recordings of core mission related activities and principal figures of the Department and associated finding aids.

11. Environmental Protection Agency, (N1–412–07–4, 3 items, 3 temporary items). This schedule authorizes the agency to apply the existing disposition instructions to several record series regardless of recordkeeping medium. The records include National Contingency Plan product files, spill prevention control and countermeasure facility plans, and oil removal contingency plans. Paper recordkeeping copies of these files were previously approved for disposal.

12. Environmental Protection Agency, Agency-wide (N1-412-07-6, 2 items, 1 temporary item). This schedule authorizes the agency to apply the existing disposition instructions to record series regardless of recordkeeping medium. The records include Resource Conservation and Recovery Act permit files for hazardous waste generators, transporters and treatment, storage and disposal facilities, as well as facilities that comply with regulations without following the usual permitting process. Paper recordkeeping copies of these files were previously approved for disposal. Also included are Resource **Conservation and Recovery Act** hazardous waste land disposal permit files, for which paper recordkeeping copies previously were approved as permanent.

Dated: April 4, 2007.

NUCLEAR REGULATORY COMMISSION

[Docket No. 72-1]

General Electric Company; Morris Operation, Independent Spent Fuel Storage Installation; Notice of Consideration of Approval of Transfer of Special Nuclear Material License and Conforming Amendment and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering the issuance of an order under 10 CFR 72.50 approving the direct transfer of the Special Nuclear Material License No. SNM-2500 for the Morris Operation, Independent Spent Fuel Storage Installation (ISFSI) currently held by General Electric Company, as owner and licensed operator. The facility is located in Grundy County, Illinois, near Morris, Illinois. The transfer would be to GE-Hitachi Nuclear Energy Americas, LLC. The Commission is also considering amending the license for administrative purposes to reflect the proposed transfer.

According to an application for approval filed by General Electric Company, GE-Hitachi Nuclear Energy Americas, LLC, a newly formed entity, would acquire ownership of the facility following approval of the proposed license transfer, and would be responsible for the operation and maintenance of the Morris Operation, ISFSI. This new entity will be wholly owned by GE-Hitachi Nuclear Energy Holdings, LLC, created as a parent company. A U.S. subsidiary or subsidiaries of Hitachi Ltd., a Japanese company will hold a 40% ownership interest. General Electric, through various subsidiaries, will hold a 60% ownership interest.

No physical changes to the Morris Operation, ISFSI facility or operational changes are being proposed in the application.

[^]The proposed amendment would replace references to General Electric Company in the license with references to GE-Hitachi Nuclear Energy Americas, LLC, to reflect the proposed transfer.

Pursuant to 10 CFR 72.50, no license, or any part included in a license issued under this part for an ISFSI, shall be transferred, directly or indirectly, through transfer of control of the license, unless the Commission gives its consent in writing. The Commission will approve an application for the transfer of a license, if the Commission determines that the proposed transferee is qualified to hold the license, and that the transfer is otherwise consistent with applicable provisions of law, regulations, and orders issued by the Commission.

Before issuance of the proposed conforming license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

As provided in 10 CFR 2.1315, unless otherwise determined by the Commission with regard to a specific application, the Commission has determined that any amendment to the license of an ISFSI which does no more than conform the license to reflect the transfer action involves no genuine issue as to whether the health and safety of the public will be significantly affected. No contrary determination has been made with respect to this specific license amendment application.

The filing of requests for hearing and petitions for leave to intervene, and written comments with regard to the license transfer application, are discussed below.

Within 20 days from the date of publication of this notice, any person whose interest may be affected by the Commission's action on the application may request a hearing and, if not the applicant, may petition for leave to intervene in a hearing proceeding on the Commission's action. Requests for a hearing and petitions for leave to intervene should be filed in accordance with the Commission's rules of practice set forth in Subpart C "Rules of General Applicability: Hearing Requests, Petitions to Intervene, Availability of
