**The year-to-date totals for House mandatory spending and appropriations do not reflect the cost of H.R. 2926, the Air Transportation Safety and System Stabilization Act, which passed the House on September 21st. Cost estimates for the mandatory spending and appropriations portions of this bill are not yet available. When such estimates become available, the RSC will update “The Money Monitor” accordingly.

An authorization explicitly allows funding for a certain program and / or directs a federal agency to take a certain action. Authorizations express the House's intent to spend, however, actual funding is provided through the annual appropriations process. **Authorizations that would result in no net cost, net decreases in mandatory spending, private-sector costs from federal mandates, and tax cuts (or other reductions in federal revenue) are not reported here.**

Mandatory spending directly establishes an appropriation. No subsequent action is required for the money to be spent.
