##### The Proposal

The FAA is considering an amendment to Part 71 of the Federal Aviation Regulations (14 CFR part 71) to establish Class E airspace at Centreville, AL. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in Paragraph 6005 of FAA Order 7400.9P, dated September 16, 2006, and effective September 16, 2006, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

[Docket No. FAA–2007–28101; Airspace Docket 07–ASO–9]

#### **Proposed Establishment of Class E Airspace; Vero Beach, FL**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This notice proposes to establish Class E2 airspace at Vero Beach, FL.

As a result of an evaluation, it has been determined Class E Airspace Designated as Surface Areas should be established for Vero Beach Municipal

Airport. Miami Air Route Traffic Control Center has communications capabilities and weather observation reporting when the Vero Beach tower is closed. Therefore, the airport will meet criteria for Class E2 airspace. Class E2 surface area airspace is required when the control tower is closed to contain Standard Instrument Approach Procedures (SIAPs) and other Instrument Flight Rules (IFR) operations at the airport. This action would establish Class E2 airspace extending upward from the surface to and including 2,500 feet MSL within a 4.2-mile radius of the airport and within 3.2 miles each side of the 261° bearing from the Vero Beach Nondirectional Radio Beacon (NDB) extending from the 4.2 mile radius of the Vero Beach Municipal Airport to 7 miles west of the NDB.

**DATES:** Comments must be received on or before June 21, 2007.

**ADDRESSES:** Send comments on this proposal to the Docket Management System, U.S. Department of Transportation, Room Plaza 401, 400 Seventh Street, SW., Washington, DC 20590–0001.
