

§ 100.11

28 CFR Ch. I (7-1-05 Edition)

costs of direct supervision and office support of this work.

Provisioning costs means all costs directly associated with the resources expended within a telecommunications carrier's network to provide a connection and/or service to an end user of the telecommunications service.

Trade secrets/proprietary information means information which is in the possession of a carrier but not generally available to the public, which that carrier desires to protect against unrestricted disclosure or competitive use, and which is clearly identified as such at the time of its disclosure to the government.

Unit cost means the directly associated cost of a single unit of a good or service which is included in a cost element.

§ 100.11 Allowable costs.

(a) Costs that are eligible for reimbursement under section 109(e) CALEA are:

(1) All reasonable plant costs directly associated with the modifications performed by carriers in connection with equipment, facilities, and services installed or deployed on or before January 1, 1995, to establish the capabilities necessary to comply with section 103 of CALEA, until the equipment, facility, or service is replaced or significantly upgraded or otherwise undergoes major modifications;

(2) Additional reasonable plant costs directly associated with making the assistance capability requirements found in section 103 of CALEA reasonably achievable with respect to equipment, facilities, or services installed or deployed after January 1, 1995, in accordance with the procedures established in CALEA section 109(b); and

(3) Reasonable plant costs directly associated with modifications to any of a carrier's systems or services, as identified in the Carrier Statement required by CALEA section 104(d), that do not have the capacity to accommodate simultaneously the number of interceptions, pen registers, and trap and trace devices set forth in the Capacity Notice(s) published in accordance with CALEA section 104.

(b) Allowable plant costs shall include:

(1) The costs of installation, inspection, and testing of the telecommunications plant, and inspection after modifications have been made; and

(2) The costs of direct supervision and office support for this work for plant costs.

(c) In the case of any modification that may be used for any purpose other than lawfully authorized electronic surveillance by a government law enforcement agency, this part permits recovery of only the incremental cost of making the modification suitable for such law enforcement purposes.

(d) Reasonable costs that are directly associated with the modifications performed by a carrier as described in § 100.11(a) are recoverable. These allowable costs are limited to directly assignable and directly allocable costs incurred by the business units whose efforts are expended on the implementation of CALEA requirements.

§ 100.12 Reasonable costs.

(a) A cost is reasonable if, in its nature and amount, it does not exceed that which would be incurred by a prudent person in the conduct of competitive business. Reasonableness of specific costs must be examined with particular care in connection with the carrier or its separate divisions that may not be subject to effective competitive restraints.

(1) No presumption of reasonableness shall be attached to the incurrence of costs by a carrier.

(2) The burden of proof shall be upon the carrier to justify that such cost is reasonable under this part.

(b) Reasonableness depends upon considerations and circumstances, including, but not limited to:

(1) Whether a cost is of the type generally recognized as ordinary and necessary for the conduct of the carrier's business or the performance of this obligation; or

(2) Whether it is a generally accepted sound business practice, arm's-length bargaining or the result of Federal or State laws and/or regulations.

(c) It is the carrier's responsibility to inform the Government of any deviation from the carrier's established practices.
