SUPPLEMENTARY INFORMATION:

Proposed Project

"Medical Expenditure Panel Survey—Medical Provider Component (MEPS-MPC) for 2003".

The MEPS-MPC is a survey of hospitals, physicians and other medical providers. The purpose of this survey is to supplement and verify the information provided by respondent households participating in the household component of the MEPS (MEPS-HC) about their use of medical services in the United States.

With the permission of members of the households surveyed in the MEPS-HC, AHRQ contractor will contact the medical providers of the HC survey respondents to determine the actual dates of service, the diagnoses, the services provided, the amount that was charged, the amount that was paid and the sources of payment. Thus, the MPC is derived from or is based upon the core survey, MEPS-HC, and will

improve the quality of the core survey data.

The Medical Expenditure Panel Survey Household Component (MEPS-HC) conducted in 2003, will provide annual estimates, based upon a national representative sample, of health care use, expenditures, sources of payment and insurance coverage, for the U.S. civilian non-institutionalized population for 2003. Data from medical providers linked to household respondents in the MEPS Household component for calendar year 2003, will be collected beginning 2004 and continuing into the year 2005. MEPS is co-sponsored by the Agency for Healthcare Research and Quality (AHRQ) and the National Center for Health Statistics (NCHS).

Data Confidentiality Provisions

MEPS data confidentiality is protected under the AHRQ and NCHS Confidentiality statutes, section 308(d) and section 924(c) of the Public Health Service Act (42 U.S.C. 242m(d) and 42 U.S.C. 299c-3(c), respectively).

Methods of Collection

The Medical Provider Survey will be conducted predominantly by telephone, but may include self-administered mail surveys, if requested by the respondent. The MPC for Calendar year 2003 estimated annual burden is as follows:
