EXECUTIVE SUMMARY
REPORT ON OREGON HEALTH PLAN (OHP)
UTILIZATION AND ENROLLMENT FOR
ADDICTION TREATMENT SERVICES:
OCTOBER 1, 2007 THROUGH DECEMBER 31, 2007

Introduction

The purpose of this document is to provide Department of Human Services (DHS), Managed Care Organizations (MCO) and stakeholders with information about alcohol and drug treatment services Oregon Health Plan (OHP) members receive through the managed care and fee-for-service delivery systems.

This report covers October 1, 2007 through December 31, 2007. The data was pulled from cleansed paid claims available in the Decision Support/ Surveillance and Utilization Review System (DSSURS) as of July 1, 2008.

Population

- Enrollment information reflects Medicaid eligible individuals enrolled in managed care plans and those who receive care through fee-for-service delivery systems.
- Over a three month period an individual may be in one or more eligibility category or MCOs. An individual may be counted more than once due to changes in managed care enrollment or fee-for-service delivery.
- Utilization data reflects Medicaid eligible individuals use of services treating chemical dependency disorders. Data reflects individuals serviced through managed care plans and fee-for-service delivery systems.

Take Home Points

- Chemical dependency service utilization among enrollees, for the Medicaid population age group 12 and older remains very low (see Table 2b), utilization ranges from a high of 4 percent to a low of 0.6 percent.
- Service utilization among adults (age 18+) is mostly in the 3 percent range, while utilization among adolescents (age 12-17) is generally in the 1 percent range (see Table 3).
- According to 2006 data from the national survey on drug use and health 10 percent of Oregon's general population is in need of drug and/or alcohol treatment. This suggests that the current service utilization among OHP members is very low.

EXECUTIVE SUMMARY

CONTINUED

- Among adolescents, services are most commonly for abuse and/or dependence related to cannabis (more than half) and alcohol (close to one third).
- Among adults, services are most commonly for abuse and/or dependence related to alcohol, amphetamines and opioids. The availability of synthetic opioid replacement treatment programs in the coverage area increases the prevalence of opioid abuse/dependence in the various plans' treatment populations.
- Among adults and adolescents the most common services are assessments, group therapy and individual therapy. Other forms of service vary greatly among plans, indicating either some specialization among the plans or their service population.

Limitations

- This report does not include tests of the statistical significance of apparent differences between providers or across time lines.
- The report is a snap-shot in time for the specific report being created.
- According to administrative rule, MCOs may submit encounters to DMAP 180 days after receipt of claims from service providers. Fee-for-service encounters may be submitted to DMAP for payment up to one year after service was provided.

Report Schedule

- This is the initial report and from now on will be created on a quarterly basis.
- The purpose of this document is to provide DHS divisions, managed care plans and stakeholders with information about alcohol and drug treatment services OHP individuals receive through managed care and fee-for-service delivery systems.

TABLE OF CONTENTS

The format and contents are constructed as follows:

- Tables are used to summarize quarterly data at the Prepaid Health Plan (PHP) level. Some tables include fee-for-service (FFS) and all eligibles.

ENROLLMENT DATA

- ❖ Enrolled: Eligible for OHP and enrolled in an FCHP or CDO
- ❖ Eligibles: Total of Enrolled and FFS
- ❖ Fee-For-Service (FFS): Eligible for OHP and NOT enrolled with an FCHP/CDO (Open Card)

Table 1: MANAGED CARE ENROLLMENT AND FEE-FOR-SERVICES INDIVIDUALS

Medicaid eligible individuals can receive chemical dependency services through several eligibility types: fee-for-service; fully capitated health plans (FCHP); and chemical dependency organizations (CDO). Over a three month period an individual may be in one or more eligibility types or FCHPs. An individual may be counted more than once due to changes in the individual’s enrollment.

N=Number of clients who received service type.

Utilization may include those who received services but were retroactively disenrolled after services were provided.

Glossaries

CD UTILIZATION REPORT GLOSSARY

ADDICTIONS AND MENTAL HEALTH DIVISION (AMH):

The division of DHS responsible for the administration of addiction and mental health services for the State of Oregon.

ELIGIBLE:

An individual eligible for services under the OHP, but may not be enrolled into an FCHP or CDO. Includes enrolled and fee-for-service.

ENCOUNTER:

An outpatient contact or covered services provided to an OHP member.

ENROLLED (ENROLLEE):

Eligible for the Oregon Health Plan (OHP) and enrolled in an FCHP or CDO.

FEE-FOR-SERVICE (FFS):

Individuals who are eligible for the OHP, but are not enrolled with an PHP. This is also known as fee-for-service (FFS) or an “open card”.

OREGON HEALTH PLAN (OHP):

Oregon’s health care reform effort consisting of a Medicaid Demonstration Project, State Children’s Health Insurance Program, an individual insurance program for persons excluded from health insurance coverage due to pre-existing health conditions, and a group insurance program for small businesses. One objective of this reform effort includes universal coverage for Oregonians. In the context of this report, OHP refers to individuals on the PHP/FFS Utilization Report Glossary.

PERCENT ENROLLEES SERVED:

This is a general measure of access, but more related to utilization of services. It is a percentage calculated by summing the unique enrollees seen during a given time period and dividing that number by the total enrollees for that time period. For example, if there is 10,000 enrollees statewide in a given month and during that same month 500 of those enrollees receive services, the percent of enrollees served is 5 percent.

UNIQUE SERVED:

Unduplicated number of individuals receiving alcohol and drug treatment services.

UNIQUE ENCOUNTERS:

Unduplicated services received by an individual(s) within a specific time period. One individual may have had several services provided – each service would be part of the calculations.

**SERVICE CATEGORY GLOSSARY
WITH SPECIFIC PROCEDURE CODES USED IN THE DATA SET**

Acupuncture:

97810, 97811, 97812, 97813, 97814

Alcohol/Drug case management:

H0006 (Managed Care, encounter only), 90882, H0033, H2010, 90862, H0034

Alcohol and or other drug testing: collection and handling only, specimens other than blood, urine analysis:

H0048 HF

Behavioral screening:

H0002

Chemical dependency assessment:

H0001, H0031, 90801, 90802, 96101, H0049, H0050, 99408, 99409, G0396, G0397

Consultation:

90887 HF, 99051, 99060, 99201, 99202, 99203, 99204, 99205, 99206, 99207, 99208, 99209, 99210, 99211, 99212, 99213, 99214, 99215, 99216, 99217, 99218, 99219, 99220, 99221, 99222, 99223, 99231, 99232, 99233, 99234, 99235, 99236, 99238, 99239, 99241, 99242, 99243, 9244, 99245, 99251, 99252, 99253, 99254, 99255

Family therapy:

T1006, 90849, 90846, 90847, 90848, 90853, 90857

Group therapy:

H0005

Individual therapy:

H0004, 90806, 90806, 90807, 90808, 90809, 90810, 90811, 90812, 90813, 90814, 90815, 90816, 90817, 90818, 90819, 90820, 90821, 90822, 90823, 90824, 90825, 90826, 90827, 90828, 90829, 90857

Methadone dosing/dispensing:

H0020, H0016, T1502
