

submission requirements set forth in this decision supersede, for the purposes of this proceeding, the otherwise applicable electronic submission requirements set forth in the Board's regulations. See 49 CFR 1104.3(b).

Electronic Submissions: Workpapers, Data Bases, and Spreadsheets

In the past, the Board has encountered problems with the "links" in spreadsheets functioning properly when the spreadsheets are installed on desktop computers or network servers. To avoid such problems, parties submitting electronic workpapers, data bases, and/or spreadsheets should use naming and linking conventions that will permit the spreadsheets to operate on the Board's computers.⁶ Electronic data bases should be compatible with the Microsoft Open Database Connectivity (ODBC) standard.⁷ The Board currently uses Microsoft Access 2000, and data bases submitted should be either in this format or another ODBC-compatible format. Otherwise, submitters should explain why it is not possible to submit the data base in this format and seek a determination as to whether it is feasible for the Board to accept the data base in another format.

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

It is ordered:

1. The primary application in STB Finance Docket No. 34424 and the related filings in STB Finance Docket No. 34424 (Sub-Nos. 1 and 2) are accepted for consideration.

2. The parties to this proceeding must comply with the Procedural Schedule adopted by the Board in this proceeding as shown in Appendix A.

3. The parties to this proceeding must comply with the procedural requirements described in this decision.

4. This decision is effective on December 5, 2003.

Decided: November 25, 2003.

⁶ The Board will not specify a particular naming and linking convention. It is incumbent upon the submitter to use generic naming and linking conventions that will permit the spreadsheets to operate on desktop computers or from a network server. Questions concerning naming and linking matters and/or compatibility with the Board's computers can be addressed to William H. Washburn, Office of Economics, Environmental Analysis, and Administration, at (202) 565-1550.

⁷ ODBC is a Windows technology that allows a database software package, such as Microsoft Access, to import data from a database created using a different software package. All databases must be supported with adequate documentation on data attributes, SQL queries, programmed reports, etc.

By the Board, Chairman Nober.

Vernon A. Williams,
Secretary.
