NUCLEAR REGULATORY COMMISSION

[Docket No. 040-07982]

Notice of Issuance of License Amendment for Termination of License SUB-00971 for ATK Ordnance and Ground Systems, LLC Arden Hills, Minnesota

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability.

FOR FURTHER INFORMATION CONTACT:

George M. McCann, Senior Health Physicist, Decommissioning Branch, Division of Nuclear Material Safety, Region III, U.S. Nuclear Regulatory Commission, 2443 Warrenville Road, Lisle, Illinois 60532; Telephone: (630) 829-9856; fax number: (630) 515-1259; e-mail: gmm@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The Nuclear Regulatory Commission (NRC) is issuing a license amendment to terminate Source Material License No. SUB-00971 issued to ATK Ordnance and Ground Systems, LLC, (ATK) and to authorize for unrestricted use its former depleted uranium production facilities, located at the Twin Cities Army Ammunition Plant, Arden Hills, Minnesota. On October 25, 2001, the NRC amended ATK's license to include an NRC-approved decommissioning plan supported by an Environmental Assessment and a Finding of No Significant Impact. These documents addressed the impacts of ATK's request to decommission its former depleted uranium facilities, including final status survey plans and the licensee's intent to terminate Source Material License No. SUB-00971. The NRC published a Notice of the Agency's proposed action and opportunity to request a hearing in the **Federal Register** (63 FR 28015) on May 21, 1998.

In a letter dated June 2, 2004, ATK requested termination of its NRC radioactive source material license. The NRC staff documented its review of ATK's final status surveys in a December 13, 2004, Safety Evaluation Report. Based on its review, the staff concluded that all licensable radioactive material had been removed from the ATK facility and residual radioactive material attributable to licensed activities did not exceed NRC unrestricted release criteria cited in its decommissioning plan.

II. Safety Evaluation Report (SER) Summary

The purpose of the amendment is to terminate ATK's source material license and authorize for unrestricted release the licensee's former depleted uranium production facilities located at the Twin Cities Army Ammunition Plant, Arden Hills, Minnesota. The licensee started production of uranium munitions in 1976, and ceased production activities during 1988. The licensee conducted surveys of its former facilities and site and provided on June 18, 2004, information to the NRC to demonstrate that the site meets the licensee's termination criteria specified in its NRC-approved decommissioning plan.

The staff prepared the SER in support of the license amendment. Based on its review, the NRC staff has determined that the licensee's final status surveys are adequate to demonstrate compliance with radiological criteria for license termination, and that ATK has demonstrated that the former depleted uranium production site radiological conditions comply with the radiological criteria for license termination. The NRC staff has reviewed the proposed amendment and has determined that the proposed termination will have no adverse effect on the public health and safety or the environment.
