Public Law 109-432 authorizes mandatory Treasury payments to three United Mine Workers of America (UMWA) retiree health benefit plans (the Combined Benefit Fund, the 1992 Plan, and the 1993 Plan), to the extent that other federal funding sources do not meet the plans expenditure needs, subject to certain limitations. Interest earned on Abandoned Mine Land trust fund balances is available for transfer to cover funding shortfalls in the plans; unobligated balances in the fund are used to generate interest for this purpose.

ADMINISTRATIVE PROVISION

With funds available for the Technical Innovation and Professional Services program in this Act, the Secretary may transfer title for computer hardware, software and other technical equipment to State and tribal regulatory and reclamation programs. The Water and Related Resources account supports the development, management, and restoration of water and related natural resources in the 17 Western States. The account includes funds for operating and maintaining existing facilities to obtain the greatest overall level of benefits, to protect public safety, and to conduct studies on ways to improve the use of water and related natural resources. Work will be done in partnership and cooperation with non-Federal entities and other Federal agencies to reduce conflict, facilitate solutions to complex water issues and stretch limited water supplies. In 2009, Reclamation will partner with the U.S. Geological Survey to implement a Water Security Initiative that focuses resources and funding on areas in the West where conflict exists or is most likely to occur. This Initiative will merge two water conservation programs Water 2025 and the Water Conservation Field Services Program and award competitive grants based upon West-wide criteria as one approach to address and prevent such future conflicts.

The U.S. Geological Survey (USGS) provides research and scientific information to support the mission of DOI and the science needs of its land and resource management bureaus. The U.S. Geological Survey also works in collaboration with other Federal, State, and Tribal cooperators to conduct research and provide scientific data and information concerning natural hazards and environmental issues pertaining to the water, land, geologic, and biological resources of the Nation.

The 2009 Budget continues science programs that generate relevant, objective information for land managers and for communities throughout the Nation. Major areas of emphasis in the Budget include: increased information about water quantity and quality through a water census and development of predictive tools needed to guide decisions made by the private sector, localities, Tribes, States, and the Federal Government; expansion of the frontiers of scientific information about oceans and coastal areas and partnering with states in regional challenges; begin development of the framework

for a climate effects research and monitoring network; begin the collaborative process to define priorities for a national land imaging program; and enhanced monitoring to better understand large scale drivers of migratory bird populations and habitat change.

*Geographic research, investigations, and remote sensing.*—The USGS Geography Program seeks to observe the Earth at various scales using remote sensing to understand the human and environmental dynamics of land change. The Geography Program also provides scientific information to describe and interpret America's landscape by mapping the terrain, monitoring changes over time, and analyzing how and why these changes have occurred. The knowledge gained through these activities is used to model the processes of change and to forecast future changes.

*Geologic hazards, resources, and processes.*—The national program of onshore and offshore geologic research and investigations produces: 1) information on natural hazards of geologic origin such as earthquakes, volcanic eruptions, landslides, and coastal erosion; 2) geologic information for use in the management of public lands and in national policy determinations; 3) information on the chemistry and physics of the Earth, its past climate, and the geologic processes by which it was formed and is being modified; 4) geologic, geophysical, and geochemical maps and analyses to address environmental, energy and mineral resource, and hazards concerns; 5) environmental, hazards, energy and mineral resource assessments; and 6) improved methods and instrumentation for detecting and monitoring hazards, disseminating hazards information, and conducting assessments.

*Water resources investigations.*—The USGS water programs produce data, analyses, assessments, and methodologies to support Federal, State, Tribal, and local government decisions on water planning, water management, water quality, flood forecasting and warning, and enhancement of the quality of the environment. These programs work cooperatively with other Federal agencies, States, and other entities to leverage Federal resources to meet their mutual water information needs.

*Biological research.*—The national program of biological research: 1) conducts biological resources inventory and monitoring; 2) provides scientific information for the management of biological resources; and 3) predicts the consequences of environmental change and the effects of alternative management actions on plants, animals, and their habitats. The program conducts the high priority biological research needed by DOI's land management bureaus and operates the Cooperative Research Unit program, which provides research and information to resource managers, and trains natural resource professionals in partnership with university and State scientists.

*Enterprise information.*—The USGS enterprise information program supports bureau-level activities and investments in the areas of information technology, information security, information management, information policy and standards, and information science. As the primary vehicle for planning and executing the broad information goals and objectives of the USGS, the program provides bureau-level information policies, infrastructure, and services needed to support the bureau's scientific mission; creates an integrated information environment within the USGS; ensures that the bureau meets legislative and administrative information management mandates; and provides the basic foundation for easy discovery, access, acquisition, and use of USGS data and information. The National Geospatial Program is focused on improving geospatial data access, integration, and applications through implementation of *The National Map* and the National Spatial Data Infrastructure (NSDI). Partnerships with other Federal, State, and local agencies; the private sector; and academia are the keystone for accomplishing this mission.

**Global change.**—USGS provides critical science, monitoring, and predictive modeling of information related to our changing climate and its effects on the landscape and the Nation's resources. The knowledge and information that results from this program will help policy makers, resource managers, and citizens make informed decisions about the management of the landscapes for which they have responsibility and on which they live.

**Science support.**—Science support provides for bureau-wide management; executive direction and coordination; administrative, human resources, and business information systems management; and financial and personnel systems support provided by DOI's National Business Center.

**Facilities.**—This activity finances: 1) rental payments and operation and maintenance for properties; and 2) deferred maintenance and capital improvement.

**Reimbursable program.**—Reimbursements from non-Federal sources are from States, Tribes, and municipalities for: cooperative efforts and proceeds from sale to the public of copies of photographs and records; proceeds from sale of personal property; reimbursements from permittees and licensees of the Federal Energy Regulatory Commission; and reimbursements from foreign countries and international organizations for technical assistance. Reimbursements from other Federal agencies are for mission-related work performed at the request of the financing agency.

*Ecological services.*—The Service conserves, protects, and enhances fish, wildlife, plants, and their habitat by working with private landowners, States, and other Federal agencies. These partnership activities help make the listing of species under the Endangered Species Act unnecessary and protect

and recover those species that are listed. Financial assistance is provided to private landowners to restore or improve habitat for endangered species and other at-risk species. Technical assistance helps prevent or minimize adverse environmental effects of development projects. Contaminants are investigated, monitored, and assessed for effects on trust resources.

**National wildlife refuge system.**—The Service maintains the National Wildlife Refuge System consisting of 548 refuges, waterfowl production areas in 205 counties that are managed by 37 wetland management districts, and 49 coordination areas, totaling over 96 million acres. The National Wildlife Refuge System administers this network of lands and waters to conserve and restore fish, wildlife, plants, and their habitats.

**Migratory bird management and law enforcement.**—The Service directs and coordinates national migratory bird programs to protect and enhance populations and habitat of more than 900 species of birds. Grants and partnerships are key to these programs, such as Joint Ventures implementing the North American Waterfowl Management Plan. The Service Law Enforcement program investigates wildlife crimes, regulates wildlife trade, helps Americans understand and obey wildlife protections laws, and works in partnership with international, state, and tribal counterparts to conserve wildlife resources.

**Fisheries.**—The Fisheries Program consists of 70 national hatcheries, nine Fish Health Centers, seven Fish Technology Centers, 64 Fishery Resource Offices, and a Historic National Fish Hatchery. Working with partners, the Fisheries Program recovers, restores and maintains fish and other aquatic resources at self-sustaining levels; provides technical assistance to States, Tribes and others; and supports Federal mitigation programs for the benefit of the American Public.

**General operations.**—Funding for the Service's general operations provides policy guidance, program coordination, and administrative services to all fish and wildlife programs. The funds also support the Service's international activities, the National Conservation Training Center, and projects through the National Fish and Wildlife Foundation to restore and enhance fish and wildlife populations.

Consistent with the Administration's focus on working with partners to address imperiled species and other priority wildlife conservation needs, the State and Tribal Wildlife grant program provides funds to States, the District of Columbia, Tribes, and territories to develop and implement wildlife management and habitat restoration programs. Allocation of funds to the States is determined by a formula of one-third based on land area and two-thirds based on population and require a cost-share. Grants to the Tribes are awarded competitively. Additionally, roughly \$5,000,000 will be provided on a competitive basis to those projects that emphasize cooperative conservation and best demonstrate results linked to outcome performance goals.

Federal Land Acquisition funds are used to protect areas that have native fish and/or wildlife values and provide natural resource benefits over a broad geographical area, and for acquisition management activities. Emphasis is placed on acquiring important fish and wildlife habitat necessary for the conservation of listed, endangered and threatened species; nationally important wetlands; and additions to existing national wildlife refuges. The program focuses on projects that use alternative and innovative conservation tools, such as easements, and projects that include the input and participation of the affected local communities and stakeholders.

The Landowner Incentive Program provided cost-shared, competitive grants to States, the District of Columbia, territories, and Tribes to create, supplement or expand upon new or ongoing landowner incentive programs. These State, Tribal, and territorial programs provide technical and financial assistance to private landowners all across the country to help them protect and manage imperiled species and their habitat, while continuing to engage in traditional land use or working conservation practices. The program was phased out in 2008.

The Partnerships for Wildlife Act (16 U.S.C. 3741) authorizes wildlife conservation and appreciation projects to conserve fish and wildlife species and to provide opportunities for the public to enjoy these species through nonconsumptive activities. Grants to States are directed toward nonconsumptive activities and the conservation of species not taken for recreation, fur, or food; not listed as endangered or threatened under the Endangered Species Act of 1973; and not defined as marine mammals under the Marine Mammal Protection Act of 1972. The Budget proposes to close the account by cancelling longstanding unobligated balances.

The Fish and Wildlife Service is proposing to amend the Migratory Bird Hunting and Conservation Stamp Act, to increase the sales price for Duck Stamps from \$15 to \$25 for 2009. We estimate sales of approximately 1.4 million Duck Stamps in 2009 providing a total of \$35 million at the \$25 price, an increase of \$14 million annually. With the additional receipts, the Service anticipates acquisition of more than 6,800 acres in fee and approximately 10,000 acres in conservation easements in 2009.

Funds deposited into this account include direct appropriations and fines, penalties, and forfeitures collected under the authority of the Migratory Bird Treaty Act (16 U.S.C. 707) and interest on obligations held in the Federal Aid in Wildlife Restoration Fund. The North American Wetlands Conservation Fund supports wetlands conservation projects approved by the Migratory Bird Conservation Commission. A portion of receipts to the Sport Fish Restoration Account is also available for coastal wetlands conservation projects.

These projects help fulfill the habitat protection, restoration and enhancement goals of the North American Waterfowl Management Plan and the Tripartite Agreement among Mexico, Canada, and the United States. These projects may involve partnerships with public agencies and private entities, with non-Federal matching contributions, for the long-term conservation of habitat for migratory birds and other fish and wildlife, including species that are listed, or are candidates to be listed, under the Endangered Species Act (16 U.S.C. 1531).

Wetlands conservation projects include the obtaining of a real property interest in lands or waters, including water rights; the restoration, management or enhancement of habitat; and training and development for conservation management in Mexico. Funding may be provided for assistance for wetlands conservation projects in Canada or Mexico.

The Cooperative Endangered Species Conservation Fund provides grants to States and U.S. territories for conservation, recovery, and monitoring projects for species that are listed, or species that are candidates for listing, as threatened or endangered. Grants are also awarded to States and U.S. territories for land acquisition in support of Habitat Conservation Plans and species recovery efforts in partnership with local governments and other interested parties to protect species while allowing development to continue. The Fund is partially financed by permanent appropriations from the General Fund of the U.S. Treasury in an amount equal to five percent of receipts deposited to the Federal Aid in Wildlife and Sport Fish Restoration accounts and amounts equal to Lacey Act receipts over \$500,000. The actual amount available for grants is subject to annual appropriations. In FY2009, \$4.5m in unobligated funds are being permanently cancelled.

NATIONAL WILDLIFE REFUGE FUND—Continued

The Refuge Revenue Sharing Act (16 U.S.C. 715s) authorizes revenues through the sale of products from Service lands, less expenses for producing revenue and activities related to revenue sharing. The Fish and Wildlife Service makes payments to counties in which Service fee lands are located. If the net revenues are insufficient to make full payments according to the formula contained in the Act, direct appropriations are authorized to make up the difference.

The Federal Lands Recreation Enhancement Act (FLREA) was passed on December 8, 2004, as part of the Omnibus Appropriations bill for 2005. Approximately 200 Fish and Wildlife Service sites collect entrance fees and other receipts. All receipts are deposited into a recreation fee account of which at least 80 percent is returned to the collecting site.

The recreation fee program demonstrates the feasibility of user generated cost recovery for the operation and maintenance of recreation areas, visitor services improvements, and habitat enhancement projects on federal lands. Fees are used primarily at the site to improve visitor access, enhance public safety and security, address backlogged maintenance needs, enhance resource protection, and cover the costs of collection. FLREA authorizes this program through 2014.

The Federal Aid in Wildlife Restoration Act, now known as the Pittman-Robertson Wildlife Restoration Act, created a program to fund the selection, restoration, rehabilitation and improvement of wildlife habitat, hunter education and safety, and wildlife management research. Under the program, States, Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands are allocated funds from an excise taxes on sporting arms and ammunition, handguns, and a tax on certain archery equipment. States are reimbursed up to 75 percent of the cost of approved wildlife and hunter education projects.

The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (P.L. 106-408) amends the Pittman-Robertson Wildlife Restoration Act and authorizes a Multistate Conservation Grant Program and a firearm and bow hunter education and safety enhancement program that provides grants to the States.

The Federal Aid in Sport Fish Restoration Act, now known as the Dingell-Johnson Sport Fish Restoration Act (as modified by the Wallop-Breaux and other amendments), created a fishery resources, conservation, and restoration program funded by excise taxes on fishing equipment, and certain other sport fish related products.

Since 1992, the Sport Fish Restoration Account has supported coastal wetlands grants pursuant to the Coastal Wetlands Planning, Protection and Restoration Act (P.L. 101-646). Additional revenue from small engine fuel taxes was provided under the Surface Transportation Extension Act of 1997 and again by the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users, enacted for 2006 and beyond.

The Coastal Wetlands Planning, Protection and Restoration Act is funded through the Dingell-Johnson Sport Fish Restoration Act, which requires an amount equal to 18.5 percent of net deposits into the Sport Fish Restoration and Boating Safety Trust Fund, or amounts collected in small engine fuels excise taxes as provided by 26 U.S.C. 9504(b), whichever is greater, to be distributed as follows: 70 percent shall be available to the Corps of Engineers for priority project and conservation planning activities in Louisiana; 15 percent shall be available to the Fish and Wildlife Service for coastal wetlands conservation grants; and 15 percent to the Fish and Wildlife Service for wetlands conservation projects under Section 8 of the North American Wetlands Conservation Act (P.L. 101-233).

The Clean Vessel Act authorizes the Secretary of the Interior to make grants to States, in specified amounts as determined through a competitive award process, to carry out projects for the construction, renovation, operation, and maintenance of pumpout stations and waste reception facilities. The Dingell-Johnson Sport Fish Restoration Act, as amended, provides for the transfer of funds from the Sport Fish Restoration and Boating Trust Fund to the Sport Fish Restoration Account for use by the Secretary of the Interior to carry out the purposes of this Act and for use by the Secretary of Homeland Security for State recreational boating safety programs (46 USC 13106(a)(1)). The Sportfishing and Boating Safety Act of 1998 authorizes the Secretary of the Interior to develop national and state outreach plans to promote safe fishing and boating opportunities and the conservation of aquatic resources, as well as to make grants to states for developing and maintaining sewage disposal facilities and other boating facilities for recreational vessels.

Assistance is provided to States, Puerto Rico, Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and the District of Columbia for up to 75 percent of the cost of approved projects including: research into fisheries problems, surveys and inventories of fish populations, acquisition and improvement of fish habitat and provision of access for public use.

The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (P.L. 106-408) amends the Dingell-Johnson Sport Fish Restoration Act and authorizes a Multistate Conservation Grant Program and provides funding for several

fisheries commissions and the Sport Fishing and Boating Partnership Council.

The National Park System administers 391 areas and 78.8 million acres of land in 49 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, Samoa, and the

Northern Marianas. These areas have been established to protect and preserve the cultural and natural heritage of the United States and its territories. Park visits total over 272 million annually. This annual appropriation funds the operation of individual units of the National Park System as well as planning and administrative support for the entire system. Funds within this appropriation are used to support the cooperative effort for restoration of the Everglades and are available until expended. Within this appropriation, repair and rehabilitation funds are available for two years, to provide the flexibility needed to carry out this project program, in which typical projects include, but are not limited to, facility, campground, and trail rehabilitation; roadway overlay and/or reconditioning; bridge repair; wastewater and water line replacement; and the rewiring of buildings. The repair and rehabilitation program includes funding to implement an automated facility management software system and to conduct comprehensive facility condition assessments.

Funds are to initiate the new Centennial Challenge matching grant program. This ten-year effort would generate up to \$2 billion in donations and matching funds for the renewal of the National Park System in preparation for the Centennial celebration in 2016. The 2008 appropriation served as interim funding pending permanent authorization for the full ten-year program. All funds must be matched on a 50/50 basis and are to be administered under the existing challenge cost-share program structure.

The Land Acquisition and State Assistance appropriation uses funding derived from the Land and Water Conservation Fund to support NPS land acquisition activities and provide grants to States for the purchase of land for recreation activities. The Federal Land Acquisition Program provides funds to acquire certain lands, or interests in lands, for inclusion in the National Park System to preserve nationally important natural and historic resources. Funds are also used for Civil War Battlefield grants. The State Assistance Program provides grants for a wide array of State recreation projects as well as for acquiring lands, or interests in lands, for outdoor recreation purposes. No grants funds are requested in 2009.

Funds are also included for the National Park Service to manage and coordinate the Federal Land Acquisition Program. The administration of the State Assistance program grants awarded in prior years was moved in 2008 to the National Recreation and Preservation account, which also funds the administration of other grants.

The Historic Preservation Fund finances 60 percent of programmatic matching grants-in-aid to States and certified local governments, as well as grants to Indian Tribes. The President's Preserve America initiative assists local communities in designing heritage tourism programs that support sustainable uses for historic assets and create economic opportunities for communities. Preserve America grants help States and communities preserve their historic resources by incorporating

the resources into their local economies; the grants also help local communities develop resource management strategies and sound business practices for the continued preservation of heritage assets, including historic resources and associated landscapes and natural features. Save America's Treasures grants help restore historic sites and collections, including significant documents, objects, manuscripts, photographs, works of art, journals, still and moving images, sound recordings, historic structures, and sites that document and illuminate the history and culture of the United States of America.

*Park concessions franchise fees.*—Franchise fees for concessioner activities in the National Park System are deposited in this account and used for certain park operations activities in accordance with section 407 of Public Law 105-391. By law, 20 percent of franchise fees collected are used to support activities throughout the National Park System and 80 percent are retained and used by each collecting park unit for visitor services and for purposes of funding high-priority and urgently necessary resource management programs and operations.

*Concessions improvement accounts.*—National Park Service agreements with private concessioners providing visitor services within national parks can require concessioners to deposit a portion of gross receipts or a fixed sum of money in a separate bank account. A concessioner may expend funds from such an account at the direction of the park superintendent for facilities that directly support concession visitor services, but would not otherwise be funded through the appropriations process. Concessioners do not accrue possessory interests from improvements funded through these accounts.

*Park buildings lease and maintenance fund.*—Rental payments for leases to use buildings and associated property in the National Park System are deposited in this account and used for infrastructure needs at park units in accordance with section 802 of Public Law 105-391.

*Operation and maintenance of quarters.*—Revenues from the rental of Government-owned quarters to park employees are deposited in this account and used to operate and maintain the quarters.

The Budget proposes the President's National Parks Centennial Challenge, a new mandatory fund program to encourage increased public donations to national parks by matching contributions for signature projects and programs up to \$100 million a year for 10 years. As the central part of the President's National Parks Centennial Initiative, this Challenge continues the National Park Service's legacy of leveraging philanthropic investment for the benefit of our national parks.

ADMINISTRATIVE PROVISIONS

[For fiscal year 2008 and hereafter, if the Secretary of the Interior, or either party to a value determination proceeding conducted under a National Park Service concession contract issued prior to November 13, 1998, considers that the value determination decision issued pursuant to the proceeding misinterprets or misapplies relevant contractual requirements or their underlying legal authority, the Secretary or either party may seek, within 180 days of any such decision, the de novo review of the value determination decision by the United States Court of Federal Claims. This court may make an order affirming, vacating, modifying or correcting the determination decision.]

For the costs of administration of the Land and Water Conservation Fund grants authorized by section 105(a)(2)(B) of the Gulf of Mexico Energy Security Act of 2006 (P.L. 109-432), the National Park Service may retain up to five percent of the amounts which are authorized to be disbursed under such section, such retained amounts to remain available until expended.

The National Park Service may distribute to operating units based on the safety record of each unit the costs of programs designed to improve workplace and employee safety, and to encourage employees receiving worker's compensation benefits pursuant to chapter 81 of title 5, United State Codes, to return to appropriate positions for which they are medically able.

In addition to other uses set forth in section 407(d) of Public Law 105-391, franchise fees credited to a sub-account shall be available for expenditure by the Secretary, without further appropriation, for use at any unit within the National Park System to extinguish or reduce liability for Possessory Interest or leasehold surrender interest. Such funds may only be used for this purpose to the extent that the benefiting unit anticipated franchise fee receipts over the term of the contract at that unit exceed the amount of funds used to extinguish or reduce liability. Franchise fees at the benefiting unit shall be credited to the sub-account of the originating unit over a period not to exceed the term of a single contract at the benefiting unit, in the amount of funds so expended to extinguish or reduce liability.

[A] For fiscal year 2009 and hereafter, a willing seller from whom the Service acquires title to real property may be considered a "displaced person" for purposes of the Uniform Relocation Assistance and Real Property Acquisition Policy Act and its implementing regulations, whether or not the Service has the authority to acquire such property by eminent domain.

Section 3(f) of the Act of August 21, 1935 (16 U.S.C. 463(f)), related to the National Park System Advisory Board, is amended in the first sentence by striking ["2007"] "2009" and inserting ["2009"] "2010". (Department of the Interior, Environment, and Related Agencies Appropriations Act, 2008.)

Notwithstanding 25 U.S.C. 15, the Bureau of Indian Affairs may contract for services in support of the management, operation, and maintenance of the Power Division of the San Carlos Irrigation Project.

Appropriations for the Bureau of Indian Affairs and Bureau of Indian Education (except the [revolving fund for loans, the Indian loan guarantee and insurance fund,] *Revolving Fund for Loans Liquidating Account, Indian Loan Guaranty and Insurance Fund Liquidating Account, Indian Guaranteed Loan Financing Account, Indian Direct Loan Financing Account,* and the Indian Guaranteed Loan Program account) shall be available for expenses of exhibits.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Affairs or Bureau of Indian Education for central office oversight and Executive Direction and Administrative Services (except executive direction and administrative services funding for Tribal Priority Allocations, [and] regional offices, and facilities operations and maintenance) shall be available for contracts, grants, compacts, or cooperative agreements with the Bureau of Indian Affairs or Bureau of Indian Education under the provisions of the Indian Self-Determination Act or the Tribal Self-Governance Act of 1994 (Public Law 103-413).

In the event any *federally recognized* tribe returns appropriations made available by this Act to the Bureau of Indian Affairs, this action shall not diminish the Federal Government's trust responsibility to that tribe, or the government-to-government relationship between the United States and that tribe, or that tribe's ability to access future appropriations.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Affairs or Bureau of Indian Education, other than the amounts provided herein for assistance to public schools under 25 U.S.C. 452 et seq., shall be available to support the operation of any elementary or secondary school in the State of Alaska.

Funds made available under this Act may not be used to establish a charter school at a Bureau of Indian Education-funded school (as that term is defined in section 1146 of the Education Amendments of 1978 (25 U.S.C. 2026)), except that a charter school that is in existence on the date of the enactment of this Act and that has operated at a Bureau of Indian Education-funded school before September 1, 1999, may continue to operate during that period, but only if the charter school pays to the Bureau of Indian Education a pro rata share of funds to reimburse the Bureau of Indian Education for the use of the real and personal property (including buses and vans), the funds of the charter school are kept separate and apart from Bureau of Indian Education funds, and the Bureau of Indian Education does not assume any obligation for charter school programs of the State in which the school is located if the charter school loses such funding. Employees of Bureau of Indian Education-funded schools sharing a campus with a charter school and performing functions related to the charter schools operation and employees of a charter school shall not be treated as Federal employees for purposes of chapter 171 of title 28, United States Code.

Until October 1, 1994, the United States exercised jurisdiction over the Trust Territory of the Pacific Islands according to the terms of the 1947 Trusteeship Agreement between the United States and the Security Council of the United Nations. These responsibilities were carried out by the Department of the Interior.

The Department of the Interior is seeking no additional appropriations for the Trust Territory of the Pacific Islands. Compacts of Free Association have been implemented with the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau.

Remaining funds in the Trust Territory of the Pacific Islands account will be used to meet final transition responsibilities of the United States. Outlays from numerous on-going infrastructure construction projects in the Republic of Palau and the other two entities will continue as provided by the Compacts of Free Association and appropriation laws and will be reported as Trust Territory expenditures until such time as the activities cease.

The peoples of the Marshall Islands and the Federated States of Micronesia approved Compacts of Free Association negotiated by the United States and their governments. The Compact of Free Association Act of 1985 (Public Law 99-239) constituted the necessary authorizing legislation to make annual payments to the Republic of the Marshall Islands and the Federated States of Micronesia. Payments began in 1987 and continued through 2003 when the original economic assistance package expired. The Compact of Free Association Amendments Act of 2003, Public Law 108-188, continues financial assistance to the Federated States of Micronesia and the Republic of the Marshall Islands through 2023.

The Compact of Free Association with the Republic of Palau was implemented under the terms of Public Law 99-658 on October 1, 1994. This compact will provide annual benefits to the Republic totalling an estimated \$600 million over the fifteen-year period that began at the implementation date.

In 2000, the American Samoa Government (ASG) was authorized to borrow \$18.6 million from the U.S. Treasury in order to reduce significant past due debts to vendors. Repayment of the loan is secured and accomplished with funds, as they become due and payable to ASG from the Escrow Account established under the terms and conditions of the Tobacco Master Settlement Agreement. ASG agreed to significant financial reforms as a prerequisite to receiving the loan proceeds.

The mission of the Office of Inspector General is to promote excellence, accountability and integrity in the programs, operations and management of the Department of the Interior. The Office's focus is in assisting the Secretary and the Congress to target resources toward developing solutions for the Department's most serious management and program challenges, and toward high-risk areas vulnerable to fraud, waste, abuse and mismanagement. The Office is responsible for independently and objectively identifying risks and vulnerabilities that directly impact, or could impact, the Department's ability to accomplish its mission. The Office is required to keep the Secretary and the Congress fully and currently informed about problems and deficiencies relating to the administration of departmental programs and operations. Effective implementation of this mandate addresses the public's demand for greater accountability and integrity in the administration of government programs and operations and the demand for programs that work better, cost less, and get the results about which Americans care most.

Tribal trust funds are deposited into a consolidated account in the U.S. Treasury pursuant to: (1) general or specific acts of Congress; and (2) Federal management of Tribal real properties, the titles to which are held in trust for the Tribes by the United States. These funds are available to the respective Tribal groups for various purposes, under various acts of Congress, and are subject to the provisions of Tribal constitutions, bylaws, charters, and resolutions of the various Tribes, bands, or groups.

Commencing with 2000, most Tribal trust funds, including special funds, managed by the Office of the Special Trustee for American Indians were reclassified as non-budgetary. Ownership of these funds did not change, nor did the Federal Government's management responsibilities; changes were made for presentation purposes only. Some Tribal trust funds will remain budgetary, in either this Tribal Special Fund or the Tribal Trust Fund presented later in this section. Most of the assets of these funds are in investments held outside Treasury.

This consolidated display presents the activities associated with the following accounts: Three Affiliated Fort Berthold Trust Fund; Standing Rock Trust Fund; Papago Cooperative Fund; Ute Tribe Trust Fund; Pyramid Lake Indian Reservation Trust Fund; Cochiti Wetfields Project; and San Luis Rey Water Authority Trust Fund. More detailed information on specific account data is provided in the budget justification for the Office of the Special Trustee for American Indians.

Tribal trust funds are deposited into a consolidated account in the U.S. Treasury pursuant to: 1) general or specific acts of the Congress and 2) Federal management of Tribal real properties, the titles to which are held in trust for the Tribes by the United States. These funds are available to the respective Tribal groups for various purposes, under various acts of the Congress, and are subject to the provisions of Tribal constitutions, bylaws, charters, and resolutions of the various Tribes, bands, or groups.

Commencing with 2000, most Tribal trust funds, including special funds, managed by the Office of the Special Trustee were reclassified as non-budgetary. Ownership of these funds did not change, nor did the Federal Government's management responsibilities; changes were made for presentation purposes only. Some Tribal trust funds will remain budgetary, in either this Tribal Trust Fund or the Tribal Special Fund presented in this section. Most assets are in investments held outside the Treasury.

This consolidated display presents the activities associated with the Tribal trust fund accounts: George C. Edgeter Fund; Funds for Advancement of Indian Race; Ella M. Franklin Fund; Josephine Lambert Fund; Orrie Shaw Fund; Welmas Endowment Fund; Arizona Intertribal Trust Fund; Navajo Trust Fund; Lower Brule Trust Fund; Crow Creek Trust Fund; S. Ute Tribal Resource Fund; Ute Mtn Tribal Resource

Fund; Chippewa Cree Tribal Trust Fund; Shivwits Band of Paiute Indians Trust Fund; and N. Cheyenne Trust Fund. More detailed information on specific account data is provided in the budget justifications for the Office of the Special Trustee for American Indians.

The Indian Gaming Regulatory Act, as amended by the 1998 Interior and Related Agencies Appropriation Act (P.L. 105-83), established the National Indian Gaming Commission as an independent agency within the Department of the Interior. The Commission monitors and regulates gaming activities conducted on Indian lands. Operating costs of the Commission are financed to the greatest extent possible through annual assessments of gaming operations, regulated by the Commission. The Native American Technical Corrections Act of 2006 (Public Law 109-221) included a provision replacing the previous fee limitation contained in the Indian Gaming Regulatory Act with a maximum of 0.08 percent of the gross gaming revenues of all gaming operations subject to regulation under Indian Gaming Regulatory Act.

The Central Hazardous Materials Fund is used to fund remedial investigations/feasibility studies and cleanups of hazardous waste sites for which the Department of the Interior is liable. Authority is provided for amounts recovered from responsible parties to be credited to this account. Thus, the account may be composed of both annual appropriations of no-year funds and of offsetting collections. The Comprehensive Environmental Response, Compensation and Liability Act, as amended (42 U.S.C. Section 9601 et seq.) requires responsible parties, including Federal landowners, to investigate and clean up releases of hazardous substances.

Under the Natural Resource Damage Assessment and Restoration Fund (Restoration Fund), natural resource damage assessments will be performed in order to provide the basis for claims against responsible parties for the restoration of injured natural resources. Funds are appropriated to conduct damage assessments, provide restoration support, and for program management. In addition, funds will be received for the restoration of damaged resources and other activities and for natural resource damage assessments from responsible parties through negotiated settlements or other legal actions by the Department of the Interior.

Restoration activities include: 1) the replacement and enhancement of affected resources; 2) acquisition of equivalent resources and services; and, 3) long-term environmental monitoring and research programs directed to the prevention, containment, and amelioration of hazardous substances and oil spill sites.

The Restoration Fund operates as a departmentwide program, incorporating the interdisciplinary expertise of its various bureaus and offices. Natural resource damage assessments and the restoration of injured natural resources are authorized by the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 et seq.), Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq.), the Oil Pollution Act of 1990 (33 U.S.C. 2701 et seq.), and the Act of July 27, 1990 (16 U.S.C. 1911 et seq.). Since 1992, amounts received by the United States from responsible parties for restoration or reimbursement in settlement of natural resource damages may be deposited in the Fund and shall accrue interest.

EXXON VALDEZ RESTORATION PROGRAM

The Budget reflects the receipts, transfers, and mandatory spending by the Department of Interior associated with the civil and criminal settlements resulting from the 1989 Exxon Valdez oil spill in the Prince William Sound and surrounding areas. Funding from the settlements, including interest, is provided to Federal and Alaska State natural resource trustee agencies to restore the natural resources and services damaged by the spill. The Exxon Valdez Oil Spill Trustee Council consists of 3 State and 3 Federal trustees who oversee restoration of the injured ecosystem through the use of civil settlement funds. The criminal settlement funds are managed separately by the Federal and Alaska State governments, but are coordinated with the Council.

The original civil settlement with the Exxon Corporation included a re-opener provision valid from September 2002 to September 2006, which provided an opportunity for the Trustee governments to claim up to an additional \$100 million for natural resource injury that could not have been known or anticipated at the time of settlement. In late 2006, the Trustee governments issued a demand letter for \$92 million to the ExxonMobil Corporation, as well a comprehensive restoration project plan for the clean up of lingering oil.

The civil settlement and interest earned to date total roughly \$1 billion, of which \$148 million remains, outside the Treasury. The balance is managed on behalf of the Trustee Council by the State of Alaska, (Exxon Valdez Investment Fund), with funds earmarked for future habitat acquisition and protection and for marine research and ecological monitoring in the spill zone.

**Preparedness.**—This activity funds the non-emergency and predictable aspects of the Department's wildland fire program. Preparedness includes readiness, operational planning, oversight, procurement, training, supervision, and deployment of wildland fire suppression personnel and equipment prior to wildland fire occurrence. It also includes activities related to program monitoring and evaluation, and integration of fire into land-use planning.

**Fire suppression operations.**—This activity funds the emergency and unpredictable aspects of the Department's wildland fire management program. Suppression operations include the total spectrum of management actions taken on wildland fires in a safe, cost-effective manner, considering public benefits and values to be protected, and consistent with resource objectives and land management plans. Emergency actions taken during and immediately following a wildfire to stabilize the

soil and structures to prevent erosion, floods, landslides, and further resource damage are included in this activity. Emergency stabilization actions may be performed within one year of containment of a fire. Funding requests are guided by the historical 10-year average of suppression expenditures, adjusted for inflation.

**Other operations.**—This activity funds programs designed to reduce the risk of damage resulting from catastrophic wildland fires. Hazardous fuels reduction, fire facilities construction and maintenance, post-fire rehabilitation of burned areas, applied research, and grants to rural fire departments are funded in other operations. The hazardous fuels reduction activity includes the planning, all operational aspects, and monitoring of treatments to reduce fuel loads and promote ecosystem health in forests and rangelands. Methods for fuels reduction include prescribed fire, mechanical, and chemical treatments or a combination of methods. The fire facilities program funds construction and maintenance of facilities to house firefighters and equipment used in wildland firefighting and hazardous fuels reduction. Facilities funded in this activity include crew quarters, warehouses, fire caches, dispatch centers, fire stations, engine storage, and aviation bases. The burned area rehabilitation program begins the restoration process for lands and resources damaged by wildland fires that would not return to fire-adapted conditions without intervention. Soil stabilization and the introduction of native and other desirable plant species are employed for up to three years following containment of a fire to return severely-burned areas to appropriate fire regimes and resource conditions. The joint fire science activity funds the Department's share of the Joint Fire Science program, an interagency partnership to sponsor applied research to assist field managers in fire suppression, fuels treatment, and post-fire rehabilitation.

The Budget assumes that the first oil and gas lease sale in the coastal plain of the Arctic National Wildlife Refuge (ANWR) would be held in 2010, producing \$7.0 billion in receipts from bonuses which would be shared 50/50 between the Federal government and the State of Alaska. The Federal share of the royalties from the leased areas would be directed to reducing the budget deficit.

[SEC. 411. No timber sale in Region 10 shall be advertised if the indicated rate is deficit when appraised using a residual value approach that assigns domestic Alaska values for western redcedar. The percentage shall be calculated by Region 10 on a rolling basis as each sale is sold (for purposes of this amendment, a “rolling basis” shall mean that the determination of how much western redcedar is eligible for sale to various markets shall be made at the time each sale is awarded). Western redcedar shall be deemed “surplus to the needs of domestic processors in Alaska” when the timber sale holder has presented to the Forest Service documentation of the inability to sell western redcedar logs from a given sale to domestic Alaska processors at a price equal to or greater than the log selling value stated in the contract. (2) there is a growing scientific consensus that human activity is a substantial cause of greenhouse gas accumulation in the atmosphere; and

(3) mandatory steps will be required to slow or stop the growth of greenhouse gas emissions into the atmosphere.

(b) It is the sense of the Congress that there should be enacted a comprehensive and effective national program of mandatory, market-based limits and incentives on emissions of greenhouse gases that slow, stop, and reverse the growth of such emissions at a rate and in a manner that: (1) will not significantly harm the United States economy; and (2) will encourage comparable action by other nations that are major trading partners and key contributors to global emissions.]

Funding for the Justice Information Sharing Technology (JIST) account will provide for corporate investments in information technology. This centralized fund, under the control of the DOJ Chief Information Officer, will ensure that investments in information sharing technology are well-planned and aligned with the Department's overall information technology (IT) strategy and enterprise architecture, and that all DOJ components are able to operate in a technologically unified environment, particularly with respect to preventing terrorist

attacks on the United States. The current major initiatives/projects are described below.

**Joint Automated Booking System.**—The Joint Automated Booking System (JABS) is a Department of Justice information sharing project that provides data to the FBI's Integrated Automated Fingerprint Identification System (IAFIS) through an automated process for the collection and transmission of fingerprint, photographic, and biographical data. The mission of JABS is to: (1) improve the booking process through automation; (2) enable agencies to share and exchange arrest information; and (3) maintain a federal offender tracking system.

**Justice Consolidated Office Network (JCON) Office Automation.**—JCON provides a reliable and robust common office automation platform for several Departmental components. The cornerstone of the project is the JCON Standard Architecture, which defines the IT computing framework, including networked workstations, servers, and printers; a common set of core applications (e-mail, word processing, etc.); and a basic set of system administration tools.

**Litigation Case Management System.**—This project will develop a common framework for the processes and systems that support litigation case management. The implementation of a common solution for litigation case management systems will provide for: (1) more accurate reporting on case loads and activity across the United States.; (2) operational efficiencies and greater information sharing; (3) long term cost savings by eliminating redundant systems and investments.

**JCON S/TS Program.**—The JCON Secret/Top Secret (S/TS) Program provides a seamless, Department-wide IT infrastructure for electronically sharing, processing, and storing classified information. JCON S/TS is a reliable, secure system which allows attorneys, intelligence analysts, law enforcement staff, and managers to exchange classified electronic data within and between components on a real-time basis.

**Law Enforcement Information Sharing Program.**—The Law Enforcement Information Sharing Program (LEISP) is a Department-wide strategy to facilitate the sharing of information about terrorism, criminal activity, and threats to public safety. LEISP will implement the information technology tools needed to facilitate timely, appropriate, and secure sharing of information across the law enforcement community.

**Unified Financial Management System.**—The Unified Financial Management System will allow the Department of Justice to streamline and standardize business processes and procedures across all components, providing secure, accurate, timely, and useful financial and procurement data to program managers, and to produce component and Department level financial statements.

The Communications Assistance for Law Enforcement Act (CALEA) of 1994 authorized the Attorney General to reimburse telecommunications carriers for costs associated with modifying digital equipment installed before January 1, 1995, in order that court-authorized wiretaps may be performed.

The Omnibus Consolidated Appropriations Act of 1997 (P.L. 104-208) extended eligibility for reimbursement to telecommunications equipment manufacturers and providers of support services. In addition to direct appropriations to the Fund, Congress authorized Federal agencies with law enforcement and intelligence responsibilities to transfer to the Fund

unobligated balances that are available until expended, upon compliance with Congressional notification requirements.

With the appropriations provided in 2001, total funding for the program has reached \$500 million, the authorization level provided in the Act.

The Office of the Federal Detention Trustee (OFDT) is mandated is to direct detention programs and improve and coordinate detention activities for the Departments of Justice and Homeland Security. The Federal Detention Trustee (the Trustee) reports to the Deputy Attorney General on detention activities, policy, and forecasting appropriations formulation and execution. The Trustee's primary responsibility is to ensure operational effectiveness and the efficient expenditure of appropriated funds so that the Federal agencies involved in detention provide for the safe, secure, and humane confinement of persons in the custody of the United States Marshals Service (USMS). The Trustee's role encompasses the care of Federal detainees in private, State, and local facilities, and includes housing, subsistence, transportation, medical care, and medical guard service. The Trustee also manages the Justice Prisoner and Alien Transportation System (JPATS) and strives to ensure equality among participating agencies while allowing unimpeded prisoner transportation operations.

For 2009, the Trustee will continue to work with State and local governments and private service providers to maintain adequate detention capacity to house detained individuals charged with Federal offenses awaiting trial or sen-

tencing. The Federal Government utilizes various methods to house detainees. For example, detention bed space for Federal detainees is acquired at the lowest cost to the Government through: (1) Federally-owned and managed detention facilities, where the Government has paid for construction and operation of the facility. This is by in large paid for in the Federal Bureau of Prisons' (BOP) Salaries and Expenses account; (2) Intergovernmental Agreements (IGAs) with State and local jurisdictions, whose excess prison and jail bed capacity is utilized and paid via a daily rate; and, (3) Private performance-based contract facilities, where a daily rate is paid. Based on anticipated growth rates in the Federal detention population, over three-quarters of the USMS's federally detained population will likely be housed in State, local and private facilities.

In an effort to reduce detention costs, the Trustee has implemented efficiencies such as the e-Designate program which automates the sentencing-to-commitment process and accelerates the movement of prisoners from detention to Bureau of Prisons (BOP) facilities. The Trustees office also facilitated the establishment of in-transit holdover facilities to further reduce the time from sentencing to incarceration by accelerating the movement of prisoners to a designated BOP facility and by increasing alternatives to detention programs.

As a key strategy to expand the President's e-government initiative, OFDT has also developed DSNetwork, a multifaceted, full-service Internet site designed to meet various detention services needs. DSNetwork is a consolidated detention services site which allows for automated processing of IGAs (eIGA), provides a facility locator and a Detention Services Schedule, posts detention facility review information, allows agencies to maintain an automated multi-year acquisition plan for long-range planning, and collects and maintains procurement data for agencies to use to assess bed space availability. DSNetwork reduces lengthy and cumbersome workload by transitioning from paper-based processing toward automation and is significantly improving interaction between government agencies and service providers. This web-based, Internet accessible tool provides timely, accurate, and comprehensive detention information on a secure, centralized site (<https://www.ofdt.net>).

Additionally, OFDT developed a Quality Assurance Program (QAP) based on Federal Performance-Based Detention Standards (FPBDS). The elements of the QAP include: Quality Assurance Reviews (QAR)—annual reviews of contracted private detention facilities and identified state and local IGA detention facilities—which produce corrective action plans for any noted deficiencies; a Facility Review Management System, which automates the QAR process; and, a Contract Monitoring Instrument (CMI), which is an automated tool that government representatives can use to monitor the performance of a facility on a more frequent basis, thus ensuring a consistent approach to monitoring non-Federal detention bed space. The QAP data is collected and provided through the DSNetwork to detention agencies and facility providers with the underlying goal of improving the safety, security and treatment of federal detainees.

The Office of the Inspector General (OIG) was statutorily established in the Department of Justice on April 14, 1989. The OIG investigates alleged violations of criminal and civil laws, regulations, and ethical standards arising from the conduct of the Department's employees. The OIG provides leadership and assists management in promoting integrity, economy, efficiency, and effectiveness within the Department and in its financial, contractual, and grant relationships with others. Also by statute, the OIG reports to the Attorney General, Congress, and the public on a semiannual basis regarding its significant activities.

The Audit function is responsible for independent audits and reviews of Department organizations, programs, functions, computer security and information technology systems, and financial statement audits. The Audit function also conducts or reviews external audits of expenditures made under Department contracts, grants, and other agreements.

The Investigations function investigates allegations of civil rights violations, bribery, fraud, abuse and violations of other laws, rules and procedures that govern Department employees, contractors, and grantees. This function also develops these cases for criminal prosecution, civil action, or administrative action. In some instances the OIG refers allegations to components within the Department and requests notification of their findings and of any disciplinary action taken.

The Evaluation and Inspections function conducts analyses and makes recommendations to decisionmakers for improvements in Department programs, policies, and procedures. In addition, this function also conducts shorter and more time-sensitive reviews and evaluations to provide managers with early warnings about possible program deficiencies.

The Oversight and Review function investigates allegations of significant interest to the American public and Congress and of vital importance to the Department.

The Executive Direction and Control function provides program direction for the OIG. Responsibilities include policy development, legal counsel, congressional affairs, planning, budget, finance, personnel, procurement, automated data processing, and general support services.

The United States Parole Commission makes decisions to grant or deny parole to Federal and D.C. prisoners serving sentences of one year and a day or more, sets conditions of parole, supervises parolees and mandatory releasees, re-commits parolees in the event of violations of the conditions of supervision, and determines the termination of supervision in accordance with the Parole Commission and Reorganization Act of 1976.

In addition, the Commission seeks to improve the rehabilitation process by monitoring an effective parole supervision program through U.S. and District of Columbia probation officers and through research studies that evaluate the effectiveness of parole programs. The U.S. Parole Commission has responsibility for parole and parole revocation hearings and supervision of District of Columbia parolees and supervised releases under the National Capital Revitalization and Self-Government Improvement Act (P.L. 105-33).

The Federal Government is represented in each of the 94 judicial districts and the District of Columbia Superior Court by a U.S. Marshal. The primary missions of the U.S. Marshals Service (USMS) are protection of the Federal judiciary, protection of witnesses, execution of warrants and court orders, and custody and transportation of unsentenced prisoners. The USMS is the principal support force in the Federal judicial system and an integral part of the Federal law enforcement community.

The USMS is proposing to restructure its 2009 budget in accordance with the President's Management Reform Agenda and the Government Performance Results Act. The new structure merges the Construction and Salaries and Expenses budgets into one streamlined budget.

For 2009, \$10.3 million in program increases are requested for judicial security in the Southwest Border district offices.

**Reimbursable program.**— Federal funds in 2009 are derived from the Administrative Office of the U.S. Courts for the court security program, the Office of the Federal Detention Trustee for the housing and transportation of USMS prisoners in non-Federal facilities, the Assets Forfeiture Fund for seized assets management, the Organized Crime Drug Enforcement Task Force Program for multi-agency drug investigations, and the Office of National Drug Control Policy and the Centers for Disease Control for security services. Non-Federal funds are derived from State and local governments for witness protection and the transportation of prisoners pursuant to State writs, as well as fees collected from service of civil process and sales associated with judicial orders.

This appropriation is used to pay fees and expenses to witnesses who appear on behalf of the Government in litigation in which the United States is a party. Factors over which the Department of Justice has little, or no, control affect the costs incurred. The United States Attorneys, the United States Marshals, and the Department's six litigating divisions are served by this appropriation.

*Fees and expenses of witnesses.*—Pays the fees and expenses associated with the presentation of testimony on behalf of the United States for fact witnesses, who testify as to events or facts about which they have personal knowledge, and for expert witnesses, who provide technical or scientific testimony. This program also pays the fees of physicians and psychiatrists who examine accused persons upon order of the court to determine their mental competency.

*United States trustee system fund.*—The United States trustees supervise the administration of bankruptcy cases and private trustees in the Federal Bankruptcy Courts and litigate against fraud and abuse in the system. The Bankruptcy Judges, U.S. Trustees and Family Farmer Bankruptcy Act of 1986 (Public Law 99-554) expanded the pilot trustee program to a twenty-one region, nationwide program encompassing 88 judicial districts. The Bankruptcy Abuse Prevention and Consumer Protection Act of 2005 (Public Law 109-8) expanded United States trustees' existing responsibilities to include means testing, credit counseling/debtor education, and debtor audits. User fees that are assessed offset the annual appropriation.

The Comprehensive Crime Control Act of 1984 established the Assets Forfeiture Fund, into which forfeited cash and the proceeds of sales of forfeited property are deposited. Authorities of the fund have been amended by various public laws enacted since 1984. Under current law, authority to use the fund for certain investigative expenses shall be specified in annual appropriation acts. Expenses necessary to seize, detain, inventory, safeguard, maintain, advertise or sell property under seizure are funded through a permanent, indefinite appropriation. In addition, beginning in 1993, other general expenses of managing and operating the assets forfeiture program are paid from the permanent, indefinite portion of the

fund. Once all expenses are covered, the balance is maintained to meet ongoing expenses of the program. Excess unobligated balances may also be allocated by the Attorney General in accordance with 28 U.S.C. 524(c)(8)(E).

The Organized Crime Drug Enforcement Task Force (OCDETF) Program consists of a nationwide structure of nine regional task forces that combine the resources and expertise of its seven member Federal law enforcement agencies, in cooperation with State and local investigators and with prosecutors from the U.S. Attorneys Offices and the Criminal and Tax Divisions, to target and destroy major narcotic-trafficking and money-laundering organizations. The task forces perform the following activities:

**Investigation.**—This activity includes the resources for direct investigative, intelligence and support activities of the task forces, focusing on the disruption and dismantlement of drug trafficking and money laundering organizations by various organized crime enterprises. Organizations participating under the Investigations function are the Drug Enforcement Administration, Federal Bureau of Investigation, Internal Revenue Service, Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Coast Guard, U.S. Marshals Service, and U.S. Immigration and Customs Enforcement.

**Prosecution.**—This activity includes the resources for the prosecution of cases generated through the investigative efforts of task force agents. Litigation efforts are intended to dissolve drug trafficking and money laundering organizations in their entirety, most notably the leaders of these organizations. This includes activities designed to secure the seizure and forfeiture of the assets of these enterprises. Participating agencies are the U.S. Attorneys, and the Department of Justice’s Criminal Division and Tax Division.

Number of new OCDETF Investigations initiated .....	1,016	975	975
Percent of active OCDETF investigations linked to CPOT .....	14%	15%	15%

At the request of the Attorney General, the OCDETF member agencies, with input from the intelligence community, developed the Consolidated Priority Organization Target (CPOT) List, which identifies those significant international drug trafficking and money laundering organizations most responsible for the illegal drug supply to the United States. In FY 2007, the CPOT list includes 46 international targets. As of Dec. 10, 2007, OCDETF had identified 578 current OCDETF investigations that are targeting components of CPOT-listed organizations. The CPOT strategy seeks to incapacitate the foreign-based organization heads, their domestic transportation and smuggling systems, their regional and local distribution networks, and their financial operations, thereby interrupting the flow of drugs into the United States and diminishing the capacity of the CPOT organizations to reconstitute themselves. The strategy aims to ensure that OCDETF funding is being used as effectively and efficiently as possible. In addition to CPOTs, OCDETF also prioritizes cases linked to Regional Priority Organization Targets (RPOTs), whose drug activities have a significant impact on the particular drug threats facing one or more of the nine

OCDETF regions. OCDETF’s commitment to pursuing priority targets is evident from the steady increase in the percentage of cases linked to these targets. During 2007, 14 percent of OCDETF’s active investigations were linked to a CPOT, while 21 percent were linked to RPOTs.

In 2007, OCDETF initiated 1,016 new cases, a 5 percent increase over the number initiated in 2006. OCDETF district and regional coordination groups are working to ensure that only those investigations that meet the standards established for OCDETF cases are approved and the quality of these new investigations clearly reflects OCDETF’s commitment to pursue the most significant drug trafficking and money laundering organizations.

The mission of the FBI is to protect the United States from terrorist and foreign intelligence activities; to uphold the law through the investigation of violations of Federal criminal law; to provide leadership and assistance to Federal, State, local, and international law enforcement agencies; and to perform these responsibilities in a manner that is responsive to the needs of the public and is faithful to the Constitution of the United States.

Protecting America in the current challenging national security and criminal environment requires that the FBI refocus its priorities; realign its workforce to address these priorities; and improve management policies and operating procedures to enhance flexibility, agility, effectiveness, and accountability. The FBI's revised strategic priorities are, in order:

- Protect the United States from terrorist attack,
- Protect the United States against foreign intelligence operations and espionage,
- Protect the United States against cyber-based attacks and high technology crimes,
- Combat public corruption at all levels of government,
- Protect civil rights,
- Combat transnational and national criminal organizations and enterprises,
- Combat major white-collar crime,
- Combat significant violent crime,
- Support federal, state, county, municipal, and international partners,
- Upgrade technology to successfully perform the FBI's mission.

FBI investigations and operations are conducted through a network of 56 major field offices, over 400 smaller field offices (resident agencies), and four information technology centers located throughout the United States; the FBI Academy and engineering complex at Quantico, Virginia; a fingerprint identification and criminal justice information services center in Clarksburg, West Virginia; over 50 foreign liaison posts; and FBI Headquarters in Washington, D.C.

A number of FBI activities are carried out on a reimbursable basis. For example, the FBI is reimbursed for its participation in Interagency Crime and Drug Enforcement programs and by other Federal agencies for certain investigative services, such as pre-employment background inquiries and fingerprint and name checks. The FBI also is authorized to conduct fingerprint and name checks for certain non-federal agencies.

For 2009, the FBI proposes \$438 million in program enhancements. These enhancements support national security, intelligence, information technology, information sharing, and infrastructure needs. Highlights of these initiatives include: (1) enhanced national security and intelligence capabilities, to include training; (2) enhanced surveillance capabilities; (3) enhanced information sharing capabilities; and (4) improved information technology.

DEA's mission is to enforce the controlled substances laws and regulations of the United States. DEA's major focus is the disruption and dismantlement of Priority Target Organizations (PTOs)—domestic and international drug trafficking and money laundering organizations having a significant impact upon drug availability in America. DEA emphasizes PTOs with links to organizations on the Attorney General's Consolidated Priority Organization Target (CPOT) list, which represents the “Most Wanted” drug supply and money laundering organizations believed to be primarily responsible for the United States' illicit drug supply. In addition to keeping drugs and drug-related violence out of the United States, DEA plays a vital role in the areas of national security, border security, and immigration.

DEA's activities are divided into three main categories:

**Domestic Enforcement.**—Through effective enforcement efforts and associated support functions, DEA disrupts and dismantles the leadership, command, control, and infrastructure of major drug syndicates, criminal organizations, and violent drug trafficking groups that threaten the United States. This activity contains most of DEA's resources, including domestic enforcement groups, state and local task forces, other federal and local task forces, intelligence groups, and all the support functions essential to accomplishing their mission. Strategic objectives have been established to:

—Identify and target the national/regional organizations most responsible for the domestic distribution and manufacture of illicit drugs;

—Systematically disrupt or dismantle targeted organizations by arresting/convicting their leaders and facilitators, seizing and forfeiting their assets, targeting their money laundering operations, and destroying their command and control networks; and,

—Work with international offices to dismantle domestic organizations directly affiliated with international cartels.

**International Enforcement.**—DEA works with its foreign counterparts to attack the vulnerabilities in the leadership, production, transportation, communications, finance, and distribution sectors of major international drug trafficking organizations. Strategic objectives include:

—Identifying, prioritizing, and targeting the most significant international drug and chemical trafficking organizations;

—Disrupting and dismantling the networks, financial infrastructures, operations, and the resource bases of targeted international drug and chemical trafficking organizations; and,

—Preventing drug trafficking organizations from funding terrorist organizations and activities.

*State and Local Assistance.*—DEA advises, assists, and trains state and local law enforcement and local community groups to ensure a consistent national approach to drug law enforcement. DEA’s training enhances their enforcement capabilities and provides access to the latest intelligence and investigative methods. The strategic objectives are to:

- Provide clandestine methamphetamine laboratory training to state and local law enforcement officers;
- Assist state and local law enforcement with efforts to clean up hazardous waste from clandestine methamphetamine laboratories; and,
- Assist local efforts to control the production of cannabis.

*Reimbursable Programs.*—The primary reimbursements to DEA are for the Interagency Crime and Drug Enforcement Task Force program and the Department of Justice Assets Forfeiture Fund.

For 2009, \$20.6 million is provided to support DEAs Drug Flow Attack Strategy, an innovative, multi-agency strategy, designed to significantly disrupt the flow of drugs, money, and chemicals between the source zones and the United States by attacking vulnerabilities in the supply, transportation systems, and financial infrastructure of major drug trafficking organizations. This strategy calls for aggressive, well-planned and coordinated enforcement operations with host-nation counterparts in global source, transit zones, and arrival zones. Key components of this strategy include intelligence driven enforcement, multilateral cooperation, sequential enforcement operations, and end game capability. This strategy will also enhance efforts to stop the flow of illegal drugs into the United States by way of the U.S. southwest border.

DEA’s general long-term goal supports the Department of Justice’s efforts to reduce illegal drug availability. DEA accomplishes its general long-term goal by disrupting or dismantling identified PTOs. The measures below reflect DEA’s focus on PTOs and those PTOs linked to organizations on the Attorney General’s CPOT list.

Public Law 102-395 established the Diversion Control Fee Account in 1993. Fees charged by the Drug Enforcement Administration under the Diversion Control Program are set at a level that ensures the recovery of the full costs of operating this program. By carrying out the mandates of the Controlled Substances Act (CSA), DEA ensures that adequate supplies of controlled drugs are available to meet legitimate medical, scientific, industrial, and export needs, while preventing, detecting, and eliminating diversion of these substances to illicit traffic. The CSA requires physicians, pharmacists, and chemical companies to register with the DEA in order to distribute or manufacture controlled substances or listed chemicals. Investigations conducted by DEA's Diversion Control Program fall into two distinct categories: the diversion of legitimately manufactured pharmaceutical controlled substances and the diversion of controlled chemicals (List I and II) used in the illicit manufacture of controlled substances. Strategic objectives include:

—Identifying and targeting those responsible for the diversion of pharmaceutical controlled substances through traditional investigation and cyber crime initiatives to systematically disrupt and dismantle those entities involved in diversion schemes;

—Supporting the registrant population with improved technology, including e-commerce and customer support, while maintaining cooperation, support and assistance from the regulated industry;

—Educating the public on the dangers of prescription drug abuse and taking proactive enforcement measures to combat emerging drug trends; and,

—Ensuring an adequate and uninterrupted supply of pharmaceutical controlled substances and listed chemicals to meet legitimate medical, commercial, and scientific needs.

For 2009, DEA is requesting programmatic enhancements totaling \$0.5 million under the Diversion Control Fee Account. These resources will be used to place a diversion investigator position in Guatemala, and fund the Diversion Control Programs portion of DEA-wide information technology infrastructure upgrades.

This appropriation will provide for the custody and care of an average daily population of 210,120 offenders and for the maintenance and operation of 115 penal institutions, 6 regional offices, and a central office located in Washington, D.C. The appropriation also finances the incarceration of sentenced Federal prisoners in State and local jails and other facilities for short periods of time. An average daily population of 36,000 sentenced prisoners will be in contract facilities in 2009.

The Federal Prison System (FPS) receives reimbursements for the daily care and maintenance of State and local offenders, for utilities used by Federal Prison Industries, Inc., for staff housing, and for meals purchased by FPS staff at institutions.

The FPS has restructured its 2009 Budget in accordance with the President's Management Reform Agenda and the Government Performance and Results Act. The new structure reflects actual costs by decision unit, and condenses the Salaries and Expenses budget from four decision units (Inmate Care and Programs, Institution Security and Administration, Contract Confinement, and Management and Administration) to three decision units (Inmate Care and Programs, Institution Security and Administration, and Contract Confinement).

**Inmate Care and Programs.**—This activity covers the costs of all food, medical supplies, clothing, welfare services, release clothing, transportation, gratuities, staff salaries (including salaries of Health Resources and Services Administration commissioned officers), and operational costs of functions directly related to providing inmate care. This decision unit also finances the costs of education and vocational training, drug treatment, religious programs, psychological services, and other inmate programs such as Life Connections. This activity also covers costs associated with regional and central office executive direction and management support functions related to providing inmate care such as medical and drug treatment programs.

**Institution Security and Administration.**—This activity covers costs associated with the maintenance of facilities and institution security. This activity finances institution maintenance, motor pool operations, powerhouse operations, institution security and other administrative functions. Finally, this activity covers costs associated with regional and central office executive direction and management support functions such as research and evaluation, systems support, financial management, budget functions, safety, and legal counsel.

**Contract Confinement.**—This activity provides for the confinement of sentenced Federal offenders in Government owned, contractor-operated facilities and State, local, and private contract facilities, and for the care of Federal prisoners in contract community residential centers and assistance by the National Institute of Corrections to State and local corrections. This activity also covers costs associated with management and oversight of contract confinement functions.

Its mission is to employ and train Federal inmates through a diversified program providing products and services to other Federal agencies. These operations are conducted in such a manner as to maximize meaningful inmate employment opportunities and minimize the effects of competition on private industry and labor. Employment provides inmates with work, occupational knowledge and skills, plus money for personal expenses and family assistance.

FPI strives to provide additional industrial employment opportunities at existing and planned institutions.

**Budget program.**—Federal Prison Industries, Inc., operations are entirely self-sustaining, and no appropriations are required for its operations. The amounts used by the Corporation for administrative expenses are subject to a congressional limitation. Information regarding this limitation is provided separately following this account.

**Financing program.**—Revenues are derived entirely from the sale of products and services to other Federal agencies. Operating expenses are applied against these revenues, resulting in operating income or loss. Earnings surplus to the needs of the manufacturing operations, capital improvements and cash reserves are used to pay accident compensation.

**Operating results.**—To date, Federal Prison Industries, Inc., has returned to the Treasury a total of \$82 million of retained income excess to the Corporation's needs. No contributions from budget authority have been made to offset deficits for non-revenue producing outlays since the inception of the fund.

The Office of Justice Programs (OJP) is requesting \$134.6 million in FY 2009 for the Justice Assistance appropriation. This appropriation includes programs that provide grants, contracts, and cooperative agreements for research, development and evaluation; development and dissemination of quality statistical and scientific information; and promotion and expansion of law enforcement information sharing initiatives and systems.

Through leadership, funding, and technical support, OJP plays a significant role in the development of new techniques and methods in the areas of crime prevention, forensic science, and violence and victimization research. The research and statistical data compiled by OJP staff are used at all levels of government to guide decision making and planning efforts related to law enforcement, courts, corrections, and other criminal justice issues. Grants, technical assistance, and national leadership provided by OJP supported the establishment of the Regional Information Sharing System, which has emerged as one of the Nation's most important law enforcement intelligence sharing networks. OJP continues to support efforts to expand and improve information sharing among the Nation's Federal, state, local, and tribal law enforcement and criminal justice agencies.

*Research, Evaluation, and Demonstration Program.*—The National Institute of Justice (NIJ) serves as the research and development agency of the Department of Justice, as authorized by 42 U.S.C. 3721–3723. The mission of NIJ is to advance scientific research, development, and evaluation to enhance the administration of justice and public safety by providing objective, independent, evidence-based knowledge, and tools to meet the challenges of crime and justice, particularly at the state and local levels. NIJ research, development, and evaluation (RD&E) efforts support practitioners and policy makers at all levels of government.

NIJ focuses its resources in program areas where Federal assistance will generate the greatest benefit in order to successfully address the wide range of mandates assigned to it by Congress. During strategic and budgetary planning, NIJ emphasizes RD&E activities into the following major program areas: (1) State and Local Law Enforcement; (2) Forensic Science; (3) Crime Prevention; (4) Violence and Victimization; and (5) Corrections and Courts.

RD&E efforts funded by NIJ concentrate on practical and effective approaches to improving crime and delinquency prevention, crime control, and the administration of justice. NIJ research funding supports the development of new standards, and tools for criminal justice practitioners; testing of innovative concepts, equipment, and program models in the field; development of new knowledge through research on crime, justice systems, violence and victimization issues; and evaluation of existing programs and responses to crime. Information generated by NIJ research activities is actively disseminated to numerous targeted audiences across the United States, including policymakers, program partners, and Federal, state, local, and tribal justice agencies.

*Criminal Justice Statistics Program.*—The Bureau of Justice Statistics (BJS) serves as the primary statistical arm of the Department of Justice, as authorized by 42 U.S.C. 3721–3735. The Criminal Justice Statistics Program is BJS base program and funds ongoing statistical series. BJS collects and analyzes statistical data on all aspects of the criminal justice system and assists state, local, and tribal govern-

ments in collecting and analyzing justice statistics. It disseminates quality information and statistics to inform policy makers, researchers, criminal justice practitioners, and the general public.

The Criminal Justice Statistics Program collects, analyzes and publishes data on a wide range of criminal justice topics, including: (1) Victimization; (2) Law Enforcement; (3) Prosecution; (4) Courts and Sentencing; (5) Corrections; (6) Tribal Justice; (7) Justice Expenditure and Employment; (8) International justice systems; and (9) Drugs, alcohol, and crime.

In addition, BJS administers the State Justice Statistics (SJS) Program for the Statistical Analysis Centers (SACs). SACs have been established in all states and most territories to centralize and integrate criminal justice statistical functions. Through financial and technical assistance to the state SACs, the SJS Program provides support to each state to coordinate and conduct statistical activities within the state, conduct research to estimate impacts of legislative and policy changes, and serve as a liaison in assisting BJS to gather data from respondent agencies within their states.

*Regional Information Sharing System (RISS).*—This program, authorized by 42 USC 3796h(d) and administered by the Bureau of Justice Assistance (BJA), is the only national criminal intelligence system operated by and for state and local law enforcement agencies. Six regional intelligence centers operate in mutually exclusive geographic regions that include all 50 states, the District of Columbia, and U.S. territories, with some member agencies in Canada, Australia, and England. These regional centers facilitate information sharing to support member agency investigative and prosecution efforts by providing state-of-the-art investigative support and training, analytical services, specialized equipment, and secure information-sharing technology. The centers also provide secure encrypted e-mail and communications capabilities to over 6,000 Federal, state, county, and municipal law enforcement agencies nationwide.

RISS initially supported state and local law enforcement. However, the regional information sharing concept has expanded from efforts in combating drug trafficking and organized criminal activity to intelligence sharing across jurisdictional boundaries. Section 701 of the USA PATRIOT Act authorized RISS to operate secure information sharing systems to enhance the investigative and prosecutorial abilities of participating law enforcement agencies in addressing terrorism.

The Office of Justice Programs (OJP) is requesting \$404 million for the State and Local Law Enforcement Assistance appropriation. This appropriation account includes programs that establish and build on partnerships with state, local, and tribal governments, and faith-based and community organizations. These programs provide Federal leadership on high-priority criminal justice concerns such as violent crime, criminal gang activity, illegal drugs, information sharing, and related justice system issues. The discretionary grants, training programs, and technical assistance activities authorized under this account assist law enforcement agencies, courts, local community partners and other components of the criminal justice system in preventing and addressing violent crime, protecting the public, and ensuring that offenders are held accountable for their actions.

For FY 2009, the Weed and Seed Program will be incorporated into the Byrne Public Safety and Protection Program. This program was previously funded under a separate appropriation account (Weed and Seed Program Fund). The FY 2009 Budget also proposes to transfer community policing development and training into this account, which was previously funded under a separate appropriation account (Community Oriented Policing Services). The transfer will help to ensure better coordination of comprehensive training and technical assistance initiatives for state and local law enforcement on issues related to violent crime control and community policing.

For FY 2009, funding requested for this account will support the following initiatives:

**Violent Crime Reduction Partnership Initiative: \$200 million.** Funding for this program supports communities affected by high rates of violent crime to address this problem by forming effective multi-jurisdictional law enforcement partnerships between Federal, state, and local law enforcement agencies. Through a competitive grant process, OJP provides funding and technical assistance to communities to establish and enhance partnerships to investigate and reduce violent crime—including efforts to address drug trafficking and criminal gang activity, which contribute to many violent offenses.

**Byrne Public Safety and Protection Program: \$200 million.** This program consolidates the most successful OJP law enforcement assistance programs into a single, flexible grant that allows state, local, and tribal governments to develop programs appropriate to the particular needs of their jurisdictions. Through a competitive grant process, OJP focuses assistance on those jurisdictions experiencing significant criminal justice problems and assists state and local governments in addressing a number of high-priority criminal justice concerns.

**Community Policing Development: \$4 million.** This program provides technical assistance and training to states, units of local government, Indian Tribal governments, and other public and private entities to advance community policing, expand cooperation between law enforcement agencies and members of the community, and enhance public safety.

The Office on Violence Against Women (OVW) is requesting \$280 million for programs to prevent and respond to violence against women and related victims. OVW provides national leadership against domestic violence, dating violence, sexual assault, and stalking, and supports a multifaceted approach to responding to these crimes. Funding will support the Prevention and Prosecution of Violence Against Women and Related Victim Services Program. This appropriation account supports a new consolidated, competitive grant program, including contracts, cooperative agreements and other assistance to support State, local, tribal and community efforts to develop and implement effective, coordinated prevention and prosecution of domestic violence, dating violence, sexual assault and stalking, and support related victims services. Such awards are designed to forge state, local and tribal partnerships among police, prosecutors, the judiciary, victim advocates, health care providers, faith leaders, and others, in order to help provide victims with the protection and services they need to pursue safe and healthy lives, while simultaneously enabling communities to hold offenders accountable.

The Office of Justice Programs (OJP) is requesting \$185 million for the Juvenile Justice Programs appropriation. This appropriation account includes programs that support state, local and tribal community efforts to develop and implement effective, coordinated prevention and intervention juvenile programs. Such programs are designed to: reduce juvenile delinquency and crime; protect children from sexual exploitation; and improve the juvenile justice system so that it protects public safety, holds offenders accountable, and provides treatment and rehabilitative services tailored to the needs of juveniles and their families.

For FY 2009, funding will support the Child Safety and Juvenile Justice Program, which consolidates existing juvenile justice and exploited children programs such as the Internet Crimes Against Children into a single, flexible grant program. Through a competitive discretionary grant process, OJP will assist State and local governments in addressing multiple child safety and juvenile justice needs to: reduce incidents of child exploitation and abuse, including those facilitated by the use of computers and the Internet, improve juvenile justice outcomes, and address school safety needs.

America's youth are facing an ever changing set of problems and barriers to successful lives. As a result, OJP is constantly challenged to develop enlightened policies and programs to address the needs and risks of those youth who enter the

juvenile justice system. OJP remains committed to leading the nation in efforts addressing these challenges, which include: preparing juvenile offenders to return to their communities following release from secure correctional facilities; dealing with the small percentage of serious, violent, and chronic juvenile offenders; helping States address the disproportionate confinement of minority youth; and helping children who have been victimized by crime and child abuse.

Programs supported by the Crime Victims Fund focus on providing compensation to victims of crime and survivors; supporting appropriate victims services programs and victimization prevention strategies; and building capacity to improve response to crime victims needs and increase offender accountability. The Fund was established to address the need for victim services programs, and to assist State, local, and tribal governments in providing appropriate services to their communities.

The Fund is financed by collections of fines, penalty assessments, and bond forfeitures from defendants convicted of Federal crimes. The 2009 Budget proposes to appropriate \$590 million from collections and balances to provide for victim compensation, services, and related needs.

Enacted in 1998, the Workforce Investment Act (WIA) is the primary authorization for this appropriation account. WIA authorization expired on September 30, 2003. The Act is intended to revitalize the Nation's job training system to provide workers with the information, advice, job search assistance, and training they need to get and keep good jobs, and to provide employers with skilled workers. Funds appropriated for this account generally are available on a July to June program year basis, and substantial advance appropriation amounts are provided.

*Adult employment and training activities.*—Grants to provide financial assistance to States and territories to design and operate training and employment assistance programs for adults, including low-income individuals and public assistance recipients.

*Dislocated worker employment and training activities.*—Grants to provide reemployment services and retraining assistance to individuals dislocated from their employment.

*Youth activities.*—Grants to support a wide range of activities and services to prepare low-income youth for academic and employment success, including summer jobs. The program links academic and occupational learning with youth development activities.

*Reintegration of Ex-Offenders.*—Supports activities to help individuals exiting prison make a successful transition to community life and long-term employment. The 2008 Budget merged the Prisoner Re-entry and Responsible Reintegration of Youthful Offenders programs into a single program that would provide mentoring and job training to promote the

successful return of adult and juvenile ex-offenders into mainstream society.

*Native Americans.*—Grants to Indian tribes and other Native American groups to provide training, work experience, and other employment-related services to Native Americans.

*National programs.*—Provides program support for WIA activities and nationally administered programs for segments of the population that have special disadvantages in the labor market.

*Community-Based Job Training Grants.*—A competitive grant program for building training capacity and training workers through community and technical colleges.

*Job Corps.*—Funding for the Job Corps program, formerly provided in this account, is now shown in the Office of Job Corps account for all years.

The Administration will propose legislation to reform the Workforce Investment Act (WIA). The legislation will seek to increase State flexibility to administer the programs, require that a greater percentage of resources be directed to training services for workers instead of administrative overhead, increase individual choice by offering "Career Advancement Accounts," streamline the performance accountability system, and increase the funds available for training by re-

quiring State matching funds. The proposal will consolidate the Adult, Dislocated Worker, Youth Activities, Employment Service State grants, Work Opportunity Tax Credit, and labor market information grants into a single State grant to facilitate coordination and eliminate duplication in the provision of services.

This program provides part-time work experience in community service activities to unemployed, low-income persons aged 55 and over. The program was deemed "Ineffective" by a Performance Assessment Rating Tool assessment, due to inadequate competition in the grants process, lack of data on program performance and impact, and duplication with other Federal programs. While the Older Americans Act Amendments of 2006 (P.L. 109-365) reauthorized and made some improvements in Title V of the Older Americans Act, the program still suffers from inadequate competition and low levels of performance in getting participants into unsubsidized employment. The Department of Labor conducted a one-time competition of its national grants (which represent a little more than three-quarters of program funding) in 2006, but the Older Americans Act Amendments prohibited competition beyond the current pool of national grantees until 2010. In program year 2006, the program fell short of its targets for placement in employment, placing less than one-third.

This account funds the Trade Adjustment Assistance (TAA) program, which provides weekly cash benefits, training, and job search and relocation allowances to certain workers dis-

placed by international trade. The account also funds the Alternative Trade Adjustment Assistance (ATAA) demonstration program of wage insurance for older workers.

The authorization for the TAA for Workers program expired December 31, 2007, but the fiscal year 2008 consolidated appropriations act provided funding at a level sufficient to keep the program operating through September 2008. This appropriation has the effect of continuing the full operation of the program, including issuing certifications of eligibility for new groups of workers after December 31, 2007, through fiscal year 2008. The Administration supports continuation of the TAA for Workers program. The budget request for this account provides sufficient funds to continue the TAA for Workers program through fiscal year 2009, including issuing certifications for new workers, and to cover the phase-out costs of the ATAA demonstration program.

While the benefits of trade are broadly spread across our economy, some American workers are adversely affected by new competition in certain industries. The Administration recognizes that the Federal Government has a responsibility to help workers who have been adversely impacted by trade to obtain the retraining and interim benefits they need. Trade Adjustment Assistance (TAA) is an important part of our Nation's efforts to target these workers with reemployment services that will help them transition to good jobs with good wages.

The Administration strongly supports TAA reauthorization that includes needed reforms to help workers adversely affected by trade access the training and reemployment services they need to return to work quickly. These reforms include the following principles. Trade impacted workers must have: (1) increased individual choice to "earn and learn" through the TAA program; (2) improved access to education and training; (3) access to education and training prior to a trade-impacted layoff; and (4) access to services through a streamlined and efficient workforce investment system.

**Unemployment compensation.**—State administration amounts provide administrative grants to State agencies which pay unemployment compensation to eligible workers and collect State unemployment taxes from employers. These agencies also pay unemployment benefits to former Federal personnel and ex-servicemembers as well as trade readjustment allowances to eligible individuals. State administration amounts also provide administrative grants to State agencies to improve the integrity and financial stability of the unemployment compensation program through a comprehensive performance management system, UI Performs. The purpose is to effect continuous improvement in State performance and related activities designed to assess and reduce errors and prevent fraud, waste, and abuse in the payment of unemployment compensation benefits and the collection of unemployment taxes. National activities relating to the Federal-State unemployment insurance programs are conducted through contracts or agreements with the State agencies or with non-State entities. A workload reserve is included in State administration to meet increases in the costs of administration resulting from increases in the number of claims filed and claims paid. The appropriation automatically provides additional funds whenever unemployment claims workload increases above budgeted levels.

The request for additional funding for in-person reemployment and eligibility assessments of claimants of unemployment compensation builds upon the success of a number of States in reducing improper payments and speeding reemployment using these assessments. Because most unemployment claims are now filed by telephone or Internet, in-person assessments conducted in the One-Stop Career Centers can help determine continued eligibility for benefits and adequacy of work search, verify the identity of beneficiaries where there is suspicion of possible identity theft, and provide referral to reemployment assistance to those who need additional help. The \$40 million requested for additional reemployment and eligibility assessments is estimated to provide benefit savings of \$155 million. It is important that this integrity initiative and other new enforcement investments be fully funded. The Administration is proposing to fund them as contingent appropriations. To ensure full funding of reemployment and eligibility assessments, the Administration proposes to employ a budget enforcement mechanism that allows for an adjustment by the Budget Committees to the section 302(a) allocation to the Appropriations Committees found in the concurrent resolution on the budget. In addition, the Administration will

seek to establish statutory spending limits, as defined by section 251 of the Balanced Budget and Emergency Deficit Control Act of 1985, and to adjust them for this purpose. To ensure full funding of the increases, either of these adjustments would only be permissible if the base level for reemployment and eligibility assessments was funded at \$10 million and if the use of the funds was clearly restricted to the specified purpose. The maximum allowable adjustment to the 302(a) allocation and/or the statutory spending limit for this program would be \$40 million for 2009 (see chapter 15 in Analytical Perspectives).

**Employment service.**—The public employment service is a nationwide system providing no-fee employment services to job-seekers and employers. State employment service activities are financed by State grants distributed under a demographically based funding formula. Employment service allotments are funded on a program year basis running from July 1 through June 30 of the following year. In 2009, the Administration proposes to terminate the Employment Service State grants program, which duplicates the services provided under the Workforce Investment Act (WIA) programs and uses a costly, separate delivery system.

Employment service activities serving national needs, including foreign labor certification, are conducted through specific reimbursable agreements between the States and the Federal Government under the Wagner-Peyser Act, as amended, and other legislation. Starting with fiscal year 2009, all funding for foreign labor certification activities will be requested in a new account, Foreign Labor Certification Administration. States also receive funding under this activity for administration of the Work Opportunity Tax Credit, as well for amortization payments for those States that had independent retirement plans prior to 1980 in their State employment service agencies.

**One-stop career centers.**—These funds are used to support the joint Federal-State efforts to improve the comprehensive One-Stop system created under WIA. This system provides workers and employers with quick and easy access to a wide array of enhanced career development and labor market information services.

The Administration will repropose legislation to reform the Workforce Investment Act (WIA). The legislation will seek to increase State flexibility to administer the programs, require that a greater percentage of resources be directed to training services for workers instead of administrative overhead, increase individual choice by offering "Career Advancement Accounts," streamline the performance accountability system, and increase the funds available for training by requiring State matching funds. The proposal will consolidate the Adult, Dislocated Worker, Youth Activities, Employment Service State grants, Work Opportunity Tax Credit, and labor market information grants into a single State grant to facilitate coordination and eliminate duplication in the provision of services. The new consolidated grant will be shown in the Training and Employment Services account.

This account provides repayable advances to the Black Lung Disability Trust Fund for making payments from that fund whenever its balances prove insufficient. The funding requested in this appropriation for 2009 is entirely for Black Lung. This spending authority is presented as authority to borrow in the Black Lung Disability Trust Fund.

This account may also provide advances to several other accounts to pay unemployment compensation to eligible individuals under various Federal and State unemployment compensation laws whenever the balances in those accounts prove insufficient or whenever legislation allows reimbursements to be made. Advances made to the Federal Employees Compensation Account in the Unemployment Trust Fund and to the Federal Unemployment Benefits and Allowances account are nonrepayable, as are certain reimbursements to the Extended Unemployment Compensation Account (EUCA), as allowed by law. All other advances made to the Federal Unemployment Account and to EUCA (both in the Unemployment Trust Fund) are repaid, with interest, to the general fund of the Treasury.

This account provides for the administration of the foreign labor certification programs within the Employment and Training Administration. Under these programs, U.S. employers that can demonstrate a shortage of qualified, available U.S. workers and that there would be no adverse impact on similarly situated U.S. workers may seek the Secretary of Labor's certification as a first step in the multi-agency process required to hire a foreign worker to fill critical permanent or temporary vacancies. Major programs include the permanent, H-2A temporary agricultural, H-2B temporary non-agricultural and temporary highly skilled worker visas. The account is divided into Federal and State activities.

*Federal Administration.*—Provides leadership, policy, and operational direction to Federal activities supporting the effective and efficient administration of foreign labor certification programs.

*State grants.*—Provides grants to State labor agencies in 54 States and U.S. territories funding employment-related activities required for the administration of Federal foreign labor certification programs. Includes State Workforce Agency posting and circulation of job orders and other assistance to employers in the recruitment of U.S. workers, processing of employer requests for prevailing wage determinations for the permanent and temporary programs, State processing of H-2A agricultural and H-2B non-agricultural temporary labor certification applications, State safety inspection of housing provided by employers to workers, and State development of prevailing wage and prevailing practice surveys used to set wages and standards in a defined geographic area.

The 2009 Budget proposes legislation to establish cost-based user fees for new applications under the permanent and H-2B temporary foreign labor certification programs, and proposes legislation to allow the Department to retain fees for applications under the H-2A temporary labor certification program and modify the fee to cover program costs. The fees would offset the State and Federal costs of administering these programs, and once fully implemented would eliminate the need for appropriations for this purpose. Upon enactment of the fee, requests for funding in the Foreign Labor Certification administration account would be reviewed and adjusted.

The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment Trust Fund. All State and Federal unemployment tax receipts are deposited in the Trust Fund and invested in Government securities until needed for benefit payments or administrative expenses. The portion of the Trust Fund funded with Federal taxes provides repayable advances (loans) to the States when the balances in their individual State accounts are insufficient to pay benefits. The Trust Fund may receive repayable advances from the general fund when it has insufficient balances to make advances to States or to pay the Federal share of extended unemployment benefits.

State payroll taxes pay for all regular State unemployment benefits. During periods of high State unemployment, there is a stand-by program of extended benefits, financed one-half by State unemployment taxes and one-half by the Federal unemployment payroll tax, which are also paid out of the Trust Fund. In addition, the Federal unemployment tax pays the costs of Federal and State administration of the unemployment insurance system, veterans employment serv-

ices, surveys of wages and employment, and about 97 percent of the costs of the Employment Service.

The Federal Employees Compensation Account (FECA) provides funds to States for unemployment compensation benefits paid to eligible former Federal civilian personnel, Postal Service employees, and ex-servicemembers. In turn, the various Federal agencies reimburse FECA for benefits paid to their former employees. Any additional resources necessary to assure that the FECA account can make the required payments to States will be provided from the Advances to the Unemployment Trust Fund and Other Funds account.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the Unemployment Trust Fund, and receipts from a tax on railroad payrolls are deposited into the Trust Fund to meet expenses.

The Administration will repropose legislation to reform the Workforce Investment Act (WIA). The legislation will seek to increase State flexibility to administer the programs, require that a greater percentage of resources be directed to training services for workers instead of administrative overhead, increase individual choice by offering "Career Advancement Accounts," streamline the performance accountability system, and increase the funds available for training by requiring State matching funds. The proposal will consolidate the Adult, Dislocated Worker, Youth Activities, Employment Service State grants, Work Opportunity Tax Credit, and labor market information grants into a single State grant to facilitate coordination and eliminate duplication in the provision of services. The new consolidated grant will be shown in the Training and Employment Services Account.

This wholly owned government corporation administers mandatory insurance programs to prevent loss of pension benefits under covered private, defined-benefit pension plans if single-employer plans terminate or if multiemployer plans are unable to pay benefits.

**Single employer benefit payment.**—The single-employer program protects about 33.8 million participants. The number of plans increased slightly from 28,800 pension plans in 2006 to 28,900 in 2007. Under this program, a company may voluntarily seek to terminate its plan, or Pension Benefit Guaranty Corporation (PBGC) may seek termination under certain circumstances. The PBGC must seek termination when a plan cannot pay current benefits. A plan that cannot pay all benefits may be ended by a “distress” termination, but only if the employer meets tests proving severe financial distress, for example, the likelihood that continuing the plan would force the company to shut down. If the terminated plan cannot pay at least the PBGC-guaranteed benefits, the PBGC uses its funds to ensure guaranteed benefits are paid.

In a “standard” termination, plan assets must be sufficient to pay all benefits before the plan is allowed to end. That payment is in the form of an annuity purchased from an insurance company or a lump sum payment. After the payment is made, the PBGC guarantee ends.

Government trusteeships at end of year .....	3,783	3,883	3,983

Retirees receiving monthly benefits .....	631,330	656,930	680,931

**Multi-employer financial assistance.**—The multiemployer insurance program protects about 10.0 million participants, up from 9.9 million participants in 2006. The number of plans decreased from 1,600 in 2006 to 1,530 in 2007. Multiemployer pension plans are maintained under collectively bargained agreements involving unrelated employers, generally in the same industry. If a PBGC-insured multiemployer plan is unable to pay guaranteed benefits when due, the PBGC will provide the plan with financial assistance to continue paying guaranteed benefits, ordinarily in the form of a loan to the plan.

**Pension insurance activities.**—Includes pension premium collections, premium investments, pre-trusteeship work, and pension insurance program protection activities.

**Pension plan termination.**—Includes all activities related to trusteeship; plan asset management, investment and accounting; and benefit administration services.

**Operational support.**—Includes the administrative, information technology infrastructure, and other shared program support for both PBGC’s insurance and plan termination activities.

Without sufficient assets .....	110	100	100

**Financing.**—The primary source of financing is annual premiums paid by sponsors of ongoing covered plans, which vary

according to the plans’ funding level. Other sources of financing include assets from terminated plans, investment income, and amounts due PBGC from the sponsors of terminating plans.

**Operating results.**—The following tables show the status of PBGC’s trust funds and PBGC’s operating results.

As of September 30, 2007, PBGC's single-employer and multi-employer programs reported deficits of \$13.1 billion and \$955 million, respectively. While the PBGC has sufficient liquidity to meet its obligations for a number of years, neither the single-employer nor multiemployer program has the resources to satisfy fully the agency's long-term obligations to plan participants. Legislation will be proposed in 2009 to adjust the insurance premiums that pension plans pay to PBGC. The Administration will propose to give PBGC Board the authority to raise premiums to produce the revenue necessary to meet expected future claims and retire PBGC deficit over ten years. These reforms will improve PBGC financial condition and safeguard the future benefits of American workers.

*Enforcement of wage and hour standards.*—The Wage and Hour Division works to obtain and encourage compliance with the minimum wage, overtime, child labor, and other employment standards under the Fair Labor Standards Act (FLSA), the Migrant and Seasonal Agricultural Worker Protection Act (MSPA), the Family and Medical Leave Act, certain provisions of the Immigration and Nationality Act (INA), the wage garnishment provisions in Title III of the Consumer Credit Protection Act, and the Employee Polygraph Protection Act. Prevailing wages are determined and employment standards are also enforced under various Government contract wage standards. In 2009, approximately 300,000 persons are expected to be aided under the FLSA through securing agreements with firms to pay back wages owed to their workers. In government contract compliance actions, about 20,000 persons will be aided through securing agreements to pay wages owed to workers. Under MSPA, approximately 1,400 investigations will be completed. In the course of all on-site investigations, investigators will routinely check for employer compliance with child labor standards, and over 1,200 targeted child labor investigations will be conducted. In all "directed" (non-complaint) investigations, investigators will also routinely check

for compliance with the employment eligibility verification recordkeeping requirements of the INA.

*Federal contractor equal employment opportunity (EEO) standards enforcement.*—The Office of Federal Contract Compliance Programs (OFCCP) enforces equal employment opportunity and nondiscrimination requirements of Federal contractors and subcontractors. In particular, OFCCP enforces: Executive Order 11246, which prohibits employment discrimination on the basis of race, sex, religion, color, and national origin; Section 503 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990 (through a memorandum of understanding with the Equal Employment Opportunity Commission), which prohibit employment discrimination against individuals with disabilities; and the Vietnam Era Veterans Readjustment Assistance Act of 1974, as amended, which prohibits employment discrimination against certain protected veterans. OFCCP programs cover close to 100,000 work-sites with a total workforce of 12 million persons. OFCCP monitors contractors' compliance through compliance evaluations, with a focus on systemic discrimination cases, and reporting requirements. In 2009, approximately 2,500,000 individuals will be covered through 7,700 compliance evaluations, 175 complaint investigations, and 2,400 other compliance actions. OFCCP also ensures that Federal contractors and subcontractors are provided linkages to recruitment sources for hiring and advancement of minorities, women, protected veterans and individuals with disabilities, and will conduct 600 compliance assistance events in FY 2009. OFCCP also honors Federal contractors and other organizations through the Secretary of Labor Opportunity Awards and the EVE/EPIC program for their outstanding compliance initiatives.

*Labor-management standards.*—The Office of Labor-Management Standards (OLMS) receives and discloses reports of unions and others in accordance with the Labor Management Reporting and Disclosure Act (LMRDA), including union financial reports; audits union financial records and investigates possible embezzlements of union funds; conducts union officer election investigations; supervises reruns of union officer elections pursuant to voluntary settlements or after court determinations that elections were not conducted in accordance with the LMRDA; and administers the statutory program to certify employee protection provisions under various Federally-sponsored transportation programs. In 2009, OLMS plans enhanced efforts to advance union transparency and financial integrity protections, primarily through increased union audits and compliance assistance efforts. OLMS expects to process 35,000 reports and conduct a total of 4,783 investigations, audits, and supervised elections. In 2009, the Department will submit proposed legislation authorizing OLMS to use civil monetary penalties to enforce reporting provisions of the LMRDA.

*Federal programs for workers' compensation.*—The Office of Workers' Compensation Programs (OWCP) administers the Federal Employees' Compensation Act, the Longshore and Harbor Workers' Compensation Act, the Energy Employees Occupational Illness Compensation Program Act, and the Black Lung Benefits Act. These programs ensure that eligible disabled and injured workers or their survivors receive compensation and medical benefits and a range of services including rehabilitation, supervision of medical care, and technical and advisory counseling to which they are entitled.

*Program direction and support.*—The Program Direction and Support (PDS) activity provides centralized leadership, policy, coordination, and essential administrative support in the areas of human resources, information technology; budget and financial management; strategic planning; performance

reporting; legislative and regulatory analysis; employee safety and health; labor relations; equal employment opportunity enforcement, and general support services to all Employment Standards Administration program components.

*Federal Employees' Compensation Act benefits.*—The Federal Employees' Compensation Act program provides monetary and medical benefits to Federal workers who sustain work-related injury or disease. Not all benefits are paid by the program, since the first 45 days of disability are usually covered by keeping injured workers in pay status with their employing agencies (the continuation-of-pay period). In 2009, 134,000 injured Federal workers or their survivors are projected to file claims; 50,000 are projected to receive long-term wage replacement benefits for job-related injuries, diseases, or deaths. Most of the costs of this account are charged back to the beneficiaries' employing agencies.

The remainder is provided from the special fund which is financed by private employers, and is assessed at the beginning of each calendar year for their proportionate share of these payments.

The Administration will repropose legislation to improve the Federal Employees' Compensation Act (FECA), which has not been substantially updated since 1974. The legislative proposal would amend FECA to convert prospectively retirement-age beneficiaries to a retirement-level benefit; impose an up-front waiting period for benefits; streamline claims processing; permit DOL to recapture additional compensation costs from responsible third parties; authorize DOL to cross-match FECA records with Social Security records to reduce improper payments; and make other changes to improve and update FECA. These changes would generate net Government-wide savings of \$377 million.

*Energy Employees' Compensation Act benefits.*—The Department of Labor is delegated responsibility to adjudicate and administer claims for benefits under the Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA). In July 2001, the program began accepting claims from employees or survivors of employees of the Department of Energy (DOE) and of private companies under contract with DOE who suffer from a radiation-related cancer, beryllium-related disease, or chronic silicosis as a result of their work in producing or testing nuclear weapons. The Act authorizes a lump-sum payment of \$150,000 and reimbursement of medical expenses.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108-767) amended EEOICPA, giving DOL responsibility for a new program (Part E) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered under section 5 of the Radiation Exposure Compensation Act. Benefit payments under Part E began in 2005.

*Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA) administration.*—Under Executive Order 13179 the Secretary of Labor is assigned primary responsibility for administering the EEOICPA program, while other responsibilities have been delegated to the Departments of Health and Human Services (HHS), Energy (DOE), and Justice (DOJ). The Office of Workers' Compensation Programs (OWCP) in the Department of Labor (DOL) is responsible for claims adjudication, and award and payment of compensation and medical benefits. DOL's Office of the Solicitor provides legal support and represents the Department in claimant appeals of OWCP decisions. HHS is responsible for developing individual dose reconstructions to estimate occupational radiation exposure, and developing regulations to guide DOL's determination of whether an individual's cancer was caused by radiation exposure at a DOE or atomic weapons facility. DOE is responsible for providing exposure histories at employment facilities covered under the Act, and other employment information. DOJ assists claimants who have been awarded compensation under the Radiation Exposure Compensation Act to file for additional compensation, including medical benefits, under EEOICPA. To improve transparency and accountability, the 2009 Budget requests that administrative funding for HHS' EEOICPA activities be directly appropriated to HHS, Centers for Disease Control and Prevention.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108-767) amended EEOICPA, giving DOL responsibility for a new program (Part E) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered by the Radiation Exposure Compensation Act. Administrative expenses for Part E are covered through indefinite, mandatory appropriations provided in P.L. 108-767.

Title IV of the Federal Mine Safety and Health Act authorizes monthly benefits to coal miners disabled from coal workers' pneumoconiosis (black lung) and to their widows and certain other dependents. Part B of the Act assigned the processing and paying of claims filed between December 30, 1969 (when the program originated) and June 30, 1973 to the Social Security Administration (SSA). P.L. 107-275 transferred Part B claims processing and payment operations from SSA to the Department of Labor's Employment Standards Administration, Office of Workers' Compensation Programs. This change was implemented on October 1, 2003.

This fund was established to provide for the accumulation of funds to meet the Panama Canal Commission's obligations to defray costs of workers' compensation which will accrue pursuant to the Federal Employees' Compensation Act (FECA). On December 31, 1999, the Commission was dis-

solved as set forth in the Panama Canal Treaty of 1977; however, the liability of the Commission for payments beyond that date did not end with its termination. The establishment of this fund, into which funds were deposited on a regular basis by the Commission, was in conjunction with the transfer of the administration of the FECA program from the Commission to the Department of Labor, effective January 1, 1989.

The trust fund consists of all moneys collected from the coal mine industry under the provisions of the Black Lung Benefits Revenue Act of 1981, as amended by the Consolidated Omnibus Budget Reconciliation Act of 1985, in the form of an excise tax on mined coal. These moneys are expended to pay compensation, medical, and survivor benefits to eligible miners and their survivors, where mine employment terminated prior to 1970 or where no mine operator can be assigned liability. In addition, the fund pays all administrative costs incurred in the operation of Part C of the Black Lung program. The fund is administered jointly by the Secretaries of Labor, Treasury, and Health and Human Services. The Benefits Revenue Act provides for repayable advances to the fund in the event fund resources will not be adequate to meet program obligations. Such advances are to be repaid with interest. The outstanding debt has increased from \$1,510 million in 1981 to \$9,980 million in 2007. It is estimated to be \$10,408 million in 2008 and \$10,832 million in 2009 if the refinancing proposal is not enacted.

The Black Lung Disability Trust Fund's revenues, which are derived primarily from coal excise taxes, are insufficient to repay the \$10 billion debt it owes to Treasury. Under current conditions, the Trust Fund's debt could never be repaid. The 2009 Budget repropose legislation to restructure the Trust Fund debt and restore the Fund's solvency. Proposed reforms would (1) refinance the outstanding debt; (2) extend the current excise tax levels until solvency is attained; and (3) provide for a one-time appropriation to compensate the General Fund for forgone interest payments.

The trust funds consist of amounts received from employers for the death of an employee where no person is entitled to compensation for such death, for fines and penalty payments, and pursuant to an annual assessment of the industry, for the general expenses of the fund under the Longshore

and Harbor Workers' Compensation Act (LHWCA), as amended.

These trust funds are available for payments of additional compensation for second injuries. When a second injury is combined with a previous disability and results in increased permanent partial disability, permanent total disability, or death, the employer's liability for benefits is limited to a specified period of compensation payments after which the fund provides continuing compensation benefits. In addition, the fund pays one-half of the increased benefits provided under the LHWCA for persons on the rolls prior to 1972. Maintenance payments are made to disabled employees undergoing vocational rehabilitation to enable them to return to remunerative occupations, and the costs of necessary rehabilitation services not otherwise available to disabled workers are defrayed. Payments are made in cases where other circumstances preclude payment by an employer and to provide medical, surgical, and other treatment in disability cases where there has been a default by the insolvency of an uninsured employer.

*Safety and health standards.*—This activity provides for the development, promulgation, review and evaluation of feasible occupational safety and health standards and guidance. Before any standard is proposed or promulgated, a determination is made that: (1) a significant risk of serious injury or health impairment exists; (2) the standard will reduce this risk; (3) the standard is economically and technologically feasible; and (4) the standard is economically and technologically feasible when compared with alternative regulatory proposals providing equal levels of protection. Regulatory reform efforts include consensus-based rulemaking, development of common sense regulations, rewriting existing standards so they are understandable to those affected by them, and regulatory and non-regulatory process improvements.

*Federal Enforcement.*—This activity provides for the enforcement of workplace standards promulgated under the Occupational Safety and Health (OSH) Act of 1970, through the physical inspection of worksites, and by fostering the voluntary cooperation of employers and employees. Programs are targeted to the investigation of claims of imminent danger and employee complaints, investigation of fatal and catastrophic accidents, programmed inspections of firms with injury-illness rates that are above the national average, and special emphasis inspections for serious safety and health hazards. OSHA's enforcement strategy ranges from a selective targeting of inspections and related compliance activities to specific high hazard industries and worksites.

*State programs.*—This activity assists States in assuming responsibility for administering occupational safety and health programs under State plans approved by the Secretary. Under section 23 of the OSH Act, grants matching up to fifty percent of total program costs are made to States that meet the Act's criteria for establishing and implementing State programs which are at least as effective as the associated Federal program. State programs, like their Federal counterparts, provide a mix of enforcement, outreach, training and compliance assistance activities.

*Technical support.*—This activity provides specialized technical expertise and advice in support of a wide range of program areas, including construction, standards setting, variance determinations, compliance assistance, and enforcement. Areas of expertise include laboratory accreditation, industrial

hygiene, occupational health nursing, occupational medicine, chemical analysis, equipment calibration, safety engineering, environmental impact statements, technical and scientific databases, computer-based outreach products, and emergency preparedness.

**Compliance assistance-Federal.**—This activity supports a range of cooperative programs, training, and outreach that provide compliance assistance in improving workplace safety and health, with particular emphasis on small business. OSHA works with employers and employees through Voluntary Protection Programs that recognize and promote effective safety and health management; partnerships focusing on the development of extended cooperative relationships; and alliances committing organizations to collaborative efforts with OSHA. Federal agencies are assisted in implementing and improving their job safety and health programs. Occupational safety and health training is provided at the OSHA Training Institute and affiliated Education Centers throughout the country. Compliance and technical assistance materials are prepared and disseminated to the public through various means, including the Internet.

**State consultation grants.**—This activity supports 90 percent Federally funded cooperative agreements with designated State agencies to provide free on-site consultation to employers upon request. State agencies tailor workplans to specific needs in each State while maximizing their impact on injury and illness rates in smaller establishments. These projects offer a variety of services, including safety and health program assessment and assistance, hazard identification and control, and training of employers and their employees.

**Training grants.**—This activity supports safety and health training grants to organizations that provide training and education and develop educational materials for employers and employees. Grants address safety and health education needs related to specific topics and industries identified by the agency. The 2009 Budget eliminates funding for these grants, and focuses on more cost-effective compliance assistance approaches.

**Safety and health statistics.**—This activity supports the information technology infrastructure, management information, and statistical basis for OSHA's programs and field operations. These are provided through an integrated data network, and statistical analysis and review. OSHA administers and maintains the recordkeeping system that serves as the foundation for the BLS survey on occupational injuries and illnesses and provides guidance on recordkeeping requirements to both the public and private sectors.

**Executive direction and administration.**—This activity supports executive direction, planning and evaluation, management support, legislative liaison, interagency affairs, Federal agency liaison, administrative services, and budgeting and financial control.

**Enforcement.**—The enforcement strategy in 2009 will be an integrated approach that links all actions to preventing occupational injuries and illnesses. These include inspection of mines as mandated by the Federal Mine Safety and Health Act of 1977, special emphasis initiatives that focus on persistent safety and health hazards, promulgation of Federal mine safety and health standards, investigation of serious accidents, and on-site education and training. The desired outcome of these enforcement efforts is to lower fatality and injury rates in our Nation's mines.

**Assessments.**—This activity assesses and collects civil monetary penalties for violations of safety and health standards.

**Educational policy and development.**—This activity develops and coordinates MSHA's mine safety and health education and training policies, and provides classroom instruction at the National Mine Health and Safety Academy for MSHA personnel, other governmental personnel, and the mining in-

dustry. States provide mine health and safety training materials, and provide technical assistance through the State Grants program.

**Technical support.**—This activity applies engineering and scientific expertise through field and laboratory forensic investigations to resolve technical problems associated with implementing the Mine Act. Technical support administers a fee program to approve equipment, materials, and explosives for use in mines and performs field and laboratory audits of equipment previously approved by MSHA. It also collects and analyzes data relative to the cause, frequency, and circumstances of mine accidents.

**Program evaluation and information resources (PEIR).**—This activity provides program evaluation and information technology resource management services for the agency. Additionally, PEIR is responsible for meeting the requirements of the Government Performance and Results Act (GPRA) and developing MSHA's performance plan and Annual Performance Report.

**Program administration.**—This activity performs general administrative functions.

**Office of Disability Employment Policy.**—This office provides leadership in developing policy to eliminate employment barriers to people with disabilities. It works within the Department of Labor (DOL) and in collaboration with other Federal agencies to develop policy based on research and analysis of specific areas of policy inquiry in employment, training and retraining, recruitment, retention, and employment support services. ODEP then disseminates its findings through technical assistance to public and private sector entities.

In a recent Program Assessment Rating Tool assessment, ODEP was rated "results not demonstrated," largely due to insufficient performance and evaluation data to assess the impact and effectiveness of ODEPs policy and coordination efforts. ODEP's responsibilities have also expanded in recent years to include a grant making function, supporting activities that extend beyond ODEP's original mission and are duplicative of activities undertaken by other Federal agencies. The Budget supports ODEP's original mission of bringing a heightened focus on disability employment within DOL through policy development, technical assistance, and dissemination of best practices.

The Office of Job Corps supports the administration and management of the Job Corps program, which helps at-risk youth who need and can benefit from intensive education and training services to become more employable, responsible, and productive citizens. The program operates in a group setting at 122 centers, residential in 48 States, the District of Columbia and the Commonwealth of Puerto Rico. Two new centers are currently under construction in Iowa and New Hampshire.

The program serves economically disadvantaged youth, aged 16-24, who must also be one or more of the following: basic skills deficient; a school dropout; homeless, a runaway, or a foster child; a parent; or in need of additional education, vocational training, or intensive counseling and related assistance in order to participate successfully in regular schoolwork or to secure and hold employment. The program serves more than 60,000 individuals per year.

In response to a mandate in the Departments of Labor, Health and Human Services, Education, and Related Agencies Appropriations Act, 2006 (Public Law 109-149), the Secretary of Labor issued Secretary's Order 09-2006 which established the Office of Job Corps within the Office of the Secretary (OSEC) and delegated authority and assigned responsibility to the Director of the Office of Job Corps and other agency heads to ensure the effective administration of the Job Corps program. Job Corps funding, appropriated to the Employment and Training Administration (ETA) in 2006, was transferred to OSEC via an allotment process. This funding mechanism continued in 2007 under the Revised Continuing Appropriations Resolution, 2007 (Public Law 110-5). The Consolidated Appropriations Act, 2008 (Public Law 110-161) appropriated Job Corps funding to the Office of Job Corps. Funding for the Job Corps program is now shown in the Office of Job Corps appropriation account for all years.

The 2009 Budget proposes to transfer the Job Corps program and administrative funding back to ETA to better coordinate the program with other employment and training programs ETA oversees.

**Program activities.**—The Office of Inspector General (OIG) conducts audits, investigations, and evaluations that improve the effectiveness, efficiency, and economy of departmental programs and operations. It addresses DOL program fraud and labor racketeering in the American workplace, provides technical assistance to DOL program agencies, and advice to the Secretary and the Congress on how to attain the highest possible program performance. The Office of Audit performs audits of the Department's financial statements, programs, activities, and systems to determine whether information is reliable, controls are effective, and resources are safeguarded. It also ensures funds are expended in a manner consistent with laws and regulations, and with achieving the desired program results. The Office of Labor Racketeering and Fraud Investigations conducts investigations to detect and deter fraud, waste, and abuse in departmental programs. It also identifies and reduces labor racketeering and corruption in employee benefit plans, labor management relations, and internal union affairs. The significant increase in the number of investigations completed in FY 2007 is due to single claimant unemployment investigations conducted following the 2005 hurricanes. The number of investigations being planned for FY 2009 reflects an expansion of the OIG's labor racketeering program to focus on foreign labor certification-related immigration fraud, Gulf Coast reconstruction and construction contracts, and Unemployment Insurance fraud.

**Jobs for Veterans State grants.**—The Jobs for Veterans Act (JVA) of 2002 provides the foundation for this budget activity. The JVA requires the Veterans Employment and Training Service (VETS) to promulgate policies and regulations that ensure maximum employment and training opportunities for veterans and priority of service for veterans within the State workforce delivery system. Under the JVA, resources are allocated to States to support Disabled Veterans Outreach Program (DVOP) specialists and Local Veterans' Employment Representatives (LVERs).

Disabled Veterans Outreach Program specialists (38 U.S.C. 4103A) provide intensive services to meet the employment needs of eligible veterans. DVOP places maximum emphasis on helping economically or educationally disadvantaged veterans. Priority of service (38 U.S.C. 4215) is given to special disabled veterans, other disabled veterans, and other eligible veterans.

Local Veterans' Employment Representatives (38 U.S.C. 4104) conduct outreach to employers as well as assist veterans in gaining employment by conducting job search workshops and establishing job search support groups. LVERs also facilitate employment, training, and placement services provided to veterans under the applicable State employment service delivery system, including One-Stop Career Centers. In addition, each LVER provides reports to the manager of the State employment service delivery system and to the State Director for Veterans Employment and Training (38 U.S.C. 4103) regarding the State's compliance with Federal law and regulations with respect to special services and priorities for eligible veterans.

The State grants budget activity also supports the Transition Assistance Program (TAP). VETS coordinates with the Departments of Defense, Veterans Affairs, and Homeland Security to provide transition assistance to military servicemembers separating from active duty. TAP is implemented worldwide and provides labor-market and employment-related information and other services to separating servicemembers. The goal of TAP is to expedite and facilitate the transition from military to civilian employment.

**Federal management.**—VETS' Federal management (38 U.S.C. 4102-4103A) budget activity carries out programs and develops policies to meet the employment and training needs of veterans. Based upon the most recent cost accounting data, the majority of VETS' Federal management resources are dedicated to Uniformed Services Employment and Reemployment Rights (USERRA) compliance and outreach activities, whereby VETS investigates complaints to help veterans, reservists, and members of the National Guard obtain their employment and reemployment rights (38 U.S.C. 4301 et seq.). Veterans' Preference activities, which are intended to assist veterans obtain Federal employment (39 U.S.C. 4214), are also supported under this activity.

Resources under this activity are also used to operate a national "Hire Veterans First" campaign that helps employers find job-ready veterans and sponsors many career fairs for veterans around the country. Funding is also used to evaluate the job training and employment assistance services provided to veterans and to support field activities and personnel who provide technical assistance to States to ensure they meet negotiated performance goals. VETS' staff works with States to provide incentive awards for outstanding performance (38 U.S.C. 4112). This budget activity also funds outreach and education efforts, such as job fairs, that raise the awareness of employers about the benefits of hiring veterans.

VETERANS EMPLOYMENT AND TRAINING—Continued

The REALifeLines initiative facilitates timely and comprehensive employment services to our Nation's severely wounded and injured veterans.

*National Veterans' Employment and Training Services Institute.*—The National Veterans' Training Institute (NVTI) supplies competency-based training to Federal and State providers of services to veterans (38 U.S.C. 4109). NVTI is administered through a contract and supported by dedicated funds. NVTI ensures that these service providers receive a comprehensive foundation so they can effectively assist job-seeking veterans.

*Homeless Veterans' Reintegration Program.*—The Homeless Veterans' Reintegration Program (HVRP) (38 U.S.C. 2021) provides grants to States or other public entities, as well as to non-profits, including faith-based organizations. Grant awards enable grantees to operate employment programs to reach out to homeless veterans and help them become employed. VETS partners with the Departments of Veterans Affairs and Housing and Urban Development to promote multi-agency-funded programs that integrate the different services needed by homeless veterans. HVRP grants are provided for both urban and rural areas.

*Veterans' Workforce Investment Program.*—The Veterans' Workforce Investment Program (VWIP) (Section 168 of P.L. 105-220) provides competitive grants geared toward training and retraining to create employment opportunities for veterans in high-skill occupations, and to meet employer demands.

These resources also fund the conduct of U.S. diplomatic policy through political and multilateral affairs, economic and social affairs, international budgetary and management affairs, and participation in and hosting various international

conferences. Resources also fund the management of U.S. participation in arms control, nonproliferation, and disarmament negotiations and other verification and compliance activities, in addition to funds otherwise available for such purposes.

Public diplomacy efforts are currently being evaluated, particularly those activities that target the Muslim world, to assure that the programs are targeting these populations effectively.

**Professional development and training.**—The professional development and training activity is a continuous process by which the Department ensures that its professionals have the skills, experience, and judgment to fulfill its functions at all levels. Training programs are designed to provide employees with the specific functional area and language skills needed for the conduct of foreign relations in the Department and abroad.

**Information management.**—This activity identifies resources that are used for the effective and efficient creation, collection, processing, transmission, dissemination, use, storage, and disposition of information required for the formulation and execution of foreign policy and for the conduct of daily business. Under the direction of the Secretary of State, the overall mission of the Bureau of Overseas Buildings Operations (OBO) is to provide U.S. Diplomatic and Consular Missions abroad with safe, secure, and functional facilities that support the foreign policy objectives of the United States. Specific program functions include: providing guidance to posts, the regional bureaus and other foreign affairs agencies on the renovation, construction and operations of facilities; providing expert space and facilities planning; managing and overseeing the design, construction, and renovation of mission facilities; incorporating security features into overseas and domestic facilities; ensuring the security of facilities during construction or renovation. In addition, OBO is responsible for establishing standards and policies for overseas housing, developing, in conjunction with posts, effective maintenance programs for post facilities, and monitoring and reporting the inventory of maintenance and backlog requirements. OBO also ensures the safety of the building occupants through the development of fire/life safety and accessibility compliance programs.

In 2009, the Department will collect charges for the fifth year of the five-year phase-in of the Capital Security Cost Sharing Program. The Capital Security Cost Sharing Program has two main goals: accelerating the construction of approximately 150 new safe, secure and functional embassy and consulate compounds over fourteen years (2005–2018), at a cost of approximately \$17.5 billion, and providing an incentive for all United States Government agencies to right-size their presence overseas.

Consistent with the Federal Real Property President's Management Agenda (PMA) initiative, the objective of the Asset Management Program is to obtain the best use of diplomatic and consular properties overseas through sale of surplus or underutilized properties and reinvestment of the proceeds in properties that provide a greater return to the U.S. Government and/or improve the safety of mission personnel. In lieu of appropriated resources, OBO uses asset sales proceeds for long-term capital investment to minimize the growth of U.S. Government leasehold requirements (through property acquisition) or to address a high-priority need for new construction or fit-out of leased space.

This appropriation also provides for capital expenditures necessary to preserve, maintain, repair, and plan for buildings owned or leased by the Department of State overseas or in the United States, including the renovation of the Main State building where required.

This is a retirement fund for Locally Employed Staff (LES) employed by the Department of State and other Foreign Affairs agencies. The purpose of the fund is to accumulate and distribute U.S. Government contributions for end-of-service benefits for LES at overseas U.S. missions where it has been determined that participation in the local social security system is not in the public interest. The State Department determines which countries are eligible to participate in the fund. Upon separation, payments will be made from the fund as a lump sum paid directly to the employee.

This fund, authorized by sections 13 and 23 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2684), finances on a reimbursable basis, certain administrative services, such as printing and reproduction, editorial material, motor pool operations and dispatch agencies operations, inter-agency cooperative administrative support services, and expenses of carrying out the Foreign Missions Act, including any acquisitions of property under section 204(f) of the State Department Basic Authorities Act of 1956 (22 U.S.C. 4304(f)).

Using the Working Capital Fund, the International Cooperative Administrative Support Services (ICASS) program was fully implemented in 1998. ICASS restructures overseas administrative support activities to allow more decision-making and managerial participation by all participating agencies, more equitable cost distribution, and incentives for efficient provision of services. Under ICASS, each agency represented at an overseas post chooses the services it wishes to receive and pays a proportional share of the cost of those services. Working through inter-agency councils at each overseas post, all agencies have a say in determining post administrative budgets and defining service standards, as well as reviewing costs and vendor performance.

This appropriation provides the U.S. share of operating expenses for ten treaty-based international fisheries commissions and organizations, two international marine science organizations, one whaling commission, and the Antarctic Treaty Secretariat, as well as funding regional sea turtle conservation, and travel expenses of non-government U.S. commissioners and their advisors. These international fisheries and whaling commissions coordinate scientific studies of shared fish stocks and other living marine resources and establish common management measures to be implemented by member governments based on their results. Many also oversee the allocation of fishing rights to their members. In addition, the Great Lakes Fishery Commission carries out a program to eradicate the invasive, parasitic sea lamprey. The marine science organizations coordinate international research on valuable fisheries, oceanography, and marine ecosystems and the results are publicly disseminated and used to advise member governments on fisheries and marine science policy.

The first phase of the President's Emergency Plan for AIDS Relief (PEPFAR) from 2004 to 2008, was the largest ever global public health initiative by a single country to fight the HIV/AIDS epidemic. In FY 2009, the second phase of PEPFAR will begin to fulfill the President's additional 5 year, \$30 billion commitment to continue this fight against global HIV/AIDS.

The 2009 budget requests an additional \$4.779 billion in the Global HIV/AIDS Initiative (GHAI) account for the fight

against global AIDS. GHAI forms the bulk of PEPFAR funding (\$6.0 billion in total) and is implemented by the Office of Global AIDS Coordinator in the State Department which partners with other agencies such as the US Agency for International Development and the Department of Health and Human Services. As of September 30, 2007, the President's Emergency Plan has supported antiretroviral treatment for more than 1.44 million men, women, and children through bilateral programs around the world. More than 1.3 million of those being supported live in Sub-Saharan Africa.

This assistance is part of an ongoing, comprehensive, regional effort to stem the flow of drugs from the Andes into the United States and to support regional stability. Counternarcotics alternative development programs are being requested in the Economic Support Fund and the Development Assistance account.

The Millennium Challenge Account (MCA) is a Presidential initiative to reduce poverty through growth in some of the poorest countries in the world, and the Millennium Challenge Corporation (MCC) is an independent U.S. government corporation established on January 23, 2004 to administer the MCA. MCC incentivizes policy reforms by rewarding only those countries that have already created the conditions for growth by ruling justly, investing in their people, and encouraging economic freedom, with a particular emphasis on anti-corruption. Recognizing that development is achieved by a country's own efforts, policies, and people, MCC gives selected countries the opportunity to identify their own priorities for achieving sustainable economic growth and poverty reduction. Countries develop their MCA proposals in broad consultation with their own society. MCC teams then work in partnership to help countries develop an MCA program which will advance reduction in poverty and sustainable economic growth. The MCA program is reflected in a Compact that defines responsibilities and insists on measurable results to ensure American foreign aid is used effectively. The Compact also describes how the country will govern and implement its MCA program, including how it will ensure financial accountability and transparent and fair procurement. MCC now has 16 approved Compacts with countries totalling \$5.5 billion. In 2007, MCC restructured its organization to enhance the resources devoted to implementation of these Compacts and the achievement of its goals of economic growth and poverty reduction.

This account supports U.S. foreign policy objectives by providing economic assistance to allies and countries in transi-

tion to democracy, supporting Middle East peace negotiations, and financing economic stabilization programs, frequently in a multi-donor context. Key objectives include:

1) Supporting strategically significant friends and allies through assistance designed to increase the role of the private sector in the economy, reduce government controls over markets, enhance job creation, and improve economic growth.

2) Developing and strengthening institutions necessary for sustainable democracy. Typical areas of assistance include technical assistance to administer and monitor elections, capacity-building for non-governmental organizations, judicial training, and women's participation in politics. Assistance is also provided to support the transformation of the public sector to encourage democratic development, including training to improve public administration; promote decentralization; and strengthen local governments, parliaments, independent media and non-governmental organizations.

3) Strengthening the capacity to manage the human dimension of the transition to democracy and a market economy and to help sustain the neediest sectors of the population during the transition period.

This account also includes funding for alternative development programs in the Andean region of South America and Afghanistan.

This assistance provides grants for military education and training to military and civilian students from foreign countries. In addition to helping these countries move toward self-sufficiency in defending themselves, this program also exposes foreign students to American democratic values, particularly respect for civilian control of the military and for internationally recognized standards of individual and human rights.

Energy security and climate change are important priorities for the Administration. Therefore, President Bush proposed a major multilateral initiative to create a new international clean technology fund to help developing countries harness the power of clean energy technologies.

The proposed clean technology fund will address the growing problem of accelerating greenhouse gas emissions in major developing countries. According to the International Energy Agency, by 2030, global demand for energy will increase by over 50 percent, with almost three-quarters of this increase coming from developing countries. The fund will help ensure that developing countries deploy clean technology by helping to finance the additional cost of clean investments over dirtier alternatives.

The fund has three major objectives: first, to reduce emissions growth in major developing countries through accelerated deployment of clean technologies; second, to stimulate and leverage private sector investment in existing clean technologies; and third, to encourage developing countries to pursue environmentally sound policies to reduce greenhouse gas emissions. The Administration is working with major donor and developing countries to create a multilateral fund that will catalyze resources of the multilateral development banks and the private sector to create innovating financing instruments to spur clean technology investments in the major developing country emitters. The Administration proposes that the U.S., as a lead donor to the fund, contribute \$400 million in 2009 as part of an overall contribution of \$2 billion over 3 years. As part of this initiative, the Administration will submit authorizing legislation.

The International Bank for Reconstruction and Development (IBRD or World Bank) provides financing and technical assistance to support infrastructure investment and policy reform. IBRD operations are designed to promote sustainable economic growth, increase productivity growth, reduce poverty, and raise living standards, including through targeted investments in basic human needs, private-sector development, and core policy reforms.

During 2007, IBRD made new commitments of \$12.8 billion and gross disbursements were approximately \$11.05 billion. Since its establishment in 1945, IBRD has made loans totaling \$433 billion. No request is being made for IBRD capital in 2009.

IBRD acts as trustee for the Global Environment Facility (GEF) Trust Fund. GEF provides partial funding for developing country projects designed to provide global environmental benefits by reducing international water pollution and ozone depletion, by promoting biodiversity and energy conservation, by reducing persistent organic pollutants, which are of particular concern in the northern United States, and by preventing and controlling desertification and deforestation. With its highly specific focus on global environmental issues, where both costs and benefits are shared across international borders, the GEF occupies an important niche in the system of international development institutions. Its basic mission is to support innovative and cost-effective pilot investments whose design and environmental benefits can be duplicated (and financed) elsewhere. Since its inception in 1991, the GEF has allocated over \$6 billion in grants, leveraging over \$20 billion in co-financing, to support more than 1,700 projects in over 160 countries.

In 2006, donor governments agreed to the fourth replenishment of the GEF, pledging total resources of \$3,130 million over four years. The U.S. commitment totals \$320 million,

to be paid in four equal installments of \$80 million from 2007 through 2010. During the replenishment negotiations, the United States achieved important policy reforms to improve the GEF's overall effectiveness, particularly with regard to project quality, portfolio management, resource allocations, transparency, and anticorruption efforts. The 2009 request includes \$80 million for the third installment of GEF-4. To date, the GEF has implemented the GEF-4 reforms as agreed.

The International Development Association (IDA) is a member of the World Bank Group and provides development financing on highly concessional terms and grant terms to the world's poorest nations. These countries are primarily in Sub-Saharan Africa and South Asia, but also in Latin America, Eastern Europe, and the former Soviet Union. IDA's primary goal is to help recipient countries achieve sustained economic growth and poverty reduction, and particularly to meet the exceptional development challenges faced by Africa within its broad commitment to support all the world's poor countries. IDA is the single largest source of multilateral lending extended on concessional terms to developing countries. Projects have to meet the same economic, financial, and environmental standards as other World Bank projects. IDA resources for new lending are provided primarily by new donor contributions through periodic replenishments, and are augmented by earnings and payments of existing loans.

During 2007, IDA made new commitments of \$11.9 billion, the highest level in IDA's history. Since its establishment, IDA has made commitments totaling \$181 billion. The largest regional share of IDA resources went to Africa, with 50 percent.

Under the fifteenth replenishment (IDA-15), IDA will provide total resources for prospective new commitments of \$41.6 billion over the 2009–2011 period. Through the IDA-15 replenishment negotiations, U.S. leadership secured a number of commitments for reform of IDA, most importantly an expanded results measurement system which will increase the effectiveness of IDA's development projects and programs, improvements to the operational framework and financing arrangements for World Bank engagement in fragile/post-conflict states, specific measures to enhance debt management capacity building, continued use of grant financing for countries experiencing debt distress, and progress toward greater transparency.

IDA-15 will provide between 20–30 percent of its total resources to the world's poorest and debt vulnerable countries as grants. Grant eligibility will be determined on the basis of debt sustainability with 41 countries (out of 63 IDA-only eligible countries) receiving grants. Consistent with its IDA-15 commitment, IDA has also enhanced efforts to improve country debt management capacity, introduced disincentives to prevent grant and debt relief recipients from borrowing non-concessionally, and conducted extensive outreach among the multilateral development banks, donors, and external creditors to enhance the use of the joint World Bank-IMF Debt Sustainability Framework. IDA has also been working to improve the effectiveness of its operations and ensure development results on the ground. IDA's result-oriented approach includes: (1) country outcomes tracked by fourteen country outcome indicators, including indicators such as primary school completion rates and; (2) output indicators measuring IDA's contribution to country outcomes for specific outputs such as the number of teachers trained and facilities built. Over the duration of IDA-15, IDA will work to improve the quality of data for outcome and output indicators through efforts to build country statistical capacity and development of a standardized list of select indicators across four to five sectors in order to produce a more accurate indicative aggregation of sector-specific outputs. In addition, IDA will develop a better measure of private sector development as well as an indicator to measure the quality of public financial management in IDA countries. The 2009 Budget consists of \$1.235 billion for the first of three scheduled installments under IDA15 and 42 million to pay a portion of outstanding U.S. arrears. The U.S. pledge is \$3.705 billion over the next three years and is based on the reform commitments described above.

The Multilateral Investment Guarantee Agency (MIGA) is a member of the World Bank Group. MIGA is designed to encourage the flow of foreign private investment to and among developing countries by issuing guarantees against

noncommercial risks and carrying out investment promotion activities.

During World Bank fiscal year 2007, MIGA issued 29 guaranteed contracts, with a maximum aggregate contingent liability of \$1.4 billion. Since MIGA's inception, estimated foreign direct investment facilitated totals more than \$50 billion.

Negotiations of MIGA's first General Capital Increase (GCI) were completed in 1998. The United States committed to contribute a total of \$30 million in paid-in capital and nearly \$140 million in callable capital over three years. The agreement included commitments from MIGA on a range of policy issues of substantial importance to the United States, including environment, information disclosure, labor, and creation of an inspection function for greater accountability and transparency. In 2000, the Administration sought and received congressional authorization for our full participation in the MIGA GCI. The U.S. currently has outstanding arrears of \$6.9 million.

No request is being made for MIGA for 2009.

The Inter-American Development Bank (IDB) promotes sustainable economic growth and productivity, poverty reduction, private sector development, and good governance in Latin America and the Caribbean through loans and technical assistance.

During 2007, IDB approved \$8.9 billion in loans. Since its inception, the IDB has approved a total of \$154 billion.

IDB provides financing through: 1) the Ordinary Capital window that lends at market-based rates; and, 2) the Fund for Special Operations (FSO), which provides financing on concessional terms to the region's poorest nations.

No request is being made for the IDB or FSO in 2009.

The Inter-American Investment Corporation (IIC), established in 1984, is a member of the Inter-American Development Bank Group, whose purpose is to promote development of private small and medium sized enterprises (SMEs) in Latin America and the Caribbean. It is a legally autonomous entity whose resources and management are separate from those of the Inter-American Development Bank itself. Through direct loans and equity investments in SMEs as well as through lending to private financial intermediaries, IIC helps SMEs in the region to access the medium/long-term capital necessary to start-up, expand, or modernize their operations.

During 2007, IIC approved 60 projects totaling \$494.5 million. Since its inception, the IIC has approved 495 projects for a total amount of \$3.08 billion.

There is no request for new scheduled annual commitments for the IIC.

The Asian Development Bank (ADB) promotes broad-based sustainable economic growth and development, poverty alleviation, and cooperation in the Asia/Pacific region. ADB has two main financing windows: i) the ordinary capital resources window and ii) the Asian Development Fund (ADF) which lends at concessional rates to the region's poorest nations.

ADF resources are derived in part from donor contributions through periodic "replenishments." In the most recent replenishment, ADF-9, the United States successfully negotiated a comprehensive package of policy reforms and pledged \$461 million over four years. Negotiations are currently ongoing for the next replenishment, ADF-10, expected to conclude in May 2008.

ADF-9 put in place a number of significant reform measures of high priority to the U.S. ADB has established a grant window for the first time, following the example of IDA and AFDF. During the ADF-9 period, grants are expected to reach as much as \$1.55 billion, or 20% of total ADF-9 operations. ADB has increased the weight assigned to good governance and strong policy performance and implementation in the system used to allocate ADF resources to borrowing countries. Internal governance has become more transparent through improved information disclosure and public communication policies. ADB has launched a new Governance and Anti-Corruption Act Plan to improve anti-corruption efforts at the institutional and country levels, and significantly increased the resources available for anticorruption activities. ADB continues to be strongly engaged in Afghanistan and has sub-

stantially increased its assistance for private sector development.

ADB played an important role in coordinating and providing assistance for reconstruction in the Asian countries affected by the December 2004 tsunamis and in Pakistan after the October 2005 earthquake. ADB is also expected to provide assistance to Bangladesh after the typhoon in 2007. ADB recently launched a technical assistance initiative funded by the Regional Trade and Financial Security Initiative to enhance port security and combat money laundering and terrorist financing. ADB also provides assistance to help strengthen the legal, regulatory and implementation frameworks for anti-money laundering and counter terrorist financing efforts.

In 2007, ADB lent roughly \$7.6 billion from its ordinary capital resources and extended an estimated \$2.4 billion in ADF and technical assistance resources. Since its founding in 1966, ADB has committed approximately \$130 billion in loans. In addition, ADB has made cumulative private sector loans, guarantees, and equity investments of over \$8.4 billion. In 2007, ADB extended \$1.3 billion in private sector assistance in the form of loans, equity investments, and guarantees.

In 2000, the United States made the final payment to ADB's fourth general capital increase. No request is being made for ADB in 2009.

The 2009 request for ADF is for \$115.25 million in budget authority for the final of four scheduled contributions under ADF-9.

The African Development Bank group is composed of i) the African Development Bank (AFDB), which lends at prevailing rates, and ii) the African Development Fund (AFDF), which provides grants and concessional loans to the poorest African countries. In 2007, the AFDB approved 34 new projects and programs amounting to about \$2.99 billion. Since its first-operations in 1967, AFDB has financed 2,181 projects and programs amounting to about \$36.08 billion.

AFDF approved \$1.88 billion for 52 projects and programs in 2007. Since its first operations in 1974, cumulative AFDF financing totals an estimated 27.44 billion for 1,063 development projects and programs.

The 2009 request for the African Development Bank Group includes \$156.055 million in budget authority for the first of three installments of the U.S. contribution to the eleventh replenishment (AFDF-11) covering the period 2009-2011.

In December 2007, the United States and other donor countries reached agreement on AFDF-11 which included a number of key U.S. policy objectives: 1) management for results agenda that emphasizes measures to strengthen the focus on delivering positive development results on the ground and the institutional management policies and procedures required to deliver them. A two-tiered results measurement framework is in place to measure, monitor, and report on outcomes and outputs at the country, regional and institutional levels; 2) maintaining the centrality of performance in the allocation of the Fund's resources while improving the implementation of the Performance Based Allocation (PBA) system; 3) enhanced engagement in fragile states through a new fragile states facility that will better address the needs or emerging opportunities in post-conflict and transition countries, such as Liberia; 4) scaling up the Funds regional operations, focusing on infrastructure projects that promote regional integration; and 5) greater support for governance issues at the regional, country, and sector levels, as well as in fragile states, in order to fight corruption, increase transparency, and improve accountability. Grants will continue to be extended to recipient countries based on their debt vulnerability. In 2007, grants were 26% of AFDF assistance.

The European Bank for Reconstruction and Development (EBRD) supports market-oriented economic reform and democratic pluralism through predominately private sector lending and investments in the nations of Central and Eastern Europe and the former Soviet Union. The United States and other shareholders signed the articles of agreement of the EBRD on May 29, 1990, and the Bank officially began operating on April 15, 1991. In April 1996, shareholders approved a doubling of the EBRD's capital base from EUR 10 billion to EUR 20 billion (approximately \$24 billion) which went into effect in April 1997.

As of October 31, 2007, approximately 72 percent of the Bank's portfolio was in the private sector. Since its inception, the EBRD has provided over \$50 billion in financing for nearly 2,500 operations, contributing to investments in the region worth over \$165 billion.

No request is being made for the EBRD for 2009.

The North American Development Bank (NADBank) provides financing for environmental infrastructure projects in the U.S.-Mexico border region. A portion of its capital also finances NAFTA-related community adjustments and investment projects in both countries. Under NADBank's charter, the United States and Mexico contributed equally to NADBank's capital \$450 million in paid-in capital and \$2.55 billion in callable capital. The final U.S. installment was appropriated in 1998, and there is no paid-in request for 2009.

NADBank finances environmental infrastructure projects that have been certified by the U.S.-Mexico Border Environmental Commission (BECC), an institution designed to assist States and local communities in coordinating border projects.

As of December 2007, NADBank had approved \$335 million in loans for 49 projects and \$84.56 million in grants for 31 projects. The Bank has also administered \$525.3 million in EPA funded grants to 66 projects in Mexico and the United States. The total investment value of all the projects to which it provides or administers funding is approximately \$2.7 billion.

In March 2002, President Bush and Mexican President Fox agreed to a set of proposals to improve the performance of NADBank and BECC in fulfilling their missions. These include measures to improve the affordability of NADBank financing, expand the geographic area of operations in Mexico, create a single Board of Directors for both institutions, and conduct a review of the project cycle.

The Multilateral Investment Fund (MIF), administered by the Inter-American Development Bank, provides grants and loans to support private-sector development and finance and labor sector reforms in Latin America and the Caribbean. Special consideration is given to reforms that encourage private foreign direct investment and promote privatization. Grants and loans are used for technical assistance to identify and resolve investment constraints, for investment in human capital, and for business infrastructure and development.

During 2007, MIF approved 127 projects totaling \$134 million. Since its inception in 1992, MIF has approved 1,057 projects, of which the MIF contribution totaled more than \$1.421 billion.

The United States made a commitment to MIF in 1992 amounting to \$500 million. Negotiations were completed in early 2005 for the first replenishment of MIF with a United States commitment of \$150 million to be paid in six equal annual installments. The United States achieved its key objectives in these negotiations: a strengthened commitment to measurable results, increasing efficiency, maintaining a focus on grants, allocating resources to maximize innovation, reforming Inter-American Development Bank procurement, and instituting a sunset clause. Grant funding will be about 75 percent of all funding approvals.

For 2009, \$25 million is requested for the third installment of the replenishment.

The International Fund for Agricultural Development (IFAD) was established in 1977 as a multilateral financial institution focused on promoting rural agricultural development in poorer countries. IFAD's specific mandate is to assist rural small-scale producers and subsistence farmers to increase their productivity and incomes, improve their nutritional levels, and help integrate them into larger markets.

The 2009 request is for \$18 million, the final of three scheduled contributions under IFAD's seventh replenishment (IFAD-7). In December 2005, negotiations were concluded on IFAD-7 and the U.S. pledged a total of \$54 million over the three-year replenishment period 2007-2009. The U.S. exercised leadership to achieve key objectives, including a time-bound and measurable action plan to address key findings of the independent external evaluation for increased effectiveness of IFAD operations (impact on poverty and food security); a strengthened performance-based allocation system including removing fixed regional allocations; a debt sustainability framework in line with that of the World Bank's International Development Association that will result in an increase in grant funding to countries; and increased transparency and anti-corruption measures. IFAD is implementing agreed IFAD-7 reforms on schedule.

This account provides technical assistance to other countries in support U.S. foreign policy objectives and in support of the responsibilities of the U.S. Treasury Department to formulate, conduct and coordinate the international financial policies of the United States. Technical assistance provided through this account facilitates key short- and medium-term reforms in the policy and management areas of budget, tax, government debt, financial institutions and financial enforcement.

The proposed appropriation will fund resident advisors, including program related administrative costs and intermittent experts in support of the resident advisors. This appropriation will permit continuation of the program in countries outside Central and Eastern Europe and the Former Soviet Union, including implementation of programs in Asia, Africa, the Greater Middle East and Central and Latin America, as well as continued technical assistance in anti-terrorism and anti-money laundering. The Treasury Department will continue to coordinate activities with international financial institutions and with USAID, the Department of State, and other relevant U.S. Government agencies when determining where its technical assistance program can have the greatest positive impact.

The Global Fund to Fight AIDS, Tuberculosis and Malaria (Global Fund) account exists to obligate and disburse U.S. contributions to the Global Fund which come from appropriations within the Departments of Health and Human Services and State. President Bush launched and made the founding contribution of \$200 million to the Global Fund in a Rose Garden event in May 2001. Other donors made financial commitments to the Fund prior to, during, and after the groundbreaking United Nations General Assembly Special Session on HIV/AIDS in June 2001, and the G8 Leaders Summit in Genoa, Italy in July of that year. The Global Fund became a non-profit foundation under Swiss law in January 2002, and held its first grant competition in April of that year.

The purpose of the Global Fund is to attract, manage, and disburse resources through a public-private partnership that make a sustainable and significant contribution to the reduction of infections, illness and death, thereby mitigating the impact caused by HIV/AIDS, tuberculosis and malaria in countries in need. The Global Fund pursues an integrated and balanced approach covering prevention, treatment, and care and support in dealing with these three diseases. The Global Fund seeks to establish a simplified, rapid, innovative process with efficient and effective disbursement mechanisms, minimizing transaction costs and operating in a transparent and accountable manner based on clearly defined responsibil-

ities. The Global Fund makes use of existing international assistance mechanisms and health plans.

Approximately \$17.9 billion has been pledged to the Global Fund thus far from industrialized and developing country governments, corporations, foundations, and private individual contributions. The U.S. is the largest donor to the Global Fund having pledged a total of \$3.625 billion through 2008. The U.S. Government has provided a total of \$2.5 billion through 2007. The 2009 request includes \$300 million within the National Institutes of Allergy and Infectious Diseases account and \$200 million within the Global HIV/AIDS Initiative account for the Global Fund.

**Debt Reduction.** The Administration requests \$141 million for debt restructuring programs, including \$121 million for bilateral Heavily Indebted Poor Country (HIPC) and poorest country debt reduction, and HIPC Trust Fund programs and \$20 million for the Tropical Forest Conservation Act program.

**Multilateral Debt Reduction Programs for the Poorest.** For the poorest countries, debt reduction provides an incentive to implement macro-economic and structural reforms necessary to improve economic performance and creditworthi-

ness. Debt relief, economic reform and poverty reduction contribute to economic growth and social development, which can mean expanded opportunities for trade and investment for the United States. For the poorest and most heavily indebted countries, the United States will continue support for the Paris Club of official creditors and provide additional relief complementary to the enhanced HIPC Initiative. The Administration requests a total of \$121 million in funding for the cost of debt restructuring programs including bilateral HIPC and poorest country debt reduction and the HIPC Trust Fund. The United States has pledged a total of \$150 million to meet the additional financing needs of the HIPC Trust Fund consistent with the President's commitment at the 2002 G-8 Summit in Kananaskis, Canada, to fund a share of HIPC financing shortfalls. The United States contributed \$74.6 million towards this pledge in fiscal year 2006.

**Tropical Forest Debt Relief.** The Tropical Forest Conservation Act (TFCA) received strong bipartisan support and was signed into law by the President in July, 1998. Modeled after the Enterprise for the Americas Initiative (EAI), P.L. 105-214, as amended, it allows the Administration to reduce outstanding concessional U.S. Agency for International Development and P.L. 480 debt stocks to support conservation of endangered tropical forests and promote economic reforms in eligible countries. Debt relief or buybacks in eligible countries will leverage payment of local currency resources to support programs to conserve tropical forests. TFCA debt reduction agreements have been concluded with twelve countries: Bangladesh, Belize, El Salvador, Peru, the Philippines, Colombia, Jamaica, Panama (two agreements), Paraguay, Guatemala, Botswana, and Costa Rica. In total, these agreements will generate over time more than \$163 million to support forest conservation.

*Development Assistance Programs.* U.S. Agency for International Development (USAID) uses these funds to promote transformational development in developing countries working in partnership with foreign governments, local private sector and non-governmental organizations, and public-private partnerships. These programs enable our foreign partners to implement the often difficult political, economic and other systemic changes that must occur to achieve sustainable de-

velopment. These programs help a country become more self reliant by sustaining economic and social progress.

—Promoting economic growth: Funding supports trade and investment programs to increase the capacity of developing countries to participate effectively in the global trading system, comply with trade agreements, improve business climates, and raise productivity. Development Assistance programs also support economic reforms, help create new job opportunities, expand access to market information, improve the knowledge and skills of entrepreneurs and workers, and support robust agricultural and natural resource management programs.

—Ruling justly and democratically: Funding supports countries to strengthen their rule of law and respect for human rights, encourage open and competitive political processes, promote the development of a politically active civil society, and encourage more transparent and accountable government institutions.

—Investing in people: Funding helps to develop human capital through programs such as improved and expanded access to basic education, especially for girls and women, and higher education and training to expand the skilled human capital base that is needed for development.

Investing in people, addressing global issues and other special concerns, stabilizing fragile states, and promoting transformational development are all supported by funds from the Child Survival and Health account.

Child Survival and Health Programs include activities that promote family planning/reproductive health, child survival and maternal health, including the primary causes of morbidity and mortality, polio, micronutrients and iodine deficiency, as well as activities directed at vulnerable children, and reducing HIV transmission and the impact of the HIV/AIDS pandemic in developing countries. Funding is also requested to address the threat of other infectious diseases of major public health importance such as tuberculosis, malaria, to reduce antimicrobial resistance, and for surveillance. The 2009 request includes \$300 million for the President's Malaria Initiative which will continue to operate in fifteen high-burden African countries. This is in addition to \$85 million for focused malaria activities in other countries. The request also includes \$50 million for programs of the U.S. Agency for International Development to respond to the threat of Avian Influenza.

This account provides funds to promote country-specific strategies that build on common, region-wide strategic goals, including economic restructuring, democratic transition, and social stabilization. Authorized Support for Assistance for Eastern Europe and the Baltic States (AEEB) programs concentrate on a) the development and strengthening of institutions and civic action necessary for sustainable democracy; b) the development of market economies and a strong private sector; and c) the improvement of the basic quality of life in selected areas.

AEEB assistance is now focused on Southeast Europe, with the single largest program designed for Kosovo. The United States is contributing to international efforts toward recovery

from the conflict with Milosevic through building effective governance and a functioning economy in the successor states of the former Yugoslavia. While implementation of the Dayton Accords still requires significant, albeit diminishing, support in Bosnia, two wars in the region in recent years have demonstrated the need for a special effort to provide for peaceful cooperation among neighbors. The Stability Pact of Southeast Europe builds on the country programs in the Balkans to help stabilize the region as a whole and prepare for integration into the European and international mainstream.

This account provides funds for a program of assistance to the independent states that emerged from the former Soviet Union.

Programs are designed to consolidate the process of political and economic transition to market democracies, and to help address major socioeconomic dislocations where they occur during these transitions. Funds will support economic restructuring by helping to create conditions that encourage: trade and investment and private sector growth; improved government fiscal policy, revenue collection, and financial management; a market-oriented financial sector; and a more efficient energy sector and a cleaner environment. Funds will support democratic transitions by encouraging citizen participation, promoting independent media, establishing the rule of law, and strengthening local governments.

2009 program resources will be focused on: 1) enhancing local public and private institutional capacity as part of the comprehensive strategy to expand trade and investment, develop and strengthen small and medium enterprises, mobilize capital, reduce crime and corruption, and build viable civil societies; and 2) mitigating the social impact of political and economic transitions in order to broaden public support for needed reforms. Assistance to central governments will be highly selective.

Funding is also requested to consolidate democratic transitions in Ukraine and Georgia, as well as to support the anti-terrorism campaign and address regional stability issues.

The International Disaster Assistance (IDA) account provides funds for the management of humanitarian relief, rehabilitation, and transition to development assistance to foreign countries affected by natural and man-made disasters, and for disaster prevention, preparedness and mitigation. The request funds relief programs such as emergency health and nutrition interventions, provision of safe drinking water, and emergency shelters. This includes the purchase of commodities including temporary shelter, blankets, supplementary and therapeutic food, potable water, medical supplies, and agricultural rehabilitation aid, including seeds and hand tools. The majority of beneficiaries in man-made disasters and conflict are internally displaced persons (IDPs), a group made more vulnerable by their lack of recognized status. The request includes an estimated \$115 million for humanitarian and post-conflict needs in Sudan.

The Administration is also requesting funds for USAID's per capita contribution to the Capital Security Cost Sharing Program (CSCS) administered by the Department of State Overseas Building Operations. The CSCS program is designed to accelerate the construction of secure, safe, functional facilities for all U.S. Government Personnel overseas.

The Office of Transition Initiatives (OTI) uses the Transition Initiatives account to address the opportunities and challenges facing conflict-prone countries and those making the transition from the initial crisis stage of a complex emergency to the path of sustainable development. OTI collaborates closely with the Department of State, the National Security Council, the Department of Defense, and USAID's regional bureaus in the selection of high foreign policy priority countries for OTI's transition assistance and in the design and monitoring of OTI programs. OTI's efforts to advance peace and stability include support for demobilization and reintegration of ex-combatants, community self-help programs that re-

duce tensions and promote grass-roots democratic media, and conflict resolution measures.

The Fund, authorized by section 635(m) of the Foreign Assistance Act of 1961, finances on a reimbursable basis the costs associated with providing administrative support to other agencies under the International Cooperative Administrative Support Services (ICASS) program overseas. Under ICASS, each agency pays a proportional share of the cost of those services they have agreed to receive. Working through inter-agency councils at post, all agencies have a say in determining which services the USAID mission will provide, defining service standards, reviewing costs, and determining funding levels. The Fund is also used for deposit of rebates from the use of Federal credit cards, the deposits then being made available for start-up costs at new ICASS service provider missions and for technical support to missions currently providing services.

In 2009, the U.S. Agency for International Development (USAID) will use the Development Credit Authority (DCA) transfer authority to support DCA projects in every region of the globe and every economic sector targeted by USAID. DCA augments grant assistance by mobilizing private capital in developing countries for sustainable development projects. Credit assistance under DCA is principally intended for use where a development activity is financially viable, where borrowers are creditworthy, and where there is a true risk sharing with private lenders.

In 2009, the request for \$21 million in DCA transfer authority will support financing of water and sanitation facilities. DCA will continue to support small and medium enterprises and infrastructure projects, and continue to promote the flow of credit to microfinance institutions, small and medium enterprises, agribusinesses, energy-efficiency projects, housing projects, and municipalities in USAID-assisted countries.

This account transfers funds to the operating expense account for the Peace Corps to finance upward adjustments of recorded obligations because of foreign currency fluctuations. Transfers are made as needed to meet disbursement requirements in excess of funds otherwise available for obligation adjustment. Net gains resulting from favorable exchange rates are returned to this appropriation and available for subsequent transfer when needed. The account is replenished through the utilization of a special transfer authority that allows the Peace Corps to withdraw unobligated balances from the operating expenses account from prior years as long as the authorized limit of \$5 million is not exceeded at the time of the transfer.

The Inter-American Foundation (IAF) funds grassroots development initiatives designed by the organized poor in Latin America and the Caribbean. The IAF has carried out its mandate by responding with grant support to the most creative ideas for self-help received from grassroots groups and non-governmental organizations. The IAF uses objective indicators to gauge the results of its grants in improving the quality of life in poor communities and disseminates the experiences to a broad audience that includes private and public sector donors, development professionals, academics, and other interested parties. In 2009, the IAF will strive to leverage additional resources for its grant program from local governments, private sector, beneficiary populations, and other donors as well as through an IAF-initiated network of Latin American businesses and corporate foundations committed to funding grassroots development.

**Development Grants.**—Grants are awarded directly to non-governmental organizations in Latin America and the Caribbean to carry out development projects. In 2009, the IAF plans to award approximately 75 new grants and to supplement with additional funds approximately 20 grants awarded in previous years.

**Leveraging of Resources.**—IAF grantees are required to contribute to their projects, encouraged to partner with local governments, and urged to mobilize funds to sustain their impact after the grant period. RedEAmerica, a network of the hemisphere's corporate foundations that have adopted the IAF's bottom-up approach, invests its funds in self-help programs. RedEAmerica members that are parties to the IAF cooperative agreements match IAF funding two-to-one; the entire network raises contributions from a variety of sources. Additionally, U.S based migrant associations are joining the

IAF to support grassroots development in their home communities.

**Evaluations and Other Activities.**—Each year the progress of all IAF grantees is routinely assessed and a sample of completed projects undergoes comprehensive evaluation. The IAF also produces and distributes regularly scheduled publications on its projects, on trends in development, and on other topics of interest to the development profession.

**Program Management and Operation.**—The IAF also manages resources that cover salaries and benefits, travel, reimbursable service agreements with other U.S. government agencies, rent, service contracts, and other support costs.

The African Development Foundation (ADF), a public corporation, is the only agency of the U.S. Government that directly invests in small, African-owned enterprises and community-based initiatives to alleviate poverty and promote sustainable development in Africa. Through its grant program, ADF provides Africans with the resources necessary to identify and solve their own problems. ADF relies on participatory development approaches that strengthen local capacity, foster ownership of development projects, and promote self-help and empowerment.

In 2009, ADF will provide grants to recipients in seventeen African countries, either directly to small, African-owned enterprises, small farmer and agricultural cooperatives, and grassroots groups or through nongovernmental mechanisms. These investments will be focused on entrepreneurs at the lower end of the economic and social spectrum in countries where ADF operates to promote the following two strategic goals:

1) Advance community-based, sustainable development and empowerment of the poor in Africa. ADF will promote micro- and small-enterprise and smallholder agricultural development to generate income and employment. ADF will increase participation of African-owned small enterprises and producer groups to promote economic development, including trade and investment.

2) Expand local capacity to promote and support grassroots, participatory development. ADF will build self-supporting, sustainable, local community development Partner Organizations that provide technical assistance and support to grassroots groups. ADF will develop and replicate new models for community reinvestment. ADF will continue to leverage additional funding through strategic partnerships with national and local governments, other donor agencies, and the local private sector. ADF will encourage African governments and other donors to increase utilization of grassroots development "practices."

As part of a general increase in the International Monetary Fund (IMF) quota resources, on November 17, 1998, the United States consented to an increase in its quota to SDR 37,149.3 million (about \$52 billion at that time). The increase in the U.S. quota involves no net budget outlays. Similarly, use by the IMF of the quota commitment does not result in net budget outlays because the United States receives an increase in its international monetary reserves corresponding to any transfer of dollars under the U.S. quota subscription. The United States can use these interest-bearing reserves to meet a balance of payments financing need.

The General Arrangements to Borrow (GAB) were established in 1962 by 10 industrial countries, including the United States, as a means of supplementing the IMF's resources when needed to forestall or cope with an impairment of the international monetary system. GAB members agreed in early

1983 to increase their financial commitments to GAB from approximately SDR 6.3 billion to SDR 17 billion, with the U.S. share rising from \$2.0 billion to approximately \$6.4 billion.

In January 1997, the Executive Board of the IMF approved the creation of the New Arrangements to Borrow (NAB) to further supplement resources available to the IMF to forestall or cope with an impairment of the international monetary system or to deal with an exceptional situation that poses a threat to the stability of the system. NAB became effective on November 17, 1998. In 2007, twenty-six countries and institutions participated in NAB through a set of credit arrangements with the IMF totaling SDR 34 billion (about \$48 billion on the date of establishment), of which the U.S. share is approximately SDR 6.6 billion (about \$10.4 billion as of December 2007). Although GAB continues to exist, the sum of loans advanced under NAB and GAB cannot exceed SDR 34 billion. The sum of U.S. loans advanced under both arrangements cannot exceed the U.S. share of NAB.

Financing extended by the United States under GAB and NAB does not result in any net budget outlays because such financing results in an equivalent increase in U.S. international reserve assets in the form of a claim on the IMF.

During 1998 (July), the IMF made one call on GAB participants in support of an assistance program for Russia, of which the U.S. share was approximately \$483 million. On December 15, 1998, the IMF made a call on NAB participants in support of an assistance program for Brazil, of which the U.S. share was approximately \$860 million. GAB and NAB loans were paid back in full on March 11, 1999. Since 1999, no calls were made on GAB or NAB participants, and no loans were outstanding at the end of the fiscal year.

In December 2004 a devastating tsunami and earthquake affected a number of countries in southeast Asia. The United

States responded with a quick infusion of emergency assistance, followed by funding for rehabilitation and reconstruction. Assistance provided in the supplemental was designed for rebuilding communities and infrastructure, helping individuals return to their original livelihood, training individuals, particularly women, to develop new skills, and supporting host government-led reconstruction and early warning/disaster preparedness effort. Funds were also used to reimburse other accounts obligated for relief and rehabilitation efforts in the immediate aftermath of the tsunami. The largest amounts of funding went to assistance for Indonesia and Sri Lanka, with smaller programs in India, Thailand, and the Maldives. Funds were also provided to support regional programs, such as development of an early warning and disaster preparedness system for the Indian Ocean and to support prevention and preparations against avian influenza.

This appropriation finances research activities and studies concerned with planning, analysis, and information development needed to support the Secretary’s responsibilities in the formulation of national transportation policies. The program is carried out primarily through contracts with other Federal

agencies, educational institutions, non-profit research organizations, and private firms. Activities support the development of transportation policy, coordination of national-level transportation planning, and such issues as regulatory modernization, energy conservation, and environmental and safety impacts of transportation. These also support departmental leadership on aviation economic policy and international transportation issues.

The Federal Aviation Reauthorization Act (FAA) of 1996 (P.L. 104–264) authorized the collection of user fees for services provided by the FAA to aircraft that neither take off nor land in the United States, commonly known as overflight fees. The Act permanently appropriated the first \$50 million of such fees for the Essential Air Service program and rural airport improvements. To the extent that fee collections fall below \$50 million, the law required the difference to be covered by Federal Aviation Administration funds. The 2009 Budget proposes a \$50 million program to be fully financed from overflight fees. The Budget proposes a general provision to restructure the program.

Through 1997, this program was funded from the Airport and Airway Trust Fund. Starting in 1998, the FAA reauthorization funded it as a mandatory program supported by overflight fees under the Essential Air Service and Rural Airport Improvement Fund. In addition to mandatory funding supported by overflight fees, direct appropriations from the Airport and Airway Trust Fund to the Payments to Air Carriers program were enacted in 2007 and 2008. The Administration is not requesting appropriations from the Airport and Airway Trust Fund for the Payments to Air Carriers account in 2009.

**FEDERAL AVIATION ADMINISTRATION**

Today’s disjointed system of aviation ticket taxes and fuel taxes fails to encourage efficient use of airports and airspace. The Administration transmitted a reauthorization proposal in February 2007 to reform the Federal Aviation Administration’s (FAA) financing system by adopting new cost-based user fees and a new governance structure to provide more transparency and accountability for FAA operations. The Administration will resubmit the proposal that establishes a cost-based financing system, helps to address congestion, and

makes the system more accountable to aviation stakeholders. The Budget estimates in the Appendix present FAA’s budget accounts under current law financing mechanisms for 2009; estimates beyond 2009 assume enactment of the Administration’s proposal.

Under the proposal, FAA’s financing sources shift from a mix of fuel taxes, other excise taxes, and general fund contributions to user fees, fuel taxes, and a general fund contribution. FAA would have the authority to collect user fees that directly offset the cost of FAA’s operations and capital investments related to air traffic services; expenditure of the available fees would be affirmed in the appropriations process. Air traffic user fees would be collected from turbine-powered fixed-wing commercial aviation operators. General aviation users, along with commercial piston flights and helicopters, would continue to pay a fuel tax that would be deposited into the Airport and Airway Trust Fund; fuel tax rates would be calibrated based on the costs that these users impose on the system. The general fund component of FAA’s budget would cover activities that benefit the public such as safety and public use of the airspace. Finally, the Airport Improvement Program and the majority of the Research, Engineering, and Development program would continue to be funded by fuel taxes paid by all domestic users into the Airport and Airway Trust Fund, along with an international passenger tax (reduced from current rates because these flights would also pay user fees).

(in millions of dollars)

	2009 Budget Current Law Extended	2010 Budget Under Reautho- rization Proposal
Safety and Operations	2,052	2,116
Air Traffic Organization	9,670	10,294
Airport Improvement Program	2,750	2,900
Research, Engineering and Development	171	189
FAA Total Program Level	14,643	15,499
Less: Obligation Limitation	-2,750	-2,900
FAA Gross Discretionary Level	11,893	12,599
Less: Discretionary User Fees	n/a	-8,550
FAA Net Discretionary Level	11,893	4,049

As the table above illustrates, while total spending will increase by \$856 million in 2010 under the Administration’s proposal, user fees will offset over half of FAA’s 2010 budget. This means FAA net discretionary level will decrease by \$7.84 billion, even as FAA increases investment in the Next Generation Air Traffic Control System.

FAA aims to create a more direct relationship between revenues collected and the cost of services provided, thereby creating incentives to make the system more efficient and responsive to user needs. The reform of FAA’s financing structure is necessary because under the existing aviation tax structure, there is no relationship between the taxes paid by users and the air traffic control services rendered by the FAA. This disconnect leads to distorted consumption of air traffic services, and, ultimately, congestion. For example, when a full plane flies from New York to Boston it imposes the same workload on the FAA as when a less crowded plane of the same size travels the same route. However, since the current tax structure is primarily based on ticket revenue, the full plane pays much more in taxes than the less crowded plane. Furthermore, a general aviation jet pays a small fraction, often less than 10 percent of what a commercial flight pays, despite using the same airspace and services. User fees allow commercial aviation users to pay directly for the services that FAA provides for managing their use of the national airspace. Similarly, under the recalibrated fuel taxes, general aviation users would pay a fairer share of the air traffic costs through their preferred payment mechanism.

The Administration's proposal was crafted to reform FAA's financing system to better enable modernization and reduce congestion. In its proposal, FAA would charge cost-based fees for terminal and en route airspace. At large congested airports, FAA could adjust this terminal fee based on the time of day and day of the week, to reduce delays and congestion.

The Administration has also taken several short-term steps to address congestion including new air traffic patterns at JFK, LaGuardia, Newark, and Philadelphia International airports, directing the appointment of a New York aviation czar, and working with the Port Authority of New York and New Jersey, airports, airlines, and other stakeholders to make operational improvements. FAA also convened scheduling reduction meetings in October 2007. As a result of those meetings, an agreement was reached on reducing schedules during peak hours at JFK to ensure operations remain within available capacity. The Secretary also directed the FAA to enter into negotiations to set hourly caps at Newark Airport, so that flights are not simply shifted there, erasing gains made at JFK.

DOT will continue talks with airlines and airports to look at ways to use broader market-based mechanisms to combat delays not only in the New York region, but in clogged aviation centers elsewhere around the country. Later this year, the FAA anticipates leasing new airspace capacity added in the New York City region for the 2009 summer schedule. The price of these leases will ultimately be determined by the market demand for the operating authorizations. The Administration will consider transmitting a budget amendment when there is better information concerning the number of operating authorizations available to be leased and the potential revenue generated from the leases. Revenue will be directed to further capacity improvements in the New York airspace.

The following table depicts the total funding for all Federal Aviation Administration programs, for which more detail is furnished in the budget schedules:

In 2009, FAA proposes a new account structure to align FAA's budget account structure with its lines of business. The proposal replaces the Operations and Facilities and

Equipment accounts with the Air Traffic Organization and Safety and Operations accounts. No further budget authority is requested in 2009 in the Operations account and its schedule shows obligation and outlay amounts from prior years. 2009 funding is requested for these activities in the Air Traffic Organization and Safety and Operations accounts.

For 2009, FAA proposes a new budget account, Air Traffic Organization, that better aligns with FAA's lines of business. This account provides funds for the operation, maintenance, communications, and logistical support of the air traffic control and air navigation systems, including the deployment of communications, navigation, surveillance and related equipment and technology. As a performance-based organization, ATO is designed to provide cost-effective, efficient, and, above all, safe air traffic services. In 2009, this account includes funding for FAA initiatives related to the Next Generation Air Transportation System, a joint effort between FAA, NASA, and other agencies to design the future operating environment. The funding request for 2009 is also in accordance with FAA's comprehensive plan for modernizing and improving air traffic control and airway facilities services.

The Federal Aviation Reauthorization Act of 1996 (P.L. 104-264) authorized the collection of user fees for air traffic control and related services provided by the FAA to aircraft that neither take off nor land in the United States, commonly known as overflight fees. The Budget estimates that \$52 million in overflight fees will be collected in 2009.

The fund provides direct support for the aviation insurance program (chapter 443 of title 49, U.S. Code). Income to the fund is derived from premium collections for premium insurance coverage issued, income from authorized investments, and binder fees for nonpremium coverage issued. The binders provide aviation insurance coverage for U.S. air carrier aircraft used in connection with certain Government contract operations by the Department of Defense and the Department of State.

The Homeland Security Act of 2002 (P.L. 107-296) required the Secretary to provide additional war risk insurance coverage (Hull Loss and Passenger and Crew Liability) to air carriers insured for Third-Party War Risk Liability as of June 19, 2002, as authorized under existing law. Continuation of this coverage was subsequently directed by several appropriations acts, the last being the Department of Transportation Appropriations Act of 2008, which extended the requirement to provide insurance coverage through August 31, 2008. The Secretary is authorized to limit an air carrier's third party liability to \$100 million, when the Secretary certifies that the loss was from an act of terrorism. The FAA insurance policy covers: (i) hull losses at agreed value; (ii) death, injury, or property loss to passengers or crew, the limit being the same as that of the air carrier's commercial coverage before September 11, 2001; and (iii) third party liability, the limit generally being twice that of such coverage.

In 2009, FAA proposes a new account structure that replaces the Operations and Facilities and Equipment accounts with the Air Traffic Organization and Safety and Operations accounts to align FAA's budget account structure with its lines of business. No budget authority is requested in 2009 in the Facilities and Equipment account and its schedule shows obligation and outlay amounts from prior years. Instead, 2009 funding is requested for these activities in the Air Traffic Organization and Safety and Operations accounts.

FEDERAL HIGHWAY ADMINISTRATION

The Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), enacted August 10, 2005, provides for increased transportation infrastructure investment, strengthens transportation safety programs and environmental programs, and continues core research activities. SAFETEA-LU, along with Title 23, United States Code (“Highways”) and other supporting legislation, provides authority for the various programs of the Federal Highway Administration designed to improve highways

throughout the Nation. The President's Budget continues transportation infrastructure investment to increase the mobility and productivity of the Nation, strengthens transportation safety programs, and provides focus on program efficiencies, oversight, and accountability. In support of the Administration's National Strategy to Reduce Congestion on America's Transportation Network, the Administration proposes using existing budgetary resources to fund a new initiative to reduce highway congestion.

In 2009, the Federal Highway Administration continues core programs, including the Surface Transportation Program, the National Highway System, Interstate Maintenance, Highway Safety Improvement Program, Highway Bridge Replacement and Rehabilitation Program, the Federal Lands Highways Program, and the Congestion Mitigation and Air Quality Improvement Program. In addition, the Transportation Infrastructure Finance and Innovation program provides Federal credit assistance to nationally or regionally significant surface transportation projects, and the Equity Bonus program provides funding to States based on equity considerations. Other programs new in SAFETEA-LU include the Coordinated Border Infrastructure Program, Highways for Life Pilot Program, National Corridor Infrastructure Improvement Program, Projects of National and Regional Significance, and Safe Routes to School.

In summary, the 2009 Budget consists of \$41,562 million in new budget authority and \$40,637 million in outlays. The following table reflects the total funding for all Federal Highway Administration programs.

The Federal-Aid Highway Act of 1968 authorized the establishment of a right-of-way revolving fund. This fund was used to make cash advances to States for the purpose of purchasing right-of-way parcels in advance of highway construction and thereby preventing the inflation of land prices from significantly increasing construction costs.

This program was terminated by TEA-21 but will continue to be shown for reporting purposes as loan balances remain outstanding. The purchase of right-of-way is an eligible expense of the Federal-aid program.

FEDERAL-AID HIGHWAYS  
HIGHWAY TRUST FUND

*Whenever in this fiscal year the Secretary of the Treasury (after consultation with the Secretary of Transportation) determines that the amount in the Highway Trust Fund (other than the Mass Transit Account) or the Mass Transit Account is insufficient to timely meet the anticipated payments from the account, and the amount in the other account exceeds the amount necessary to timely meet the anticipated payments from that account, the Secretary shall transfer to the insufficient account from such other account referred to in this paragraph an amount up to the insufficiency or the excess in such other account, whichever is less: Provided, That any amount transferred to the insufficient account shall be treated as a non-interest bearing repayable advance: Provided further, That whenever in this fiscal year or any fiscal year hereafter the Secretary of the Treasury (after consultation with the Secretary of Transportation) determines that the amount in the account to which an advance is made exceeds the amount necessary to timely meet the anticipated payments from the account, the Secretary shall transfer from that account, to the account from which the advance was made, an amount equal to the amount so advanced or such excess, whichever is less.*

The Highway Revenue Act of 1956, as amended, provides for the transfer from the General Fund to the Highway Trust Fund of revenue from the motor fuel tax and certain other taxes paid by highway users. The Secretary of the Treasury estimates the amounts to be transferred. In turn, appropriations are authorized from this fund to meet expenditures for Federal-aid highways and other programs as specified by law.

The Budget authorizes borrowing between the Highway Account and the Mass Transit Account within the Highway Trust Fund in fiscal year 2009 in the form of non-interest bearing repayable advances. The borrowing would occur if the Secretary of the Treasury, in consultation with the Secretary of Transportation, determines that during 2009, the amount in the borrowing account is not sufficient to make anticipated payments in a timely manner and the amount in the lending account exceeds the amount necessary to make anticipated payments in a timely manner.

The Status of Funds table presents the status of the Highway Trust Fund. The rule governing most trust funds is that the legal authority to incur obligations against the receipts estimated to be collected by the fund cannot exceed the cash balances of the fund, i.e., the actual receipts estimated to be collected in that year. The laws governing the Highway Trust Fund provide an exception to this rule. The legal authority to incur obligations against the Highway Trust Fund can exceed the actual cash balances up to the receipts anticipated to be collected in the following four years.

*Cash balances.*—The Status of Funds table begins with the unexpended balance on a “cash basis” at the start of the year. The table shows the amount of cash invested in Federal securities at par value and the amount of cash on hand, i.e., uninvested balance. Next, the table provides the amounts of cash income and cash outlays during each year to show the cash balance at the end of each year.

The following table shows the annual income and outlays of programs funded by the Highway Account of the Highway Trust Fund.

The Federal-Aid Highways (FAH) program is designed to aid in the development, operations and management of an intermodal transportation system that is economically efficient, environmentally sound, provides the foundation for the Nation to compete in the global economy, and moves people and goods safely.

All programs included within FAH are financed from the Highway Trust Fund and most are distributed via apportionments and allocations to States. Liquidating cash appropriations are subsequently requested to fund outlays resulting from obligations incurred under contract authority. The Budget continues to fund most programs from within the Federal-Aid Highway obligation limitation. Emergency Relief (\$100 million) and a portion of the Equity Bonus program (\$639 million) are exempt from the obligation limitation.

The FAH program is funded by contract authority in P.L. 109-59, the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU). The Budget proposes an obligation limitation for FAH of \$39.4 billion. This funding level for 2009 reflects the obligation limitation that will fulfill the funding commitment under SAFETEA-LU, including a downward adjustment based on the revenue aligned budget authority (RABA) calculation enacted in SAFETEA-LU.

*Surface transportation program (STP).*—STP funds may be used by States and localities for projects on any Federal-

aid highway, bridge projects on any public road, transit capital projects, and intracity and intercity bus terminals and facilities. A portion of STP funds are set aside for transportation enhancements and State sub-allocations are provided.

**National highway system (NHS).**—The NHS program provides funding for a designated National Highway System consisting of roads that are of primary Federal interest. The NHS consists of the current Interstate, other rural principal arterials, urban freeways and connecting urban principal arterials, and facilities on the Defense Department's designated Strategic Highway Network, and roads connecting the NHS to intermodal facilities. Legislation designating the 161,000 mile system was enacted in 1995.

**Interstate maintenance (IM).**—The IM program finances projects to rehabilitate, restore, resurface and reconstruct roads and bridges on the Interstate system. Reconstruction that increases capacity, other than HOV lanes, is not eligible for IM funds.

**Emergency relief (ER).**—The ER program provides funds for the repair or reconstruction of Federal-aid highways and bridges and Federally-owned roads and bridges that have suffered serious damage as the result of natural disasters or catastrophic failures. The ER program supplements the commitment of resources by States, their political subdivisions, or Federal agencies to help pay for unusually heavy expenses resulting from extraordinary conditions.

**Bridge replacement and rehabilitation.**—The bridge program enables States to improve the condition of their bridges through replacement, rehabilitation, and systematic preventive maintenance. The funds are available for use on bridges located on any public road.

**Congestion mitigation and air quality improvement program (CMAQ).**—The CMAQ program directs funds toward transportation projects and programs to help meet and maintain national ambient air quality standards for ozone, carbon monoxide, and particulate matter.

**Federal lands.**—This category funds improvement for forest highways, park roads and parkways, Indian reservation roads, and refuge roads. The Federal Lands Highways program provides for transportation planning, research, engineering, and construction of highways, roads, parkways, and transit facilities that provide access to or within public lands, National parks, and Indian reservations.

**Transportation infrastructure finance and innovation (TIFIA) program.**—The TIFIA credit program issues loans to assist in the development of surface transportation projects of regional and national significance. The goal is to develop major infrastructure facilities through greater non-Federal and private sector participation.

As required by the Federal Credit Reform Act of 1990, this account records, for this program, the subsidy costs associated with the direct loans, loan guarantees, and lines of credit obligated in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program. The subsidy amounts are estimated on a present value basis and the administrative expenses are estimated on a cash basis.

**Federal highway research, technology and education.**—Research, technology, and education programs develop new transportation technology that can be applied nationwide. Activities include surface transportation research, including Intelligent Transportation Systems; development and deployment, training and education; and University Transportation Research.

**Highway safety improvement (HSIP).**—The highway infrastructure safety program, established as a core program in 2006, features strategic safety planning and performance, devotes additional resources, and supports innovative ap-

proaches to reducing highway fatalities and injuries on all public roads.

**Equity Bonus program.**—The Equity Bonus program provides additional funds to States to ensure that each State receives an amount based on equity considerations. Each State is guaranteed a minimum rate of return on its share of contributions to the Highway Account of the Highway Trust Fund, and a minimum increase relative to the average dollar amount of apportionments under the previous highway authorization (the Transportation Equity Act for the 21st Century, or TEA-21). Certain States will maintain the share of total apportionments they each received during TEA-21. An open-ended authorization is provided, ensuring that there will be sufficient funds to meet the objectives of the Equity Bonus program.

**High priority projects and transportation improvements.**—Funds are provided for specific projects identified in SAFETEA-LU, each with a specified amount of funding over the 5 years of SAFETEA-LU.

**Projects of national and regional significance.**—Provides funding for specific projects of national or regional importance. All the funds authorized for this program from the Highway Trust Fund are designated for projects listed in SAFETEA-LU.

**Congestion Reduction Initiative.**—In support of a Department-wide effort to tackle congestion in all modes of transportation, the 2009 Budget includes a \$175 million initiative for reducing highway congestion. The Budget proposes to fund the initiative by reprogramming \$175 million in unobligated balances associated with inactive Federal-aid highway program demonstration projects. These funds will be used to support new pricing projects in metropolitan areas and continue the Corridors of the Future program.

Motor Carrier Safety Grants are funded at \$307 million in 2009, of which \$209 million is dedicated to Motor Carrier Safety Assistance Program (MCSAP) State grants. Grants will be used to support State compliance reviews; identify and apprehend traffic violators; conduct roadside inspections; and support safety audits on new entrant carriers. State safety enforcement efforts, at both the southern and northern borders, are funded at a total of \$32 million to ensure that all points of entry into the U.S. are fortified with comprehensive safety measures. In addition, \$25 million is included to improve State commercial driver’s license (CDL) oversight activities to prevent unqualified drivers from being issued CDLs, and \$5 million is provided for the Performance and Registration Information Systems and Management (PRISM) program, which links State motor vehicle registration systems with carrier safety data in order to identify unsafe commercial motor carriers. It also includes \$25 million for Commercial Vehicle Information Systems and Networks Deployment (CVISN) to improve safety and productivity of commercial vehicles and drivers; \$3 million for Safety data improvement program to improve the accuracy, timeliness, and completeness of commercial motor vehicle safety data; and \$8 million to modernize its Commercial Driver’s License Information System (CDLIS).

A total of \$231.5 million (including the National Driver Register program) is proposed for Operations and Research. Of this amount, \$105.5 million is for the Highway Safety Research and Development Program, and \$4.0 million is for the National Driver Register program, both of which are currently authorized under SAFETEA-LU. In addition, \$122.0 million is for the Vehicle Safety Program for which authorization is being requested. The Budget proposes to fund all NHTSA programs from the Highway Trust Fund.

Programs funded under the Operations and Research appropriation are described below.

**Safety Performance Standards (Rulemaking) Programs.**—Supports the promulgation of Federal motor vehicle safety standards for motor vehicles and safety-related equipment; automotive fuel economy standards required by the Energy Policy and Conservation Act; international harmonization of vehicle standards; and consumer information on motor vehicle safety, including the New Car Assessment Program.

**Safety Assurance (Enforcement) Programs.**—Provides support to ensure compliance with motor vehicle safety and automotive fuel economy standards, investigate safety-related motor vehicle defects, enforce Federal odometer law, encourage enforcement of State odometer law, and conduct safety recalls when warranted.

**Research and Analysis.**—Provides motor vehicle safety research and development in support of all NHTSA programs, including the collection and analysis of crash data (also funded under Highway Safety Research) to identify safety problems; develops alternative solutions; and assesses costs, benefits, and effectiveness. Research will continue to concentrate on improving vehicle crash worthiness and crash avoidance, with emphasis on increasing safety belt use, decreasing alcohol involvement in crashes, decreasing the number of rollover crashes, improving vehicle-to-vehicle crash compatibility, and improving data systems.

**Highway Safety Research Programs.**—Provide research, demonstrations, technical assistance, and national leadership for highway safety programs conducted by State and local governments, the private sector, universities, research units, and various safety associations and organizations. This program emphasizes alcohol and drug countermeasures, vehicle occupant protection, traffic law enforcement, emergency medical and trauma care systems, traffic records and licensing, State and community evaluation, motorcycle riders, pedestrian and bicycle safety, pupil transportation, young and older driver safety programs, and development of improved accident investigation procedures.

**National Driver Register.**—Provides funding to implement and operate the Problem Driver Pointer System (PDPS) to help identify drivers who have been suspended for or convicted of serious traffic offenses, such as driving under the influence of alcohol or other drugs.

SAFETEA-LU updated the following programs:

**Section 402.**—SAFETEA-LU reauthorized and amended the State and Community Highway Safety formula grant program to support State highway safety programs, designed to reduce traffic crashes and resulting deaths, injuries,

and property damage. A State may use these grant funds only for highway safety purposes; at least 40 percent of these funds are to be expended by political subdivisions of the State.

**Section 405.**—SAFETEA-LU reauthorized and amended Section 405(a) of Chapter 4 of Title 23 to encourage States to adopt and implement effective programs to reduce deaths and injuries from riding unrestrained or improperly restrained in motor vehicles. A State may use these grant funds only to implement and enforce occupant protection programs.

**Section 406.**—SAFETEA-LU established a new program of incentive grants to encourage the enactment and enforcement of laws requiring the use of safety belts in passenger motor vehicles. A State may use these grant funds for any safety purpose under Title 23 or for any project that corrects or improves a hazardous roadway location or feature or proactively addresses highway safety problems. However, at least \$1 million of amounts received by States must be obligated for behavioral highway safety activities.

**Section 408.**—SAFETEA-LU established a new program of incentive grants to encourage States to adopt and implement effective programs to improve the timeliness, accuracy, completeness, uniformity, integration, and accessibility of State data that is needed to identify priorities for national, State, and local highway and traffic safety programs; to evaluate the effectiveness of efforts to make such improvements; to link these State data systems, including traffic records, with other data systems within the State; and to improve the compatibility of the State data system with national data systems and data systems of other States to enhance the ability to observe and analyze national trends in crash occurrences, rates, outcomes, and circumstances. A State may use these grant funds only to implement such data improvement programs.

**Section 410.**—SAFETEA-LU reauthorized and amended the alcohol-impaired driving countermeasures incentive grant program to encourage States to adopt and implement effective programs to reduce traffic safety problems resulting from individuals driving while under the influence of alcohol. A state may use these grant funds to implement the impaired driving activities described in the Programmatic Criteria, including but not limited to costs for high visibility enforcement; the costs of training and equipment for law enforcement; the costs of advertising and educational campaigns that publicize checkpoints, increase law enforcement efforts and target impaired drivers under 34 years of age; the costs of a State impaired operator information system, and the costs of vehicle or license plate impoundment. In addition, the Secretary is directed to make a separate grant under the section to high fatality rate States.

**Child Safety and Child Booster Seat Safety Incentive Grants.**—Section 2011 of SAFETEA-LU established a new incentive grant program to make grants available to States that are enforcing a law requiring any child riding in a passenger vehicle who is too large to be secured in a child safety seat to be secured in a child restraint that meets the requirements prescribed under section 3 of Anton’s Law (49 U.S.C. 30127 note; 116 Stat. 2772). These grant funds may be used only for child safety seat and child restraint programs, including programs for purchasing and distributing child safety seats and child restraints to low-income families.

**Motorcyclist Safety.**—Section 2010 of SAFETEA-LU established a new program of incentive grants to encourage States to adopt and implement effective programs to reduce the number of single and multi-vehicle crashes involving motorcyclists. A State may use these grants funds only for motorcyclist safety training and motorcyclist awareness

HIGHWAY TRAFFIC SAFETY GRANTS—Continued  
(HIGHWAY TRUST FUND)—Continued

programs, including improvements to training curricula, delivery of training, recruitment or retention of motorcyclist safety instructors, and public awareness and outreach programs.

**High Visibility Enforcement.**—Section 2009 of SAFETEA-LU established a new program to administer at least two high-visibility traffic safety law enforcement campaigns each year to achieve one or both of the following objectives: (1) reduce alcohol-impaired or drug-impaired operation of motor vehicles; and/or (2) increase the use of safety belts by occupants of motor vehicles. These funds may be used to establish and administer the high visibility traffic safety law enforcement campaigns, to pay for the development, production, and use of broadcast and print media advertising in carrying out these campaigns, and by the Secretary to conduct an annual evaluation of the effectiveness of these campaigns. Consideration is to be given to advertising directed at non-English speaking populations, including those who listen, read or watch non-traditional media.

**Grant Administrative Expenses.**—Section 2001(a)(11) of SAFETEA-LU provides funding for salaries and operating expenses related carrying out Chapter 4 of Title 23, United States Code, as well as supporting the National Occupant Protection User Survey (NOPUS) and Highway Safety Research programs.

Funds are used to redevelop the Pennsylvania Station in New York City, which involves also renovating the James A. Farley Post Office building. Funding for this project was included in the Grants to the National Railroad Passenger Corporation appropriation in 1995 through 1997, and the Northeast Corridor Improvement Program in 1998. In 2000, an advance appropriation of \$20 million was provided for 2001, 2002, and 2003. In 2001, Congress specified that the \$20 million advance appropriation provided in 2000 for the Farley Building, was to be used exclusively for fire and life safety initiatives. No funds are requested in 2009.

For 2009, the Administration proposes a Capital Grant Program to encourage state participation in its passenger rail service. Under this program, a State or States may apply for grants for up to 50 percent of the cost of capital investments necessary to support improved intercity passenger rail service that either requires no operating subsidy or for which the State or States agree to provide any needed operating subsidy. To qualify for funding, States would have to include intercity passenger rail service as an integral part of Statewide transportation planning as required under 23 U.S.C. 135. Additionally, the specific project would have to be on the Statewide Transportation Improvement Plan at the time of application.

**FEDERAL TRANSIT ADMINISTRATION**

The Federal Transit Administration (FTA) provides grant funding to State and local governments, public and private transit operators, and other recipients to subsidize public transit operations; construct new public transit systems; purchase and maintain transit vehicles and equipment; support regional transportation planning efforts; and improve the technology and service methods used in the delivery of public transportation services. FTA programs also provide financial assistance to help implement national policy goals relating to mobility for the elderly, for individuals with disabilities, and for those who are economically disadvantaged. In 2009, FTA will again increase public transportation funding predictability and transparency by distributing more funds by formula, including the rural (non-urbanized area) program funds to address unmet public transportation needs in underserved rural communities.

This table below presents the total funding for all Federal Transit Administration programs with additional detail provided in the budget schedules that follow.

In 2009, the National Research and Technology Program, Transit Cooperative Research Program, University Centers Program, and the National Transit Institute are funded in the Research and University Research Centers account.

National Research and Technology Program funding will be used for FTA's safety and mobility activities. Under the national component of the program, FTA advances the research, development, and deployment of transportation methods and technologies that address issues such as accessibility for elderly, low income, and disabled individuals; air quality; traffic congestion; and transit capacity and operational improvements.

The Transit Cooperative Research Program funds research projects that are significant to the transit industry. Grant awards support priority projects in areas of safety, security, equipment and system design, system operations, and the economic development impact of transit investment in transportation corridors.

Funding for the University Centers Program will provide continued support for research, education, and technology transfer activities aimed at addressing regional and national transportation problems.

The National Transit Institute exists to develop and provide transit industry employee education programs to improve transit workforce performance, enhance security incident response capability, and to implement strategies that increase ridership.

In 2009, funding for the New Starts program, including Small Starts grants, is included in the Capital Investment Grants account. FTA's New Starts program is the Federal government's primary source for capital investment in transit infrastructure that is planned, constructed and operated by State and local government entities. These projects include heavy rail, light rail, commuter rail and bus rapid transit systems that are implemented in communities across the country to provide an alternative to automobile travel, to improve mobility, and to address congestion and air quality concerns in the areas they serve.

For 2009, all programs within the Formula and Bus Grant account are funded from the Mass Transit Account of the Highway Trust Fund.

Formula and Bus Grants are funded by contract authority provided in SAFETEA-LU (Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users) P.L. 109–59. Formula Grant funds can be used for all transit purposes including planning, bus and railcar purchases, facility repair and construction, maintenance and, where eligible, operating expenses. These funds help existing transit systems alleviate congestion, ensure basic mobility, promote economically vibrant communities and meet the requirements of the Americans with Disabilities Act (ADA) and the Clean Air Act (CAA).

**Urbanized Area Formula.**—\$4,552.3 million in funds will be apportioned to areas with populations of 50,000 or more. Funds may be used for any transit capital purpose, including preventive maintenance for capital assets in urban areas over 200,000 in population. In urban areas under 200,000, both capital and operating costs are eligible expenditures. Urbanized Area Formula includes funding for the Growing States and High Density States Formula Programs which are distributed to the Urbanized and Nonurbanized Area Formula programs using separate factors.

**Fixed Guideway Modernization.**—\$1,666.5 million for the acquisition, reconstruction and improvement of facilities and equipment for use on fixed guideways, including heavy rail, light rail, commuter rail, and ferryboat operations. Funding for this program will help ensure that the Nation’s older fixed guideway systems continue to meet the transportation needs of the communities they serve.

**Bus and Bus Facility Grants.**—\$984 million to provide investments in bus and bus-related capital projects that enhance the efficiency and safety of the nation’s bus systems.

**State Administered Programs.**—\$928.6 million. Nonurbanized Area Formula—\$538.1 million will be apportioned by legislative formula based on each State’s nonurban areas with populations of less than 50,000. Available funding may be used to support intercity bus service as well as to help meet rural and small urban areas’ transit needs, including \$9.3 million for the Rural Transportation Assistance Program. Nonurbanized Area Formula includes funding for the Growing States Program. Formula Grants for Elderly and Individuals with Disabilities—\$133.5 million will be apportioned to each State according to a legislatively required formula for the purchase of vehicles and equipment and for transportation services under a contract, lease or similar arrangement. Job Access and Reverse Commute—\$164.5 million, to be appor-

tioned to the States by formula to provide grants to non-profit organizations and local transit agencies to fund transportation services in urban, suburban and rural areas to assist welfare recipients and low-income individuals to access employment opportunities. New Freedom Program—\$92.5 million, to be apportioned by formula to provide additional tools to overcome significant barriers facing Americans with disabilities seeking access to jobs and integration into the workforce.

*Planning.*—\$113.5 million to fund metropolitan and state-wide planning activities.

*Over-the-Road Bus Accessibility Program.*—\$8.8 million for the Rural Transportation Accessibility Incentive Program. Funding will assist operators of over-the-road buses in financing the incremental capital and training costs of complying with the Department of Transportation’s final rule regarding disabled accessibility of over-the-road buses required by the Americans with Disabilities Act.

*Clean Fuels Grant Program.*—\$51.5 million to provide financing for the purchase or lease of clean fuel buses and bus facilities and the improvement of existing facilities to accommodate these buses. This includes buses powered by compressed natural gas, biodiesel fuels, batteries, alcohol-based fuels, hybrid electric, fuel cell and certain clean diesel (up to 25 percent of grants annually), and other low or zero emissions technology.

*Alternatives Analysis Program.*—\$25 million provided for transit projects in the early stage of development and to investigate transit alternatives to solving local transportation problems.

*Alternative Transportation in Parks and Public Lands.*—\$26.9 million to enhance the protection of America’s national parks and increase the enjoyment of those visiting the parks. The goals of the Alternative Transportation in Parks program include ensuring access for all, including individuals with disabilities; improving conservation and park and public land opportunities in urban areas through partnering with State and local governments; and improving park and public land transportation.

*National Transit Database (NTD).*—\$3.5 million for operation and maintenance of the NTD system, a database of statistics on the transit industry, which is Congressionally mandated under 49 U.S.C. 5335(a)(1)(2). The NTD provides for the national collection and dissemination of a uniform system of transit system financial accounts and operating data. As set forth in legislative formulas, these data are used in the national allocation of FTA formula funding.

This account was renamed in 2006 from Trust Fund Share of Expenses consistent with the account restructuring in SAFETEA-LU.
