NUCLEAR REGULATORY COMMISSION

[Docket No. PAPO-00, ASLBP No. 04-829-01-PAPO NEV-01]

Atomic Safety and Licensing Board; Department of Energy (High Level Waste Repository: Pre-Application Matters); First Case Management Order (Regarding Preparation of Privilege Logs)

January 24, 2005.

Before Administrative Judges: Thomas S. Moore, Chairman, Alex S. Karlin and Alan S. Rosenthal

The purpose of this order is to promote good management and efficiency in the resolution of documentary privilege disputes during the pre-license application phase of the expected application by the United States Department of Energy (DOE) for a license to construct a repository for high-level radioactive waste (HLW) at Yucca Mountain, Nevada. DOE, the NRC Staff, the State of Nevada (State), other potential parties, interested Indian Tribes, and interested units of local government (collectively Potential Participants) are directed to submit their responses to this order within the times specified below.

I. Background

On August 31, 2004, this Board granted the motion of the State to strike DOE certification regarding its production of documentary material on the grounds, *inter alia*, that the gaps in its document production, and the incompleteness of DOE's review of the documents for claims of privilege, showed that DOE had not made all documentary material available as required by 10 CFR 2.1003(a). LBP-04-20, 60 NRC 300 (2004). In that decision, we noted that DOE had claimed approximately one million of its documents were entitled to some form of privilege and yet had not completed its privilege review for several hundred thousand of these documents. 60 NRC at 316, 318. Underscoring the magnitude of the issue, counsel for the State indicated that, given DOE's numerous claims of privilege, "we're going to be [before the Board] thousands of times asking for documents." 60 NRC at 328 n.47. Although our ruling of August 31, 2004 temporarily postponed such privilege disputes, once DOE re-submits and re-certifies its documents, the controversies will begin anew.

Even assuming that DOE's pending document production is of the highest quality, it is now clear that thousands of documents in this proceeding (whether
