### Notes

1. The letter ॐ is used with "checked" (voiceless) consonants and indicates a change in pronunciation. It is written following four consonants only, the letters ॐ, ॐ, ॐ, ॐ, which are romanized *g*, *j*, *d*, and *b* respectively.
2. The mark ॐ̄ (a dot written above the line after a vowel) is used to indicate nasalization and is romanized as *ñ* after the vowel it modifies. Another mark, ॐ̄ (written below the line after the vowel it modifies) is used to indicate low pitch and is omitted in romanization.

**Other Marks Used in OI Script**

1. The mark ̄ , written over a letter, is used to indicate the prolongation of a vowel. It is omitted in romanization.
2. The mark - (similar to a hyphen) is used to separate "checked" consonants from other consonants or vowels. It is omitted in romanization.
