DIVISION OF SCIENCE RESOURCES STATISTICS

The Division of Science Resources Statistics (SRS) fulfills the legislative mandate of the National Science Foundation Act to ...

provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources and to provide a source of information for policy formulation by other agencies of the Federal Government...

To carry out this mandate, SRS designs, supports, and directs periodic surveys as well as a variety of other data collections and research projects. These surveys yield the materials for SRS staff to compile, analyze, and disseminate quantitative information about domestic and international resources devoted to science, engineering, and technology.

If you have any comments or suggestions about this or any other SRS product or report, we would like to hear from you. Please direct your comments to:

SRS data are available through the World Wide Web (<http://www.nsf.gov/sbe/srs/stats.htm>). For more information about obtaining reports, call (301) 947-2722. For NSF's Telephonic Device for the Deaf, dial (703) 292-5090.

Acknowledgments

Organizational responsibility for this report is held by the Division of Science Resources Statistics (SRS), Lynda T. Carlson, Director, of the National Science Foundation's (NSF's) Directorate for Social, Behavioral and Economic Sciences, Wanda E. Ward Acting Assistant Director. The report was prepared by SRS's Human Resources Statistics Program under the direction of Nancy L. Leach, Program Director; Mary J. Frase, Acting Program Director; and Mary A. Golladay, retired. Joan Burrelli organized the report and generated the tables and text. Emy Sok of the Bureau of Labor Statistics, Aurora D'Amico of the National Center for Education Statistics, and John Tsapogas, Jean M. Johnson, Maurya M. Green, and Deborah A. Collins of SRS provided data and/or tables. Rolfe W. Larson, Peg Whalen, and Tanya R. Gore of SRS's Information and Technology Services Program, under the direction of John R. Gawalt, Program Director, coordinated editing and composition and developed the Web site. Substantive and copyediting services were provided by Aspen Systems Inc., composition and design services by EDO Corporation Professional Services Division and Omnistudio, and Web design and coding by Compuware Corporation.

Review and guidance for this report were provided by Mary J. Frase, Deputy Director of SRS, and Ronald S. Fecso, Chief Statistician of SRS. Fran Featherston facilitated the review process. Members of the review committee for this report were Robert K. Bell, Myles Boylan, Fran Featherston,

Mark C. Regets, Judy Sunley, Wanda E. Ward, and R. Keith Wilkinson of NSF.

The following individuals provided comments on the new concept and/or the tables and text: Norman M. Bradburn, former Assistant Director, NSF's Directorate for Social, Behavioral, and Economic Sciences; Eleanor Babco, Commission on Professionals in Science and Technology; Beatriz Clewell, The Urban Institute; Catherine Didion, Association for Women in Society; Yolanda George and Shirley Malcom, American Association for the Advancement of Science; Beverly Hartline, Education and Management Consultant, and Lilian Wu, IBM Corporation. Members of the Committee on Equal Opportunities in Science and Engineering (CEOSE) also provided comments on the new concept. The 2004 members included Indira Nair, Carnegie Mellon University; Robert Licher, Merrimack Consultants; David Burgess, Boston College; Luis Echigoyen, Clemson University; Beverly Hartline, Education and Management Consultant; J.K. Haynes, Morehouse College; Joyce Justus, University of California at Santa Cruz; Samuel Myers, Jr., University of Minnesota; Willie Pearson, Jr., Georgia Institute of Technology; Carol Schwartz, New York Institute of Technology; Telle Whitney, Anita Borg Institute for Women & Technology; Lilian Wu, IBM Corporation; and Sara Young, Montana State University. Margaret E.M. Tolbert, NSF Executive Liaison to CEOSE, and John F. Wilkinson, NSF Director's Liaison, were also consulted.

About This Report	1
-------------------------	---

Figures

Broad demographic characteristics of the U.S. population

A-1 U.S. population 18–24 years old, by race/ethnicity: July 1990–99 and projections to 2050	3
--	---

Undergraduate enrollment

B-1 Minority undergraduate engineering students, by race/ethnicity: 1990–2002	4
---	---

Undergraduate degrees

C-1 Bachelor's degrees awarded in S&E and non-S&E fields, by sex: 1966–2001	5
C-2 Bachelor's and associate's degrees awarded in computer sciences, by sex: 1985–2001	6
C-3 S&E bachelor's degrees awarded per 1,000 U.S. citizens and permanent residents 20–24 years old, by race/ethnicity: 1989–2000	7
C-4 Bachelor's degrees awarded to racial/ethnic groups in S&E fields: 2001	8

Graduate enrollment

D-1 Female share of S&E graduate students, by field: 1991 and 2001	9
D-2 Field distribution of S&E graduate students, by race/ethnicity: 2001	10
D-3 Field distribution of graduate students, by disability status: 2000	11

Master's degrees

E-1 Master's degrees awarded in S&E and non-S&E fields, by sex: 1966–2001	12
E-2 Minority share of S&E master's degrees awarded to U.S. citizens and permanent residents, by race/ethnicity: 1989–2001	13

Doctoral degrees

F-1 Doctoral degrees awarded in S&E and non-S&E fields, by sex: 1966–2001	14
F-2 Field distribution of S&E and non-S&E doctoral degrees awarded to U.S. citizens and permanent residents, by race/ethnicity: 2001	15

Employment

H-1 Employed S&E doctorate holders, by sex and years since doctorate: 2001	16
H-2 Employed S&E doctorate holders, by race/ethnicity and field of doctorate: 2001	17
H-3 S&E doctorate holders, by disability and employment status: 2001	18

H-4	Employed S&E doctorate holders, by employment sector and sex: 2001	19
H-5	Full professors as a percentage of full-time ranked S&E doctorate holders in 4-year colleges and universities, by sex and years since doctorate: 2001	20
H-6	Employment status of spouses of employed S&E doctorate holders, by sex: 2001	21
H-7	Age distribution of S&E doctorate holders, by disability status: 2001	22

Tables

Broad demographic characteristics of the U.S. population

A-1	Resident population of United States, by age and sex: 2001	23
A-2	Resident population of United States, by race/ethnicity and age: 2001	24
A-3	Disability status of U.S. civilian noninstitutionalized population, by disability type and age: 2000	25

Undergraduate enrollment

B-1	Undergraduate enrollment at all institutions, by race/ethnicity, citizenship, sex, and enrollment status: 1994–2000	26
B-2	Enrollment of first-time, first-year undergraduate students at all institutions, by race/ethnicity, citizenship, sex, and enrollment status: 1994–2000	27
B-3	Undergraduate enrollment at 2-year institutions, by race/ethnicity, citizenship, sex, and enrollment status: 1994–2000	28
B-4	Undergraduate enrollment at 4-year institutions, by race/ethnicity, citizenship, sex, and enrollment status: 1994–2000	29
B-5	Undergraduate enrollment status, by sex, race/ethnicity, citizenship, institution control, and enrollment status: 2000	30
B-6	Disability status of undergraduate students, by age, institution type, financial aid, and enrollment status: 2000	31
B-7	Major field of study of undergraduates, by disability status: 2000	32
B-8	Intentions of freshmen to major in S&E fields, by race/ethnicity and sex: 2002	33
B-9	Undergraduate enrollment in engineering programs, by sex, race/ethnicity, and citizenship: 1994–2002	34
B-10	Undergraduate enrollment in engineering programs, by sex, race/ethnicity, and citizenship: 2002	35

Undergraduate degrees

C-1	Associate's degrees, by field and sex: 1994–2001	36
C-2	Associate's degrees, by field, citizenship, and race/ethnicity: 1994–2001	39
C-3	S&E associate's degrees, by sex, citizenship, race/ethnicity, and field: 2001	42
C-4	Bachelor's degrees, by sex and field: 1994–2001	43
C-5	Bachelor's degrees, by field and sex: 1994–2001	44
C-6	Bachelor's degrees, by field, citizenship, and race/ethnicity: 1994–2001	46

C-7	Field distribution of U.S.-citizen and permanent-resident bachelor's degree recipients, by race/ethnicity: 1994–2001	49
C-8	Bachelor's degrees awarded in engineering, by sex, race/ethnicity, and citizenship: 1990–2002	51
C-9	Bachelor's degrees, by field, citizenship, and race/ethnicity: 2001	52
C-10	Bachelor's degrees awarded to U.S.-citizen and permanent-resident blacks, by institution type and field: 1994–2001	53
C-11	Bachelor's degrees awarded to U.S.-citizen and permanent-resident Hispanics, by institution type and field: 1994–2001	54
C-12	Bachelor's degrees awarded to U.S.-citizen and permanent-resident American Indians/Alaskan Natives, by institution type and field: 1994–2001	55
C-13	Bachelor's degrees awarded to women, by field, citizenship, and race/ethnicity: 1994–2001	56
C-14	Bachelor's degrees awarded to men, by field, citizenship, and race/ethnicity: 1994–2001	59
C-15	Bachelor's degrees, by race/ethnicity, citizenship, sex, and field: 2001	62
C-16	First university degree in selected countries, by sex and field: 2000.....	63
C-17	S&E associate's degrees awarded by leading institutions, by sex: 1997–2001	65
C-18	S&E associate's degrees awarded by leading institutions, by race/ethnicity of minority graduates: 1997–2001	66
C-19	S&E bachelor's degrees awarded by leading institutions, by sex: 1997–2001	67
C-20	S&E bachelor's degrees awarded by leading institutions, by race/ethnicity of minority graduates: 1997–2001	68

Graduate enrollment

D-1	S&E graduate students, by field, citizenship, and race/ethnicity: 1994–2001	69
D-2	Female S&E graduate students, by field, citizenship, and race/ethnicity: 1994–2001	80
D-3	Male S&E graduate students, by field, citizenship, and race/ethnicity: 1994–2001	91
D-4	First-time enrollment of full-time S&E graduate students, by field and sex: 1994–2001	102
D-5	Black U.S.-citizen and permanent-resident S&E graduate students in all institutions and HBCUs, by field and sex: 2001	106
D-6	Hispanic U.S.-citizen and permanent-resident S&E graduate students in all institutions and HSIs, by field and sex: 2001	108
D-7	Disability status of S&E graduate students, by sex, age, race/ethnicity, and enrollment and citizenship status: 2000	110
D-8	Field distribution of graduate student enrollment, by disability status: 2000	111
D-9	Enrollment status of S&E graduate students, by field and sex: 2001	112
D-10	Enrollment status of S&E graduate students, by field, citizenship, and race/ethnicity: 2001	114
D-11	Primary source of support for full-time S&E graduate students, by sex and field: 2001	118

Master's degrees

E-1	Master's degrees, by field: 1994–2001	120
E-2	Master's degrees awarded to women, by field: 1994–2001	121

E-3	Master's degrees, by field, citizenship, and race/ethnicity: 1994–2001	122
E-4	Racial/ethnic distribution of S&E master's degrees awarded to U.S. citizens and permanent residents, by field: 1994–2001	125
E-5	Master's degrees awarded to females, by field, citizenship, and race/ethnicity: 1994–2001	127
E-6	Master's degrees awarded to males, by field, citizenship, and race/ethnicity: 1994–2001	130

Doctoral degrees

F-1	S&E doctoral degrees awarded, by field: 1994–2001	133
F-2	S&E doctoral degrees awarded to women, by field: 1994–2001	134
F-3	S&E doctoral degrees awarded to men, by field: 1994–2001	135
F-4	Top 50 baccalaureate institutions of S&E doctorate recipients, by sex: 1997–2001	136
F-5	Field distribution of doctorate recipients, by race/ethnicity and citizenship: 2001	137
F-6	S&E doctorates awarded to U.S. citizens and permanent residents, by field and race/ethnicity: 1994–2001	139
F-7	Top baccalaureate institutions of black S&E doctorate recipients: 1997–2001	144
F-8	Top baccalaureate institutions of Hispanic S&E doctorate recipients: 1997–2001	145
F-9	Top baccalaureate institutions of American Indian/Alaskan Native S&E doctorate recipients: 1997–2001	146
F-10	Top baccalaureate institutions of Asian/Pacific Islander S&E doctorate recipients: 1997–2001	147
F-11	S&E doctorates awarded to U.S. citizens and permanent residents, by field, sex, and race/ethnicity: 1994–2001	148
F-12	S&E doctorates awarded to U.S. citizens and permanent residents, by sex, race/ethnicity, and field: 2001	153
F-13	S&E doctorate recipients, by disability status: 1994–2001	155
F-14	Top baccalaureate institutions of S&E doctorate recipients with disabilities, by disability type: 1997–2001	156
F-15	S&E doctorate recipients, by field and disability status: 2001	158
F-16	Primary source of support for U.S.-citizen and permanent-resident S&E doctorate recipients, by sex and doctorate field: 1997–2001	159
F-17	Primary source of support for U.S.-citizen and permanent-resident S&E doctorate recipients, by race/ethnicity and doctorate field: 1997–2001	161
F-18	Primary source of support for U.S.-citizen and permanent-resident S&E doctorate recipients, by disability status: 1997–2001	165
F-19	Location and type of postgraduate activity for U.S.-citizen and permanent-resident S&E doctorate recipients with definite postgraduate plans, by sex: 2001	166

Postdoc status

G-1	Definite postgraduation plans of U.S.-citizen and permanent-resident S&E doctoral degree recipients, by major field, sex, and location: 2001	167
G-2	S&E postdoctoral fellows, by field and sex: 1994–2001	169

G-3	Location and type of postgraduate activity for U.S.-citizen and permanent-resident S&E doctoral degree recipients with definite postgraduate plans, by race/ethnicity: 2001	174
G-4	Location and type of postgraduate activity for U.S.-citizen and permanent-resident S&E doctoral degree recipients with definite postgraduate plans, by disability status: 2001	175

Employment

H-1	Employed bachelor's or higher degree recipients, by occupation, sex, race/ethnicity, country of birth, and disability status: 2000	176
H-2	Employed persons 16 years and older, by detailed occupation: Selected years, 1983–2001 annual averages	182
H-3	Employed females 16 years and older, by detailed occupation: Selected years, 1983–2001 annual averages	185
H-4	Employed males 16 years and older, by detailed occupation: Selected years, 1983–2001 annual averages	188
H-5	Employed persons 16 years and older, by detailed occupation, sex, race, and selected race/ethnicity: 1994–2002 annual averages	191
H-6	Employed S&E doctorate holders, by occupation and sex: 2001	217
H-7	Employed S&E doctorate holders, by occupation and race/ethnicity: 2001	218
H-8	Employed S&E doctorate holders, by occupation, race/ethnicity and sex: 2001	220
H-9	Employed S&E doctorate holders, by occupation and disability status: 2001	223
H-10	Employment status of S&E doctorate holders, by age group, sex, race/ethnicity, and disability status: 2001	224
H-11	S&E doctorate holders employed part time, by preference for full-time employment and reason for working part time, sex, race/ethnicity, and disability status: 2001	225
H-12	S&E doctorate holders who are unemployed or out of labor force, by reason for not working, sex, race/ethnicity, and disability status: 2001	226
H-13	Primary education/employment status and median salary of 1999 and 2000 S&E bachelor's degree recipients, by field, sex, race/ethnicity, and disability status: 2001	227
H-14	Primary education/employment status and median salary of 1999 and 2000 S&E master's degree recipients, by field, sex, race/ethnicity, and disability status: 2001	229
H-15	Employment status and median salary of 1999 and 2000 S&E doctoral degree recipients, by broad field of doctorate, sex, race/ethnicity, and disability status: 2001	231
H-16	Median annual salary of S&E doctorate holders employed full time, by broad occupation, age group, and sex: 2001	234
H-17	Median annual salary of S&E doctorate holders employed full time, by sex, broad occupation, age group, and race/ethnicity: 2001	235
H-18	Median annual salary of S&E doctorate holders employed full time, by broad occupation, age group, and disability status: 2001	238
H-19	Employed S&E doctorate holders, by sector of employment, broad occupation, sex, race/ethnicity, and disability status: 2001	239
H-20	S&E doctorate holders employed in academic institutions, by institution type, sex, race/ethnicity, and disability status: 2001	241

H-21	S&E doctorate holders employed in universities and 4-year colleges, by broad occupation, sex, years since doctorate, and faculty rank: 2001	242
H-22	Occupations of S&E doctorate holders employed in universities and 4-year colleges, by race/ethnicity and faculty rank: 2001	245
H-23	S&E doctorate holders employed in universities and 4-year colleges, by broad occupation, sex, race/ethnicity, and faculty rank: 2001	247
H-24	Occupations of S&E doctorate holders employed in universities and 4-year colleges, by disability status and faculty rank: 2001	250
H-25	Occupations of S&E doctorate holders employed in universities and 4-year colleges, by sex, years since doctorate, and tenure status: 2001	251
H-26	Occupations of S&E doctorate holders employed in universities and 4-year colleges, by race/ethnicity and tenure status: 2001	254
H-27	Occupations of S&E doctorate holders employed in universities and 4-year colleges, by disability and tenure status: 2001	256
H-28	Occupations of Federal scientists and engineers, by sex: 1998–2002	257
H-29	Occupations of Federal scientists and engineers, by race/ethnicity 1998–2002	263
H-30	Primary or secondary work activity of S&E doctorate holders employed in the private-for-profit sector, by age, sex, race/ethnicity, and disability status: 2001	277
H-31	Demographic characteristics of employed S&E doctorate holders, by sex: 2001	278
H-32	Demographic characteristics of employed S&E doctorate holders, by race/ethnicity and sex: 2001	279
H-33	Demographic characteristics of employed S&E doctorate holders, by disability status and sex: 2001	280
H-34	Employed S&E doctorate holders with disabilities, by age at onset of disability: 2001	281

About This Report

Women, Minorities, and Persons with Disabilities in Science and Engineering is moving toward a new concept to provide the most current information available. Rather than being a static report, the new format is a dynamic Web-based information source with data updated as they become available. This site is a starting point for finding information about the participation of women, minorities, and persons with disabilities in science and engineering education and employment. Its primary purpose is to serve as an information source; it offers no endorsement of or recommendations about policies or programs. National Science Foundation reporting on this topic is mandated by the Science and Engineering Equal Opportunities Act (Public Law 96-516).

This site contains data tables organized by topic (e.g., undergraduate enrollment, graduate degrees, employment) and also by group (e.g., Hispanics, minority women, persons with disabilities). Presentation slides, which are charts in PowerPoint, graphic, and spreadsheet formats, are provided for easy downloading. Furthermore, links to additional data sources (e.g., National Center for Education Statistics, American Council on Education) and reports on these topics are provided. Data on this website are updated as they become available. A complete update of the report is issued every 2 years.

Racial/ethnic information

In October 1997, the U.S. Office of Management and Budget announced new government-wide standards for the collection of data on race and ethnicity (published as U.S. OMB 1999) effective January 1, 2003. Previously, racial/ethnic groups were identified as white, non-Hispanic; black, non-Hispanic; Hispanic; Asian or Pacific Islander; and American Indian or Alaskan Native. Because the old standards were in effect when the data for this report were collected, the racial/ethnic groups described here are designated by the old standards. Where data collection permits, subgroups of the Hispanic population are identified (e.g., Mexican, Puerto Rican).

Many of the groups of particular interest are quite small, so that it is difficult to measure them accurately without surveys of the entire population. In some instances, sample surveys may not have been of sufficient scope to permit calculation of reliable racial/ethnic population estimates;

consequently, results are not shown for all groups. The Bureau of the Census's Current Population Survey, for example, cannot provide data on American Indians. Data on this population are available only from the decennial census. Another issue related to race/ethnicity is that it is easy to overlook or minimize heterogeneity within subgroups when only a single statistic is reported for an entire racial/ethnic group.

Data on race/ethnicity are often based on self-identification. These data are less reliable for certain racial/ethnic groups than for others. For example, data collected at two points in time indicate that self-identification of American Indians is much less reliable than self-identification of other racial/ethnic groups.¹

Information about people with disabilities

Data on people in science and engineering who have disabilities are seriously limited for several reasons. First, the operational definitions of *disability* vary, include a wide range of physical and mental conditions, and thus are not totally comparable. The Americans With Disabilities Act of 1990 (ADA) encouraged progress toward standard definitions. Under ADA, an individual is considered to have a disability if he or she has a physical or mental impairment that substantially limits one or more of his or her major life activities, has a record of such impairment, or is regarded as having such an impairment. ADA also contains definitions of specific disabilities. See <http://www.usdoj.gov/crt/ada/pubs/ada.txt>.

Second, data on disabilities frequently are not included in comprehensive institutional records (e.g., in registrars' records in institutions of higher education). If included at all, such information is likely to be kept only in confidential files at an office responsible for providing special services to students. Institutions of higher education are unlikely to have information regarding any students with disabilities who have not requested special services. In elementary and secondary school programs receiving funds to provide special education, however, statistics on all students identified as having special needs are centrally available.

¹U.S. Bureau of Labor Statistics, *A Test of Methods for Collecting Racial and Ethnic Information* (Washington, DC: U.S. Department of Labor, 1995).

Third, information about people with disabilities that is gathered from surveys is often obtained from self-reported responses. Typically, respondents are asked whether they have a disability and to specify what kind of disability it is. Resulting data therefore reflect individual perceptions rather than objective measures.

The attempt to provide estimates of the proportion of the undergraduate student population with disabilities is an example of how these factors coalesce. Self-reported data on the undergraduate student population, collected through a survey to ascertain patterns of student financial aid, suggest

that about 10 percent of this population have a disability. Estimates from population surveys of higher education institutions, in contrast, place the estimate much lower, between 1 and 5 percent. Whether this discrepancy is the result of self-perception, incomplete reporting, nonevident disabilities, or differing definitions is difficult to ascertain.

In the final analysis, although considerable information is available about the number of individuals with disabilities in the education system and in the science and engineering workforce, it is often impossible to compare statistics from different sources.

FIGURE A-1. U.S. population 18–24 years old, by race/ethnicity: July 1990–99 and projections to 2050

NOTE: Hispanics may be of any race. Data for American Indians/Alaskan Natives are not shown but can be found in table A-2.

SOURCE: U.S. Bureau of the Census, Current Population Survey, annual series; and U.S. Bureau of the Census, *Projections of the Total Resident Population by 5-Year Age Groups, and Sex With Special Age Categories: Middle Series, 1999 to 2100*, NP-T3, <http://www.census.gov/population/www/projections/natsum-T3.html>

The proportion of the U.S. population that is minority will continue to rise in the first half of the 21st century.

- • According to the latest population projections, minorities (Asians/Pacific Islanders, blacks, Hispanics, and American Indians/Alaskan Natives) are expected to be more than half (52 percent) of the resident college-age (18–24 years old) population of the United States by 2050, up from 34 percent in 1999.
- • By 2050, whites would constitute 48 percent of the U.S. population 18–24 years old, down from 66 percent in 1999.
- • The greatest growth among minority groups is projected for Hispanics and Asians/Pacific Islanders, reflecting immigration trends.
- • Relatively little growth is projected for college-age blacks and American Indians/Alaskan Natives; these populations would remain 14 and 0.9 percent, respectively, of all U.S. 18–24-year-olds in 2050.

FIGURE B-1. Minority undergraduate engineering students, by race/ethnicity: 1990–2002

SOURCE: American Association of Engineering Societies, Engineering Workforce Commission, special tabulations.

Minorities account for an increasing proportion of undergraduate engineering enrollment.

- The percentage of undergraduate engineering students who are white decreased from 76 percent in 1990 to 68 percent in 2002.
- The Asian/Pacific Islander share of engineering enrollment generally increased between 1990 and 2002.
- The Black, Hispanic, and American Indian/Alaskan Native share of engineering enrollment also increased, although there has been little growth or some decline since the late 1990s.

FIGURE C-1. Bachelor's degrees awarded in S&E and non-S&E fields, by sex: 1966–2001

NOTE: National data not available for 1999.

SOURCE: National Science Foundation, Division of Science Resources Statistics, special tabulations of U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System, Completions Survey, 1966–2001.

Females now account for half of all S&E bachelor's degree awards.

- The number of S&E bachelor's degrees awarded to females has increased
- every year since 1966 (excluding 1988), reaching 202,583 in 2001.
- The number of bachelor's degrees in S&E awarded to males has fluctuated
- around 200,000 since 1976.
- Females earn more bachelor's degrees in non-S&E fields than males.

FIGURE C-2. Bachelor's and associate's degrees awarded in computer sciences, by sex: 1985–2001

NOTE: National data not available for 1999.

SOURCE: National Science Foundation, Division of Science Resources Statistics, special tabulations of U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System, Completions Survey, 1985–2001.

Bachelor's degrees awarded in computer sciences rose steeply in the latter part of the 1990s, especially for males.

- The female share of bachelor's degrees in computer sciences dropped from 37 percent in 1985 to 28 percent in 2001.
- The number of associate's and bachelor's degrees awarded in computer sciences to both males and females increased substantially in the late 1990s.

FIGURE C-3. S&E bachelor's degrees awarded per 1,000 U.S. citizens and permanent residents 20–24 years old, by race/ethnicity: 1989–2000

NOTE: National data not available for 1999.

SOURCE: National Science Foundation, Division of Science Resources Statistics, special tabulations of U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System, Completions Survey, 1989–2001; and U.S. Bureau of the Census, Current Population Survey.

Blacks, Hispanics, and American Indians/Alaskan Natives earn fewer S&E bachelor's degrees relative to their population than do whites, but the differences narrowed in the 1990s.

- The number of S&E bachelor's degrees earned by nonwhite groups has risen since 1989.
- The rate of increase in degrees earned exceeded the rate of population growth for these groups.
- Asians/Pacific Islanders earn more S&E bachelor's degrees than whites do relative to their college-age populations, and the difference widened during the 1990s.

FIGURE C-4. Bachelor's degrees awarded to racial/ethnic groups in S&E fields: 2001

NOTE: Percents refer to percentage of each racial/ethnic group earning degrees in a given field. Physical sciences include earth, atmospheric, and ocean sciences.

SOURCE: National Science Foundation, Division of Science Resources Statistics, special tabulations of U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System, Completions Survey, 2001.

White, black, Hispanic, and American Indian/Alaskan Native S&E bachelor's degree recipients are similarly distributed across most broad S&E fields.

- With the exception of Asians/Pacific Islanders, for whom almost half of all bachelor's degrees received are in S&E, about a third of bachelor's degrees earned by each racial/ethnic group are in S&E.
- A higher percentage of Asians/Pacific Islanders than of other racial/ethnic groups earned their bachelor's degrees in computer sciences, biological sciences, and engineering.

FIGURE D-1. Female share of S&E graduate students, by field: 1991 and 2001

SOURCE: National Science Foundation, Division of Science Resources Statistics, Survey of Graduate Students and Postdoctorates in Science and Engineering, 1991 and 2001.

Females constituted a greater percentage of graduate students in S&E in 2001 (41 percent) than in 1991 (34 percent).

- Females accounted for more than half of all graduate students in some science fields: in 2001, for example, females made up 74 percent of the graduate students in psychology, 54 percent in biological sciences, and 52 percent in social sciences.
- Roughly 30-40 percent of the graduate students in most other science fields were female.
- Females accounted for 20 percent of graduate students in engineering and 30 percent of graduate students in computer sciences in 2001.

FIGURE D-2. Field distribution of S&E graduate students, by race/ethnicity: 2001

NOTES: Data are for U.S. citizens and permanent residents only. Physical sciences include earth, atmospheric, and ocean sciences.

SOURCE: National Science Foundation, Division of Science Resources Statistics, Survey of Graduate Students and Postdoctorates in Science and Engineering, 2001.

Asian/Pacific Islander S&E graduate students are distributed among S&E fields differently from graduate students of other racial/ethnic groups.

- In 2001, more than 50 percent of black, Hispanic, and American Indian/Alaskan Native graduate students and 39 percent of white students were in psychology or social sciences, compared to 20 percent of Asian/Pacific Islander students.
- Larger percentages of Asian/Pacific Islander graduate students than of other groups were in computer sciences, biological sciences, and engineering.

FIGURE D-3. Field distribution of graduate students, by disability status: 2000

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Postsecondary Student Aid Study, 2000.

Graduate students with disabilities differ somewhat from students without disabilities in their distribution across disciplines.

- Similar percentages of graduate students with and without disabilities were enrolled in graduate programs in three broad-field groups: engineering/computer sciences/mathematics; life/physical sciences; and education in 2000.
- A higher percentage of graduate students with disabilities than without disabilities were in social and behavioral sciences and in the humanities.

FIGURE E-1. Master's degrees awarded in S&E and non-S&E fields, by sex: 1966–2001

NOTE: National data not available for 1999.

SOURCE: National Science Foundation, Division of Science Resources Statistics, special tabulations of U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System, Completions Survey, 1966–2001.

The number of master's degrees earned by females rose more rapidly than for males in the 1990s.

- By 2001, females earned 44 percent of S&E and 63 percent of non-S&E master's degrees, up from 34 and 48 percent, respectively, in 1990.
- In S&E and non-S&E fields, both the number of females earning master's degrees and their proportion of all students earning master's degrees rose steadily during the 1990s.
- For both males and females, the proportion of master's degrees earned in S&E fields declined in the 1990s.

FIGURE E-2. Minority share of S&E master's degrees awarded to U.S. citizens and permanent residents, by race/ethnicity: 1989–2001

NOTE: National data not available for 1999.

SOURCE: National Science Foundation, Division of Science Resources Statistics, special tabulations of U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System, Completions Survey, 1966–2001.

The percentages of S&E master's degrees earned by Asians/Pacific Islanders, blacks, Hispanics, and American Indians/Alaskan Natives increased during the 1990s.

- The number of S&E master's degrees awarded increased for all minority groups and for white females during the 1990s.
- The number of S&E master's degrees earned by white males decreased during the decade.

FIGURE F-1. Doctoral degrees awarded in S&E and non-S&E fields, by sex: 1966–2001

SOURCE: National Science Foundation, Division of Science Resources Statistics, Survey of Earned Doctorates, 1966–2001.

Both the number of females earning doctoral degrees and their percentage of total awards in S&E and non-S&E fields rose between 1966 and 2001.

- • By 2001, females earned 37 percent of S&E and 57 percent of non-S&E □ doctoral degrees, up from 8 and 18 percent, respectively, in 1966.
- • The number of males earning S&E doctoral degrees dropped between □ 1996 and 2001.

FIGURE F-2. Field distribution of S&E and non-S&E doctoral degrees awarded to U.S. citizens and permanent residents, by race/ethnicity: 2001

NOTE: Hispanic total includes Puerto Rican, Mexican American, and other Hispanic.

SOURCE: National Science Foundation, Division of Science Resources Statistics, Survey of Earned Doctorates, 2001.

The proportion of all doctorates earned in S&E fields varies considerably across racial/ethnic groups.

- More than half of all doctorates awarded to U.S. citizens and permanent residents were earned in S&E fields in 2001.
- However, among blacks, more than half of the doctorates earned in 2001 were in non-S&E fields, primarily education.
- In contrast, 78 percent of doctorates earned by Asians/Pacific Islanders were in S&E fields, and only 7 percent were in education in 2001.

FIGURE H-1. Employed S&E doctorate holders, by sex and years since doctorate: 2001

SOURCE: National Science Foundation, Division of Science Resources Statistics, Survey of Doctorate Recipients, 2001.

Females made up about 26 percent of employed S&E doctorate holders in 2001.

- • More than half of employed S&E doctorate holders in 2001 were males who had earned their doctorates 10 or more years earlier.
- • Females constituted a larger share of recent S&E doctorate holders (i.e., those who had earned doctorates less than 10 years earlier) than they did of S&E doctorate holders who earned doctorates more than 10 years earlier.

FIGURE H-2. Employed S&E doctorate holders, by race/ethnicity and field of doctorate: 2001

SOURCE: National Science Foundation, Division of Science Resources Statistics, Survey of Doctorate Recipients, 2001.

The racial/ethnic composition of engineering doctorate holders differs markedly from that of science doctorate holders.

- Asians/Pacific Islanders comprised a far larger share and whites a much smaller share of engineering doctorate holders than of science doctorate holders in 2001.
- Blacks and Hispanics each constituted about 3 percent of science doctorate holders and 2 percent of engineering doctorate holders in 2001.
- American Indians/Alaskan Natives were 0.3 percent of both science and engineering doctorate holders in 2001.

FIGURE H-3. S&E doctorate holders, by disability and employment status: 2001

SOURCE: National Science Foundation, Division of Science Resources Statistics, Survey of Doctorate Recipients, 2001.

The labor force participation rates of S&E doctorate holders with and without disabilities are quite different.

- • About 27 percent of S&E doctorate holders with □□□ disabilities were out of the labor force in 2001, □□□ compared with 10 percent of those without □□□ disabilities.

FIGURE H-4. Employed S&E doctorate holders, by employment sector and sex: 2001

SOURCE: National Science Foundation, Division of Science Resources Statistics, Survey of Doctorate Recipients, 2001.

Male and female employed doctorate holders differ in the sectors in which they are employed.

- Females were less likely than males to be employed in business or industry
- and more likely to be employed in educational institutions in 2001.
- Variations by sector primarily stem from differences in occupation. Females were less likely than males to be engineers or physical scientists, occupations that tend to be employed in business or industry.

FIGURE H-5. Full professors as a percentage of full-time ranked S&E doctorate holders in 4-year colleges and universities, by sex and years since doctorate: 2001

NOTES: Base of percentage is full, associate, and assistant professors. Because of small sample sizes, a 3-year average is used for years since doctorate.

SOURCE: National Science Foundation, Division of Science Resources Statistics, Survey of Doctorate Recipients, 2001.

Among S&E doctorate holders who hold academic faculty positions in 4-year colleges and universities, females are less likely than their male colleagues to be found in the highest faculty ranks.

- Females are less likely than males to be full professors and more likely to be assistant professors.
- The differences in rank vary by time since earning the doctorate. Few differences in rank exist between males and females in their early careers and greater differences exist between 15 and 20 years after receipt of the doctorate.

FIGURE H-6. Employment status of spouses of employed S&E doctorate holders, by sex: 2001

SOURCE: National Science Foundation, Division of Science Resources Statistics, Survey of Doctorate Recipients, 2001.

Married female S&E doctorate holders are more likely than their male counterparts to face the challenges of a dual-career household.

- • Female S&E doctorate holders are almost twice as □ likely as males to have spouses employed full time:
- 82 percent of the married females and 42 percent of □ the married males had spouses employed full time
- in 2001.
- • Only 13 percent of the married females but 38 □ □ percent of the married males had spouses who were □ not employed.

FIGURE H-7. Age distribution of S&E doctorate holders, by disability status: 2001

SOURCE: National Science Foundation, Division of Science Resources Statistics, Survey of Doctorate Recipients, 2001.

Scientists and engineers with disabilities are older, on average, than those without disabilities.

- • Only 7 percent of employed S&E doctorate holders □ with disabilities were younger than 40 years in 2001, □ compared with 25 percent of those without □ □ disabilities.
- • Conversely, 69 percent of those with disabilities and □ 44 percent of those without were 50 or older.

TABLE A-1. Resident population of United States, by age and sex: 2001

Age (years)	All residents	Female		Male	
		Number	Percent	Number	Percent

Learning, remembering, concentrating	3,592,912	10.8
Self-care	3,183,840	9.5
Difficulty going outside home	6,795,517	20.4

¹Individuals were classified by Census as having a disability if any of the following three conditions were true: (1) they were ages 5 or older and responded yes to sensory, physical, mental or self-care disability; (2) they were ages 16 or older and responded yes to going outside the home disability; or (3) they were ages 16–64 and responded yes to employment disability.

NOTES: Data on disability status were derived from answers to two items in the census long-form questionnaire. One asked about the existence of the following long-lasting conditions: blindness, deafness, or a severe vision or hearing impairment (sensory disability), and a condition that substantially limits one or more basic physical activities such as walking, climbing stairs, reaching, lifting, or carrying (physical disability). The second question asked if the individual had a physical, mental, or emotional condition lasting 6 months or more that made it difficult to perform certain activities: (a) learning, remembering, or concentrating (mental disability); (b) dressing, bathing, or getting around inside the home (self-care disability); (c) going outside the home alone to shop or visit a doctor's office (going outside the home disability); and (d) working at a job or business (employment disability).

TABLE B-6. Disability status of undergraduate students, by age, institution type, financial aid, and enrollment status: 2000
(Percent)

Age, institution type, financial aid, and status	All undergraduates	No disability	With disability
All undergraduates	100.0	89.4	10.6
Age (years)			
18 and younger	9.5	9.8	6.8
19–23	47.6	48.8	37.6
24–29	16.9	17.1	16.1
30–39	13.8	13.3	17.7
40 and older	12.2	11.0	21.7
Institution type			
4-year	46.5	47.2	40.1
2-year	44.6	43.9	50.7
Less than 2-year	2.7	2.6	3.3
More than one institution	6.2	6.2	5.9
Financial aid	57.9	57.4	62.1
Grants only	41.7	42.2	37.7
Loans only	12.5	12.6	11.5
Work study only	0.4	0.4	0.1
Grants and loans	24.7	24.8	24.1
Grants and work study	2.1	2.1	2.2
Loans and work study	0.5	0.5	0.4
Grants, loans, and work study	5.4	5.5	4.5
Other only	3.4	3.0	6.6
Other combination	9.3	8.9	12.8
Enrollment status			
Full time			
Full year			
One institution	37.4	38.0	32.3
More than one institution	2.9	3.0	2.6
Part year	13.3	13.1	15.5
Part time			
Full year			
One institution	20.9	20.7	22.5
More than one institution	1.5	1.5	1.3
Part year	24.0	23.8	25.8

NOTES: For disability status, those who reported any type of disability related to blindness, deafness, severe vision or hearing impairment, substantial limitation of mobility, or any other physical, mental, or emotional condition that lasted 6 months or more were classified as "with disability." Financial aid data sum to more than 100 percent because respondents could select more than one response.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Postsecondary Student Aid Study, 2000.

TABLE B-7. Major field of study of undergraduates, by disability status: 2000
(Percent)

Major field of study	All undergraduates	No disability	With disability
All fields	100.0	100.0	100.0
Business/management	19.3	19.5	17.3
Education	8.7	8.7	8.2
Health	10.4	10.5	9.1
Humanities	15.7	15.6	17.1
S&E	30.8	30.6	32.2
Computer/information sciences	8.6	8.4	10.5
Engineering	6.0	6.1	5.0
Life sciences	5.1	5.2	4.5
Mathematics	0.7	0.7	0.6
Physical sciences	1.2	1.2	1.0
Social/behavioral sciences	9.2	9.0	10.6
Vocational/technical ¹	5.7	5.7	5.4
Other technical/professional ²	9.6	9.5	10.7

¹ Includes industrial arts, mechanics technology, precision production, protective services, and transportation.

² Includes agriculture, agricultural science, architecture, basic/personal skills, city planning, communications, communications technology, cosmetology, dental/medical technology, home economics, journalism, law, and military science.

NOTE: For disability status, those who reported any type of disability related to blindness, deafness, severe vision or hearing impairment, substantial limitation of mobility, or any other physical, mental, or emotional condition that lasted 6 months or more were classified as "with disability."

NOTES: Unlike other degree tables, S&E total here includes degrees in S&E technologies. Physical sciences include earth, atmospheric, and ocean sciences; physics; astronomy; and chemistry. Data on race/ethnicity were collected on broad fields of study only until 1994; therefore, the 1994 data could not be adjusted to the exact field taxonomies used by the National Science Foundation (NSF). The primary difference between 1994 and later years is that history was included in the social sciences in 1994 but is included in non-S&E from 1995 on. Temporary resident includes all racial/ethnic groups. Data were not available for 1999.

TABLE C-6. Bachelor's degrees, by field, citizenship, and race/ethnicity: 1994–2001

Page 3 of 3

Field, citizenship, and race/ethnicity	1994	1995	1996	1997	1998	2000	2001
Psychology	855	942	1,016	1,049	1,170	1,264	1,283
Social sciences	3,585	3,779	3,908	3,957	3,915	3,810	3,902
Engineering	4,540	4,810	4,763	4,797	4,643	4,533	4,419
Non-S&E	20,298	22,327	23,040	24,037	24,178	23,611	23,765

NOTES: Physical sciences include earth, atmospheric, and ocean sciences; physics; astronomy; and chemistry. Data on race/ethnicity were collected on broad fields of study only until 1994; therefore 1994 data could not be adjusted to the exact field taxonomies used by the National Science Foundation (NSF). The primary difference between 1994 and later years is that history was included in social sciences in 1994 but is included in non-S&E from 1995 on. Racial/ethnic breakouts are for U.S. citizens and permanent residents only. Temporary resident includes all racial/ethnic groups. Data are not available for 1999.

NOTES: Physical sciences include earth, atmospheric, and ocean sciences; physics; astronomy; and chemistry. Data on race/ethnicity were collected on broad fields of study only until 1994; therefore, 1994 data could not be adjusted to the exact field taxonomies used by the National Science Foundation (NSF). The primary difference between 1994 and later years is that history was included in social sciences in 1994 but is included in non-S&E from 1995 on. Data are not available for 1999.

TABLE C-13. Bachelor's degrees awarded to women, by field, citizenship, and race/ethnicity: 1994–2001

Page 3 of 3

Field, citizenship, and race/ethnicity	1994	1995	1996	1997	1998	2000	2001
Physical sciences	246	250	249	240	246	225	248
Psychology	648	710	741	794	874	990	1,013
Social sciences	1,552	1,687	1,794	1,877	1,866	1,981	2,015
Engineering	548	566	620	676	628	806	777
Non-S&E	10,017	11,071	11,307	11,894	12,163	12,145	12,374

NOTES: Physical sciences include earth, atmospheric, and ocean sciences; physics; astronomy; and chemistry. Data on race/ethnicity were collected on broad fields of study only until 1994; therefore, 1994 data could not be adjusted to the exact field taxonomies used by the National Science Foundation (NSF). The primary difference between 1994 and later years is that history was included in social sciences in 1994 but is included in non-S&E from 1995 on. Racial/ethnic breakouts are for U.S. citizens and permanent residents only. Temporary resident includes all racial/ethnic groups. Data are not available for 1999.

TABLE D-7. Disability status of S&E graduate students, by sex, age, race/ethnicity, enrollment, and citizenship status: 2000
 (Percent; standard errors in parentheses)

Sex, age, race/ethnicity, and enrollment and citizenship status	All students	No disability	With disability
All S&E graduate students	100.0 (0.0)	91.7 (0.6)	8.3 (0.6)
Female	47.2 (1.4)	46.6 (1.4)	54.1 (3.8)
Male	52.8 (1.4)	53.4 (1.4)	45.9 (3.8)
Age (years)			
15–23	11.2 (0.8)	11.6 (0.9)	6.5 (1.8)
24–29	45.8 (1.2)	47.0 (1.2)	32.6 (3.2)
39 and older	43.0 (1.2)	41.4 (1.3)	60.9 (3.5)
Race/ethnicity			
White	61.1 (1.3)	59.9 (1.3)	74.1 (3.9)
Asian	19.0 (1.0)	20.3 (1.1)	4.9 (1.7)
Native Hawaiian/Pacific Islander	0.9 (0.3)	1.0 (0.4)	0.0 (0.0)
Black	7.0 (0.7)	7.1 (0.7)	6.2 (1.8)
Hispanic	6.8 (0.7)	6.6 (0.7)	8.3 (3.0)
American Indian/Alaska Native	0.7 (0.2)	0.5 (0.2)	2.6 (1.1)
Other	2.8 (0.4)	2.9 (0.4)	1.4 (0.8)
More than one race	1.8 (0.3)	1.7 (0.3)	2.5 (1.5)
Enrollment status			
Mostly full time	69.3 (1.5)	69.9 (1.6)	63.7 (4.9)
Mostly part time	25.3 (1.5)	25.1 (1.5)	27.4 (4.7)
Mix of full and part time	5.4 (0.8)	5.0 (0.8)	8.9 (3.6)
Citizenship status			
U.S. citizen	75.3 (1.1)	73.8 (1.2)	91.7 (1.9)
Resident alien	3.7 (0.4)	3.7 (0.5)	3.6 (0.9)
Foreign/international student	21.0 (1.1)	22.5 (1.1)	4.7 (1.5)

NOTES: Enrollment status was determined by graduate student responses to the question, *Since you started working on your degree, have you been enrolled mainly as a full-time student or part-time student?* For disability status, those who reported any type of disability at all related to blindness, deafness, a severe vision or hearing impairment, substantial limitation of mobility, or any other physical, mental, or emotional condition that lasted 6 months or more are classified as "with disability."

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Postsecondary Student Aid Study, 2000.

TABLE D-8. Field distribution of graduate student enrollment, by disability status: 2000
 (Percent; standard errors in parentheses)

Field	All students	No disability	With disability
Business/management	18.4 (0.8)	18.9 (0.9)	12.9 (1.8)
Education	24.4 (0.8)	24.5 (0.8)	24.0 (2.2)
Engineering/computer sciences/mathematics	8.6 (0.5)	8.7 (0.5)	7.7 (1.4)
Health	14.8 (0.9)	15.0 (0.9)	11.8 (1.8)
Humanities	9.5 (0.8)	9.1 (0.8)	14.9 (1.6)
Law	5.0 (0.5)	5.1 (0.5)	4.1 (0.9)
Life/physical sciences	6.2 (0.3)	6.2 (0.3)	6.6 (1.1)
Social/behavioral sciences	8.2 (0.6)	7.8 (0.6)	12.6 (1.5)
Other	4.9 (0.3)	4.8 (0.3)	5.5 (1.2)

TABLE E-3. Master's degrees, by field, citizenship, and race/ethnicity: 1994–2001

Page 3 of 3

Field, citizenship, and race/ethnicity	1994	1995	1996	1997	1998	2000	2001
Mathematics and statistics	1,095	1,116	1,030	993	1,026	1,111	1,230
Physical sciences	1,770	1,752	1,734	1,644	1,497	1,335	1,411
Psychology	361	473	424	402	460	467	464
Social sciences	2,743	3,743	3,944	4,036	4,186	4,185	4,227
Engineering	9,357	9,699	8,996	8,636	9,161	9,823	11,001
Non-S&E	25,627	26,539	26,572	28,212	29,582	30,821	33,768

NOTES: Physical sciences includes earth, atmospheric, and ocean sciences; physics; astronomy; and chemistry. Data on race/ethnicity were collected on broad fields of study only until 1994; therefore, 1994 data could not be adjusted to the exact field taxonomies used by the National Science Foundation (NSF). The primary difference between 1994 and later years is that history was included in social sciences in 1994 but is included in non-S&E from 1995 on. Temporary resident includes all racial/ethnic groups. Data are not available for 1999.

Non-S&E	11,247	11,925	12,047	12,997	13,811	14,481	15,990	43.9	47.4

NOTES: Physical sciences include earth, atmospheric, and ocean sciences; physics; astronomy; and chemistry. Data on race/ethnicity were collected on broad fields of study only until 1994; therefore, 1994 data could not be adjusted to exact field taxonomies used by the National Science Foundation (NSF). The primary difference between 1994 and later years is that history was included in social sciences in 1994 but is included in non-S&E from 1995 on. Racial/ethnic breakouts are for U.S. citizens and permanent residents only. Temporary resident includes all racial/ethnic groups. Data are not available for 1999.

NOTE: Table limited to those with a bachelor's or higher degree. Data based on a 1 percent sample of the U.S. population. Science and engineering occupations do not include postsecondary teachers.

Numbers are rounded to nearest hundred. Individuals were classified as having a disability if they had a response of "yes" to a sensory, physical, or mental disability or they had responded that a disability limits but does not prevent work, prevents work, or causes difficulty working.

With disability	3,600	S	2,600	S	S	50,000

S suppressed data with weighted cases less than 100 or unweighted sample sizes less than 20 for reasons of respondent confidentiality or data reliability.

^aSalary data are for principal jobs only. Full-time employed are those working at least 35 hours per week at their principal jobs. Full-time students are excluded from salary data.

NOTES: Figures are rounded to nearest 100, and median salaries are rounded to nearest 1,000. Details may not add to totals because of rounding. The underrepresented minority category includes black, Hispanic, and American Indian/Alaskan Native. For disability status, those who reported any difficulty (from moderate to unable to do) in any category of seeing (with glasses/contact lenses), hearing (with hearing aid), walking, or lifting are classified as "with disability."

S suppressed because fewer than 200 weighted cases

NOTES: Salaries rounded to nearest 100. Table limited to those who earned a doctorate in an S&E field from a U.S. institution. For disability status, those who reported any difficulty (from moderate to unable to do) in any category of seeing (with glasses/contact lenses), hearing (with hearing aid), walking, or lifting are classified as "with disability."

S suppressed because fewer than 50 weighted cases

NOTES: Data are limited to those who earned a doctorate in an S&E field from a U.S. institution. Numbers rounded to nearest 10. Details may not add to total because of rounding. For disability status, those who reported any difficulty (from moderate to unable to do) in any category of seeing (with glasses/contact lenses), hearing (with hearing aid), walking, or lifting are classified as "with disability."

S suppressed because fewer than 50 weighted cases

NOTES: Data are limited to those who earned a doctorate in an S&E field from a U.S. institution. Numbers rounded to nearest 10. Details may not add to total because of rounding and because total includes "other race/ethnicity" not shown separately. For disability status, those who reported any difficulty (from moderate to unable to do) in any category of seeing (with glasses/contact lenses), hearing (with hearing aid), walking, or lifting are classified as "with disability."

^a Percents represent the proportion responding "yes" to each category. Respondents could answer "yes" to more than one category.

NOTES: Data are limited to those who earned a doctorate in an S&E field from a U.S. institution. Figures rounded to nearest 10. Details may who reported any difficulty (from moderate to unable to do) in any category of seeing (with glasses/contact lenses), hearing (with hearing aid), walking, or lifting are classified as "with disability."

SOURCE: National Science Foundation, Division of Science Resources Statistics, Survey of Doctorate Recipients, 2001.

TABLE H-34. Employed S&E doctorate holders with disabilities, by age at onset of disability: 2001

Age at onset (years)	Number	Percent distribution
All ages	35,630	100.0
Since birth	2,000	5.6
Younger than 10	2,140	6.0
10-19	3,160	8.9
20-29	3,530	9.9
30-39	4,220	11.8
40-49	11,560	32.4
50 or older	9,010	25.3

NOTES: Data are limited to those who earned a doctorate in an S&E field from a U.S. institution. Numbers rounded to nearest 10. Details may not add to total because of rounding. For disability status, those who reported any difficulty (from moderate to unable to do) in any category of seeing (with glasses/contact lenses), hearing (with hearing aid), walking, or lifting are classified as "with disability."

Technical Notes

The data in this report come from many sources, including surveys conducted by the National Science Foundation (NSF), other Federal agencies, and non-Federal organizations. Many methods of data collection are represented. Therefore, users should take great care when comparing data from different sources. These data often will not be strictly comparable because of differences in definitions, survey procedures, and phrasing of questions, among other things.

Survey accuracy is determined by the joint effects of sampling and nonsampling errors.¹ Sampling errors arise when estimates based on a sample differ from figures that would have been obtained if a complete population had been surveyed. Nonsampling errors can arise from design, reporting, and processing errors as well as from errors due to faulty responses or nonresponses. Nonsampling errors include respondent-based events, such as some respondents interpreting questions differently from other respondents; respondents making estimates rather than giving actual data; and respondents being unable or unwilling to provide complete, correct information. Errors can also arise during the processing of responses, such as during recording and keying.

Reporting categories

This report draws on data collected from many sources, many of which use differing terms to describe the various statistics presented here. Efforts have been made to maintain consistency throughout this text, but in some data reporting, it has been necessary to use distinct terminology that does not match that used in other compilations.

Racial/ethnic information

The collection and reporting of race/ethnicity data pose several additional problems. First, both the naming of population subgroups and their definitions often have changed over time. Second, many of the groups of particular interest are quite small, so it is difficult to measure them accurately without surveys of the entire population of interest. In some instances, sample surveys may not have been of sufficient scope to permit the calculation of reliable

racial/ethnic population estimates; consequently, results are not shown for all groups. The U.S. Bureau of the Census's Current Population Survey, for example, cannot provide data on American Indians. Data on this population are available only from the decennial census. Third, data on race/ethnicity are often based on self-identification. These data are less reliable for certain racial/ethnic groups than for others. Data collected at two points in time indicate that self-identification of American Indians is much less reliable than self-identification of other racial/ethnic groups.² Fourth, it is easy to overlook or minimize heterogeneity within subgroups when only a single statistic is reported for a total racial/ethnic group.

Information about people with disabilities

Data on people with disabilities who study or work in science and engineering (S&E) are seriously limited for several reasons. First, the operational definitions of *disability* vary, include a wide range of physical and mental conditions, and thus are not totally comparable. The Americans With Disabilities Act of 1990 (ADA) encouraged progress toward standard definitions. Under ADA, an individual is considered to have a disability if he or she has a physical or mental impairment that substantially limits one or more of his or her major life activities, has a record of such impairment, or is regarded as having such an impairment. ADA also contains definitions of specific disabilities. See <http://www.usdoj.gov/crt/ada/pubs/ada.txt>.

Second, data on disabilities frequently are not included in comprehensive institutional records (e.g., in registrars' records in institutions of higher education). If included at all, such information is likely to be kept only in confidential files at an office responsible for providing special services to students. Institutions of higher education are unlikely to have information regarding any students with disabilities who have not requested special services. In elementary/secondary school programs receiving funds to provide special education, however, statistics on all students identified as having special needs are centrally available.

¹In all surveys cited as sources of data for this report, efforts were made to minimize these errors.

²U.S. Bureau of Labor Statistics, *A Test of Methods for Collecting Racial and Ethnic Information* (Washington, DC: U.S. Department of Labor, 1995).

Third, information about people with disabilities that is gathered from surveys is often obtained from self-reported responses. Typically, respondents are asked whether they have a disability and to specify what kind of disability it is. Resulting data therefore reflect individual perceptions rather than objective measures.

The attempt to provide estimates of the proportion of the undergraduate student population with disabilities is an example of how these factors coalesce. Self-reported data on the undergraduate student population, collected through a survey to ascertain patterns of student financial aid, suggest that about 10 percent of this population have some disability. Estimates from population surveys of higher education institutions, in contrast, place the estimate much lower, between 1 and 5 percent. Whether this discrepancy is the result of self-perception, incomplete reporting, nonexistent disabilities, or differing definitions is difficult to ascertain.

In the final analysis, although considerable information is available about individuals with disabilities in the education system and in the S&E workforce, it is often impossible to compare statistics from different sources.

Several sources of data on people with disabilities are cited here. They include four surveys conducted by the Department of Education's National Center for Education Statistics (NCES); the American Council on Education–University of California–Los Angeles Survey of the American Freshman: National Norms; and NSF's Survey of Earned Doctorates (SED), Survey of Doctorate Recipients (SDR), and National Survey of Recent College Graduates (NSRCG). These sources are described in more detail later in this appendix; the following is a brief description of how each survey treats the issue of disability.

- **NCES surveys.** Four NCES surveys collect disability-related information—the National Education Longitudinal Study, the Beginning Postsecondary Students Longitudinal Study, the Baccalaureate and Beyond Study, and the National Postsecondary Student Aid Study (NPSAS). Text table 1 provides a quick comparison of the disability-related information collected by these surveys.

TEXT TABLE 1. Selected characteristics of NCES disability-related surveys

Characteristic	NELS	BPS	B&B	NPSAS
Survey year	1988	1990/94	1993/97	2000
Questionnaire respondent	Parent	Student	Student	Student
Question as asked in the survey	In your opinion, does your eighth-grader have any of the following problems? AND Has your eighth-grader ever received special services for any or all of the following?	Do you have any of the following conditions?	Do you have any of the following disabilities?	Do you have any disabilities, such as a hearing, speech, or mobility impairment, or vision problems that can't be corrected with glasses?
Disability type as categorized by the survey				
Visual impairment	Visual handicap (not correctable by glasses)	Visual handicap	Vision impairment that cannot be corrected with glasses, or are you legally blind?	Legally blind or have a vision impairment that cannot be corrected with glasses
Hearing impairment or deaf	Hearing problem OR deafness	Hard-of-hearing OR deafness	Hearing impairment	A hearing impairment
Speech impairment	Speech problem	Speech disability	Speech disability or limitation	A speech disability or limitation
Orthopedic impairment	Orthopedic problem (for example: club foot, absence of arm or leg, cerebral palsy, amputation, polio)	Orthopedic handicap	Orthopedic or mobility limitation	An orthopedic or mobility limitation
Learning disability	Specific learning problem (for example: dyslexia or other reading, writing, or math disability)	Specific learning disability	Specific learning disability	A specific learning disability
Other disability or impairment	Other health problem (includes mental retardation) OR emotional problem OR other physical disability	Other health impairment	Any other type of limitations, disabilities, or handicaps	Other health-related disability or limitation

B&B Baccalaureate and Beyond Study

BPS Beginning Postsecondary Students Longitudinal Study

NELS National Education Longitudinal Study

NPSAS National Postsecondary Student Aid Study

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Students With Disabilities in Postsecondary Education: A Profile of Preparation, Participation, and Outcomes*, NCES 1999-187 (Washington, DC, 1999), p. 6.

- **Survey of the American Freshman.** National Norms. The National Norms survey conducted by the American Council on Education and the University of California–Los Angeles asks whether the student has a disability and, if so, whether the student has a disability such as a hearing, speech, orthopedic, learning, health-related, or other disability. The student is asked to mark all that apply.
- **NSF surveys.** The three NSF surveys, SED, SDR, and NSRCG, provide individual respondents' answers. SED asks if the respondent has a disability, then asks the respondent to mark what category applies to the disability. SDR and NSRCG ask the degree of difficulty—none, slight, moderate, severe, or unable to do—an individual with a disability or disabilities may have in performing life activities. Those respondents who answered "moderate," "severe," or "unable to do" for any activity were classified as disabled. Text table 2 compares SED, SDR, and NSRCG treatment of disability.

Primary data sources

Data from several sources are presented here. This section provides summary descriptions of major sources and information about the location of more detailed survey descriptions.

Primary NSF sources

The following sources from NSF's Division of Science Resources Statistics (SRS) were used for data tables in this publication. Published data tables from these surveys can be accessed on the SRS website at <http://www.nsf.gov/sbe/srs>. In addition, researchers may access data directly from the Scientists and Engineers Statistics Data System (SESTAT) or the WebCASPAR database system, which also can be accessed from the SRS website.

Survey of Earned Doctorates

SED has been conducted annually since 1957 for NSF, the U.S. Department of Education, the National Endowment for the Humanities, the National Institutes of Health, the National Aeronautics and Space Administration, and the U.S. Department of Agriculture. This is a survey of all recipients of research doctoral degrees such as the doctor of philosophy (Ph.D.) or doctor of science (D.Sc.); it excludes the recipients of first professional degrees such as the juris doctor (J.D.) or doctor of medicine (M.D.). Therefore, SED data are restricted to research doctorates.

Data for SED are collected directly from individual doctorate recipients contacted through graduate deans at all U.S. universities awarding research doctorates. The recipients are asked to provide information about the field and specialty of their degree as well as their personal educational history, selected demographic data, and information about their postgraduate work and study plans. Over time, approximately 95 percent of the annual cohort of doctorate recipients respond to the questionnaire.

Partial data from public sources, such as field of study, are added to the file for nonrespondents. No imputations are made, however, for nonresponse for data not available elsewhere, such as race/ethnicity information. The data for a given year include all doctorates awarded in the 12-month period ending on June 30 of that year. Information about SED can be found on the Web at <http://www.nsf.gov/sbe/srs/ssed/start.htm>.

Survey of Graduate Students and Postdoctorates in Science and Engineering

The data collected in the Survey of Graduate Students and Postdoctorates in Science and Engineering (GSS) represent national estimates of graduate enrollment and postdoctoral employment at the beginning of the academic year in all academic institutions in the United States that offer doctoral or master's degree programs in any S&E field. Included are data for all branch campuses; affiliated research

TEXT TABLE 2. SED, SDR, and NSRCG definitions of *disability*

Disability (mark all that apply)	Difficulty with physical functions (mark one choice for each)
Visual	SEEING words or letters in ordinary newsprint (with glasses/contact lenses if you usually wear them)
Auditory	HEARING what is normally said in conversation with another person (with a hearing aid, if you usually wear one)
Orthopedic	WALKING without human assistance or using stairs (mobility)
[No corresponding category in SED]	LIFTING or carrying something as heavy as 10 pounds, such as a bag of groceries
Vocal	[No corresponding category in SDR]
Other	[No corresponding category in SDR]

SDR Survey of Doctorate Recipients

SED Survey of Earned Doctorates

NSRCG National Survey of Recent College Graduates

centers; and separately organized components such as medical or dental schools, schools of nursing, and schools of public health. In fall 2001, the survey population consisted of 721 reporting units at 606 graduate institutions. Data are collected at the academic department level. In fall 2001, the response rate was 98.5 percent for institutions and 99.0 percent for departments.

Available information includes full-time graduate students by source and mechanism of support, including data on women and first-year students enrolled full time, part-time graduate students by sex, and citizenship and racial/ethnic background of all graduate students. In addition, detailed data on postdoctorates are available by source of support, sex, and citizenship, including separate data on those holding first professional doctorates in the health fields; summary information about other doctoral nonfaculty research personnel is also included.

NSF has collected data on graduate S&E enrollment and postdoctoral appointees since 1966. From fall 1966 through fall 1971, data from a limited number of doctorate-granting institutions were collected through the NSF Graduate Traineeship Program, which requested data only on those S&E fields supported by NSF. Beginning with the fall 1972 survey, this data collection effort was assigned to SRS. It was gradually expanded during the period 1972–75 to include additional S&E fields as well as all institutions known to have programs leading to the master's or doctoral degree. Because of this expansion, data for 1974 and earlier years are not strictly comparable with 1975 and later data. Information about GSS can be found on the Web at <http://www.nsf.gov/sbe/srs/sgss/start.htm>.

Survey of Doctorate Recipients

SDR is a longitudinal panel survey of individuals who have received their doctorates in the United States in the sciences or engineering. Since the 1970s, this study has been conducted every 2 years for NSF and other Federal sponsors. It provides information about educational background, occupation, employment, and demographic characteristics of S&E doctorate holders.

The sampling frame for the 2001 SDR included individuals who had earned a doctoral degree from a U.S. college or university in an S&E field; were U.S. citizens or, if non-U.S. citizens, indicated that they had plans to remain in the United States after receiving their degrees; and were under 76 years of age. In 2001, the SDR sample size was 40,000. The overall unweighted response rate for the 2001 SDR was 82.2 percent. The overall weighted response rate was 82.6 percent (weighted responses divided by the number of

weighted sample cases). To minimize the effect of nonresponse error, results were adjusted for nonresponse through the use of statistical weighting techniques.

SDR classifies the following broad categories as S&E occupations: computer and mathematical scientists, life and related scientists, physical and related scientists, social and related scientists, and engineers. Postsecondary teachers are included within each of these groups. The following are considered non-S&E occupations: top and midlevel managers; teachers, except S&E postsecondary teachers; technicians/technologists, including computer programmers; people in health and related occupations; social services and related occupations; sales and marketing occupations; and other non-S&E occupations—for example, artists, broadcasters, editors, entertainers, public relations specialists, writers, clerical and administrative support personnel, farmers, foresters, lawyers, judges, librarians, archivists, curators, actuaries, food service personnel, historians (except science and technology), architects, construction tradespeople, mechanics and repairers, and those involved in precision/production occupations, operators (for example, machine setup operators, machine operators and tenders, fabricators, assemblers) and related occupations, transportation/material-moving occupations, and protective and other service occupations. Information about SDR can be found on the Web at <http://www.nsf.gov/sbe/srs/ssdr/start.htm>.

Primary non-NSF sources

The following non-NSF sources were used for data tables in this report.

The Integrated Postsecondary Education Data System Survey: Fall Enrollment, Completions, and Institutional Characteristics

Contact: National Center for Education Statistics
U.S. Department of Education
1990 K Street, NW
Washington, DC 20006
(202) 502-7300
<http://nces.ed.gov/ipeds>

The Integrated Postsecondary Education Data System (IPEDS) Survey began in 1986 as a supplement to and replacement for the Higher Education General Information Survey (HEGIS), which began in 1966. HEGIS annually surveyed institutions listed in the current NCES *Education Directory of Colleges and Universities*; IPEDS surveys all postsecondary institutions, including universities and colleges

and the institutions that offer technical and vocational education. IPEDS consists of several integrated component surveys that obtain information about types of institutions where postsecondary education is available, student participants, fall enrollments, programs offered and completed, graduation rates, and the human and financial resources involved in the delivery of postsecondary education. Descriptions of these surveys follow.

The **IPEDS Institutional Characteristics Survey** provides the basis for the list of institutions reported in the Education Directory of Colleges and Universities. The list includes institutions that meet specific accreditation criteria and offer at least a 1-year program of college-level studies leading to a degree. Each fall, institutions listed in the previous year's directory are asked to update information about their school's characteristics.

The **IPEDS Completions Survey** replaces and extends the HEGIS Degrees and Other Formal Awards Conferred Survey. It is administered to all institutions offering degrees at the bachelor's degree level and above, 2-year institutions, and less-than-2-year institutions.

The **IPEDS Fall Enrollment Survey** replaces and extends the previous HEGIS surveys of enrollment in institutions of higher education.

The National Postsecondary Student Aid Study

Contact: National Center for Education Statistics
U.S. Department of Education
1990 K Street, NW
Washington, DC 20006
(202) 502-7300
<http://nces.ed.gov/npsas>

NPSAS was established by NCES to collect information about financial aid allocated to students enrolled in U.S. postsecondary institutions. NPSAS was first administered in the fall of the 1986–87 academic year. NCES conducted subsequent cycles of NPSAS during the 1989–90, 1992–93, 1995–96, and 1999–2000 academic years.

The 1999–2000 survey gathered information from about 62,000 undergraduate and graduate students selected from registrars' lists of enrollees at more than 900 postsecondary institutions. The sample included students who did and did not receive financial aid, as well as students' parents. Student information, such as field of study, educational level, and attendance status (part time or full time), was obtained from registrars' records. Types and amounts of financial aid and family financial characteristics were abstracted from school financial aid records. Data pertaining to family circumstances,

background demographic data, educational and work experiences, and expectations were collected from students using a computer-assisted telephone interview. The response rate for obtaining institutional record data for all students was 97.0 percent, and the weighted overall student interview response rate was 65.6 percent.

Survey of Engineering and Technology Enrollments and Survey of Engineering and Technology Degrees

Contact: Matt Doster
Engineering Workforce Commission
American Association of Engineering Societies
1111 19th Street, NW
Suite 403
Washington, DC 20036
(202) 546-2237
<http://www.ecw-online.org/>

For 35 years, the Engineering Workforce Commission (EWC) has conducted annual surveys of enrollments and degrees conferred in engineering programs. In 2002, EWC collected data on engineering enrollments and engineering degrees conferred from 351 and 347 institutions, respectively, including all of those with curricula approved by the Accreditation Board for Engineering and Technology (ABET). EWC counts the number of students studying for engineering degrees at all ABET-accredited engineering schools throughout the United States. Historically, EWC has also included schools that are not ABET accredited for a variety of reasons unique to each school. Some schools are in the process of obtaining ABET accreditation; others have simply asked to be included in the survey. The response rate for the 2002 enrollment survey was 87 percent, and the response rate for the 2002 degrees survey was 92 percent. Each year, EWC obtains data from all schools included in the previous year's survey to ensure accurate time-series comparisons.

Sampling Errors

Sampling errors occur when estimates are derived from a sample rather than the entire population. The sample used for any particular survey is only one of a large number of possible samples of the same size and design that could have been selected. Even if all other aspects of the survey remained fixed, such as the questionnaire and instructions, the estimates from each sample would differ from other

samples. This difference, termed sampling error, occurs by chance, and its variability is measured by the standard error associated with a particular estimate.

The standard error of a sample survey estimate measures the precision with which an estimate from one sample approximates the true population value, and it can be used

to construct a confidence interval for a survey parameter to assess the accuracy of the estimate. See the technical notes section of *Characteristics of Doctoral Scientists and Engineers in the United States: 2001* at <http://www.nsf.gov/sbe/srs/nsf03310/start.htm> for information about calculation of standard errors for data from SDR.

Students Served Under the Individuals With Disabilities Education Act (IDEA)

U.S. Department of Education, Office of Special Education Programs, *Annual Report to Congress*. Available at <http://www.ed.gov/offices/OSERS/OSEP/Products/comppubs.html>.

Mathematics and Science Teachers

National Center for Education Statistics, *Public School Student, Staff, and Graduate Counts, by State: School Year 2001–02*. Available at <http://nces.ed.gov/pubs2003/snfreport03>.

National Center for Education Statistics, Schools and Staffing Survey (elementary and secondary education). Available at <http://nces.ed.gov/surveys/sass>.

Number of Students

National Center for Education Statistics, *Public School Student, Staff, and Graduate Counts, by State: School Year 2001–02*. Available at <http://nces.ed.gov/pubs2003/snfreport03>.

Computer Use

National Center for Education Statistics, *Advanced Telecommunications in U.S. Private Schools: 1998–99*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2001037>.

- National Center for Education Statistics, *Beyond School-Level Internet Access: Support for Instructional Use of Technology*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2002029>.
- National Center for Education Statistics, *Internet Access in U.S. Public Schools and Classrooms: 1994–2000*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2001071>.
- National Center for Education Statistics, *Teacher Use of Computers and the Internet in Public Schools*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2000090>.
- National Center for Education Statistics, *Young Children's Access to Computers in the Home and at School in 1999 and 2000*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2003036>.
- National Center for Education Statistics, *Competing Choices: Men's and Women's Paths After Earning a Bachelor's Degree*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2001154>.
- National Center for Education Statistics, *Digest of Education Statistics, 2000*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2003060>.
- National Center for Education Statistics, *Educational Achievement and Black-White Inequality*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2001061>.
- National Center for Education Statistics, *Entry and Persistence of Women and Minorities in College Science and Engineering Education*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2000601>.

High School Completion

National Center for Education Statistics, *Public High School Dropouts and Completers From the Common Core of Data: School Years 1998–99 and 1999–2000*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2002382>.

National Center for Education Statistics, *The Condition of Education*. Available at <http://nces.ed.gov/programs/coe/2002/section3/indicator25.asp>.

Undergraduate Education

Higher Education Research Institute (HERI), University of California at Los Angeles, *The American Freshman—National Norms 2002*. Available at http://www.gseis.ucla.edu/heri/american_freshman.html.

National Center for Education Statistics, *Digest of Education Statistics, 2002*. Available at <http://nces.ed.gov/pubs2003/digest02>.

Educational Persistence and Attainment

National Center for Education Statistics, *Coming of Age in the 1990s: The Eighth-Grade Class of 1988 12 Years Later*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2002321>.

- National Center for Education Statistics, *Entry and Persistence of Women and Minorities in College Science and Engineering Education*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2000601>.
- National Center for Education Statistics, *Public High School Dropouts and Completers From the Common Core of Data: School Years 1991–92 Through 1997–98*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2002317>.
- National Center for Education Statistics, *The Influence of High School Racial Composition on Black College Attendance and Test Performance*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=78212>.
- National Center for Education Statistics, *Trends in Educational Equity of Girls & Women*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2000030>.
- U.S. Census Bureau, Current Population Survey, Educational Attainment Data. Available at <http://www.census.gov/population/www/socdemo/educ-attn.html>.

Minority Education

American Council on Education, *Nineteenth Annual Status Report on Minorities in Higher Education 2001–02*. Available at <http://www.acenet.edu/programs/omhe/status-report/index.cfm#tables>.

National Center for Education Statistics, *American Indians and Alaska Natives in Postsecondary Education*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=98291>.

National Center for Education Statistics, *Educational Achievement and Black-White Inequality*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2001061>.

National Center for Education Statistics, *Status and Trends in the Education of Hispanics*. Available at <http://nces.ed.gov/pubs2003/hispanics>.

National Center for Education Statistics, *The Influence of High School Racial Composition on Black College Attendance and Test Performance*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=78212>.

Students With Disabilities

National Center for Education Statistics, *An Institutional Perspective on Students With Disabilities in Postsecondary Education*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=1999046>.

National Center for Education Statistics, *Postsecondary Students with Disabilities: Enrollment, Services, and Persistence*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2000092>.

National Center for Education Statistics, *What Are the Barriers to the Use of Advanced Telecommunications for Students With Disabilities in Public Schools?* Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2000042>.

The George Washington University, HEATH Resource Center, *2001 College Freshmen With Disabilities: A Biennial Statistical Profile*. Available at <http://www.heath.gwu.edu/PDFs/collegefreshmen.pdf>.

Minority-Serving Institutions

National Center for Education Statistics, *Hispanic Serving Institutions: Statistical Trends From 1990 to 1999*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2002051>.

U.S. Department of Education, Office of Civil Rights (list of minority serving institutions). Available at <http://www.ed.gov/offices/OCR/minorityinst.html>.

International Participation in Science and Engineering

Organisation for Economic Co-operation and Development, *Education at a Glance* (annual) (contains data on education by sex and country). Available at <http://www.oecd.org>.

The World Bank Group, GenderStats (electronic database of gender statistics on enrollment and attainment by sex and country). Available at <http://genderstats.worldbank.org>.

Employment and Faculty

Committee on Women in Science and Engineering, National Research Council, *Female Engineering Faculty at U.S. Institutions: A Data Profile*. Available at <http://www4.nationalacademies.org/osep/cwse.nsf/web/publications?OpenDocument>.

National Center for Education Statistics, *Gender and Racial/Ethnic Differences in Salary and Other Characteristics of Postsecondary Faculty: Fall 1998*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2002170>.

National Center for Education Statistics, *The Gender and Racial/Ethnic Composition of Postsecondary Instructional Faculty and Staff, 1992–98*. Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2002160>.

National Research Council, Committee on Women in Science and Engineering, *From Scarcity to Visibility: Gender Differences in the Careers of Doctoral Scientists and Engineers*. Available at <http://www4.nationalacademies.org/osep/cwse.nsf/web/publications?OpenDocument>.

Nelson, D. J., The Nelson Diversity Surveys (2002) (tables with number of faculty, by sex, race/ethnicity, and rank at top 50 institutions, by field). Available at <http://cheminfo.chem.ou.edu/faculty/djn/diversity/top50.html>.

University of California, Los Angeles, Higher Education Research Institute, Faculty Survey. Available at http://www.gseis.ucla.edu/heri/c_button5.html.

U.S. Office of Personnel Management, (Federal employment statistics, by occupational group, sex, race/ethnicity, and disability status). Available at <http://www.opm.gov/feddata/index.asp>.
