SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general. Although this action may be of particular interest to those persons who are required to register, regulate, or label pesticides, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the information in this notice, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through [regulations.gov](http://www.regulations.gov) or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one

complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

- i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date, and page number).

- ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.

- iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

- iv. Describe any assumptions and provide any technical information and/or data that you used.

- v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

- vi. Provide specific examples to illustrate your concerns and suggest alternatives.

- vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

- viii. Make sure to submit your comments by the comment period deadline identified.

3. *Specific questions for comment.* i. The proposed statements are intended to give clear, practical instructions for the ordinary consumer, and to state a reason for following the instructions. Are there terms in the statements that are ambiguous or subject to interpretation, which could potentially confuse an untrained user?

- ii. Three of the four categories (liquid concentrate, dust, and liquid ready-to-use) should not be applied in winds that would cause the product to drift to unintended areas. Since a home user can not be presumed to have any means of knowing actual wind speed at the time of application, what directions regarding wind would be most helpful?

- a. The proposed environmental hazard statement to minimize the potential for drift reads: "[Do not] apply when wind is strong enough to carry spray away from treatment area." Is that a clear, practical instruction?

- b. The alternative statement to minimize drift incorporates the *Beaufort scale* (<http://www.ncdc.noaa.gov/oa/climate/conversion/beaufortland.html>). The Beaufort scale a system for

estimating wind strengths without the use of instruments. For wind speeds that could affect application of residential products, the visual effects according to the Beaufort scale for a moderate breeze of 13 to 18 miles per hour would be that small branches on trees are moving. Is this a practical indicator of when not to use a product? Is the phrase "Do not apply when wind is strong enough to move small branches on trees, as wind will carry spray away from treatment area" preferable to "Do not apply when wind is strong enough to carry spray away from treatment area"?

II. What Action is the Agency Taking?

EPA is recommending that registrants of outdoor residential use pesticides revise Environmental Hazard Statements on product labels. This action is voluntary and may be done through notification. As this is voluntary, no Agency action will be taken.
