SUPPLEMENTARY INFORMATION:

I. Abstract

The NASA-sponsored Classroom of the Future (COTF) will conduct numerous studies on identifying and assessing learning and tracking flow in video. Though the methodology in each study may differ somewhat, the purpose of each collection is similar. Without basic research into assessment of learning in games, NASA Education will have no measurement of how much learning occurs in the games they develop. NASA will use this research to inform its investment in developing educational video games to support increased achievement in science, technology, engineering and mathematics education.

II. Method of Collection

Most of the data collection will be online using Web-based database technologies. Many of the pre- and post-test questions that will be asked in focus groups and face-to-face interviews will have responses compiled on-line to aid research efforts. Almost all the data collected will be acquired through

software that tracks user skill and flow in games.
