

respective employees. E.O. 12829 also authorizes the Executive Agent to issue, after consultation with affected agencies, standard forms that will promote the implementation of the NISP.

The Under Secretary of Defense for Intelligence assigned DSS to exercise authority and responsibility for central operational management of DoD PSI workload projections, and monitoring of PSI funding and investigation quality issues for DoD components to include cleared contractors under the National Industrial Security Program. In the past, DSS has relied on historical data for agency budget projections regarding the numbers of PSIs required by cleared contractor entities; however, historical data did not provide a particularly accurate or credible estimate of such workload. In this annual collection of information, DSS asks the Facility Security Officers of cleared contractor entities to provide projections of the numbers and types of personnel security investigations required as well as providing a description of the methodology used for the projections, and the percentage of the cleared contractor's projections representing DoD and non-DoD (NISP) agencies PSI requirements for cleared contractors. The data will be incorporated into DSS' budget submissions and to track against actual cleared contractor's actual PSI submissions.

The Office of Personnel Management (OPM) has responsibility to conduct PSIs and the subsequent periodic reinvestigations (PRs) in accordance with the Code of Federal Regulations, Title 5, Part 736.

Representative of various industry associations, the National Industrial Security Program Policy Advisory Committee (NISPPAC), the Military Services, various elements of the Department of Defense and other Federal Government Agencies are familiar with the annual survey.
