The Washington Research Library Consortium (WRLC) opened in 1987 when the major universities in the Washington D.C. area wanted to share library collections and information technology to enhance the resources available to their students and faculty. This presentation will cover the consortium's organization, services, governance and funding.

Guest Speaker

Bruce Hulse is the Director of Information Services at the Washington Research Library Consortium (WRLC) where he implements and enhances various components of the ALADIN digital library system and oversees of the WRLC Storage facility operation and delivery services. Hulse originally joined WRLC in 1990 as a systems librarian to work on the implementation of the first generation ALADIN system. Prior to joining WRLC, Hulse worked at the Brown University Libraries and the Columbia University Libraries. He holds BA and MSLS degrees from Columbia University. Bruce is also a member of the adjunct faculty at The Catholic University of America's School of Library and Information Science.

For more information on the Washington Research Library Consortium check out their website at http://www.wrlc.org/.

The Learning@Lunch series is designed to provide an informal setting at which topics of interest to federal information professionals will be presented. Each lecture is free and lasts approximately 90 minutes. Information professionals are encouraged to propose topics and presenters for upcoming series lectures. When possible, web conferencing will be utilized to expand opportunities to participate in the lecture.
