Five-hundred forty-three (543) letters, postcards, and e-mails were received in response to the Final EIS. Comments received were grouped into 55 categories or themes, and resulted in just over 2300 comments spread over these categories. Approximately 20 percent of the comments simply expressed either opposition or support of the proposal, though the overwhelming majority of these were in opposition. Of the remaining comments, almost half dealt with the following issues or concerns: greenhouse gas emissions/global warming/carbon capture and sequestration; renewable sources/conservation; air pollution in general; mercury/toxic emissions; outdated generation technology/dirty fuel; EIS inadequate; adverse effect to Great Falls Portage NHL; and, waste of scarce water resources. A complete summary of the comments is attached to the ROD. Though comments were not responded to individually, six substantive issues were addressed briefly in the ROD: Rural Development authority to make a loan guarantee for the proposal; financial analysis of the proposal; future carbon regulation; carbon capture and sequestration; renewable energy sources and conservation; and, water use, quality and quantity.

Based on an evaluation of the information and impact analyses presented in the EIS including the evaluation of all alternatives and in consideration of Agency environmental policies and procedures (7 CFR part 1794), Rural Development found that the evaluation of reasonable alternatives is consistent with the NEPA. The Agency selects the Salem site as its preferred alternative. This concludes the Agency's compliance with NEPA and the Agency's environmental policies and procedures. A review and analysis of the proposal's justification, associated engineering studies, and preliminary financial information have been reviewed and the Agency concurs in the proposal's purpose and need. The proposal would have an adverse effect on the Great Falls Portage NHL. Prior to the approval of the expenditure of Federal funds, the National Historic

Preservation Act (NHPA), Section 106 process must conclude in accordance with 36 CFR part 800. Ongoing discussions are being conducted with all consulting parties concerning a resolution of adverse effects with the goal of concluding the Section 106 process with the execution of a Memorandum of Agreement (MOA) with the required parties. Once executed, the MOA will be integrated as a condition of the approval of the expenditure of Federal funds. Approval is contingent on SME obtaining and complying with all applicable local, State and Federal permits, implementing in good faith all mitigation measures and recommendations in the Final EIS and Biological Assessment, and continuing to participate in good faith as a consulting party in the NHPA Section 106 process and implementing all measures agreed to by the signatories to the MOA addressing the adverse effect to the Great Falls Portage NHL. This decision is in compliance with applicable statutory, regulatory and policy mandates, including the NEPA, the Endangered Species Act (ESA), Federal Aviation Administration (FAA) requirements, and the NHPA.

Drinking water systems are basic and vital to both health and economic development. With dependable water facilities, rural communities can attract families and businesses that will invest in the community and improve the quality of life for all residents. Without dependable water facilities, the communities cannot sustain economic development.

The USDA Rural Development Utilities Programs supports the sound development of rural communities and the growth of our economy without endangering the environment. Rural Utilities Service (RUS) programs are administered by USDA Rural Development. USDA Rural Development provides financial and technical assistance to help communities bring safe drinking water and sanitary, environmentally sound waste disposal facilities to rural Americans in greatest need.

The Revolving Fund (RFP) Grant Program has been established to assist communities with water or wastewater systems. Qualified private non-profit organizations will receive RFP grant funds to establish a lending program for eligible entities. Eligible entities for the revolving loan fund will be the same entities eligible to obtain a loan, loan guarantee, or grant from the Water and Waste Disposal and Wastewater loan

and grant programs administered by USDA Rural Development. As grant recipients, the non-profit organizations will set up a revolving loan fund to provide loans to finance predevelopment costs of water or wastewater projects, or short-term small capital projects not part of the regular operation and maintenance of current water and wastewater systems. The amount of financing to an eligible entity shall not exceed \$100,000.00 and shall be repaid in a term not to exceed 10 years. The rate shall be determined in the approved grant work plan.
