DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency For Healthcare Research and Quality

Notice of Meeting

In accordance with section 10(d) of the Federal Advisory Committee Act (5 U.S.C., Appendix 2), announcement is made of a Health Care Policy and Research Special Emphasis Panel (SEP) meeting.

A Special Emphasis Panel is a group of experts in fields related to health care research who are invited by the Agency for Healthcare Research and Quality (AHRQ), and agree to be available, to conduct on an as needed basis, scientific reviews of applications for AHRQ support. Individual members of the Panel do not attend regularly-scheduled meetings and do not serve for fixed terms or a long period of time. Rather, they are asked to participate in particular review meetings which require their type of expertise.

Substantial segments of the upcoming SEP meeting listed below will be closed to the public in accordance with the Federal Advisory Committee Act, section 10(d) of 5 U.S.C., Appendix 2 and 5 U.S.C. 552b(c)(6). Dissertation grant application, "The Economics of Mother's Milk Feedings in the Neonatal Intensive Care Unit" is to be reviewed and discussed at this meeting. These discussions are likely to reveal personal information concerning individuals associated with the application. This information is exempt from mandatory disclosure under the above-cited statutes.

SEP Meeting on: The Economics of Mother's Milk Feedings in the Neonatal Intensive Care Unit.

Date: July 19, 2005 (open on July 19 from 1 p.m. to 1:15 p.m. and closed for the remainder of the telephone conference call meeting).

Place: AHRQ, John M. Eisenberg Building, 540 Gaither Road, 2nd Floor Conference Room, Rockville, Maryland 20850.

Contact Person: Anyone wishing to obtain a roster of members, agenda or minutes of the non-confidential portions of this meeting should contact Mrs. Bonnie Campbell, Committee Management Officer, Office of Extramural Research, Education and Priority Populations, AHRQ, 540 Gaither Road, Room 2038, Rockville, Maryland 20850, telephone (301) 427-1554.

Agenda items for this meeting are subject to change as priorities dictate.

This notice is being published less than 15 days prior to the July 19 meeting, due to the time constraints of reviews and funding cycles.

Dated: July 11, 2005.

Carolyn M. Clancy,

Director.

Single Gene Disorders Resource Network

Announcement Type: New.

Funding Opportunity Number: AA092.

Catalog of Federal Domestic Assistance Number: 93.283.

Key Dates:

Letter of Intent (LOI) Deadline: July 29, 2005.

Application Deadline: August 18, 2005.

I. Funding Opportunity Description

Authority: This program is authorized under Sections 301, 311 and 317(C) of the Public Health Service Act [42 U.S.C. 241, 243, and 247b-4 as amended].

Background: There are over 6000 known single gene disorders, including over 1650 with identified genes. Single gene disorders occur in about one in 300 births, and account for 13 percent of in-patients in pediatric hospital and three to five percent of pediatric deaths. The National Center on Birth Defects and Developmental Disabilities (NCBDDD) seeks to ensure the optimal outcome of people with disabling or potential disabling pediatric single gene conditions and their families, by developing surveillance systems that meet challenges of single gene disorders, improving screening and diagnosis, and improving services to patients and families. Genetic disorders raise different issues for health care providers and families than do non-genetic disorders because genetic disorders have implications for other family members, and raise psychosocial issues (such as guilt, blame and stigmatization). Lessons learned from public health activities in single gene disorders can be applied to complex disorders as their etiologies become elucidated.

This cooperative agreement will fund the development of a national resource network for single gene disorders. Initial funding will support projects related to Duchenne and Becker Muscular Dystrophy (DBMD) and Fragile X

syndrome (FXS). The proposed National Network will have the capacity to expand to other single gene disorders.

Purpose: The purpose of the program is to develop, implement, and evaluate a Network for Single Gene Disorders, focusing specifically on DBMD and FXS. This program addresses the "Healthy People 2010" focus areas of Disability and Secondary Conditions; Mental Health and Mental Health Disorders; and Maternal, Infant, and Child Health."

Measurable outcomes of the program will be in alignment with one (or more) of the following performance goal(s) for the National Center on Birth Defects and Developmental Disabilities (NCBDDD): Prevent birth defects and developmental disabilities, and improve the health and quality of life of Americans with disabilities.

This announcement is only for non-research activities supported by CDC/ATSDR. If research is proposed, the application will not be reviewed. For the definition of research, please see the CDC Web site at the following Internet address: <http://www.cdc.gov/od/ads/opspoll1.htm>.

Activities:

Applicants may apply for funding under part A and/or part B. Please note that if applicants choose to apply for both part A and part B, applicants may submit consolidated applications addressing the requirements of both part A and part B under one application.

Awardee activities for part A of this program are as follows:

- Increase access to accurate and scientifically valid information on the etiology, diagnosis, and treatment of DBMD for end users including families, educators, health professionals, allied health caregivers, and the general public. The awardee will specifically assemble and/or develop informational materials that: (1) Reflect expert opinion, evidence-based knowledge and current clinical practice, and (2) respond to the needs of individuals and families affected by DBMD. These informational materials will be disseminated to the target populations.

- Assess current educational and outreach materials related to DBMD targeted at families with DBMD and the general public. Develop and/or modify, implement and evaluate educational materials for families with DBMD and the general public, including information on the etiology, clinical course, treatment options, and available services (including services supported by Health Resources and Services Administration, the Administration for Children and Families/Administration on Developmental Disabilities, and

other DHHS-supported efforts that target families of children with disabilities). Content of materials includes issues specific to single gene disorders, such as genetic counseling.

- Assess current educational and outreach materials related to DBMD targeted at health care providers. Develop and/or modify, implement and evaluate educational materials for providers and students, focusing on recognition, diagnosis, referral and treatment. Content of materials includes current diagnostic and treatment standards or guidelines; and issues specific to single gene disorders, such as genetic counseling.

- Disseminate the information on DBMD widely within the targeted group including families, educators, health professionals, allied health caregivers, and the general public. This may be new or existing materials in a variety of formats including written, video, CD, and World Wide Web. Ensure the dissemination plan for the materials is developed, methods for reaching underserved and minority communities are described and justified; and accurate information about diagnosis and treatment of DBMD is available to various stakeholders, *i.e.*, practitioners, families, teachers, and other caregivers.

- Coordinate educational activities with other community-based and community-wide providers and organizations that offer services or direct education messages to U.S. residents that have DBMD and their providers.

- Hire and train staff as necessary to implement education and outreach activities for DBMD.

- Increase opportunities for regular and ongoing DBMD training and education available to persons within the targeted audiences.

- Identify core competencies about DBMD for medical and allied health students.

- Evaluate the core competencies for appropriateness and validity based on needs of the audiences and on scientific research.

- Develop methods to ensure that materials and resources for DBMD education and training are easily accessible.

- Coordinate activities with other awardees.

Awardee activities for part B of this program are as follows:

- Increase access to accurate and scientifically valid information on the etiology, diagnosis, and treatment of FXS for end users including health professionals, allied health caregivers, and students. The awardee will specifically assemble and/or develop
