

pressure (HP) turbine disc, P/N UL10323, UL27680, and UL27681, installed. These engines are installed on, but not limited to Boeing 757 and Tupolev Tu204 airplanes.

Note 1: This AD applies to each engine identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For engines that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Compliance with this AD is required as indicated, unless already done.

To prevent machining-induced cracking of the HP turbine disc, which could cause an uncontained HP turbine disc failure and damage to the airplane, do the following:

(a) Remove HP turbine discs P/Ns UL27680 and UL27681 from service before accumulating 15,000 cycles-since-new (CSN).

(b) Remove HP turbine discs P/N UL10323 from service before accumulating 14,800 CSN.

(c) After the effective date of this AD, do not install any HP turbine disc P/N UL27680 or UL27681 that exceeds 15,000 CSN, or any HP turbine disc P/N UL10323 that exceeds 14,800 CSN.

Alternative Methods of Compliance

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Engine Certification Office (ECO). Operators must submit their request through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, ECO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this airworthiness directive, if any, may be obtained from the Engine Certification Office.

Special Flight Permits

(e) Special flight permits may be issued in accordance with §§ 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be done.

Effective Date

(f) This amendment becomes effective on June 20, 2003.

Issued in Burlington, Massachusetts, on May 29, 2003.

SUPPLEMENTARY INFORMATION:

The FAA published this direct final rule with a request for comments in the **Federal Register** on April 17, 2003 (68 FR 18857) [FR Doc. 03-9508]. The FAA uses the direct final rulemaking procedure for a non-controversial rule where the FAA believes that there will be no adverse public comment. This direct final rule advised the public that no adverse comments were anticipated, and that unless a written adverse comment, or a written notice of intent to submit such an adverse comment, were received within the comment period, the regulation would become effective on July 10, 2003. [Docket No. FAA-2003-14707; Airspace Docket No. 03-ASO-3]

Establishment of Class E2 Airspace, Amendment of Class E5 Airspace; Waycross, GA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes Class E2 airspace and amends Class E5 airspace at Waycross, GA. The Ware County Airport Authority has requested Class E2 surface area airspace at Waycross-Ware County Airport to provide airport operations within controlled airspace. Jacksonville Air Route Traffic Control Center (ARTCC) will provide air traffic services at the airport and a federally commissioned automated weather observing system is in operation. In order to conduct these operations, Class E2 surface area must be established. This action will establish Class E2 surface area airspace within a 4.1-mile radius of the airport.

As a result of an evaluation, it has been determined a modification should be made to the Waycross, GA, Class E5 airspace area to contain the Nondirectional Radio Beacon (NDB) Runway (RWY) 18 Standard Instrument Approach Procedure (SIAP) to Waycross-Ware County Airport. Controlled airspace extending upward from 700 feet Above Ground Level (AGL) is needed to contain the SIAP. Additionally, the 7-mile radius of the Waycross-Ware County Airport will be reduced to a 6.6-mile radius.

DATES: 0901 UTC, July 10, 2003.

SUPPLEMENTARY INFORMATION:

History

On April 15, 2003, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) by establishing Class E2 airspace and amending Class E5 airspace at Waycross, GA, (68 FR 18173). This action provides adequate Class E2 and Class E5 airspace for IFR operations at Waycross-Ware County Airport. Designations for Class E are published in FAA Order 7400.9K, dated August

30, 2002, and effective September 16, 2002, which is incorporated by reference in 14 CFR part 71.1. The Class E designations listed in this document will be published subsequently in the Order.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received.

The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) establishes Class E2 airspace and amends Class E5 airspace at Waycross, GA.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

SUPPLEMENTARY INFORMATION:

Background

Federal Register Document 03–12816, Docket No. FAA–2003–14673; Airspace Docket 03–ASO–2, published on May 23, 2003, (68 FR 28128), establishes Class E2 airspace at Elizabeth City CGAS/Regional Airport, NC. An error was discovered in the legal description, describing the Class E2 airspace area. The name of the airport should be changed from Elizabeth City CGAS/Municipal Airport to Elizabeth City CGAS/Regional Airport. This action corrects the error.

Designations for Class E airspace areas designated as surface areas are published in Paragraph 6002 of FAA Order 7400.9k, dated August 30, 2002, and effective September 16, 2002, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

Need for Correction

As published, the final rule contains an error which incorrectly identifies the name of the airport. Accordingly, pursuant to the authority delegated to me, the legal description for the Class E2 airspace area at Elizabeth City, NC, incorporated by reference at § 71.1, 14 CFR 71.1, and published in the **Federal Register** on May 23, 2003, (68 FR 28128), is corrected by making the following correcting amendment.
