DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Agency for Healthcare Research and Quality, HHS.

ACTION: Notice.

SUMMARY: This notice announces the intention of the Agency for Healthcare Research and Quality (AHRQ) to request that the Office of Management and Budget (OMB) approve the proposed information collection project: "Evaluation of the Effectiveness of AHRQ's Grant-Supported Research on Healthcare Costs, Productivity, and Market Forces." In accordance with the Paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3506(c)(2)(A)), AHRQ invites the public to comment on this proposed information collection.

DATES: Comments on this notice must be received by February 26, 2008.

ADDRESSES: Written comments should be submitted to: Doris Lefkowitz, Reports Clearance Officer, AHRQ, by E-mail at doris.lefkowitz@ahrq.hhs.gov.

Copies of the proposed collection plans, data collection instruments, and specific details on the estimated burden can be obtained from the AHRQ Reports Clearance Officer.

FOR FURTHER INFORMATION CONTACT:

Doris Lefkowitz, AHRQ Reports Clearance Officer, (301) 427-1477 or by E-mail at doris.lefkowitz@ahrq.hhs.gov.

SUPPLEMENTARY INFORMATION:

Proposed Project

"Evaluation of the Effectiveness of AHRQ's Grant-Supported Research on Healthcare Costs, Productivity, and Market Forces"

The proposed information collection will support AHRQ's efforts to systematically review the effectiveness

of its grant-supported research on healthcare costs, productivity, and market forces since the late 1990s. In the first phase of its ongoing evaluation, AHRQ determined it had funded 149 grants in the area of cost, productivity, organization and market forces since the late 1990s (Krissik, Lake and Gold, 2007). Prior to this proposed information collection, no evaluation of these grants and their effects has been conducted. Collecting such information through a survey of the 149 grantees will assist AHRQ in its mission of supporting the synthesis and dissemination of available scientific evidence for use by patients, consumers, practitioners, providers, purchasers, policymakers, and educators. The survey will provide information on grant activities that is not currently available, including up-to-date information on grantee dissemination activities and feedback on AHRQ's role in supporting research and dissemination.

A survey of the universe of grantees who were funded to carry out the above-described health services research work offers a rational and scientific approach to collecting data on the impact of AHRQ's research in this area that is otherwise not currently available. The survey will be an integral part of AHRQ's overall evaluation, which attempts to describe the research and the pathways through which research findings that it has supported are disseminated and used. The survey interviews principal investigators about their grant research projects and will capture data that systematically track grant outcomes, providing information on: (1) The main substantive findings from the work and the ways they have been communicated; (2) known impacts of the work to date; (3) linkage of work to other research in the field; (4) grantee ratings of the support that AHRQ provided before, during, and after award and how AHRQ services for grantees could be improved; and, (5) grantee perceptions of AHRQ's role in research funding in this area and how sponsor interest influences the topics that are addressed.

Method of Collection

A web-based questionnaire will be used to conduct the survey with AHRQ grantees. A self-administered mode was selected for this survey because respondents may need to look up information in order to answer some questions. A self-administered mode allows respondents to complete the survey at their own pace and schedule. If requested, a hardcopy of the
