

guidance. The final revised guidance will not be effective prior to EPA's publication of the question and answer document." (See Revised Addendum to the CAP agreement conveyed to the CAP participants via a May 15, 1996 letter from the Office of Enforcement and Compliance Assurance.) This statement of intent was similar to proposals contained in the March 9, 1995 proposed TSCA section 8(e) Guidance which was the subject of a notice of availability published in the **Federal Register** of March 20, 1995 (60 FR 14756) (FRL-4937-6).

The June 3, 2003 **Federal Register** notice discusses the CAP in several places as part of the history of the development of the revised guidance. (See, e.g., 68 FR 33131, Unit II.C.). The notice also mentions the planned question and answer document (68 FR 33133). Yet, the June 3, 2003 notice never linked the effective date of the Reporting Guidance to the publication of a question and answer document. Rather, as mentioned in this unit, the best reading of the notice is that the Guidance was effective and applicable upon publication.

The Agency has now made a question and answer document available. It can be found on the OPPT's TSCA section 8(e) internet site: <http://www.epa.gov/oppt/tscas8e/>.

EPA hopes and expects that the guidance has been, and will continue to be, useful to manufacturers (including importers), processors, and distributors of chemical substances and mixtures in fulfilling their responsibilities under TSCA section 8(e).

applications that would increase a station's DTV service area in channels 2-51 in one or more directions beyond the combined area resulting from the station's parameters as defined in the following: (1) The DTV Table of Allotments; (2) Commission authorizations (license and/or construction permit); and (3) applications on file with the Commission prior to release of the freeze public notice; and television modification applications that would increase a station's analog service area in channels 2-51 in one or more directions beyond the combined area resulting from the station's parameters as defined in the following: (1) Commission authorizations (license and/or construction permit) and (2) applications on file with the Commission prior to release of the freeze public notice. The Bureau may consider, on a case by case basis and consistent with the public interest, amendments to those applications to, for example, resolve interference with other stations or pending applications or to resolve mutual exclusivity with other pending applications. In earlier public notices, we have frozen maximization applications for channels 52-59 and 60-69.

- Class A station displacement applications and applications for coverage changes that would serve any area that is not already served by that Class A station's authorized facilities.
