

**§ 1216.314**

**14 CFR Ch. V (1–1–08 Edition)**

**§ 1216.314 Tiering.**

Actions which are the subject of an environmental impact statement and which represents projects of broad scope may contain within them component actions of narrower scope, perhaps restricted to individual sites of activity or sequential stages of a mission, and which themselves may require environmental assessments and, where necessary, environmental impact statements. The CEQ Regulations provide that agencies may use “Tiering” (§ 1508.28 of the CEQ Regulations) of environmental impact statements to relate such broad and narrow actions. When employing tiering, Headquarters officials shall, by reference, make maximum use of environmental documentation already available, and avoid repetition.

**§ 1216.315 Processing legislative environmental impact statements.**

(a) Preparation of a legislative environmental impact statement shall conform to the requirements of 40 CFR 1506.8 of the CEQ Regulations. The responsible Headquarters official, in coordination with the Associate Administrator for Management, shall identify those NASA recommendations or reports on legislation that would require preparation of environmental impact statements in accordance with criteria set forth in 14 CFR 1216.305.

(b) For the purposes of this provision, “legislation” not only excludes requests for appropriations (40 CFR 1508.17 of the CEQ Regulations), but also excludes the annual authorization bill submitted to the Congress.

[53 FR 9762, Mar. 25, 1988]

**§ 1216.316 Cooperating with other agencies and individuals.**

(a) The Associate Administrator for Management, in coordination with the Associate Administrator for External Relations, shall ensure that NASA officials have an opportunity to cooperate with other agencies and individuals. He/she shall keep abreast of the activities of Federal, state, and local agencies, particularly activities in which NASA has expertise or jurisdiction by law (see 40 CFR 1508.15 of the CEQ Regulations). He/she shall inform the re-

sponsible Headquarters official of the need for cooperation as necessary.

(b) At the request of the Associate Administrator for Management, Headquarters officials shall initiate discussions with another Federal agency concerning those activities which may be the subject of that agency’s EIS on which NASA proposes to comment.

(c) At the request of the Associate Administrator for Management, the responsible Headquarters official shall, in the interest of eliminating duplication, prepare joint analyses, assessments, and statements with state and local agencies. These joint environmental documents shall conform with the requirements of these procedures and overall NASA policy.

(d) Because of the uniqueness of the NASA’s aerospace activities, it is unlikely that NASA will have the opportunity to “adopt” environmental statements prepared by other agencies (40 CFR 1506.3 of the CEQ Regulations). However, should the responsible NASA official wish to adopt a Federal draft or final environmental impact statement or portion thereof, he/she shall consult with the Associate Administrator for Management to determine whether that statement meets NASA requirements.

(e) From time to time, there may be disagreements between NASA and other Federal agencies regarding which agency has primary responsibility to prepare an environmental impact statement in which both parties are involved. The Headquarters official with primary responsibility for the activity in question shall consult with the Associate Administrator for Management to resolve such questions in accordance with 40 CFR 1501.5 of the CEQ Regulations.

(f) Responsibility for the environmental analyses and any necessary environmental assessments and environmental impact statements required by permits, leases, easements, etc., proposed for issuance to non-Federal applicants rests with the Headquarters official responsible for granting of that permit, lease, easement, etc. The responsible Headquarters official shall consult with the Associate Administrator for Management for advice on the type of environmental information
