

Postcard from Iraq

CPT Jeremy Hall

Since March, 2007 I have worked as the Gulf Region North Liaison to the Multi-National Division North. It has been a great ride. I've had the privilege to serve with many fine people from the 25th Infantry Division, 1st Armor Division, and the Gulf Region North District of the US Army Corps of Engineers.

Early in my tour I went outside the wire with the Aegis Reconstruction Liaison Team to visit completed Reconstruction projects in Kirkuk. I never thought I would see farmers combining winter wheat, such as in the photo left, center photo. My office is in the Division Main, or DMAIN, building on COB Speicher (below, right) but I do get outside the wire often. The top, right photo was taken at the Bayji Oil Refinery with "Bayji Bob."

I went home on leave for a couple of weeks in September, and a real highlight for me was just hanging out in the Hall Family Backyard with my girls (top, left photo). I enjoy keeping up with all of our projects. The bottom, left photo is with Engineer Alda Ottley at the Mosul Passenger Terminal. That's all for now!

Jeremy
