SUPPLEMENTARY INFORMATION: The information collected under the requirements of FERC-567 "Gas Pipeline Certificates: Annual Reports of System Flow Diagrams and System Capacity" (OMB No. 1902-0005) is used by the Commission to implement the statutory provisions of sections 4, 5, 6, 7, 9, 10(a) and 16 of the Natural Gas Act (NGA), 15 U.S.C. 717-717w and title III, sections 301(a), 303(a), 304(d), title IV, sections 401 and 402, title V, section 508 of the Natural Gas Policy Act (Pub. L. 95-621). The information collected under the requirements of FERC-567 is used by the Commission to obtain accurate data on pipeline facilities. Specifically, the FERC-567 data is used in determining the configuration and location of installed pipeline interconnections and receipt and delivery points; and developing and evaluating alternatives to proposed facilities as a means to mitigate environmental impact of new pipeline construction.

FERC-567 also contains valuable information that can be used to assist federal officials in maintaining adequate natural gas service in times of national emergency. The Commission implements these filing requirements in the Code of Federal Regulations (CFR) under 18 CFR part 260.8 and 284.13.

Action: The Commission is requesting a three-year extension of the current

expiration date, with no changes to the existing collection of data.

Burden Statement: Public reporting burden for this collection is estimated as:

Number of respondents annually (1)	Number of responses per respondent (2)	Average burden hours per response (3)	Total annual burden hours (1)×(2)×(3)
91	1,714*	81.58	12,724

* Derived by dividing the total number of response expected annually (156) by the number of respondents(91) and rounding to three places.

Estimated cost burden to respondents: 12,724 hours / 2,080 hours per year x \$117,041 per year = \$715,976. The cost per respondent is equal to \$ 7,868.

The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting, or otherwise disclosing the information.

The estimate of cost for respondents is based upon salaries for professional and clerical support, as well as direct and indirect overhead costs. Direct costs include all costs directly attributable to providing this information, such as administrative costs and the cost for information technology. Indirect or overhead costs are costs incurred by an organization in support of its mission. These costs apply to activities which benefit the whole organization rather than any one particular function or activity.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology

e.g., permitting electronic submission of responses.

Secretary.
