An authorization explicitly allows funding for a certain program and / or directs a federal agency to take a certain action. Authorizations express the House's *intent* to spend, however, actual funding is provided through the annual appropriations process. **Authorizations with no net cost, bills that would result in no significant net change in mandatory spending or federal revenue, and private-sector costs from federal mandates are not reported here.**

Mandatory spending directly establishes an appropriation. No subsequent action is required for the money to be spent.

All numbers in "The Money Monitor" are positive unless otherwise indicated.

The costs of conference reports are not recorded here. "The Money Monitor" only accounts for the costs of bills as they first pass the House (with the exception of bills that contain major cost-related changes upon subsequent House passage).
