

SC-351, Group Quarters Initial Contact Checklist—This checklist will be used by enumerators to collect contact information and to determine the type of GQ.

SC-920, Address Listing Page—This page will include existing addresses from the MAF. Special Census enumerators will update these addresses, if needed, at the time of enumeration.

SC-921(HU), Housing Unit Add Page—This page will be used by enumerators to add HUs that are observed to exist on the ground and that are not contained on the address listing page.

SC-921(SP), Special Place/Group Quarter Add Page—This page will be used by enumerators to add SPs/GQs that are observed to exist on the ground and that are not reflected in the address listing page.

The Special Census Program will operate as a generic OMB clearance including a library of forms and the operational procedures that will be used for the many special censuses we anticipate conducting this decade. The Census Bureau will establish a reimbursable agreement with a variety of potential special census customers that are unknown at this time.

We will submit for OMB's review and approval, under cover of a change worksheet, any special-purpose questions requested by customers to be added to special census questionnaires.

II. Method of Collection

The Special Census Program will use the Census 2000 Update/Enumerate (U/E) methodology. Enumerators will canvass their assigned areas with an address register that contains addresses obtained from the MAF. Special Census enumerators will update the address information, as needed, based on their observation of HUs and/or SPs/GQs that exist on the ground. Additionally, enumerators will interview households at regular HUs and residents at GQs using the appropriate Special Census questionnaire.
