Proposed Project

Indicators of the Performance of Local and State and Education Agencies in HIV-prevention and Coordinated School Health Program Activities for Adolescent and School Health Programs—Reinstatement with Change—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Division of Adolescent and School Health (DASH), CDC, supports HIV prevention activities and coordinated school health program (CSHP) activities conducted by local education agencies (LEA) and state and territorial education agencies (SEA and TEA). DASH has previously collected information on these activities under OMB control number 0920-0672, which is scheduled to expire in February 2008. Because there is currently no other standardized annual reporting process for HIV prevention activities or CSHP activities, DASH seeks OMB approval to reinstate the previously fielded web-based questionnaires. In addition, DASH proposes to add a new questionnaire to assess asthma management activities to be conducted by LEAs and SEAs.

Four Web-based questionnaires will be used that correspond to specific funding sources within the Division of Adolescent and School Health. Two questionnaires pertain to HIV-prevention program activities among LEAs and SEAs/TEAs. The third questionnaire pertains to asthma management activities among LEAs. The fourth questionnaire pertains to CSHP activities among SEAs.

The two HIV questionnaires will include questions on:

- Distribution of, professional development and individualized technical assistance on school policies.
- Distribution of, professional development and individualized technical assistance on education curricula and instruction.
- Distribution of, professional development and individualized technical assistance assessment on student standards.
- Collaboration with external partners.
- Targeting priority populations.
- Planning and improving projects.
- Information about additional program activities.

The asthma questionnaire will ask the questions above, but will focus on asthma management activities.

The CSHP questionnaire will also ask the questions above, but will focus on physical activity, nutrition, and tobacco-use prevention activities (PANT). It will include additional questions on:

- Joint activities of the State Education Agency and State Health Agency (SHA).
- Activities of the CSHP state-wide coalition.
- Health promotion programs and environmental approaches to PANT.

Information gathered from the questionnaires will: (1) Provide standardized information about how HIV prevention, asthma management, and CSHP funds are used by LEAs and SEAs; (2) assess the extent to which programmatic adjustments are indicated; (3) provide descriptive and process information about program activities; and (4) provide greater accountability for use of public funds.

Each Web-based questionnaire will be completed annually. There are no costs to respondents except their time to participate in the survey.

agent a file containing information pertaining to individuals owing past-due support. The insurer or the insurer's agent will then compare that information with information pertaining to claims, settlements, awards, and payments. The insurer will furnish the information resulting from the comparison to OCSE.

On a daily basis, OCSE will furnish the results of a comparison to the State agencies responsible for collecting child support from the individuals by transmitting the Insurance Match Response Record. The results of the comparison will be used by the State agencies to collect from the insurance proceeds past-due child support owed by the individuals.

Respondents: Insurance companies or their agents, including the U.S. Department of Labor and State agencies administering workers' compensation programs.
