the Code of Federal Regulations (CFR), ensures that remotely controlled switches are lined to protect workers who are vulnerable to being struck by moving cars as they inspect or service equipment on a particular track or, alternatively, occupy camp cars. FRA believes that production of notification requests promotes safety by minimizing mental lapses of workers who are simultaneously handling several tasks. Sections 218.30 and 218.67 require the operator of remotely controlled switches to maintain a record of each notification requesting blue signal protection for fifteen days. Operators of remotely controlled switches use the information as a record documenting blue signal protection of workers or camp cars. This record also serves as a valuable resource for railroad supervisors and FRA inspectors monitoring regulatory compliance.

Form Number(s): N/A.

Affected Public: Businesses.

Frequency of Submission: On occasion.

Reporting Burden:

CFR section	Respondent universe (railroads)	Total annual responses	Average time per response (minutes)	Total annual burden hours (hours)	Total annual burden cost
Blue Signal Protection	70	8,942,500 records	2	298,083	\$9,240,573
Camp Cars	7	4,000 notifications	4	267	8,277

Total Estimated Annual Burden: 298,350 hours.

Status: Regular Review.

Title: Bad Order and Home Shop Card.

OMB Control Number: 2130-0519.

Abstract: Under 49 CFR part 215, each railroad is required to inspect freight cars placed in service and take the necessary remedial action when defects are identified. Part 215 defects are specific in nature and relate to items that have or could have caused accidents or incidents. Section 215.9

sets forth specific procedures that railroads must follow when it is necessary to move defective cars for repair purposes. For example, railroads must affix a "bad order" tag describing each defect to each side of the freight car. It is imperative that a defective freight car be tagged "bad order" so that it may be readily identified and moved to another location for repair purposes only. At the repair point, the "bad order" tag serves as a repair record. Railroads must retain each tag for 90 days to verify that proper repairs were

made at the designated location. FRA and State inspectors review all pertinent records to determine whether defective cars presenting an immediate hazard are being moved in transportation.

Form Number(s): N/A.

Affected Public: Businesses.

Frequency of Submission: On occasion.

Respondent Universe: 685 railroads.

Total Responses: 165,000 tags/notifications/records.

Average Time Per Response: 4.636 minutes.

Estimated Total Annual Burden: 12,750 hours.
Status: Regular Review.
Title: Stenciling Reporting Mark on Freight Cars.
OMB Control Number: 2130-0520.
Abstract: Title 49, section 215.301 of the Code of Federal Regulations, sets forth certain requirements that must be followed by railroad carriers and private car owners relative to identification marks on railroad equipment. FRA, railroads, and the public refer to the stenciling to identify freight cars.
Form Number(s): N/A.
Affected Public: Businesses.
Frequency of Submission: On occasion.
Respondent Universe: 685 railroads.
Total Responses: 20,000 cars stencilled.
Average Time Per Response: 45 minutes.
Estimated Total Annual Burden: 15,000 hours.

Status: Regular Review.
Title: Disqualification Proceedings.
OMB Control Number: 2130-0529.
Abstract: Under 49 U.S.C. 20111(c), FRA is authorized to issue orders disqualifying railroad employees, including supervisors, managers, and other agents, from performing safety-sensitive service in the rail industry for violations of safety rules, regulations, standards, orders, or laws evidencing unfitness. FRA's regulations, 49 CFR part 209, subpart D, implement the statutory provision by requiring (i) a railroad employing or formerly employing a disqualified individual to disclose the terms and conditions of a disqualification order to the individual's new or prospective employing railroad; (ii) a railroad considering employing an individual in a safety-sensitive position to ask the individual's previous employing railroad whether the individual is currently serving under a disqualification order; and (iii) a

disqualified individual to inform his new or prospective employer of the disqualification order and provide a copy of the same. Additionally, the regulations prohibit a railroad from employing a person serving under a disqualification order to work in a safety-sensitive position. This information serves to inform a railroad whether an employee or prospective employee is currently disqualified from performing safety-sensitive service based on the issuance of a disqualification order by FRA. Furthermore, it prevents an individual currently serving under a disqualification order from retaining and obtaining employment in a safety-sensitive position in the rail industry.
Form Number(s): N/A.
Affected Public: Businesses.
Frequency of Submission: On occasion/recordkeeping.
Reporting Burden:

CFR section	Respondent universe	Total annual responses	Average time per response	Total annual burden hours	Total annual burden cost
Respondent reply to disqualification order.	40,000 locomotive engineers.	1 doc. reply	3 hours	3 hours	\$135
Informal reply to proposed disqualification order.	40,000 locomotive engineers.	1 informal response.	1 hour	1 hour	45
Provide copy of disqualification order to prospective employer.	685 railroads	1 notification	30 minutes5 hour	23
Request copy of disqualification order from previous employer.	685 railroads	Usual and customary procedure.	N/A	N/A	N/A

Total Estimated Burden: 5 hours.
Status: Regular Review.
Title: Grade Crossing Signal System Safety Regulations.
OMB Control Number: 2130-0534.
Abstract: FRA believes that highway-rail grade crossing (grade crossing) accidents resulting from warning system failures can be reduced. Motorists lose faith in warning systems that constantly warn of an oncoming train when none is present. Therefore, the fail-safe feature of a warning system loses its effectiveness if the system is not repaired within a reasonable period of time. A greater risk of an accident is

present when a warning system fails to activate as a train approaches a grade crossing. FRA's regulations require railroads to take specific responses in the event of an activation failure. FRA uses the information to develop better solutions to the problems of grade crossing device malfunctions. With this information, FRA is able to correlate accident data and equipment malfunctions with the types of circuits and age of equipment. FRA can then identify the causes of grade crossing system failures and investigate them to determine whether periodic

maintenance, inspection, and testing standards are effective. FRA also uses the information collected to alert railroad employees and appropriate highway traffic authorities of warning system malfunctions so that they can take the necessary measures to protect motorists and railroad workers at the grade crossing until repairs have been made.
Form Number(s): FRA F 6180.83.
Affected Public: Businesses.
Frequency of Submission: On occasion; recordkeeping.
Reporting Burden:

CFR section	Respondent universe (railroads)	Total annual responses	Average time per response (minutes)	Total annual burden hours (hours)	Total annual burden cost

Total Estimated Burden: 4,151.
Status: Regular Review.
Title: New Locomotive Certification (Noise Compliance Regulations).
OMB Control Number: 2130-0527.
Abstract: Part 210 of Title 49 of the United States Code of Federal Regulations (CFR) pertains to FRA's noise enforcement procedures which encompass rail yard noise source standards published by the Environmental Protection Agency (EPA). EPA has the authority to set these standards under the Noise Control Act of 1972. The information collected by FRA under Part 210 is necessary to ensure compliance with EPA noise standards for new locomotives.
Form Number(s): N/A.
Affected Public: Businesses.
Frequency of Submission: On occasion.

Respondent Universe: 2 Locomotive Manufacturers.
Total Responses: 2,040 requests/badges/measurements.
Average Time Per Response: 1.725 hours.

Estimated Total Annual Burden: 3,520 hours.

Status: Regular Review.
Title: Railroad Signal System Requirements.

OMB Control Number: 2130-0006.
Abstract: The regulations pertaining to railroad signal systems are contained in 49 CFR parts 233 (Signal System Reporting Requirements), 235 (Instructions Governing Applications For Approval of a Discontinuance or Material Modification of a Signal System), and 236 (Rules, Standards, and Instructions Governing the Installation, Inspection, Maintenance, and Repair of Systems, Devices, and Appliances). Section 233.5 provides that each railroad must report to FRA within 24 hours after learning of an accident or incident arising from the failure of a signal appliance, device, method, or system to function or indicate as required by part 236 of this title that results in a more favorable aspect than intended or other condition hazardous to the movement of a train. Section 233.7 sets forth the specific requirements for reporting signal

failures within 15 days in accordance with the instructions printed on Form FRA F 6180.14. Finally, Section 233.9 sets forth the specific requirements for the "Signal System Five Year Report." It requires that every five years each railroad must file a signal system status report. The report is to be prepared on a form issued by FRA in accordance with the instructions and definitions provided. Title 49, Part 235 of the Code of Federal Regulations, sets forth the specific conditions under which FRA approval of modification or discontinuance of railroad signal systems is required and prescribes the methods available to seek such approval. The application process prescribed under Part 235 provides a vehicle enabling FRA to obtain the necessary information to make logical and informed decisions concerning carrier requests to modify or discontinue signaling systems. Section 235.5 requires railroads to apply for FRA approval to discontinue or materially modify railroad signaling systems. Section 235.7 defines material modifications and identifies those changes that do not require agency approval. Section 235.8 provides that any railroad may petition FRA to seek relief from the requirements under 49 CFR part 236. Sections 235.10, 235.12, and 235.13 describe where the petition must be submitted, what information must be included, the organizational format, and the official authorized to sign the application. Section 235.20 sets forth the process for protesting the granting of a carrier application for signal changes or relief from the rules, standards, and instructions. This section provides the information that must be included in the protest, the address for filing the protest, the item limit for filing the protest, and the requirement that a person requesting a public hearing explain the need for such a forum. Section 236.110 requires that the test results of certain signaling apparatus be recorded and specifically identify the tests required under sections 236.102-109; sections 236.377 to 236.387; sections 236.576, 236.577; and section 236.586-236.589. Section

236.110 further provides that the test results must be recorded on preprinted or computerized forms provided by the carrier and that the forms show the name of the railroad; place and date of the test conducted; equipment tested; tests results; repairs; and the condition of the apparatus. This section also requires that the employee conducting the test must sign the form and that the record be retained at the office of the supervisory official having the proper authority. Results of tests made in compliance with section 236.587 must be retained for 92 days, and results of all other tests must be retained until the next record is filed, but in no case less than one year. Additionally, section 236.587 requires each railroad to make a departure test of cab signal, train stop, or train control devices on locomotives before that locomotive enters the equipped territory. This section further requires that whoever performs the test must certify in writing that the test was properly performed. The certification and test results must be posted in the locomotive cab with a copy of the certification and test results retained at the office of the supervisory official having the proper authority. However, if it is impractical to leave a copy of the certification and test results at the location of the test, the test results must be transmitted to either the dispatcher or one other designated official, who must keep a written record of the test results and the name of the person performing the test. All records prepared under this section are required to be retained for 92 days. Finally, section 236.590 requires the carrier to clean and inspect the pneumatic apparatus of automatic train stop, train control, or cab signal devices on locomotives every 736 days, and to stencil, tag, or otherwise mark the pneumatic apparatus indicating the last cleaning date.

Form Number(s): FRA F 6180.14; FRA F 6180.47.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

Reports, Forms, and Record Keeping Requirements; Agency Information Collection Activity Under OMB Review

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collections and their expected burden. The **Federal Register** document with a 60-day comment period was published on October 30, 2002 [67 FR 66193].

DATES: Comments must be received on or before May 1, 2003.

FOR FURTHER INFORMATION CONTACT: Rosalind Proctor at the National Highway Traffic Safety Administration, (NVS–131), 400 Seventh Street, SW., Room 5320, Washington, DC 20590. Ms. Proctor’s telephone number is (202) 366–0846. Her facsimile number is (202) 493–2290.

SUPPLEMENTARY INFORMATION:

National Highway Traffic Safety Administration

Title: 49 CFR part 575; Consumer Information Regulations (Sections 103 and 105).

OMB Control Number: 2127–0049.

Type of Request: Extension of a currently approved information collection.

Abstract: NHTSA must ensure that motor vehicle manufacturers comply with 49 CFR part 575, Consumer Information Regulation part 575.103 Truck-camper loading and part 575.105 Utility Vehicles. Part 575.103 requires that manufacturers of light trucks that are capable of accommodating slide-in campers provide information on the cargo weight rating and the longitudinal limits within which the center of gravity for the cargo weight rating should be located. Part 575.105 requires manufacturers of utility vehicles affix a sticker in a prominent location alerting drivers that the particular handling and maneuvering characteristics of utility vehicles require special driving practices when these vehicles are operated.

Affected Public: Motor vehicle manufacturers of light trucks and utility vehicles.

Estimated Total Annual Burden: 300 hours.

ADDRESSES: Send comments, within 30 days, to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street, NW., Washington, DC 20503, Attention: NHTSA Desk Officer.

Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department’s estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

A comment to OMB is most effective if OMB receives it within 30 days of publication.

Issued on: March 27, 2003.

Stephen R. Kratzke,

Associate Administrator for Rulemaking.

[FR Doc. 03–7808 Filed 3–31–03; 8:45 am]

BILLING CODE 4910–59–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2003–14628]

Extension of Comment Period on Whether Nonconforming 1996 and 1997 Lamborghini Diablo Passenger Cars Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Extension of comment period.

SUMMARY: On March 12, 2003, NHTSA published notice (at 68 FR 11898) that it had received a petition to decide that nonconforming 1996 and 1997 Lamborghini Diablo passenger cars are eligible for importation into the United States. The notice solicited public comments on the petition and stated that the closing date for comments is April 11, 2003.

This is to notify the public that NHTSA is extending the comment period until May 30, 2003. This extension is based on a request from Automobili Lamborghini S.p.A. (“Lamborghini”). In requesting the extension, Lamborghini noted that its available resources for responding to the petition are “seriously constrained.” In particular, Lamborghini stated that it has only two employees who would be able to conduct the necessary research to prepare the response and those employees will be on travel in the United States for three to four weeks beginning March 18, 2003 to prepare the company’s emission certification on a vehicle to be introduced in the 2004 model year.

DATES: Comments on the import eligibility petition must be submitted on or before May 30, 2003.

ADDRESSES: Comments are to be submitted to: Docket Management, Room PL–401, 400 Seventh St., SW., Washington, DC 20590 (Docket hours are from 9 am to 5 pm). Anyone is able to search the electronic form of all
