The Proposal

This action would amend Title 14 Code of Federal Regulations, part 71 (14 CFR part 71) by revising Class E airspace at Wenatchee/Pangborn Airport, Wenatchee, WA. The establishment of a new Standard ILS SIAP requires additional Class E controlled airspace extending upward from 700 feet or more above the surface for the safety of IFR aircraft executing the new Standard ILS SIAP at Wenatchee/Pangborn Memorial Airport, Wenatchee, WA. Controlled airspace is necessary where there is a requirement for IFR services, which include arrival, departure, and transitioning to/from the terminal or en route environment.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.9M dated August 30, 2004, and effective September 16, 2004, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in this order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulations; (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The Proposal

The FAA is considering an amendment to 14 CFR part 71 by establishing a Class E airspace area at Marana Northwest Regional Airport, AZ. The establishment of a RNAV (GPS) RWY 3, 21, 12, and 30 IAP and a NDB RWY 12/30 IAP at Marana Northwest Regional Airport has made this proposal necessary. Additional controlled airspace extending upward from 700 feet above the surface is needed to contain aircraft executing the RNAV

(GPS) RWY 3, 21, 12, and 30 IAP and NDB RWY 12 and 30 IAP at Marana Northwest Regional Airport has made this proposal necessary. The intended effect of this proposal is to provide adequate controlled airspace for aircraft executing the RNAV (GPS) RWY 3, 21, 12, and 30 IAP and a NDB IAP at Marana Northwest Regional Airport at Tucson, AZ. Class E airspace designations are published in paragraph 6005 of FAA Order 7400.9M dated August 30, 2004, and effective September 16, 2004, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in this Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
