

§ 1203.412

protection equivalent to that afforded within the Executive Branch.

[48 FR 5890, Feb. 9, 1983]

§ 1203.412 Classification guides.

(a) *General.* A classification guide, based upon classification determinations made by appropriate program and classification authorities, shall be issued for each classified system, program or project. Classification guides shall:

(1) Identify the information elements to be protected, using categorization and subcategorization to the extent necessary to ensure that the information involved can be readily and uniformly identified.

(2) State which of the classification designations (i.e., Top Secret, Secret or Confidential) apply to the identified information elements.

(3) State the duration of each specified classification in terms of a period of time or future event. Whenever a specific time or future event for declassification cannot be predetermined, the following notation will be used: DECLASSIFY ON: Originating Agency's Determination Required or "OADR."

(4) Indicate specifically that the designations, time limits, markings and other requirements of "the Order" are to be applied to information classified pursuant to the guide.

(5) Be approved personally and in writing by an official with original Top Secret classification authority; the identity of the official will be shown on the guide. Such approval constitutes an original classification decision. Normally, all guides will be approved by the Chairperson, NASA Information Security Program Committee, whose office will maintain a list of all classification guides in current use.

(b) *Review of classification guides.* Classification guides shall be reviewed by the originator for currency and accuracy not less than once every two years. Changes shall be in strict conformance with the provisions of this part 1203 and shall be issued promptly. If no changes are made, the originator shall so annotate the record copy and show the date of the review.

14 CFR Ch. V (1-1-08 Edition)

Subpart E—Derivative Classification

§ 1203.500 Use of derivative classification.

The application of derivative classification markings is a responsibility of those who incorporate, paraphrase, restate, or generate in new form information that is already classified, and of those who apply markings in accordance with instructions from an authorized original classifier or in accordance with an authorized classification guide. If a person who applied derivative classification markings believes that the paraphrasing, restating, or summarizing of classified information has changed the level of or removed the basis for classification, that person must consult for a determination with an appropriate official of the originating agency or office of origin who has the authority to upgrade, downgrade, or declassify the information.

[48 FR 5891, Feb. 9, 1983]

§ 1203.501 Applying derivative classification markings.

Persons who apply derivative classification markings shall:

(a) Observe and respect original classification decisions:

(b) Verify the information's current level of classification so far as practicable before applying the markings; and

(c) Carry forward to newly created documents any assigned authorized markings. The declassification date or event that provides the longest period of classification shall be used for documents classified on the basis of multiple sources.

[44 FR 34913, June 18, 1979, as amended at 48 FR 5891, Feb. 9, 1983]

Subpart F—Declassification and Downgrading

§ 1203.600 Policy.

Information shall be declassified or downgraded as soon as national security considerations permit. NASA reviews of classified information shall be coordinated with other agencies that have a direct interest in the subject matter. Information that continues to

meet the classification requirements prescribed by §1203.400 despite the passage of time will continue to be protected in accordance with "the Order."

[48 FR 5891, Feb. 9, 1983]

§ 1203.601 Responsibilities.

Officials authorized original classification authority may declassify or downgrade information that is subject to the final classification jurisdiction of NASA and shall take such action in accordance with the provisions of this subpart F.

§ 1203.602 Authorization.

Information shall be declassified or downgraded by the official who authorized the original classification, if that official is still serving in the same position, the originator's successor, a supervisory official of either, or officials delegated such authority in writing by the Administrator or the Chairperson, NASA Information Security Program Committee.

[48 FR 5891, Feb. 9, 1983]

§ 1203.603 Systematic review for declassification.

(a) *General.* (1) Except for foreign government information as provided in subpart G of this part, classified information constituting permanently valuable records of the government as defined by 44 U.S.C. 2103, and information in the possession and control of the Administrator of General Services Administration pursuant to 44 U.S.C. 2107 or 2107 note, shall be reviewed for declassification as it becomes 30 years old.

(2) Systematic review for declassification of classified cryptologic information will be coordinated through the National Security Agency.

(3) Systematic review for declassification of classified information pertaining to intelligence activities (including special activities) or intelligence sources or methods will be coordinated through the Central Intelligence Agency.

(4) The Chairperson, NASA Information Security Program Committee, shall designate experienced personnel to assist the Archivist of the United States in the systematic review of 30-

year old U.S. originated information and 30-year old foreign information. Such personnel shall:

(i) Provide guidance and assistance to National Archives and Records Service employees in identifying and separating documents and specific categories of information within documents which are deemed to require continued classification; and

(ii) Develop reports of information or document categories so separated, with recommendations concerning continued classification.

(b) *Systematic review guidelines.* The Chairperson, NASA Information Security Program Committee, shall develop, in coordination with NASA organizational elements, guidelines for the systematic review for declassification of 30-year old classified information under NASA's jurisdiction. (See subpart G of this part, Foreign Government Information.) The guidelines shall state specific limited categories of information which, because of their national security sensitivity, should not be declassified automatically but should be reviewed item-by-item to determine whether continued protection beyond 30 years is needed. These guidelines are authorized for use by the Archivist of the United States and, with the approval of the Administrator, by an agency having custody of the information covered by the guidelines. All information, except foreign government information, cryptologic information, and information pertaining to intelligence sources or methods, not identified in these guidelines as requiring review and for which a prior automatic declassification date has not been established shall be declassified automatically at the end of 30 years from the date of original classification. These guidelines shall be reviewed at least every 5 years and revised as necessary unless an earlier review for revision is requested by the Archivist of the United States. Copies of the declassification guidelines promulgated by NASA will be provided to the Information Security Oversight Office, GSA.

(c) *Systematic review procedures.* (1) All security classified records 30 years old or older, whether held in storage areas under installation control or in Federal Records Centers, will be surveyed to
