#### SUPPLEMENTARY INFORMATION:

##### The Petition

On June 27, 2007, the Department of Commerce ("the Department") received a petition filed in proper form by Allied Tube & Conduit; Atlas Tube; Bull Moose Tube Company; California Steel and Tube; EXLTUBE; Hannibal Industries; Levitt Tube Company LLC, Maruichi American Corporation; Searing Industries; Southland Tube; Vest Inc.; Welded Tube; and Western Tube and Conduit (collectively, "petitioners"). The Department received timely information from petitioners supplementing the petition on July 6, July 9 and July 12, 2007.

In accordance with section 702(b)(1) of the Tariff Act of 1930, as amended ("the Act"), petitioners allege that manufacturers, producers, or exporters of light-walled rectangular ("LWR") pipe and tube in the People's Republic of China (the "PRC"), receive countervailable subsidies within the meaning of section 701 of the Act and that such imports are materially injuring, or threatening material injury to, an industry in the United States.

The Department finds that petitioners filed the petition on behalf of the domestic industry because they are interested parties as defined in sections 771(9)(C) and (D) of the Act and petitioners have demonstrated sufficient industry support with respect to the countervailing duty investigation (*see* "Determination of Industry Support for the Petition" section below).

##### Scope of Investigation

The merchandise that is the subject of this investigation is certain welded

carbon-quality light-walled steel pipe and tube, of rectangular (including square) cross section (LWR), having a wall thickness of less than 4mm.

The term carbon-quality steel includes both carbon steel and alloy steel which contains only small amounts of alloying elements. Specifically, the term carbon-quality includes products in which none of the elements listed below exceeds the quantity by weight respectively indicated: 1.80 percent of manganese, or 2.25 percent of silicon, or 1.00 percent of copper, or 0.50 percent of aluminum, or 1.25 percent of chromium, or 0.30 percent of cobalt, or 0.40 percent of lead, or 1.25 percent of nickel, or 0.30 percent of tungsten, or 0.10 percent of molybdenum, or 0.10 percent of niobium, or 0.15 percent vanadium, or 0.15 percent of zirconium. The description of carbon-quality is intended to identify carbon-quality products within the scope. The welded carbon-quality rectangular pipe and tube subject to this investigation is currently classified under the Harmonized Tariff Schedule of the United States ("HTSUS") subheadings 7306.61.50.00 and 7306.61.70.60. While HTSUS subheadings are provided for convenience and Customs purposes, our written description of the scope of these investigations is dispositive.

##### Comments on Scope of Investigation

During our review of the petition, we discussed the scope with the petitioners to ensure that it is an accurate reflection of the products for which the domestic industry is seeking relief. Moreover, as discussed in the preamble to the regulations (*Antidumping Duties; Countervailing Duties; Final Rule*, 62 FR 27296, 27323 (May 19, 1997)), we are setting aside a period for interested parties to raise issues regarding product coverage. The Department encourages all interested parties to submit such comments within 20 calendar days of the publication of this notice. Comments should be addressed to Import Administration's Central Records Unit ("CRU"), Room 1870, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230. The period of scope consultations is intended to provide the Department with ample opportunity to consider all comments and to consult with parties prior to the issuance of the preliminary determinations.

##### Consultations

Pursuant to section 702(b)(4)(A)(ii) of the Act, the Department invited representatives of the Government of the
