

The modification extends the expiration date of the Permit from December 31, 2003, to December 31, 2004, for takes of green (*Chelonia mydas*), loggerhead (*Caretta caretta*), olive ridley (*Lepidochelys olivacea*), leatherback (*Dermochelys coriacea*), hawksbill (*Eretmochelys imbricata*) and Kemp's ridley (*Lepidochelys kempii*) sea turtles. The permit allows the SEFSC to conduct sea turtle bycatch reduction research in the pelagic longline fishery of the western north Atlantic Ocean. The purpose of the research is to develop and test methods to reduce bycatch that occurs incidental to commercial, pelagic longline fishing.

Issuance of this amendment, as required by the ESA was based on a finding that such permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of the threatened and endangered species which are the subject of this permit; and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.
