

practicable to complete the review within this time period, section 751(a)(3)(A) of the Act and section 351.213(h)(2) of the Department's regulations allow the Department to extend the 245-day period to 365 days and the 120-day period to 180 days. Due to the fact that in this case the Department is conducting verifications subsequent to the preliminary results of the administrative review, although verifications are normally conducted prior to issuing the preliminary results, and therefore requires additional time to complete the verifications and issue its findings, the Department determines that it is not practicable to complete this administrative review within the current time limit.

Section 751(a)(3)(A) of the Act and section 351.213(h) of the Department's regulations allow the Department to extend the deadline for the final results of a review to a maximum of 180 days from the date on which the notice of the preliminary results was published. For the reasons noted above, the Department is extending the time limit for the completion of these final results until no later than Monday, June 27, 2005, which is the next business day after 180 days from the date on which the notice of the preliminary results was published.

This notice is issued and published in accordance with Section 751(a)(3)(A) of the Act.

Dated: April 8, 2005.

Barbara E. Tillman,

Acting Deputy Assistant Secretary for Import Administration.

National Institute of Standards and Technology

Public Forum on Urban Search and Rescue Robot Performance Standards

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Meeting notice.

SUMMARY: The National Institute of Standards and Technology (NIST) will host, in conjunction with the Department of Homeland Security (DHS), a public meeting from 9 a.m. to 4 p.m. on May 13, 2005 at the NIST campus in Gaithersburg, MD. This meeting pertains to a new DHS Program to develop comprehensive standards related to the development, testing, and certification of effective technologies for Urban Search and Rescue (US&R) robotics. These US&R robotic performance standards cover sensing, mobility, navigation, planning, integration, and operator control in order to ensure that the robots can meet operational requirements under the extremely challenging conditions that rescuers are faced with, including long endurance missions. The standards will also address issues of robotic component interoperability to reduce costs. The US&R robotic standards effort focuses on fostering collaboration between first responders, robot vendors, and technology developers to advance consensus standards for task specific

robot capabilities and interoperability of components. These standards will allow DHS to provide guidance to local, state, and federal homeland security entities regarding the purchase, deployment and use of US&R robotic systems. The meeting is intended as a method of disseminating information pertaining to this newly initiated program. Attendees at the May 13 forum are expected to include: robot platform vendors, robot peripherals and software providers, sensor (chemical, biological, radiological, nuclear, environmental) providers, researchers working on robotic components, platforms, and algorithms, government agencies working on applicable robotic technologies and sensors, federal, state, and local responders and response agencies, and testing and evaluation sites and laboratories. There will be an \$80 charge for this meeting and pre-registration is required. An electronic registration site will be available at http://www.isd.mel.nist.gov/US&R_Robot_Standards.

DATES: The forum will begin on May 13, 2005 at 9 a.m. and conclude at 4:00 p.m.

ADDRESSES: The workshop will be held at the National Institute of Standards and Technology, Gaithersburg, MD. Directions and instructions for registration in order to gain admittance to the site are available at http://www.isd.mel.nist.gov/US&R_Robot_Standards.
