

because they are frequently found in completed exposure pathways, but are not on the CERCLA Priority List because they have a very low toxicity (e.g., sodium). Since the CERCLA Priority List incorporates three different components (toxicity, frequency of occurrence, and potential for human exposure) to

determine its priority substances, substances with very low toxicity are not on the CERCLA Priority List and consequently are not the subject of toxicological profiles. In addition, since the Priority List is mandated by CERCLA, it only uses data from sites on the CERCLA National Priorities List,

whereas the CEP report uses data from all sites with ATSDR activities that have a CEP. Of the 100 substances on the CEP report, the 25 substances found at the most number of sites in a CEP are presented below.

Substance name	Number of sites with substance in a CEP	
	All sites	NPL sites
Lead	386	251
Trichloroethylene	338	280
Arsenic	299	192
Tetrachloroethylene	251	198
Volatile Organic Compounds, Unspecified	187	129
Benzene	184	130
Cadmium	183	126
Chromium	178	121
Polychlorinated Biphenyls	168	111
Mercury	144	86
Manganese	144	84
Zinc	143	88
1, 1,1-Trichloroethane	128	108
Copper	125	73
Chloroform	116	90
1, 1-Dichloroethene	109	93
Polycyclic Aromatic Hydrocarbons	108	75
Benzo (A) Pyrene	105	55
Methylene Chloride	104	72
Nickel	102	65
Toluene	101	66
Vinyl Chloride	100	81
Barium	95	54
Antimony	92	58
1, 2-Dichloroethane	89	73

Note: Sorted by the ALL Sites column.

All Sites = all sites with ATSDR activities that have a CEP; NPL Sites = current and former sites on the National Priorities List, as mandated.

Dated: November 3, 2003.

Georgi Jones,

Director, Office of Policy and External Affairs, Agency for Toxic Substances and Disease Registry.

Advisory Committee on Childhood Lead Poisoning Prevention: Notice of Charter Renewal

This gives notice under the Federal Advisory Committee Act (Pub. L. 92-463) of October 6, 1972, that the Advisory Committee on Childhood Lead Poisoning Prevention, Centers for Disease Control and Prevention, of the

Department of Health and Human Services, has been renewed for a 2-year period through October 31, 2005.

For information, contact Mary Jean Brown, R.N., ScD, Executive Secretary, Advisory Committee on Childhood Lead Poisoning Prevention, Centers for Disease Control and Prevention, of the Department of Health and Human Services, 4770 Buford Highway, M/S F 30 Chamblee, Georgia 30341, telephone 404-498-1442.

The Director, Management Analysis and Services Office has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Dated: November 3, 2003.

Joseph E. Salter,

Acting Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

Public Health Genetics Fellowship

Announcement Type: New.

Funding Opportunity Number: 04059.

Catalog of Federal Domestic

Assistance Number: 93.283.

Key Dates:

Letter of Intent Deadline: November 26, 2003.

Application Deadline: December 22, 2003.

I. Funding Opportunity Description

Authority: This program is authorized under Sections 301, 317(C), and 317(G) of the Public Health Service Act, (42 U.S.C. Sections 241, 247b-4, and 247b-8, as amended).

Purpose: The purpose of the program is to establish a cooperative agreement for co-sponsoring a Public Health Genetics Fellowship Program for genetics professionals to be located at the Centers for Disease Control and Prevention (CDC), in Atlanta, GA or other CDC locations. The intent of this program is to introduce genetics professionals to opportunities in public health genetics through education, training and career-enhancing experiences.

Fellowship candidates will include genetics professionals who are at the doctoral (MD and PhD) and master's levels. Typical fellowships for genetics professionals who recently completed their training will be for a maximum of two years. For mid-career professionals, typical fellowships will be for one year, although appointments of less than one year may be made under special circumstances. Varying lengths of time for fellowship appointments will be considered on the basis of CDC and project needs.

This program addresses the "Healthy People 2010" focus areas of: Arthritis, Osteoporosis, and Chronic Back Conditions; Cancer; Chronic Kidney

Disease; Diabetes; Disability and Secondary Conditions; Heart Disease and Stroke; HIV; Immunization and Infectious Diseases; Maternal, Infant, and Child Health; Mental Health and Mental Disorders; Nutrition and Overweight; Oral Health; Respiratory Diseases; and Vision and Hearing.

Measurable outcomes of the program will be in alignment with the following performance goal for CDC: To develop career opportunities for genetics professionals in association with the recipient organization to work across CDC program areas to improve knowledge concerning genetics-related disease and disability; and to identify causes and risk factors for these conditions in order to develop prevention strategies and evaluate their effectiveness.

Activities

Recipient activities for this program are as follows:

- In collaboration with CDC, assist with planning and implementation of a fellowship program for genetic professionals in public health. The target number of fellows for this project is up to two a year, although this may be increased if additional funds become available. This plan should include the recruitment, training and mentoring of fellows under the program.
- Provide a senior staff member to serve as co-director to lead fellowship recruitment and assist in the selection and mentoring of fellows.
- Identify and recruit fellowship candidates with expertise in appropriate topic areas and implement a recruitment plan through advertisements, announcements, professional associations, and complementary training programs.
- Assist CDC in the selection of candidates appropriate for the public health genetics fellowship program. Selection of candidates will be made by a committee comprised of members of the recipient organization in conjunction with CDC.
- Provide opportunities for fellows to present their fellowship work and participate in national networking, policy development conferences, and workshops to expand professional growth and skill levels.
- Provide salary and benefits commensurate with the background and experience for fellows selected in the program. This includes recipient support of related costs for the fellowships, including travel and training expenses; and for recipient staff salaries and related technical and administrative costs.

- Collect and report to CDC information on status of fellows for up to five years after completion of the fellowship program in order to assess the impact of the fellowship program on public health genetics.

In a cooperative agreement, CDC staff is substantially involved in the program activities, above and beyond routine grant monitoring. CDC Activities for this program are as follows:

- Assist in the development and implementation of the overall fellowship plan and training program. In that regard, CDC will provide a senior staff member to serve as fellowship co-director in the planning and conduct of the program.
- Provide formal and informal training opportunities to the recipient organization and the assigned fellows.
- Coordinate and facilitate the placement of fellows with appropriate advanced training opportunities at CDC.
- Provide supervisory and mentoring support to fellows to assure optimal developmental experiences under the fellowship assignments.

II. Award Information

Type of Award: Cooperative Agreement. CDC involvement in this program is listed in the Activities Section above.

Fiscal Year Funds: 2004.

Approximate Total Funding: \$125,000. This funding level will be modified based on the number of fellowship positions available at CDC, and the capacity of the recipient to provide highly qualified candidates for the fellowship program.

Approximate Number of Awards: One.

Anticipated Award Date: March 1, 2004.

Budget Period Length: 12 months.

Project Period Length: Five years.

Throughout the project period, CDC's commitment to continuation of awards will be conditioned on the availability of funds, evidence of satisfactory progress by the recipient (as documented in required reports), and the determination that continued funding is in the best interest of the Federal Government.

III. Eligibility Information

Eligible applicants: Assistance will be provided only to a national non-profit organization. This announcement is limited to national non-profit organizations since they would have the capacity to recruit and place doctoral and master's level professionals in career-enhancing programs outside the individual educational institution or place of employment. A national
