DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Committee on Vital and Health Statistics; Meeting

Pursuant to the Federal Advisory Committee Act, the Department of Health and Human Services (HHS) announces the following advisory committee meeting.

Name: National Committee on Vital and Health Statistics (NCVHS), Subcommittee on Privacy and Confidentiality.

Time and Date: August 16, 2005, 1:30 p.m.–5 p.m. August 17, 2005, 9 a.m.–5 p.m.

Place: Hotel Monaco, 501 Geary Street, San Francisco, CA 94102, (415) 292-0100.

Status: Open.

Purpose: The meeting will focus on privacy and confidentiality issues related to electronic health records and the development of a National Health Information Network (NHIN). The Subcommittee will hear from witnesses who have been asked to respond to questions posted on the Subcommittee's Web site <http://www.ncvhs.hhs.gov/>. The questions focus on design options for a NHIN, related privacy and confidentiality concerns, issues around patient control of content and access to NHIN records, and broader issues around privacy and confidentiality of personal health information and building the public trust in the NHIN.

Contact Person for More Information: Substantive program information as well as summaries of meetings and a roster of committee members may be obtained from Maya A. Bernstein, Lead Staff for Subcommittee on Privacy and

Confidentiality, Office of the Assistant Secretary for Planning and Evaluation, 434E Hubert H. Humphrey Building, 200 Independence Avenue, SW., 20201; telephone (202) 690-7100; or Marjorie S. Greenberg, Executive Secretary, NCVHS, National Center for Health Statistics, Centers for Disease Control and Prevention, 3311 Toledo Road, Room 2402, Hyattsville, Maryland 20782, telephone (301) 458-4245. Information also is available on the NCVHS home page of the HHS Web site: <http://www.ncvhs.hhs.gov/>, where further information including an agenda will be posted when available.

Should you require reasonable accommodation, please contact the CDC Office of Equal Employment Opportunity on (301) 458-4EEO (4336) as soon as possible.

Dated: July 29, 2005.

James Scanlon,

Acting Deputy Assistant Secretary for Science and Data Policy, Office of the Assistant Secretary for Planning and Evaluation.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Toxic Substances and Disease Registry

Applied Research for Populations Around Hazardous Waste Sites

Announcement Type: New.

Funding Opportunity Number: CDC-RFA-TS05-110.

Catalog of Federal Domestic Assistance Number: 93.161.

DATES: *Application Deadline:* August 29, 2005.

I. Funding Opportunity Description

Authority: This program is authorized in sections 104(i) (1)(E), (7), (9), and (15) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) as amended by the Superfund Amendments and Reauthorization Act (SARA) [42 U.S.C. 9604(i)(1)(E), (7), (9), and (15)].

Background: Agency for Toxic Substances and Disease Registry (ATSDR) has the responsibility under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as amended, to evaluate the relationship between exposures to hazardous substances and adverse human health effects. However, this relationship between exposures to hazardous substances and adverse health effects is complicated and difficult to evaluate. Many factors can

generate the appearance or hide the presence of a relationship between exposure to hazardous substances and adverse health effects. The presence of environmental contamination and an adverse health effect does not automatically demonstrate evidence of a causal relationship. Beginning in 1992, ATSDR developed a research agenda to address some of these questions. Research under this agenda continues to be conducted, but additional research is needed. Therefore, projects conducted under this program announcement will focus on those questions that have the greatest relevance toward determining the relationship of adverse health effects among persons exposed to hazardous substances.

Examples of relevant ATSDR activities are presented below:

Evaluation of Persons Exposed to Tremolite Asbestos Contaminated Vermiculite

Asbestos contaminated vermiculite ore was mined and processed in Libby, Montana, from the early 1920s until 1990. ATSDR has completed a medical screening program, a mortality review and a Public Health assessment in Libby. Based on these studies and additional evaluation conducted by ATSDR, EPA and the State of Montana, people who worked in the Libby mine or processing facilities and people who lived in the Libby community were exposed to asbestos-contaminated vermiculite. Nearly eighteen percent of medical screening participants had radiographic pleural abnormalities consistent with asbestos exposure. Mortality due to lung cancer and asbestosis was also found to be elevated in Libby. ATSDR has also implemented a Tremolite Asbestos Registry (TAR) of exposed persons and has funded the State of Montana to conduct additional periodic medical surveillance for eligible persons.

Additionally, records indicate that the vermiculite ore from Libby was shipped to over 200 locations around the U.S. for handling and/or processing into various commercial and consumer products. Twenty-eight "Phase 1 Sites" have been identified based on a variety of factors such as tonnage of ore received, population density, numbers of workers, etc. Health statistics reviews (to evaluate mortality and cancer registry data) are currently being completed in sixteen states and mesothelioma surveillance has been initiated in three states (New York, Wisconsin and New Jersey). In addition, ATSDR has funded a comprehensive community exposure assessment project in a community receiving the ore. This work addresses
