

Mobile Computing Devices for Field Work—Methods for implementing an MCD system during the Nonresponse Followup (NRFU) operation. We are developing an MCD system that incorporates Spanish and English language capabilities, that can receive workload information and transmit census data, and that includes maps. We plan to assess the impact of the system on field infrastructure and data processing.

Coverage Improvement—New methods for improving coverage, including procedures to address overall coverage of the Nation's population and housing and procedures to address duplication issues. The 2004 Census Test Questionnaire will include two new questions (numbers 2 and 10) designed to ensure that each individual is counted once and only once and in the right place, revised residence rule instructions to help respondents understand who to include on census forms, and space to add information for four characteristics for persons seven through twelve (age, sex, date of birth, and relationship).

Changes to Questionnaire Content—Collect data on respondent reaction to the revised race and Hispanic Origin questions, including the removal of the "Some Other Race" ("SOR") option and the inclusion of examples for both questions. In addition, we are planning to record and behavior-code some of the NRFU interviews in order to gain additional insight into respondent reaction to the race and Hispanic Origin questions.

Methods to Identify Special Places/ Group Quarters—As part of its research and development work for the 2010 census, the 2004 Census Test also will test improved definitions and methods for distinguishing between group quarters and housing units during census operations, in order to update the MAF in a comprehensive, integrated manner. The Group Quarters Validation (GQV) operation is covered by a separate OMB submission.

The 2004 Census Test, which is part of an extended test cycle leading up to the next decennial census, will be conducted in two sites—Northwest Queens Borough, NY, and three rural counties in Southwest Georgia (Colquitt, Tift, and Thomas). The test will use two modes for data collection (paper and MCD). Approximately 175,000 housing units in the test sites will receive a census questionnaire by mail (mailout/mailback universe, *i.e.* housing units that have city-style addresses such as 806 Main Street). Additionally, enumerators will deliver a questionnaire to approximately 25,000 housing units

that have non city-style addresses such as Rt. 7, Box 433 (update/leave universe). All respondents (those living in both the mailout/mailback and update/leave areas) will be asked to complete the forms and mail them back using the postage-paid envelopes provided.

Prior to the beginning of NRFU, a second questionnaire will be sent to each housing unit in the mailout/mailback universe in both sites that has not already returned the initial questionnaire. During the NRFU portion of the test, enumerators equipped with MCDs will visit and/or call non-respondents and attempt to collect the information.

The 2004 Census Test will include an array of data collection, data capture, and data processing operations along with the associated support activities necessary for obtaining the data required for evaluation. Although we will conduct a quality assurance operation during NRFU, we will not conduct the re-interview portion of the Race and Hispanic Origin Retinterview due to its operational complexity and resource requirements. We will conduct a short re-interview for quality-control purposes with approximately 5,800 households in the NRFU universe to verify that a NRFU enumerator visited the address and collected the appropriate address and household information.

Enumerator Taping Assistants (ETAs) also will tape and behavior-code an area sample of NRFU interviews (Northwest Queens Site, only) as enumerators are conducting the interviews. Data collected as a result of these interviews will be used in conjunction with missing data rates, NRFU response distributions, and the 2003 National Census Test results to evaluate respondent reactions to the new race and Hispanic Origin questions.

Affected Public: Individuals or households.

Frequency: One-time.

Respondent's Obligation: Mandatory.

Legal Authority: Title 13 U.S.C., Sections 141 and 193.

OMB Desk Officer: Susan Schechter, (202) 395-5103.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek, Departmental Paperwork Clearance Officer, (202) 482-0266, Department of Commerce, room 6625, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at dhynek@doc.gov).

Written comments and recommendations for the proposed information collection should be sent

within 30 days of publication of this notice to Susan Schechter, OMB Desk Officer either by fax (202) 395-7245 or e-mail (susan_schechter@omb.eop.gov).

Dated: October 8, 2003.

Madeleine Clayton,

Management Analyst, Office of the Chief Information Officer.

Mechanical Transfer Presses from Japan: Extension of Time Limit for Preliminary Results of Antidumping Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce

SUMMARY: The Department of Commerce is extending the time limit for the preliminary results of the administrative review of mechanical transfer presses (MTPs) from Japan until no later than February 28, 2004. The period of review is February 1, 2002 through January 31, 2003. This extension is made pursuant to section 751(a)(3)(A) of the Tariff Act of 1930, as amended (the Act).

EFFECTIVE DATE: October 15, 2003.

FOR FURTHER INFORMATION CONTACT: Jacqueline Arrowsmith, Office of AD/CVD Enforcement VII, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington DC 20230; telephone: (202) 482-5255.

SUPPLEMENTARY INFORMATION:

Background

On February 16, 1990, the Department issued an antidumping duty order on mechanical transfer presses from Japan. *See Antidumping Duty Order: Mechanical Transfer Presses from Japan*, 55 FR 5642 (February 16, 1990). The term "mechanical transfer presses" refers to automatic metal-forming machine tools with multiple die stations in which the work piece is moved from station to station by a transfer mechanism designed as an integral part of the press and synchronized with the press action, whether imported as machines or parts suitable for use solely or principally with these machines. These presses may be imported assembled or unassembled. *See Mechanical Transfer Presses from Japan: Final Results of Antidumping Administrative Review* 68 FR 39515.

On February 24, 2003, the Department of Commerce (the Department) received a timely request for administrative review of the antidumping duty order on MTPs from Japan from respondent Hitachi Zosen Corporation (HZC), and its subsidiary Hitachi Zosen Fukui Corporation d/b/a H&F Corporation (H&F). On February 27, 2003, the Department received a timely request from the petitioner, IHI-Verson Press Technology, LLC, for an administrative review of HZC and H&F. On February 28, 2003, HZC and H&F submitted a request that the Department revoke the order with respect to HZC and H&F based on the absence of dumping in three consecutive reviews. On March 25, 2003, the Department published a notice of initiation of this administrative review, covering the period of February 1, 2002 through January 31, 2003 (*see* 68 FR 14394), for HZC and its subsidiary H&F. The preliminary results for HZC/H&F are currently due no later than October 31, 2003.

Extension of Time Limits for Preliminary Results

As a result of the fact that mechanical transfer presses are unique to each customer because they are designed to detailed specifications, there are complex issues with respect to normal value. In addition, HZC/H&F has requested revocation with respect to the order. Given these facts, it is not practicable to complete this review within the time limits mandated by section 751(a)(3)(A) of the Act. The Department is therefore extending the time period for issuing the preliminary results of this review by 120 days, from October 31, 2003, until no later than February 28, 2004, in accordance with section 751(a)(3)(A) of the Act. The final results continue to be due 120 days after the publication of the preliminary results. This notice is published pursuant to sections 751(a)(3)(A) and 777(I)(1) of the Act.

Dated: October 7, 2003.

Richard O. Weible,

Acting Deputy Assistant Secretary for Import Administration, Group III.

Certain Polyester Staple Fiber from Korea: Final Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Final Results of 2001-2002 Administrative Review.

SUMMARY: On June 9, 2003, the Department of Commerce published the preliminary results of the administrative review of the antidumping duty order on certain polyester staple fiber from Korea. The period of review is May 1, 2001, through April 30, 2002. We gave interested parties an opportunity to comment on the preliminary results. Based on our analysis of the comments received and an examination of our calculations, we have made certain changes for the final results. The final weighted-average dumping margins for the two manufacturer/exporters are listed below in the "Final Results of the Review" section of this notice.

EFFECTIVE DATE: October 15, 2003.

FOR FURTHER INFORMATION CONTACT: Andrew McAllister or Judith Rudman, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone: (202) 482-1174, or (202) 482-0192, respectively.

SUPPLEMENTARY INFORMATION:

Background

Since the publication of the preliminary results in this review (*see Certain Polyester Staple Fiber from Korea; Preliminary Results of Antidumping Duty Administrative Review and Partial Rescission of Review*, 68 FR 34378 (June 9, 2003) ("Preliminary Results")), the following events have occurred:

The Department reported its findings from Huvis Corporation's ("Huvis") cost verification on July 2, 2003. *See* Memorandum from Robert Greger and Mark Todd to Neal Halper, Director, Office of Accounting, "Verification Report on the Cost of Production and Constructed Value Data Submitted by Huvis Corporation," dated July 2, 2003 ("Huvis Cost Verification Report"), which is on file in the Department's Central Records Unit ("CRU") in room B-099 of the main Department building.

We invited parties to comment on the preliminary results of the review. On

July 22, 2003, E.I. DuPont de Nemours, Inc., Arteva Specialties S.a.r.l., d/b/a KoSa, Wellman, Inc., and Intercontinental Polymers, Inc. (collectively "the petitioners"), and the respondents East Young Co., Ltd. ("East Young"/Stein Fibers, Ltd. ("Stein Fibers")) and Huvis filed case briefs. On July 28, 2003, the above-mentioned parties, with the exception of East Young/Stein Fibers, filed rebuttal briefs.

Scope of the Order

For the purposes of this order, the product covered is certain polyester staple fiber ("PSF"). PSF is defined as synthetic staple fibers, not carded, combed or otherwise processed for spinning, of polyesters measuring 3.3 decitex (3 denier, inclusive) or more in diameter. This merchandise is cut to lengths varying from one inch (25 mm) to five inches (127 mm). The merchandise subject to this order may be coated, usually with a silicon or other finish, or not coated. PSF is generally used as stuffing in sleeping bags, mattresses, ski jackets, comforters, cushions, pillows, and furniture. Merchandise of less than 3.3 decitex (less than 3 denier) currently classifiable under the *Harmonized Tariff Schedule of the United States* ("HTSUS") at subheading 5503.20.00.20 is specifically excluded from this order. Also specifically excluded from this order are polyester staple fibers of 10 to 18 denier that are cut to lengths of 6 to 8 inches (fibers used in the manufacture of carpeting). In addition, low-melt PSF is excluded from this order. Low-melt PSF is defined as a bi-component fiber with an outer sheath that melts at a significantly lower temperature than its inner core.

The merchandise subject to this order is currently classifiable in the HTSUS at subheadings 5503.20.00.45 and 5503.20.00.65. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the merchandise under order is dispositive.

Period of Review

The period of review ("POR") is May 1, 2001, through April 30, 2002.

Verification

As stated in the *Preliminary Results* and provided in section 782(i) of the Tariff Act of 1930, as amended ("the Act"), we verified information provided by East Young and Huvis using standard verification procedures, including on-site inspection of the manufacturers' facilities, examination of relevant sales, cost and financial records, and selection
