*Year-to-date* net five-year revenue change by House-passed bills: -\$425,890,500,000.00

An authorization (otherwise known as "discretionary spending") explicitly allows funding for a certain program and / or directs a federal agency to take a certain action. Authorizations express the House's *intent* to spend, however, actual funding is provided through the annual appropriations process. Authorizations with no <u>net</u> cost, bills that would result in no significant <u>net</u> change in mandatory spending or federal revenue, and private-sector costs from federal mandates are not reported here.

Mandatory spending directly establishes an appropriation. No subsequent action is required for the money to be spent.

The figures for revenue changes are from "static" estimates by the Joint Committee on Taxation or the Congressional Budget Office. That is, they do not take into account the stimulative effects that tax cuts and other revenue reductions have on the national economy.

All numbers in "The Money Monitor" are positive unless otherwise indicated.

<u>The costs of conference reports are not recorded here</u>. "The Money Monitor" only accounts for the costs of bills as they <u>first</u> pass the House (with the exception of bills that contain major cost-related changes upon subsequent House passage).
