

N. W. Ayer & Son's  
AMERICAN  
**NEWSPAPER ANNUAL**  
& DIRECTORY  
*A Catalogue of American Newspapers*

---

A CAREFULLY PREPARED LIST of newspapers and periodicals published in the United States, Territories, and Dominion of Canada, Cuba and the West Indian Islands, with valuable information regarding their circulation, issue, date of establishment, political or other distinctive features, names of editors and publishers, and street addresses in cities of fifty thousand inhabitants and upward, together with the population of the counties and places in which the papers are published.

A SEPARATE LIST of all daily newspapers in the United States and its possessions and the Dominion of Canada which are published continuously throughout the year, indicating by distinguishing marks those which issue Weekly or Sunday editions.

LISTS of monthly and weekly publications of general circulation, religious and agricultural publications, the various class and trade publications, newspapers printed in foreign languages, co-operative newspaper lists, etc.

---

*A DESCRIPTION of every place in the United States and Canada in which a newspaper is published, including railroad, telegraph, express and banking facilities, also state, territory or province, giving the location, character of surface and soil, chief products and manufactures, forming a valuable guide to the judicious placing of any line of advertising. Sixty-three maps of the United States and its possessions, the Canadian provinces and the West Indian Islands, carefully revised and corrected to date.*

## INTRODUCTION TO THE 1917 EDITION.

---

In this issue of the AMERICAN NEWSPAPER ANNUAL AND DIRECTORY we have listed 24,868 publications, an increase of 279 over last year.

We show in this issue 11,870 towns where newspapers are published, an increase of 178 over last year. This volume contains 1,585 new publications. The suspensions and consolidations during the year past make the net gain 279, as shown above. The increase in the United States was 347, being offset by a decrease of 68 in Canada, the loss in Canada arising chiefly from a number of publishers having suspended publication of their papers to do their part in Canada's army. We wish them all a safe return, and hope we shall soon be able to list their names again in the ANNUAL.

Instead of giving the number of pages for each publication, a detail which is subject to frequent changes, and is of but little value to the advertiser, even when constant, we began, in the 1914 edition, to give the width of the columns, expressed in pica ems. Some of our readers may not be conversant with printers' measures. For their benefit we explain that a pica em is exactly one-sixth of an inch. In place of the size of the paper page we now show the size of the type page, as being information of greater usefulness to those interested.

**DAILY NEWSPAPERS.**—Following the General Catalogue is a complete list of all dailies in the United States and their possessions and the Dominion of Canada, which are issued continuously throughout the year, distinguishing the morning and evening issues by the use of roman and italic type respectively and also indicating by an asterisk (\*) all that have Sunday editions whether under the same or different titles. Those which issue weekly, semi-weekly or tri-weekly editions are indicated by a parallel (||).

In this place it may be of interest to note that among the regular dailies—excluding college and summer resort dailies, which are issued during part of the year only—there are 1,876 evening and 704 morning papers.

**MONTHLY AND WEEKLY PUBLICATIONS.**—These are comprised in three lists—viz.: Magazines, including literary, illustrated and humorous weeklies of general circulation; Women's Publications of Home Circulation, and Mail Order Journals. Attention is invited to the special note on page 1191 relative to this group.

**CLASS PUBLICATIONS.**—These lists have, as usual, been carefully revised from the press proofs of the catalogue. Some changes and additions have been made which we believe will make the lists more valuable. We aim to keep this important part of the book fully abreast of the needs of the times, omitting no opportunity to make it more useful.

**POPULATION.**—The population figures in the United States and possessions are those of the 1910 Census, except in Florida, Iowa, Kansas, Massachusetts, New Jersey, New York, North Dakota, Rhode Island, South Dakota and Wyoming, in each of which states we have used the figures of a state census taken in 1915. The populations of the other states, and of their towns and cities of 8,000 or more, are, with very few exceptions, taken from a bulletin issued by the Census Bureau on March 31st, 1914, giving the Census Bureau's estimates of the population of such places in the year 1914. These estimates were based upon the latest procurable information at that time, and may be accepted as practically correct. The figures in the Philippines are from the census of 1904. Those of Canada are from the 1911 census.

Where figures from the above sources are not available, or fail to approximate present conditions, we have used the latest presumably authentic information and have marked the figures with a star (\*), signifying that they are estimated. A number of counties have been divided since the 1910 census was taken. In these cases we have estimated the population from the best information we could obtain.

On pages 12 to 22 inclusive will be found the population of all places in the United States and Canada which have 3,000 inhabitants and upward, arranged alphabetically by states and by groups in each state as follows: Towns of from 3,000 to 5,000, 5,000 to 10,000, 10,000 to 20,000, 20,000 to 50,000 and 50,000 upward.

**STATE HEADINGS.**—The headings of the states and provinces have been carefully revised from the latest authentic information procurable and give concise and valuable statements of their resources and productions. The Department of Agriculture, the Geological Survey, the Census Bureau and the Department of Commerce of the United States, the Census and Statistics Office of Canada, the Department of Mines and the Fisheries Branch of the Naval Service of Canada, with the officials of many states and provinces, have given us much valuable information for this section, and we take this opportunity of expressing our thanks.

**MAPS.**—The maps have been brought as nearly as possible up to date, the larger and more thickly settled states and provinces being divided into two, three or four double page sections, thus doing away with the confusion and incompleteness inseparable from maps drawn on too small a scale. Practically every newspaper town contained in the ANNUAL may be found on the maps, each town being indexed so that it may be readily located if reference to it is desired. The reference follows the population of each place, as (G 5), etc., the letters referring to vertical and the figures to horizontal divisions. To facilitate reference where the place desired is on or near the horizontal line, we have marked it thus: (G 5½), etc. All places so marked will be found on or very near the line indicating the southern limit of the space covered by the number given.

**TOWN HEADINGS.**—These headings have also been carefully revised. The distance, on the map, and in most cases the direction, from some large city, trading centre or nearby railroad town, is given; the means of communication by railroad, water or stage; the telegraph and express facilities. If a town has a bank the word "Bank" appears, if more than one, "Banks," if there is no bank in the place the nearest, or most accessible, or the usual banking town is given. Then follows the description of the place itself, setting forth the leading manufactures, the nature of the surrounding district, with its agricultural and other productions, and educational and other public institutions and such other features as may be worthy of note. We pay particular attention to this valuable feature of the book, endeavoring to have it as up-to-date and complete as possible.

**SUB-EDITIONS.**—We endeavor to distinguish between independent and distinct publications and those which are simply reprints of some other paper, usually with little or no change beyond the name. All papers so issued, as far as it is possible to trace them, are entered in the Catalogue under the name of the leading paper, or, in some cases, that of the publisher. Under the place of apparent publication the name of the sub-edition is given, with a reference to the paper or house issuing it. It is very difficult at times to determine positively this question of similarity of issue. Publishers of such papers are frequently unwilling to give information or to send sample copies, and it is possible that in some instances an error may have been made either in quoting a paper as a sub-edition of another, when it would be fairly entitled to an independent entry if all the facts were known, or in giving a paper an independent standing when it is not entitled to it. Every effort however, is made to guard against either of these possibilities.

**PUBLICATIONS EXCLUDED.**—In accordance with our usual custom there are several hundred publications which we do not insert, as they have little value for the general advertiser or the general public. Among them are those issued by private and high schools, the smaller colleges, local church papers, papers issued by business houses primarily for the exploitation of their own goods, and generally known as "house organs," and publications issued in the interest of institutions, unless having an influence outside of the particular one by or for which they are published. Care has also been exercised in the selection of newspapers and periodicals which rightly come within the scope of this work. Experience teaches that it is not wise to insert every paper when it is first issued, for while the exclusion may be unfortunate in a few instances, much dead matter is thereby kept out of the book; as many of these ventures have very short lives.

**NAMES OF EDITORS AND PUBLISHERS.**—No labor has been spared in the effort to have this department of the work as accurate as possible at the time of going to press: the continual changes of ownership and places of publication, however, necessarily preclude absolute accuracy.

Papers which are believed to decline general advertising are indicated in the Catalogue by the words "No Adv." in the circulation column.

**THE REVISION** of this book for the edition of 1918 has already been begun, and publishers will confer a favor by notifying us of the establishment, suspension or change of any papers within their knowledge, or by calling our attention to any inaccuracies in newspaper descriptions, town headings, state headings or any other department of the ANNUAL.

### CONCERNING CIRCULATION

The only copies of a periodical which can have any value for an advertiser are those which are delivered to actual readers.

Because of our desire to give actual circulations for the benefit of the users of this book, we require that all statements sent us for publication therein shall be made according to the ANNUAL's definition of circulation.

This is our definition of circulation, whether the rating be certified, based on the publisher's statement or estimated,

**CIRCULATION: THE AVERAGE NUMBER OF COMPLETE COPIES OF ALL REGULAR ISSUES FOR A GIVEN PERIOD, EXCLUSIVE OF LEFT OVER, UN-SOLD, RETURNED, FILE, SAMPLE, EXCHANGE AND ADVERTISERS' COPIES.**

This definition appears on all blanks we send out for circulation figures for the Annual, and no figures, sworn or otherwise, will be printed as publishers' statements unless made in accordance therewith.

The word "AVERAGE", as we use it, must not be misunderstood. It is the custom of some publishers to issue occasionally large extra editions; to add these and the regular editions together for a given time, and divide the total by the number of the issues within that period. This is not what we desire. By "AVERAGE" we mean that number which *usually* fills the needs of the mailing lists, and the demand either in or out of the office.

Left over, unsold, returned and file copies, having never reached the hands of a possible reader, cannot be considered as part of the circulation. Sample copies are excluded because there is, as a rule, no method of ascertaining the percentage which reach actual readers. Exchanges are usually cut up in the office to which they are sent, which terminates their usefulness. Advertisers' copies may be read, in some cases, but the great majority are simply checked for the advertisement concerned, and either filed or thrown away.

Before we adopted the above definition, each publisher included in his statements such papers as suited his fancy. Some gave the total number printed, some the "complete and perfect copies," some deducted their returns, while others gave the number of papers actually sold. These last were at a considerable disadvantage when compared with those who included ten to fifteen per cent of uncirculated copies.

Statements made according to the Annual's definition place all publishers upon an equal footing and do injustice to none.

This principle has been recognized by the Post Office Department, which requires that daily papers shall state the number of papers which are actually sold or are sent to paid subscribers.

In addition to the regular statements made for the ANNUAL, we requested all dailies to send in copies of their Post Office statements. The figures of those received have been printed. It will be noted that in many cases there is a variation between the figures of the statements made for the ANNUAL and those made for the Post Office Department, although our requirements as to copies to be included are almost identical with those of the Post Office. This is easily explained. The statements for the ANNUAL may cover any period of six consecutive months or more in the year 1916. The Post Office statements cover definite periods of six months ending March 30th and September 30th, 1916. We have also printed the net paid figures from many reports of the auditors of the Audit Bureau of Circulations, but could not make as general use of these reports as we desired, as a great proportion of the publications audited sent us sworn statements covering much later periods than those covered by the audits, and these later figures were used. Where the figures of the A. B. C. audits are given, they are those of the net paid circulation, and all are from audits including some part of the year 1916.

Ratings are not increased, as a rule, except upon receipt of satisfactory signed statements. They may be reduced where the publishers' continued neglect to furnish such statements leaves us dependent on outside information. As every publisher, without ex-

ception, is furnished each year with a statement blank and a stamped envelope, and thus given an opportunity to present his own figures, publishers have no reasonable ground for complaint if in the absence of statements the ratings given appear unsatisfactory to them.

**SWORN DETAILED STATEMENTS** covering a recent period of six consecutive months or more we consider the strongest kind of statements that can be made. All ratings based on such statements are printed in **bold face type**, and marked with a star (\*). All ratings from sworn statements are printed in bold face type. Detailed statements, not sworn to, are printed in plain figures marked with a star (\*). A double dagger (‡) indicates the publisher's claim unsupported by either affidavit or detailed statement. Our own estimates are set in plain figures and unmarked.

Statements in detail enable us to see to what extent special or extra editions figure in the period covered, and also to what extent the circulation fluctuates or steadily increases.

A detailed statement covering the full period on our blanks will, if properly signed by the publisher or some responsible person for him, ordinarily entitle the paper to a rating in accordance therewith, unless contradictory statements or other evidence call for other action. We say *ordinarily*, because we do not regard the mere rendering of such a statement as incontestable proof of its correctness, and there have been instances where such statements, even when sworn to, could not be accepted in the face of positive information to the contrary; but we believe that such cases are few, and as a rule a detailed statement covering the required period, properly signed, is accepted as *prima facie* evidence of its reliability. In this connection we may say that while the greater part of the circulation ratings are based upon statements sent us by the publishers, and the publishers alone are responsible for them, we use our best endeavors to obtain statements showing actual circulation and we do not print figures if we have reason to doubt their substantial accuracy.

**ESTIMATED RATINGS.**—We endeavor to have all estimated circulation ratings as nearly accurate as our information will permit, without either favor or intentional injustice to any publication. When a publisher fails to submit a statement or other evidence, we base our estimate of his circulation on previous statements which have stood without question, or on such other presumably authentic information as we may have. Estimates based on data more than a year old are usually in round numbers. Such an estimate means that the publication has, so far as our records indicate, at least the number given, while it may have more. Although we try to have all estimates as fair as possible, yet the fact that we have to estimate indicates, as a rule, that our information is old or indefinite, and we would suggest that before concluding important matters with publications having estimated ratings it would be well to request an up-to-date showing.

Although the greater number of circulation ratings are determined when the bulk of the statements are received, earlier in the year, we are willing to revise the figures until the middle of October, if by that time acceptable statements are received by the editor of the ANNUAL AND DIRECTORY.

Circulation ratings are omitted in the following instances:—Where the paper has been established during the current year, or is entered for the first time in the ANNUAL; where the information received is indefinite, contradictory or otherwise unsatisfactory, where our information on local conditions creates a doubt as to the accuracy of the figures sent us, or where publishers have requested omission, in which case the word "Decline" is printed in the circulation column.

We aim at absolute impartiality in this important part of our work, and desiring always to avoid injustice to publishers, in our efforts to procure accurate and trustworthy information for advertisers, we will gladly receive communications from any who may consider themselves unfairly dealt with in any statement in this volume, and will cheerfully correct in future editions any mistakes made in the present one, if furnished with satisfactory evidence of error.

N. W. AYER & SON.

Philadelphia, December 30th, 1916.

## HOW THIS DIRECTORY IS MADE

Sometimes an unobservant publisher asks us the question, "Why don't you revise the ANNUAL every year?" Our answer is, "We do."

We try to make this book perfect, not because we hope to attain perfection, but because we know that by striving for perfection we shall grow better all the time.

By the system we follow, no publisher can justly say that we have neglected to describe his paper correctly. If its description is incorrect, it is because he failed to give us correct information, when we gave him his annual opportunity to do so. Every year, a printed proof of the entry of each and every one of the 24,800 newspapers in the ANNUAL is cut out, mounted on a blank, and mailed to the publisher, with the request that he make any necessary corrections and return it to us. This blank also provides space for his circulation figures. Another blank, printed and ruled for a detailed statement, is also sent him, as well as a stamped and addressed envelope in which to return his proof and statements. It costs a publisher little effort and no money to have his paper's correct description and his circulation statement properly set before the thousands of discriminating advertisers who use the ANNUAL. An increasing number of publishers each year take advantage of the service we offer them, although there are still too many who, impelled by the too handy pigeon-hole, indulge the common propensity for procrastination, to their own detriment.

This sending of proof slips and blanks to each paper for each edition of the ANNUAL, and writing up the facts obtained for the new book, is only a part of the work of revision. The description of each of the 11,870 towns named in the ANNUAL is also sent out for correction every year. This brings back a mass of valuable gazetteer matter for each issue.

In preparing the 1917 edition we found 3,595 new journalistic ventures of such apparent importance as to warrant our sending for copies. We received 1,965 of these. Of the remainder, some were merged with others, some reached us too late to get into the ANNUAL, many failed to respond to our repeated requests for copies, and the greater part died in infancy.

Of the 1,965 received, there were many which, although no doubt of considerable value and interest to their readers, were not considered of sufficient importance to be entered in the ANNUAL. These were papers evidently issued for campaign purposes, or published by single churches, by schools and other institutions, or as house organs, etc. As a result of careful investigation of those received, 1,723 were judged worthy of being listed in the ANNUAL, and were written up, and proofs of their descriptions sent to their publishers for revision, except in the case of some of the later ones. Before the ANNUAL was printed, however, 138 of these had given up the struggle, for various reasons, leaving 1,585 survivors who consequently make their bow to the advertisers of the country in this volume. We wish them all success, and trust they will always fill out and return their proof slips and their statement blanks with care and promptitude, eschewing the pigeon-hole habit.

Consolidations, especially of daily and weekly papers, were numerous. Many daily papers have dropped their weekly editions. These and other causes which bring about the suspension of newspapers made it necessary for us to eliminate 1,327 names from the catalogue during 1916.

Of the fifteen or sixteen thousand newspapers whose publishers felt sufficient interest in their correct representation to return their proof slips, many were found to have changed in size, price, issue, name, politics or ownership. Our rule is to make no changes upon hearsay. We receive every year many thousands of communications relating to newspapers, in the shape of clippings, correspondence and voluntary items of information from other sources. Every one, unless coming directly from the paper concerned, is verified before the information is used for the new ANNUAL. The towns also contain many changes in description. An actual count of the changes made upon a number of pages, picked at random, leads us to estimate the total number of separate changes in the catalogue and the lists each year to be at least 70,000.

This summary of the changes made in a single year instances the truth of the statement of the late George P. Rowell, the first publisher of a newspaper directory, when he declared that a last year's newspaper directory had about as much value as a cancelled postage stamp.

The lists, which occupy 127 pages and classify 241 different kinds of publications, covering almost every field of human effort, are made up each year from the final proofs of the new ANNUAL.

The work of making a new ANNUAL each year calls for a large outlay for postage. The postal matter used in the preparation of each new ANNUAL includes, together with stamped envelopes, about 70,000 two cent stamps, also five thousand stamped wrappers, 6,000 double postal cards, about 2,000 Canadian stamps and sundry West Indian, Cuban and other stamps. These stamps and cards are used solely for the work of revision, and do not include any of those used in selling or advertising the ANNUAL, that being a matter entirely outside the province of the department having charge of the editorial work on the book.

We have given much time, thought, effort and cash to the preparation of the 1917 ANNUAL AND DIRECTORY. We do so every year. We have tried to avoid errors of every kind, but in the listing of nearly 25,000 newspapers, with ten separate and distinct items of information about each one; and of 11,870 towns with a dozen or more particulars of each, and in the making up of more than two hundred lists of different classes of periodicals; it would be a marvel indeed if every one of the half million distinct pieces of information should be absolutely correct. We shall consider it a favor to be informed of any error that exists and a duty and a pleasure to make the necessary correction in the next ANNUAL.

We bespeak from our friends an appreciation of the merits of the book and a frank and friendly criticism of what they may consider its faults.

N. W. AYER & SON,  
Publishers.

# TABULATED STATEMENT

Showing the number of newspapers and periodicals of all issues published in the United States, Territories, and Dominion of Canada; the number of towns in which newspapers are published, and the number of towns which are county seats.

## POPULATION.

CITIES, TOWNS AND VILLAGES OF THE UNITED STATES AND CANADA ARRANGED BY STATES AND PROVINCES IN ALPHABETICAL ORDER AND SUB-DIVIDED INTO GROUPS IN EACH STATE AND PROVINCE ACCORDING TO THE NUMBER OF INHABITANTS, FROM 3,000 UPWARD.

THE POPULATIONS IN THE TABLE ARE TAKEN FROM THE UNITED STATES CENSUS OF 1910, OR LATER STATE CENSUSES, THE CANADIAN CENSUS OF 1911, OR ESTIMATED FROM THE LATEST AND BEST INFORMATION OBTAINABLE. THOSE OF CITIES OF 8,000 OR MORE IN THE UNITED STATES ARE FROM THE PUBLISHED ESTIMATES OF THE CENSUS BUREAU FOR THE YEAR 1914, EXCEPTING IN THE STATES WHICH TOOK CENSUS IN 1915.

## AMERICAN NEWSPAPERS

GIVING THE PLACES IN WHICH THEY ARE PUBLISHED IN THE UNITED STATES, THE TERRITORY OF ALASKA, THE INSULAR POSSESSIONS, THE DOMINION OF CANADA AND NEWFOUNDLAND, ARRANGED ALPHABETICALLY IN STATES, ETC.; A DESCRIPTION OF EACH PLACE, ITS LOCATION, RAILROAD AND OTHER MEANS OF COMMUNICATION, TELEGRAPH AND EXPRESS ROUTES AND BANKING FACILITIES; THE COUNTIES AND IN CANADA, THE DOMINION ELECTORAL DISTRICTS IN WHICH THE PLACES ARE SITUATED, WITH THE LOCATION AND POPULATION OF EACH; AND, IN CONNECTION WITH THE PAPERS, THE FREQUENCY OF ISSUE, POLITICS, DENOMINATION OR GENERAL CHARACTER, YEAR OF ESTABLISHMENT, SIZE, SUBSCRIPTION PRICE, CIRCULATION AND NAMES OF EDITORS AND PUBLISHERS.

Populations, unmarked, in the United States are from the United States census of 1910, except in the states of Florida, Iowa, Kansas, Massachusetts, New Jersey, New York, North Dakota, Rhode Island, South Dakota and Wyoming, each of which is credited with the official figures of a state census taken in 1915. Canadian populations are from the census of 1911. All populations marked with an asterisk (\*) are estimated. Practically all of the estimated populations of the cities of 8,000 or more in the United States, except in those states which had a 1915 census, are taken from the published Census Bureau estimates for the year 1914.

The width of the column of each publication is given in pica ems, the type size of its page in inches and halves or quarters. For the benefit of those not conversant with printers' terms we may state that a pica em measures exactly one sixth of an inch.

Circulation statements for which affidavits have been furnished are printed in **bold-face** figures; detailed statements are designated by a six-pointed star (\*); signed statements, neither detailed nor sworn to, are designated by a double-dagger (†); those unmarked are estimated from the latest presumably authentic information we have. The Post Office Statements were made in 1916. Where publications are credited with figures from the reports of the auditors of the Audit Bureau of circulations, the figures are those of the net paid circulations and are taken from audits for periods covering at least a part of the year 1916.

Where circulation figures are omitted, we have been unable to obtain any satisfactory information, or the paper was established during the current year, or is entered for the first time in the ANNUAL. The word "decline" indicates that the publishers have declined to furnish any statement for publication.

County seats are indicated by a dagger(†).

**Population of the United States 109,021,992**

(U. S. Census Bureau estimate for 1914).

## ALABAMA.

**Population 2,269,945**

(U. S. Census Bureau estimate for 1914).

### STATE CAPITAL, MONTGOMERY.

ALABAMA is bounded north by Tennessee, east by Georgia and Florida, south by Florida and the Gulf of Mexico, and west by Mississippi. Its extreme length north to south is 336 miles; breadth varying from about 150 to 200 miles; land area, 51,540 square miles. The climate in the northern portion is mild; the portion bordering on the Gulf may be called semi-tropical. The Alleghany range enters the state at the northeast and extends toward the centre, finally losing itself in mere hills; then follows a tract of rolling prairies, interspersed with pine barrens and exceedingly rich alluvial bottoms, including the cane brake region, one of the richest cotton-producing districts in the world. From this to the Florida border and the Gulf the land is gently undulating. This part is covered with forests of yellow pine, which is growing valuable, since the available supply of better timber has become small. Over a billion feet is cut annually. The total forest area is about 20,000,000 acres. The production of naval stores here is very considerable. The cut over pine lands are being settled by white farmers and good crops of corn, cotton, truck and fruit are grown. North of this is a broad belt of rich black soil, constituting the great cotton-producing section of the state. The soil then becomes sandy and poor, but abundant water power renders it capable of becoming a fine manufacturing district. The mineral region occupies the northeast part, while the northwest is a good agricultural and stock raising country. The mountain district and the valley of the Tennessee possess fine forests of hardwood timber.

Cotton is grown throughout the state, but mainly in the central belt mentioned. The 1915 crop was 1,050,000 bales, which put Alabama in fourth place among the states in cotton production. Tobacco is also grown to some extent, and the light sandy loams of the central and southern portions produce a remarkably good quality of wrappers, of both the Sumatra and Cuban varieties. Very fine wheat is grown in the north and northeast; rice in the south; corn largely all over the state. Alabama holds fourth place in sweet potatoes, with a crop, in 1915, of 7,200,000 bushels. Dairy products, fruits, wool and oats are produced in considerable quantities and immense quantities of truck of all kinds, berries and small fruits are grown and shipped north, the climate and other local conditions being peculiarly favorable to this industry. There were in 1910 262,720 farms in Alabama, the average area being 79 acres.

Manufacturing and mineral interests have become important. The number of manufacturing plants increased 81 per cent. from 1904 to 1909. In the latter year there were 3,401 establishments, turning out an annual product worth \$146,481,000. The chief manufactures are iron, steel and their products, machinery and heavy castings, iron and soil pipe, cotton gins, flour, lumber, leather, cotton goods, yarns, thread, turpentine, etc. Cotton manufacturing is growing fast and there are nearly a million spindles in the various mills in the state. Oysters and other shellfish are plentiful. Alabama's export and import trade centers at Mobile. Cotton, lumber, iron and naval stores are the chief exports. There are nearly five thousand miles of steam railroads, and a number of navigable rivers.

Extensive beds of brown and red iron ore are found in the counties of Jefferson, Bibb, Cleburne, Blount, St. Clair, Franklin, Shelby, Talladega and Etowah, covering a total area of over 7,500 square miles. Coal deposits are found over a large section of North Alabama in and around the Birmingham district, the total area of coal bearing lands being estimated at 5,500 square miles. Bituminous coal of several kinds is found and the mining of it now gives employment to many thousand men. The state's coal production in 1914 was 15,593,422 tons. Other mineral productions were iron ore, 4,888,959 tons; coke, 3,084,149 tons. Birmingham is the center of the iron and coal region, with an immense production of pig iron. Here are situated large steel works, many furnaces and scores of foundries, machine shops and pipe plants. The manufacture of basic steel from Alabama ores has proved a practical success and steel rails are now being manufactured at Ensley and other towns in Jefferson county, to the amount of about 50,000 tons each month. Considerable gold has been mined; silver, bauxite and copper are also found; potter's, porcelain and fire clays, hydraulic limestone, manganese, mica, graphite, asbestos, cement rock, emery and many other minerals exist in considerable quantities; there are various building stones. The statuary granite and white marble of Coosa county and the variegated marbles of Talladega and adjacent counties are not surpassed by any in the country. In Fayette and other counties natural gas is found.

---

The number of newspapers and periodicals published in Alabama is 225, including 24 daily, 4 semi-weekly, 174 weekly, 7 semi-monthly, 13 monthly, 2 bi-monthly, and 1 quarterly. The places of publication number 131, of which 69, designated by a dagger (†), are county seats.

# ALASKA.

**Population, \*64,680**  
(U. S. Census Bureau estimate for 1914).

## TERRITORIAL CAPITAL, JUNEAU.

ALASKA is bounded north by the Arctic Ocean, east by the Yukon district of Canada and British Columbia, south by the Pacific Ocean, and west by Behring Sea and Strait, and numerous islands. It has a total area of about 590,884 square miles, its greatest length, from north to south, being 1,200 miles and greatest breadth over 800 miles. The northern half is low with great swampy morasses along the streams, running back into low, rolling hills. The population of this portion consists chiefly of Indians, who live along the streams in small bands. The southern half is mountainous, and along the southeast coast are some of the highest mountain peaks on the American continent; Mount St. Elias, the principal one, is over 18,000 feet. Near the center of the territory is Mt. McKinley, the loftiest on the entire continent, summit over 20,000 feet. The southwesterly section comprises the peninsula of Aliaska and the Aleutian Islands, the latter the principal seat of the fur seal and sea otter fisheries. The production of the latter fur has greatly decreased, as the animal is now almost extinct. This district is mountainous and actively volcanic.

The principal industry at present is mining, the country being seamed by the largest quartz veins in the world. The production of gold in 1915 was \$16,900,000; silver 400,000 ounces; tin, 104 tons, value \$66,560. Valuable deposits of copper are also being developed. The 1914 product was 83,850,000 pounds, value \$14,400,000. Total of metallic minerals \$32,000,000. Coal, which was first discovered in 1855 by the Russians, has been worked to some extent. The output varies greatly, one year reaching over 10,000 tons. Deposits of anthracite of high quality have recently been discovered, as well as new fields of bituminous, the new coal fields covering an area of almost a thousand square miles, and it is believed that Alaska, with improved transportation facilities, will greatly increase its production. Some small deposits of petroleum have been found, also gypsum, antimony and graphite. Marble is quarried on Prince of Wales Island. The fisheries in 1911 employed 376 vessels of a total of 87,006 tons, and 17,932 persons, the product being worth \$16,863,728. \$22,671,887 is invested in this industry.

The agricultural industries in Alaska are confined to a few small truck farms near the cities, but the Department of Agriculture has established experiment stations in various places, and oats and wheat have been brought to maturity in favored situations. Some cattle have been raised on the Aleutian Islands, and it is believed that the enterprise will be successful. The Department of Agriculture is also raising sheep there.

The exports consist chiefly of gold, canned salmon and other fish, copper ore and furs. Furs were exported to the value of \$701,511 in the year ending June 30th, 1914; gold to the value of \$12,291,672; fish, 15,201,488; copper, \$3,876,411. The imports are chiefly hardware, machinery and provisions, and the combined export and import trade for the year ending June 30th, 1914, was \$61,076,892. About 27,000,000 acres of forest land are set apart as national forests under the care of the Forest Service of the Department of Agriculture and their timber will be cut under the supervision of the department in such a manner as to make them a permanent source of supply. In 1912, 45,000,000 feet of timber were sold. The coast, from the southern boundary to Cape Spencer, is lined with a continuous chain of islands, between which and the main land are salt water channels, navigable for the largest sized steamships. In the interior is one of the largest rivers in the world, the Yukon, which has a course of between 1,500 and 1,600 miles through the territory, navigable the entire distance, and 60 miles wide at the mouth. The United States government is now building a railroad from Seward to Fairbanks.

The number of newspapers and periodicals published in Alaska is 31, including 14 daily, 15 weekly, 1 semi-monthly and 1 quarterly. The places of publication number 14.

## ARIZONA.

**Population \*239,053**  
(U. S. Census Bureau estimate for 1914).

### STATE CAPITAL, PHOENIX.

ARIZONA is bounded north by Utah and Nevada, south by Mexico, east by New Mexico, and west by California and Nevada; length, north to south, 390 miles, breadth averaging about 300 miles; land area, 113,956 square miles. It lies entirely within the valley of the Colorado, which stream forms nearly all the western boundary. The streams generally flow through deeply eroded chasms, among them being the wonderful "Grand Cañon of the Colorado." The rainfall is very light, increasing with the altitude and varying from 3.15 inches at Yuma, which has an elevation of 141 feet, to 23.87 inches at Flagstaff, at an elevation of 6,907 feet. The Weather Bureau station at Yuma shows the lowest percentage of humidity in the United States, 42 per cent.

Farming is successfully carried on in the valley lands, by the aid of irrigation, and the mountain lands are well adapted to stock raising and wool growing. The reports of the United States Department of Agriculture for January, 1916, give Arizona 891,000 cattle, of which 53,000 were dairy cows; 124,000 horses and 1,849,000 sheep. The 1910 census found 223,512 goats and about 260,000 head of poultry. The raising of ostriches is one of the great industries of the state, which has more than eighty per cent of all the ostriches in the United States. The ostrich farms are all in the Salt River valley, which seems to be peculiarly well adapted to their needs. Over 4,000 birds are in the valley, and feathers of the finest quality are abundantly produced. Their principal food is alfalfa, and that they thrive on it is shown by the fact that nearly 2,000 young birds were successfully raised in 1909. Irrigation is necessary almost everywhere and has been practiced by some of the Indian races from time immemorial, also by the Mexicans before the country passed into the possession of the United States. In recent years, under government care, the area irrigated has been greatly extended. The great Roosevelt dam, constructed under the national irrigation law, and dedicated in the spring of 1910, stores the flood waters of Salt River and Tonto Creek and forms a reservoir whose capacity is sufficient to cover 1,284,000 acres, or a little over 2,000 square miles, a foot deep. Its purpose is to irrigate 240,000 acres of land in the Salt River valley, sixty miles distant from the reservoir. The annual rainfall in this district is only five inches, and the average temperature 69°. Another district of 250,000 acres will be irrigated from the Laguna dam on the Colorado River, near Yuma. It is calculated that it will be possible to irrigate a total of about 900,000 to 1,000,000 acres. A sufficient supply of water demonstrates that the soil of the state has remarkable fertility, and a succession of crops can be grown throughout the year. Oranges, lemons, grape fruit, canteloupes, dates, figs and other deciduous fruits thrive, as well as every variety of fruits and vegetables which will grow in the temperate and semi-tropic zones. The high summer temperature and the days of uninterrupted sunshine make the valley lands wonderful producers of exotic fruits and vegetables. The U. S. Weather Bureau at Phoenix shows the highest summer temperature in the United States, the average from April to October, inclusive, being over 100°, reaching as high as 119° in June. The winter months bring the annual mean down to 69°. Alfalfa and grain are the principal crops grown on the irrigated lands, and with the division of the farms into smaller holdings the dairy industry is increasing and will soon take a prominent position. Sugar beets have been successfully grown, and the acreage will be considerably increased as soon as the factories can take care of the crops. "Dry farming" has been carried on with good results in some parts of the territory, and fair crops of grain and fruit have been secured, but the results are yet somewhat doubtful. It is believed, however, that the establishment of an experimental station in the district suited to this branch of agriculture will result in discoveries that will be of great benefit. There were in 1910 8,078 farms, averaging 154 acres. In the north are pine forests of large extent, the greater portion being included in the National Forests, the timber of which is being cut under government supervision, which prevents the destructive methods usual under private ownership. The annual cut of lumber is estimated to reach about 50,000,000 feet.

The chief wealth of the state, however, lies in its mineral deposits. Gold, silver, lead, and copper abound, and the mining and working of gold and copper ores is at present the leading industry. Gold, valued at \$1,200,000; silver, 5,458,000 ounces; 450,000,000 pounds of copper; 22,272,000 pounds of lead and 17,729,000 pounds of zinc were produced in 1915. The production of copper was much greater than in any other state.

There are now over 2,000 miles of railroads. An extensive system of good roads is provided for under a special tax and will be of material assistance in opening up the country to settlement. Manufactures are small, but increasing with the needs of a growing population. There are over 800 manufacturing establishments, with products valued at over \$50,000,000.

The number of newspapers and periodicals published in Arizona is 87, including 17 daily, 2 semi-weekly, 60 weekly, 1 fortnightly and 7 monthly. The places of publication number 42, of which 14, designated by a dagger †, are county seats.

## ARKANSAS.

**Population \*1,686,480**  
(U. S. Census Bureau estimate for 1914).

**STATE CAPITAL, LITTLE ROCK.**

**ARKANSAS** is bounded north by Missouri, east by Missouri, Tennessee, and Mississippi, south by Louisiana, southwest by Texas, and west by Oklahoma; greatest length from north to south, 240 miles, and breadth from 170 to 250 miles; land area, 53,045 square miles. The state is well watered by numerous streams and the average rainfall is about 45 inches. The summer season is long, the winters short and mild. The eastern part is low and level, originally covered with dense forests and many swamps and lakes, and frequently more or less inundated by the Mississippi, Arkansas, and other rivers, but this part of the state is being drained, and the land, which is of great fertility, brought into use, a great part of it being devoted to the culture of rice. The surface rises toward the centre, where it is hilly and diversified with forests and rolling prairies. Further west are branches of the Ozark Mountains, comprising the Black Hills in the north, Cane Hills in the northwest, and the Ouachita Hills in the south. The valley of the St. Francis, in the northeast, like the Mississippi valley, is gradually being drained; the valley of the Arkansas, from the Oklahoma line entirely across the state, is unsurpassed as a cotton producing country; the valley of the White in the north, abounding in forests, is also rich in agriculture and has deposits of zinc and marble. In the southern part of the state are the Saline, Ouachita, Little Missouri and Red rivers, while in the southeast the Bayou Bartholomew drains a large area, giving it communication with the Mississippi.

Arkansas has 214,275 farms averaging 82 acres. The soil is very varied in character, and its elevation reaches up to 2,500 feet, so that almost every crop which can be grown between the lakes and the Gulf of Mexico can be successfully grown in Arkansas. The river bottoms are very fertile, and yield large crops of cotton, corn, sweet potatoes, rice, tobacco and fruit. The cotton crop in 1915 was 785,000 bales. The soil on the uplands, particularly in the north, produces good crops of wheat, oats, and fruit, especially apples and peaches. Two crops of potatoes are frequently grown in one year and the average yield per acre is high, both of white and sweet potatoes. Cotton is the chief staple; corn next. Corn clubs are doing good work toward the production of more and better corn. Many acres have shown a yield of from 75 to 100 bushels. In one case, a 12-year-old boy in Montgomery county raised 120 bushels. Rice is becoming one of the state's great products—Arkansas holding third place in this crop—and the small grains, peanuts, alfalfa and hay are important crops. The principal grain crops in 1915 were corn, 62,100,000 bushels; rice, 4,840,000 bushels; oats, 10,125,000 bushels. Stock raising is an important and growing industry, the mild winters making it unnecessary to house the stock during that season.

The principal manufactures are cottonseed oil, rice, flour and grist mill products, furniture, wagons and lumber. The manufacturing establishments numbered 2,925 in 1909, an increase of 52 per cent. from 1904. The goods produced had a value of \$74,916,000. Lumber and its products occupy the first place with 1,697 establishments in 1909, producing goods valued at over \$40,000,000. The 1912 output was 1,821,811,000 feet. Next in value come cottonseed products, value nearly \$8,000,000. Lumber, especially hardwood, is abundant, and the state produces large quantities of red gum, hickory, ash, cottonwood, cypress, pine, oak and sycamore.

Coal, argentiferous galena, zinc, copper, lead, phosphate rock, bauxite, fuller's earth, cement rock, asphalt, soapstone, chalk, lithograph stone, slate, whetstones, iron, marble, grindstone, granite and kaolin are among the minerals. Diamonds have been discovered in Pike county, and the mines are being worked to some extent with a production of a few thousand dollars each year. Pearls are found in many of the rivers. Good coal is mined in Crawford, Conway, Franklin, Johnson, Perry, Pope, Pulaski, Sebastian, Scott, Washington, White, and Yell counties. Silver is found in connection with galena in Pulaski and Sevier counties, and with lead in Benton, Carroll, Independence, Izard, Lawrence, Madison, Marion, Newton, Randolph, Searcy, and Washington counties. Excellent marble quarried. Slate for all purposes is quarried in Pike, Pulaski, Polk, Garland and Sevier counties; Garland county has extensive quarries of Arkansas hone or oilstone. In Pulaski county, a few miles south of Little Rock, very extensive quarries of blue granite have been opened up, and valuable discoveries of iron have also been made. A large part of the country's supply of aluminum is made from Arkansas bauxite. The mineral deposits in general are being rapidly developed, and much eastern capital is being invested. Natural gas is found in the western part of the state. Among the mineral springs, the "Hot Springs of Arkansas," at Hot Springs, are the most renowned. There are others, celebrated for their medicinal qualities, at Eureka Springs, Heber and Searcy. Over a million gallons of mineral waters are shipped out each year.

---

The number of newspapers and periodicals published in Arkansas is 311, including 31 daily, 7 semi-weekly, 256 weekly, 3 semi-monthly, 13 monthly and 1 bi-monthly. The places of publication number 176, of which 86, designated by a dagger (†), are county seats.

## CALIFORNIA.

**Population \*2,757,895.**  
(U. S. Census Bureau estimate for 1914).

### STATE CAPITAL SACRAMENTO.

CALIFORNIA is bounded north by Oregon, east by Nevada and Arizona, south by Lower California, and west by the Pacific Ocean. A line drawn through its centre, following the curves of the eastern and western borders, would measure about 770 miles. Its average breadth is about 230 miles; land area, 155,980 square miles. It is the largest state in the Union except Texas. The state is traversed by two great ranges, the Sierra Nevada in the east and the Coast Range in the west, and between them are the beautiful and fertile valleys of the Sacramento and San Joaquin, forming practically one immense basin, over 400 miles long. The Yosemite and other valleys are on the western slope of the Sierra Nevada, and the entire range teems with minerals, as does the Coast Range to a lesser degree. The surface presents every variety of soil and scenery. The highest peak in the country (excluding Alaska) and the lowest valley are both in one county of California, only 75 miles apart. The extreme north is an elevated mountain region, with a great deal of good land, and is celebrated for timber, minerals and fresh fruits, such as apples, etc. The central and southern portions, except in the more mountainous districts, have soil unexcelled in fertility. The southwestern portion, although containing some fertile valleys, is chiefly a region of arid and barren deserts. Its mineral wealth, however, is great.

Irrigation, necessary in much of the state's area, was originally introduced by the mission fathers and has been largely increased since the American occupation. The Mormons established a very elaborate system in San Bernardino county in 1853, and the Riverside Canal was built in 1869. Other large public and private enterprises are in operation. There are 360,000 irrigated farms, about a quarter of the whole number of such farms in the United States. California occupies a high position in agriculture. Every kind of fruit that grows in semi-tropical and temperate climates finds a favorable soil and climate here. The wheat crop was 7,040,000 bushels in 1915. Barley was 39,440,000 bushels; 10,140,000 bushels of potatoes were grown. The hay crop was 4,520,000 tons. Corn produced 2,624,000 bushels; rice, 2,268,000 bushels; beans, 3,825,000 bushels; onions, 3,048,000 bushels. The wool clip was 11,590,000 pounds. Dairy cows numbered, in 1916, 568,000, other cattle and calves, 1,554,000; sheep, 2,450,000. There are several "ostrich farms" and the feathers produced are fully equal to those imported from Africa. The largest farms are at South Pasadena, where there are about 1,000 birds. Several others in the state have each 100 birds or more. It is estimated that the feathers of each male bird have an annual value of about \$30 raw, and \$100 after the various treatments necessary to prepare them for use. The yield of raisins in 1910 was about 120,000,000 pounds, about two-thirds of it from Fresno County; the yield of wine, 45,500,000 gallons, and of brandy, 2,500,000 gallons. Dried and canned fruits are extensively produced, prunes alone averaging over 75,000 tons each year; the 1912 output of dried fruits was 239,000 tons and the shipments of canned fruits to Great Britain alone over 1,000,000 cases. The 1910 yield of walnuts and almonds was 16,000,000 pounds; canned fruits, 3,200,000 cases. Oranges and lemons have reached \$50,000,000. The 1910 census says California's crop of olives was 16,132,412 pounds, 98 per cent of the country's total. The quality is unexcelled. The crop of figs was 22,990,358 pounds, the country's total being 85,060,395 pounds. Honey is an important product. Hops are largely grown. In beet sugar, the state is second only to Colorado. The factories in 1915 produced 203,500 tons of sugar. There were produced in 1910 45,819,471 pounds of butter, 4,648,348 pounds of cheese, 160,000,000 pounds of beans and large quantities of asparagus, potatoes and other vegetables. Cotton is grown on irrigated lands in the Imperial Valley, 34,000 bales were produced in 1915. The lumber cut in 1914, over half being California redwood, the rest pine, spruce and cedar, was 1,303,153,000 feet.

California is famous also for her yield of precious metals. The gold produced in 1915 was worth \$22,560,590, the silver weighed 1,974,529 ounces and the copper output was 44,098,552 pounds; zinc, 11,443,926 pounds, and lead, 6,346,319 pounds. Mercury produced 13,916 flasks, more than a million pounds, valued at \$1,189,818. There are numerous other minerals, including valuable deposits of platinum, coal, copper, asphalt, fuller's earth, pumice, tungsten, iron, chromium, antimony, borax, rock salt, soda, potash, sulphur, etc. Petroleum production is large, being 89,000,000 barrels in 1915, about a third of the total for the country. Natural gas is being used at Sacramento, Stockton, Santa Barbara, Redwood City, and other places.

Manufacturing interests are growing, the products for 1910 being worth \$485,000,000, the principal being lumber, flour, woolens, wine, brandy, tobacco, cigars, cement, machinery, and metallic wares. The annual value of the fisheries is about \$6,000,000. A large number of inter-urban electric lines have been built within the past few years, especially in the vicinity of San Francisco, Los Angeles and Sacramento, one of them from Sacramento to Chico being ninety miles long.

The number of newspapers and periodicals published in California is 972, including 167 daily, 4 three times a week, 31 semi-weekly, 592 weekly, 3 fortnightly, 10 semi-monthly, 1 fourteen times a year, 154 monthly, 3 bi-monthly and 7 quarterly. The places of publication number 388, of which 57, designated by a dagger (†), are county seats.

LOS ANGELES†, pop. *438,914 (G 17); LOS ANGELES Co. (S.), pop. *600,000.	On Los Angeles R., 345 m. S.E. of San Francisco. Steamers to San Francisco. Center of R.R. system of Southern California. S'thrn Pac.; Atch., Top. & S. Fe; San Ped., Los Ang. & S. Lake R.R.s. Tel. Exp. Banks. The city now embraces the territory along the Los Angeles R. from the ocean to about 15 miles up the river, the coast cities of San Pedro and Wilmington having been consolidated with Los Angeles. Fine harbor and docks. Commercial metropolis of Southern California, and second city of the state in population. In a highly fertile fruit grow- ing country, with extensive orange groves and vineyards. Large exports of fruits, raisins, wine, wool, etc. Gold and petroleum in vicinity. Favorite health resort. The world's greatest aqueduct is being built by the city for its water supply. It will reach a distance of 250 miles to the Owens River, near the Nevada line, part of it being a tunnel over five miles long through the Coast Range, and will provide, in addition to the 35,000,000 gallons needed daily by the city, about 250,000,000 gallons for irrigation and electrical power plants. University of Southern California, a State Normal School, Catholic, Baptist and Presbyterian colleges.

## COLORADO.

**Population \*909,537.**  
(U. S. Census Bureau estimate for 1914).

### STATE CAPITAL, DENVER.

COLORADO is bounded north by Nebraska and Wyoming, east by Nebraska and Kansas, south by Oklahoma and New Mexico, and west by Utah. Length, from east to west, 350 miles, breadth, 280 miles; land area, 103,645 square miles. It is intersected near the center by the main range of the Rocky Mountains, otherwise known as the "Continental Divide," and including the highest peaks, among which are Pike's and Long's, Mts. Torrey, Lincoln, Gray, Yale and Harvard, the Spanish Peaks, etc. The mountains enclose wonderful valleys or basins known as parks, many of which are small, but others larger than some entire states. These parks are well timbered, and abound with beautiful scenery, being diversified with low hills and ridges, which contain the sources of all the great rivers that rise in the state. The average altitude of this state is over 6,000 feet above sea level. There are 120 peaks of over 13,500 feet altitude and 85 over 14,000 feet. In crossing the mountains the height reached by railroad is 11,330 feet and by wagon road 13,700 feet. These altitudes, however, do not mean that the mountains are bare of vegetation, or snow-covered. While in the European Alps but little arboreal growth is found at over 8,000 feet, and the line of perpetual snow is found between 9,000 and 10,000 feet, timber is found in many places in Colorado at a height of 11,000 feet, and the snow line in summer is about 14,000. Wheat and oats have attained maturity at 7,000 to 8,000 feet, barley at over 10,000 feet and apples, pears, plums, cherries and small fruits between 7,000 and 8,000 feet. The climate is healthful and has been of great benefit to many invalids, who have tried Eastern and European resorts in vain, the dry atmosphere, light rainfall and abundant sunshine—nearly double that of the European resorts, together with the usually higher temperature, making an outdoor life both agreeable and beneficial. There are many mineral springs, some reputed to have medicinal virtues. The eastern part of Colorado is an immense plain which was for many years devoted to cattle raising, but is now being rapidly developed into one of the finest agricultural districts in the country.

Much of the land will always no doubt be better fitted for grazing than for other uses, but the cultivated area is steadily increasing. Irrigating ditches have been constructed in all parts of the state and are being rapidly extended. The total length of canals and ditches is now over 20,000 miles; acres irrigated, 3,000,000. Colorado is second only to California in the number of farms under irrigation. The state has about 240,000 such farms, one sixth of the total number in the country. Where water can be had the soil is very productive. The leading farm products are wheat, corn, sugar beets, alfalfa, barley, oats, flax, hay, melons, potatoes, fruits, honey, garden and dairy products. The yield of wheat in 1915 was 13,310,000 bushels; of oats, 11,700,000; of corn, 11,280,000, of potatoes, 7,155,000 bushels, of hay, 2,184,000 tons, of beet sugar, the largest output among the states, 235,000 tons. In 1912 16,027 carloads of fruit exported included 7,770 of apples, 4,042 of peaches and 2,300 of canteloupes. The total fruit crop for that year was valued at over \$6,000,000. The western slope is particularly adapted to the apple, more than two-thirds of the state's crop coming from that region. Berries and other small fruits do well. Cattle, sheep and hog raising are among the chief agricultural pursuits. Colorado had, in 1916, 1,839,000 sheep and 1,315,000 cattle, of which 219,000 were dairy cows. The wool clip is usually over 10,000,000 pounds.

Lumbering is of considerable importance. The mining of gold, silver and other metals is one of the chief industries. The annual production of the precious and semi-precious metals is very large, the gold alone produced in 1915 being valued at \$22,330,000, a close second to California. Silver, 7,080,000 ounces and 7,100,000 pounds of copper were produced in the same year; lead, 66,664,000 pounds; zinc, 100,000,000 pounds. Other mineral products are also abundant. Large beds of lignite, bituminous and semi-bituminous coal exist, also a little anthracite, the total extent of coal-bearing strata in the state being estimated at more than 20,000 square miles. The production of coal in 1914 was 8,170,559 tons. Petroleum is found in various places. The 1913 output was 188,799 barrels. There are about 125 producing wells in the Florence field alone. Natural gas fields are also being developed. Cement, slate, sandstone, marble, granite, fire clay and manganese are being worked, and the iron of the state is manufactured into steel and iron rails. Some radium is produced in Montrose county. Thirty-three separate minerals are produced in commercial quantities, and the total annual mineral production in 1913 was valued at \$51,294,281.

Manufactures are developing. The census report, for the year 1909, gives the total value of manufactures in the state as \$130,044,000.

---

The number of newspapers and periodicals published in Colorado is 393, including 44 daily, 1 three times a week, 5 semi-weekly, 31 weekly, 1 semi-monthly, 29 monthly and 2 quarterly. The places of publication number 188, of which 61, designated by a dagger (†), are county seats.

## CONNECTICUT.

**Population \*1,202,688.**  
(U. S. Census Bureau estimate for 1914).

### STATE CAPITAL, HARTFORD.

**CONNECTICUT** is bounded north by Massachusetts, east by Rhode Island, south by Long Island Sound, and west by New York. Its average length from east to west is 86 miles; its average breadth, 55 miles; land area, 5,004 square miles. The eastern part is principally composed of rounded hills, which, though stony, afford rich pasture; and the valleys support a thrifty agricultural and manufacturing population. The Connecticut valley, near the river, and at a distance from the Sound, is very fertile. In the south the land is broken and the soil sandy and gravelly, but when well manured it yields good crops of potatoes, rye, oats, and corn. In the west the surface is rough and the hills are abrupt. There are several good harbors on the coast, and a large business is done in oyster fishing and in the taking of fish for oil and fertilizer. The state is second in the value of oyster fisheries, its annual production being 4,000,000 bushels.

Agriculture employs less than one-third of the working population and the capital invested in agriculture is estimated at \$115,000,000. Dairy products and hay are the principal staples of the east and west. Tobacco is largely grown, chiefly in the Connecticut valley, which produces the finest cigar wrappers grown in the United States. In 1915, 22,000 acres were planted, resulting in a crop of 29,970,000 pounds, with a total value, at the farm, of \$5,095,000. Corn, rye, oats and potatoes are grown in nearly all parts of the state. The 1915 corn crop was 3,250,000 bushels grown on 65,000 acres, and the average per acre—50 bushels, was higher than in any other state. The land near the large cities and towns is chiefly devoted to market gardening. The total value of the agricultural products is about \$30,000,000.

The Connecticut river is open to steamboat navigation from its mouth to Hartford. The Thames river is likewise navigable by Sound steamers as far as its formation by the Yantic and Shetucket rivers in Norwich city, and steamers ply regularly between that city and New York, and, in the summer season, to the shore resorts.

Connecticut is mainly a manufacturing state, having an unusual abundance of water power, and its industries are extensive and varied. Among the leading productions are brass goods, clocks, hardware, india rubber goods, firearms, silver and silver plated ware, hats, corsets, cutlery, machinery, tools, automobiles, bicycles and textile fabrics. Connecticut stands first in the manufacture of brass goods, producing 44.6 per cent of the total for the United States. In clocks, corsets, firearms and ammunition and silver plated ware, it produces over two-thirds of the country's totals. The state ranked twelfth among the states in the value of its manufactured products in 1909. It had 4,251 manufacturing establishments and from materials worth \$257,259,000 the labor of 238,871 workers produced goods worth \$490,272,000. The brass goods manufactured were worth \$66,933,000, foundry and machine shop products \$65,585,000; cotton goods, \$24,232,000; silk goods, \$21,063,000; firearms and ammunition, \$19,948,000.

A little iron is made from Connecticut ores, a productive tungsten mine is operated in Trumbull, but the state's mineral industries are practically confined to stone quarrying and clay working. Large quantities of brown stone are taken from the celebrated Portland sandstone quarries. The state of Connecticut, and especially its capital city of Hartford, has become celebrated for the extent and solidity of its insurance interests,—the nineteen life and fire companies of Hartford alone representing in capital and assets nearly two hundred millions of dollars.

The number of newspapers and periodicals published in Connecticut is 155, including 36 daily, 7 semi-weekly, 84 weekly, 1 fortnightly, 3 semi-monthly, 19 monthly, 1 bi-monthly and 4 quarterly. The places of publication number 66, of which 9, designated by a dagger (†), are county seats.

## DELAWARE.

**Population \*209,817.**  
(U. S. Census Bureau estimate for 1914)

**STATE CAPITAL, DOVER.**

DELAWARE is bounded north by Pennsylvania, east by the Delaware River and Bay and the Atlantic Ocean, south and west by Maryland. Its length from north to south is 96 miles, its breadth ranging from 9 to 12 miles in the north to about 36 miles in the south; land area 1,960 square miles. The surface in the north is somewhat hilly, and southward the land is rolling, with fringes of marshes and swampy tracts along the indentations of Delaware Bay. The southern portion of the state is in great part a sandy region, but by skillful farming has been made highly productive. Kaolin and iron ore are found in the north. The soil in the interior of the state is light and easily cultivated.

The agricultural products are grain, corn, fruit, potatoes, and market garden produce; peach growing and small fruits—berries—are prominent industries. Apples and pears of fine quality are also largely grown. Over one hundred evaporators and canneries are engaged in preserving all kinds of fruits, berries and garden vegetables, at Seaford, Dover, Milford, Georgetown, Smyrna and other towns in the lower half of the state. In 1915, the state produced 6,615,000 bushels of corn, 1,875,000 bushels of wheat, 1,045,000 bushels of potatoes. In 1909, the latest year for which we have exact figures for small fruits and vegetables, the production was 18,845,589 quarts of berries, 628,786 baskets of fresh tomatoes, 258,982 bushels of canteloupes, and other fruit and vegetables in abundance. The same year the output of canned tomatoes was 1,212,110 cases. Poultry products have an annual value of \$2,500,000.

Manufactures are various, and are carried on chiefly in Wilmington and its vicinity. The 1910 census gives the total value of manufactured goods in 1909 as \$52,840,000. Iron goods, iron and wooden steam and sailing vessels, cars, bridges, structural steel, fibre products, crates and boxes for the canneries, gunpowder, paper, pulp, leather, carriages, machinery, cotton and woolen goods and flour are the leading products.

Seaford ships immense quantities of oysters, and Lewes is a station for menhaden and other fisheries. Oyster growing and fishing are important industries. Large quantities of timber are cut for ship building and railroad ties. Delaware's mineral industries are small and confined to stone and clay products.

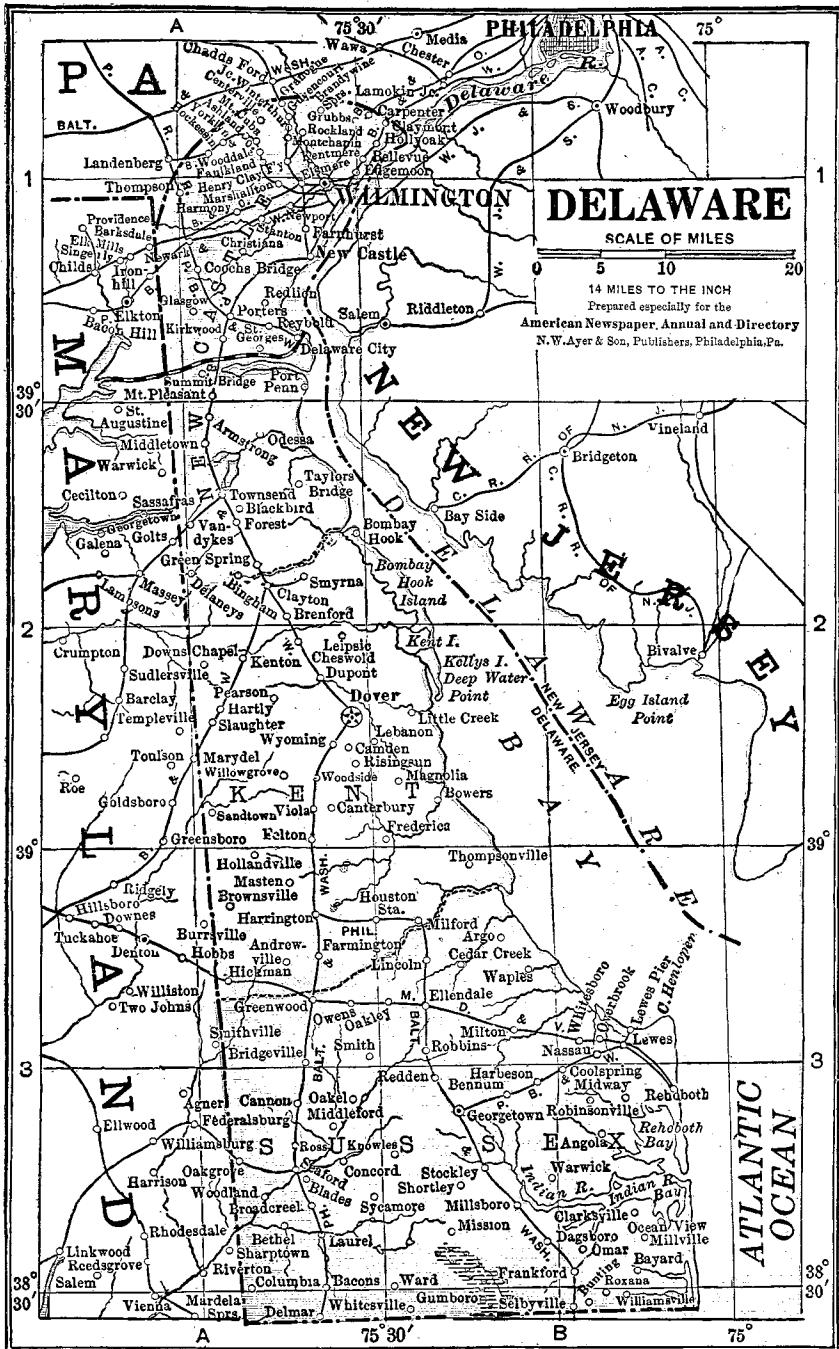

Congress is considering provision for increasing the depth and width of the Chesapeake and Delaware Canal, which connects the upper portions of the bays, and converting it into a free ship canal, which would greatly facilitate traffic between Philadelphia and Baltimore, and other ports in Maryland and Virginia. Other projects are being pushed for the drainage of swamp lands in Sussex County, and for the building of good roads, New Castle County alone spending \$600,000 for the latter purpose.

The number of newspapers and periodicals published in Delaware is 35, including 3 daily, 27 weekly, 4 monthly and 1 quarterly. The places of publication number 14, of which 3, designated by a dagger (†), are county seats.

## DISTRICT OF COLUMBIA.

**Population #353,378.**  
(U. S. Census Bureau estimate for 1914).

(For map see map of Maryland).

The DISTRICT OF COLUMBIA is inclosed by the state of Maryland, except on the southwest, which is bounded by the Potomac River; land area, 60 square miles. Surface undulating, with a fine fertile soil on the small portion, about twenty per cent., which is available for cultivation. Floriculture, truck growing and dairying are the chief agricultural industries, flowers and foliage plants leading with a production of fully sixty per cent. of the total value of all agricultural products. The number and total area of the farms are declining year by year. The United States Government has large plants for engraving, printing, bookbinding and the manufacture of various articles, employing altogether about 15,000 persons. The private manufacturing industries are varied, the most important being the brewing of malt liquors, and the manufacture of ice, pottery, brick and clay products, lumber and planing mill products, marble and stone, roasted and ground coffee and spices, flour, structural iron work, castings and bottled mineral and carbonated waters. The manufactures have an annual value of over \$25,000,000. A considerable coasting trade is carried on.

The number of newspapers and periodicals published in the District of Columbia is 95, including 6 daily, 24 weekly, 1 semi-monthly, 47 monthly, 6 bi-monthly and 11 quarterly.

## FLORIDA.

**Population 921,618**

**STATE CAPITAL, TALLAHASSEE.**

**FLORIDA** is bounded north by Alabama and Georgia, east by the Atlantic Ocean, south and west by the Gulf of Mexico and Alabama. The peninsular portion of the state is about 375 miles long by an average breadth of 90 miles; the upper portion 360 miles from east to west by from 30 to 90 miles from north to south; land area, 54,240 square miles. The surface is diversified with numerous lakes, the largest, Okeechobee, being 40 miles long by about 30 miles broad. There is a coast line of about 1,150 miles, while the water surface comprises one-fifteenth of the whole. The larger portion of that part of the peninsula south of Lake Okeechobee is occupied by the Everglades, an evergreen marsh or swamp, fifty-five miles wide by one hundred and fifty miles long, and covered with a dense growth of "saw grass," eight to ten feet high and so thick as to be practically impenetrable, except where it is intersected by numerous winding channels. The surface is dotted with innumerable islands of from half an acre to hundreds of acres in extent, almost all being subject to overflow during rainy seasons. The state has made good progress on a project for draining the Everglades, by cutting through the rim of limestone rock which confines the waters, and by controlling the overflow of Lake Okeechobee. This project, when carried to completion, will add millions of acres of most fertile soil to the area of tillable land. The Coast Line Canal, with a depth of five feet from Miami to Jacksonville has been completed. It is 370 miles long. A ship canal across the state from Jacksonville is under consideration and U. S. engineers have made preliminary surveys. Many other improvements of water courses are contemplated or under construction. From the northern end of the swamp to Georgia is mostly a dead level, with occasional undulations and small hills. The highest place in the state, at Mt. Pleasant station, is only 301 feet above the sea. The pine lands, which cover the greater part of the state, are studded, at intervals of a few miles, with stretches of extremely rich soil, called hammocks, varying in extent from small patches up to thousands of acres. The swamp lands, when drained, are remarkably fertile. The climate is semi-tropical, but the temperature does not reach the extremes attained in other states and frost is almost unknown. The U. S. Weather Bureau Station at Jupiter shows the highest average temperature in the United States, being 74°, the highest monthly average being 81°, the lowest 64°. The same station records the greatest annual rainfall, being 60.2 inches.

Florida had, in 1910, 49,884 farms, of an average area of 105 acres. Sugar cane is grown, chiefly along the Gulf coast. Both long and short staple cotton and tobacco are grown. Corn, rice and oats are the principal cereals. The cotton crop for 1915 was 50,000 bales, the tobacco crop 3,549,000 pounds. Oranges, lemons, limes, pineapples, figs, olives, and grapes flourish luxuriantly; garden vegetables are largely produced for the northern market. The total value of the farm products is over \$50,000,000. Cattle require little care, are not housed in winter, and large numbers are raised and shipped to Havana. Hogs form an important part of the live stock, numbering nearly 1,000,000.

Sponges are found on many parts of the coast. Pine lumber, ship timber, tar, rosin, turpentine, cottonseed oil and cake, palmetto hats and braids are manufactured; salt is made by solar evaporation; cigars are manufactured at Key West and at Ybor City, near Tampa, in large quantities. Naval stores form a very important part of the products, the value of turpentine and rosin alone amounting to over \$15,000,000 each year. Immense deposits of phosphate rock underlying parts of several counties furnish material for large fertilizer industries, the product being shipped not only to other states but to European countries. The total product in 1914 was 2,138,891 tons, value \$7,354,744, nearly four-fifths of the country's product. Outside of a considerable output of fuller's earth and some brick and china clay, there are no other minerals of importance.

The fisheries are of great value, the inland and coast waters being full of fish; oysters are abundant, and the sponge and coral fisheries are of considerable importance, the annual production of sponges being estimated to have a value of \$2,000,000. The winter climate of Florida is exceedingly mild, frost being of rare occurrence, and it has become a most fashionable resort at that season. Manufactures are growing. The 1910 census figures give Florida 7,153 manufacturing establishments, with an annual output of \$72,724,000.

The number of newspapers and periodicals published in Florida is 204, including 35 daily, 4 semi-weekly, 154 weekly, 1 semi-monthly and 10 monthly. The places of publication number 112, of which 48, designated by a dagger (†), are county seats.

## GEORGIA.

**Population \*2,776,513.**  
(U. S. Census Bureau estimate for 1914).

**STATE CAPITAL, ATLANTA.**

**GEORGIA** is bounded north by Tennessee and North Carolina, northeast by South Carolina, southeast by the Atlantic Ocean, south by Florida, and west by Alabama. Its extreme length from north to south is 320 miles, extreme breadth 254 miles; land area, 58,980 square miles. The surface is varied; along the coast it is intersected by numerous rivers and sounds, and the country for miles inland is a succession of ridges of pines and live oaks and swamps of cypress; the great Okeefinokee swamp is in the southeast. Back from the coast is a stretch of sandy land, mostly pine barrens and yielding large amounts of timber and naval stores. A series of terraces bring the land in the middle of the state to about 575 feet above tidewater, from which elevation it rises toward the north more rapidly, until it becomes mountainous, being there crossed by spurs of the Appalachians.

Georgia has 290,497 farms, averaging 93 acres. The soil of the islands is sandy, producing sea island cotton; that of the mainland, rich alluvial, producing corn, cotton, and rice; the middle region is red loam, yielding good cotton, corn, tobacco, etc. In the North, grain, tobacco, fruits, and vegetables are largely grown, but cotton is mainly grown in the central, west central, and southwestern regions. Georgia's fruit and vegetables, especially peaches and watermelons, are greatly celebrated and enjoy a great sale in the northern markets. In the production of cotton Georgia ranks second among the states, her crop in 1915 reaching 1,900,000 bales. Sugar cane is grown in the south, and considerable pork fattened, mainly for home consumption; wool is prominent, but corn and cotton are the leading staples. Wheat and oats are grown in considerable quantities. In 1915, the production of corn was 64,950,000 bushels; wheat, 3,575,000 bushels; oats, 17,648,000 bushels; potatoes, 1,040,000 bushels; sweet potatoes, in which Georgia holds second place, 8,075,000 bushels; tobacco, 1,496,000 pounds.

Among the leading industries are lumber, flour, boots and shoes, carriages, cotton and woolen goods, wool carding and cloth dressing, leather, saddlery, metallic wares, furniture, castings, machinery, farm implements, etc. There are many cotton factories in the state. The most important are at Augusta and Columbus; the other chief seats of the cotton manufacture are Athens, Atlanta, Decatur, Macon, Savannah, and West Point. Savannah is the most important South Atlantic seaport. The city is the seat of a large foreign and domestic commerce. Its railroads extend to all parts of the country, and its steamships ply daily to the principal North Atlantic ports. Savannah is the largest naval stores port and second largest cotton and rice port in the United States, and holds an important place in the manufacture and shipment of lumber and fertilizers. Atlanta has large iron works, and has developed into a great manufacturing city. Rome, Dalton, Marietta and Thomasville are manufacturing towns. The iron and steel trade is overtaking the cotton manufacture in importance. Other important branches of manufacture are lumber, flour, pulp, etc. Darien, Brunswick and St. Marys manufacture and export lumber. The 1910 census gives the number of manufacturing plants as 4,792, with a production of \$202,863,000, more than double that of ten years previous.

Minerals: bituminous coal in the northwestern portion; deposits of iron ore in Bartow, Chattooga and other counties; gold is found in Cherokee, Carroll, Cobb, and Lumpkin counties, the 1914 production being \$16,270; barytes, bauxite, fuller's earth, mineral paints and asbestos are produced in commercial quantities; granite, marble, gypsum and slate are found. There are numerous mineral springs, of which the Indian Spring in Butts county and the Bowden Lithia, or Salt Spring, in Douglas county, are the best known. The development of the rich marble resources in north Georgia during recent years has been wonderful. There are quarries of the finest marble in Pickens, Cherokee, Murray and adjoining counties, and millions of dollars have been invested in opening them.

The number of newspapers and periodicals published in Georgia is 360, including 29 daily, 2 three times a week, 13 semi-weekly, 256 weekly, 3 fortnightly, 7 semi-monthly, 48 monthly, and 2 bi-monthly. The places of publication number 206, of which 144, designated by a dagger (†), are county seats.

## IDAHO.

**Population, 395,407.**  
(U. S. Census Bureau estimate for 1914).

**STATE CAPITAL, BOISE.**

IDAHO is bounded north by British Columbia, east by Montana and Wyoming, south by Utah and Nevada, and west by Oregon and Washington; its length from north to south is about 480 miles, width varying from 44 to 825 miles; land area, 84,313 square miles. Surface is diversified, mountainous in the northern and central portions with arid plains in the south. In the southeast is a volcanic region, abounding in geysers and saline springs.

The valley lands in many parts of the state are unsurpassed in fertility, and almost all crops of the temperate zone can be successfully grown, except those classed as sub-tropical. The farms in 1909 numbered 30,741, an increase since 1900 of 76 per cent. They average 171 acres. Fruits of all kinds belonging to the temperate zone are produced in abundance, and their quality is unexcelled. The chief products are wheat, live stock, fruits, potatoes, sugar beets, hay, oats and barley. The wheat crop in 1915 was 18,730,000 bushels, that of oats 15,745,000 bushels, barley 7,736,000 bushels, potatoes 3,500,000 bushels, hay 1,828,000 tons. The live stock produced is worth annually over \$9,000,000, the fruit over \$7,000,000. Mutton and wool are largely produced. Cattle in 1916 numbered 532,000, 126,000 being dairy cows, horses 241,000, sheep 3,102,000. Idaho stands fourth in sheep and fifth in wool production—15,286,000 pounds. The production of sugar beets and the manufacture of beet sugar form an important industry. Only four states excelled Idaho in the production of sugar beets in 1915. Her output of beet sugar was 52,700 tons. Many of the arid plains have been irrigated, and make excellent wheat growing districts. There is abundant water in the streams and lakes to reclaim the 10,000,000 acres which are susceptible of irrigation. The water power is said to be sufficient for all the needs of the state for transportation, manufacturing and all other purposes requiring power. Irrigation work to cost about \$150,000,000 has been planned and work already done on the various projects to the value of \$30,000,000. Dry farming is successfully carried on in various parts of the state. It is estimated that about 10,000,000 acres can be made productive by this means.

The forest-covered area is very large, embracing about 20,000,000 acres, much of the timber "lodge pole" pine of small diameter, but growing very thickly. Other trees are fir, spruce, cedar, etc., some of these being very large. The annual value of the lumber output is estimated at \$10,000,000. The National Forests occupy a large part of the forest area, and are estimated at forty-five billion feet of lumber. Nearly 2,000,000 sheep graze in them.

Gold, silver and lead are plentiful in all parts of the state and are largely produced, especially lead, the production of this metal in 1915 being 377,000,000 pounds. Gold to the amount of \$1,650,000 was also produced, with 13,000,000 ounces of silver, 7,169,000 pounds of copper and 80,000,000 pounds of zinc. Coal is also mined, and there are immense deposits of coal and phosphate rock which have not yet been developed. The total metal production was nearly \$40,000,000. Manufacturing industries are increasing with the rapid extension of transportation facilities and the increase of population.

The number of newspapers and periodicals published in Idaho is 160, including 10 daily, 7 semi-weekly, 138 weekly, 1 semi-monthly, 3 monthly and 1 quarterly. The places of publication number 109, of which 37, designated by a dagger (†), are county seats.

## ILLINOIS.

**Population, \*5,986,781.**  
(U. S. Census Bureau estimate for 1914).

**STATE CAPITAL, SPRINGFIELD.**

ILLINOIS is bounded north by Wisconsin, northeast by Lake Michigan, east by Indiana, southeast and south by Kentucky, and west by Missouri and Iowa; extreme length north and south 385 miles; extreme breadth 218 miles; land area, 58,980 square miles. The surface is mostly level table land, inclining gently toward the south, with bluffs along the principal rivers. A small tract in the northwest, around Galena, is somewhat broken, and a low mountain ridge extends across the southern end from Grand Tower, on the Mississippi River, to Shawneetown, on the Ohio, about 850 feet above sea level. This is a great fruit region. The prairies are sometimes level, but generally undulating.

The mineral wealth is great. More than two-thirds of the state is a productive bituminous coal field, the output in 1915 reaching 57,589,197 tons, value \$64,693,529. In the production of petroleum, being credited with 18,500,000 barrels in 1915, it is exceeded only by California and Oklahoma. Natural gas in large quantities has been discovered at various places in the state. The iron ore is good only when mixed with Michigan and Missouri ores. Lead and zinc are mined extensively in the northwest. Copper ore, a little silver, lead, zinc, tripoli, gypsum and marble are found. Limestone and freestone abound; 1,425,168 tons of coke were made in 1914.

The prairie soils are deep and fertile; that of the river bottoms often seems inexhaustible. A tract called the American Bottom, extending along the Mississippi River a length of ninety miles by about five in breadth, has an alluvial soil about twenty-five feet in depth. Illinois is unexcelled as an agricultural state, and is among the first in manufactures. The total value of her field crops in 1915 was \$408,110,000, leading all other states. Spring and winter wheat, corn, and other cereals, dairy produce, wool and hay are leading products. Illinois stands first in corn. The 1915 crop was 376,164,000 bushels. The state is second in oats, of which she grew 195,435,000 bushels, sixth in wheat, with 53,200,000 bushels, and second in poultry, in which she is exceeded only by Iowa. Broom corn, sorghum, buckwheat, sweet and white potatoes, root crops and some tobacco are also grown. Dairying is a very important industry, the dairy cows, numbering 1,047,000 in 1916, contributing to the state's wealth over half a billion gallons of milk each year. Other live stock are 1,239,000 beef cattle and calves, 907,000 sheep, 4,489,000 hogs and 1,452,000 horses. In the number of horses and hogs it is second only to Iowa. There is also a large production of fruit, live stock, mutton and wool. Illinois has over 250,000 farms. The total value of farm lands and buildings, according to the 1910 census, is over \$3,500,000,000, an average of \$108.12 per acre, the highest value of any state.

The manufactures embrace a wide range of articles, and the seats of manufacture are distributed generally throughout the state. The leading articles include iron and steel and their products, woodenware, furniture, farming implements, cars and carriages, flour, watches, woolen goods, bridge work, lumber, tiles, glassware, soap, malt and distilled liquors, etc. In 1905 the total production of iron and steel goods was valued at \$87,352,761. The total value of manufactured goods in 1909 was over \$1,900,000,000, produced in 18,026 factories. Illinois is exceeded, in this respect, by only New York and Pennsylvania. Fishing interests are extensive on the large rivers and on Lake Michigan. They center chiefly at Chicago, which is also the center of an immense business in live stock, lumber, slaughtering and meat packing industries. The value of the meat products from these establishments in 1909 was \$389,594,056. The state is amply supplied with transportation facilities, by rail, river and lake. It has 12,216 miles of railroad within its borders.

The number of newspapers and periodicals published in Illinois is 1,967, including 172 daily, 4 three times a week, 41 semi-weekly, 1,039 weekly, 9 fortnightly, 28 semi-monthly, 1 every 19 days, 647 monthly, 1 four times a year, 1 semi-quarterly, 7 bi-monthly, and 17 quarterly. The places of publication number 659, of which 102, designated by a dagger (†), are county seats.

CHICAGO*, pop. *2,393,325 (J 2); COOK Co. (N.E.), pop. 2,405,233. On Lake Mich. and Chicago R., 25 railroads from all sections of the country center here. Tel. Exp. Banks. Federal Reserve Bank. Second city in population of the United States, and leading commercial city of the West. Port of entry and center of shipment of western produce to the East. Its trade in grain, provisions, live stock and lumber is the largest of any city in the world. Hog and beef killing and packing industries are very large, and manufactures are numerous and important, including extensive steelship building works, brewing and distilling, iron, steel, wood, leather, brick, chemicals, shoes, cigars and tobacco and other industries. Chicago has a series of handsome parks, many magnificent public and commercial buildings, the University of Chicago, various theological seminaries and many other institutions. While the site is low, the city is healthful and the summer heat is tempered by the constant breezes. Chicago's name of "The Windy City" is well deserved.	Abendpost (Ger.)—see Sonntag - } Evg. ex. ## INDIANA.

**Population \*2,779,467.**  
(U. S. Census Bureau estimate for 1914).

**STATE CAPITAL, INDIANAPOLIS.**

INDIANA is bounded north by Michigan and Lake Michigan, east by Ohio, south by Kentucky, and west by Illinois. Its extreme length north and south is 276 miles; average breadth 140 miles; land area 35,910 square miles. About two-thirds of the surface is undulating or level prairie; near the Ohio and other rivers the surface is hilly. In the extreme northwest there is a sandy tract, with considerable marsh land, where peat abounds and is an article of considerable commercial importance. The northeast abounds in oak openings and prairie land, interspersed with many small lakes. The soil is generally fertile, much of it exceedingly so; the richest is found along the Wabash, White, and White Water rivers.

There is abundance of coal of good quality, the 1914 output being 16,641,132 tons. The petroleum output amounts to nearly 1,000,000 barrels. The natural gas belt, one of the largest known in the world, extends over 21 counties, or more than 6,000 square miles. The iron manufactures are extensive, Indiana coal being particularly suited to this industry, but the ores used come mainly from the Lake Superior region, Missouri, and Tennessee. Indiana has some bog ore and local deposits of better grades which have been worked to some extent. Coke was produced to the amount of 2,276,652 tons in 1914. There are some salt springs, good sandstone, limestone, fire brick, potter's clays, and kaolin. The manufacture of cement is a large industry, over 10,000,000 barrels being made in 1913. Limestone is particularly abundant, being practically inexhaustible.

Indiana ranks among the first as a grain producing and stock raising state. She has 214,741 farms, of an average size of 99 acres. Corn, of which 190,950,000 bushels were grown in 1915 (Indiana standing in fifth place among the states), is the largest single product; other important crops being wheat, 47,300,000 bushels; oats, 65,520,000 bushels; potatoes, 7,125,000 bushels hay, 3,030,000 tons; rye, 2,400,000 bushels; tobacco, 11,340,000 pounds. Cattle, hogs, sheep and horses are raised in all parts of the state. Important among the live stock are sheep, numbering in 1916 1,058,000, and hogs, 4,167,000. Butter, wool, maple sugar, and sorghum molasses are also important products; lumber is largely exported.

Manufactures are numerous and extensive, the principal goods being flour and grist mill products, lumber, woolen goods, furniture, carriages and wagons, iron and iron ware, machinery, agricultural implements, pork products, liquors, metallic wares, leather, boots, shoes, clothing and automobiles. The manufacturing of automobiles is now an immense industry in Indiana, which is surpassed by only one state in the number built. The total value of manufactured goods in 1909 was \$578,728,000.

No state is better supplied with transportation facilities, as it lies directly in the path of almost all the great trunk lines, which have branches extending into all parts of the state; and fully half of its borders are on navigable waters. Indiana has a larger mileage of good roads than any other state, having 24,995 miles of improved roads in 1909. Ohio came next with 24,106, nearly double the mileage of New York, which held third place.

The number of newspapers and periodicals published in Indiana is 745, including 146 daily, 1 three times a week, 23 semi-weekly, 499 weekly, 6 semi-monthly, 62 monthly and 8 quarterly. The places of publication number 353, of which 91, designated by a dagger (†), are county seats.

# IOWA.

**Population 2,358,066.**

**STATE CAPITAL, DES MOINES.**

IOWA is bounded north by Minnesota, east by Wisconsin and Illinois, south by Missouri and west by Nebraska and South Dakota. Its greatest length from east to west is 300 miles, and breadth 208 miles; land area, 55,475 square miles. The surface, especially in the eastern, southern and southwestern parts of the state is generally rolling prairie, with no mountains nor very high hills, but with frequent bluffs along streams; and in places near the large rivers it presents a broken appearance, caused by erosion from torrents. The central and northern parts are the most level, with prairies, groves, and the numerous affluents of the two great rivers. While Iowa is generally known as entirely an agricultural state, there are about 2,250,000 acres of natural timber lands, situated almost entirely in the eastern portion of the state, and about 120,000 acres of planted timber. Most of the natural growth, however, is of little use except for fuel and fencing, the more valuable species having been largely cut off. In the northeast the surface is more elevated, with numerous low hills, with tops covered with oaks, and abounding in lead and other minerals; but the distinguishing feature of Iowa is its prairies, which are every where fertile and easily tilled and, having few stones or stumps, are especially adapted for the use of agricultural machinery. The valleys of the Red Cedar, Iowa and Des Moines rivers contain the richest soils; northward of these the soil becomes less fertile, but is still productive and remunerative.

Building stone, cement rock, gypsum and clay of fine quality are abundant; coal and lead are extensively worked. The coal fields extend through twenty-three counties, with three hundred mines working, and the production in 1914 was 7,451,022 tons. Iron ore and a few other minerals are also found.

At the time of the 1910 census Iowa had 216,807 farms, averaging 156 acres. The cereals generally, dairy and market garden products, hay, wool, linseed, sorghum, and live stock of all kinds are very largely produced. Iowa is second in corn, first in oats and second in hay. The 1915 crops included 308,000,000 bushels of corn; 188,000,000 bushels of oats; 5,576,000 tons of hay; 15,540,000 bushels of potatoes; 10,943,000 bushels of barley and 15,557,000 bushels of wheat. Other grains are also largely grown. Grapes grow well in the south, and fruit culture is increasing. The total value of field crops in 1915 was \$824,398,000. Iowa is the headquarters of the hog, the porcine population in 1916, according to the government statistics, numbering 9,069,000, more than double the number of any other state. Iowa has also 1,274,000 sheep, 1,391,000 dairy cows, 2,737,000 other cattle and stands first in the number of horses, 1,584,000. This state is also first in poultry and eggs, having, according to the 1910 census, over 29,000,000 head of poultry, an average of over a dozen head for every man, woman and child in the state. The dairies supply about 600,000,000 gallons of milk yearly for all purposes. Iowa occupies third place among the states in the value of its dairy products. Prepared cereal products are also of great value. The total value of Iowa's farm property in 1910 was \$3,745,861,000, the land being worth \$2,801,974,000, buildings \$445,460,000, implements and machinery \$95,478,000, live stock \$456,453,000.

The manufacturing interests are rapidly developing, especially in flour, lumber and wood working, carriages, briks and other clay products, cement, woolen goods, boots and shoes, pork packing, saddlery, furniture, malt liquors and farm implements, and the total output of manufactured goods in 1914 was valued at \$400,000,000. Iowa has a well deserved reputation as a leading state in educational matters. She has twenty-six colleges, and over 200 libraries, of which 102 are public and the rest belong to educational and other institutions.

The number of newspapers and periodicals published in Iowa is 934, including 58 daily, 7 three times a week, 33 semi-weekly, 751 weekly, 1 three times a month, 3 fortnightly, 12 semi-monthly, 62 monthly, 2 bi-monthly and 5 quarterly. The places of publication number 582, of which 100, designated by a dagger (†), are county seats.

## KANSAS.

**Population 1,672,545.**

**STATE CAPITAL, TOPEKA.**

KANSAS is bounded north by Nebraska, east by Missouri, south by Oklahoma, and west by Colorado. Its length from east to west is 410 miles, and from north to south 207 miles; land area, 81,700 square miles. The surface is chiefly undulating in the east, while the western part has a rolling and varied surface, and until recently has been devoted to stock raising, but irrigation works are gradually changing it to an agricultural district of great fertility. There are no mountains, very few lakes, and those small and shallow; no marshes but salt marshes, and these are valuable. The bottom and table lands are chiefly a rich black loam, and highly productive. When the state was settled only five per cent. of the area was forest, and this was distributed mainly along streams and in occasional groves and small tracts; but it is estimated that the area of forest trees has since doubled by voluntary growth, transplanting, and by seed.

Kansas has rich mineral resources. The coal production in 1914 was 6,060,988 tons; petroleum, 3,000,000 barrels, and rapidly increasing; salt, 2,967,864 barrels. Natural gas is abundant. Some lead and zinc are produced.

But Kansas is primarily an agricultural state. There are 177,299 farms, averaging 244 acres. Winter and spring wheat, corn, rye, oats, live stock and potatoes are the chief products, while broom corn, sorghum, flax, hemp, castor beans, sugar beets, tobacco, and hay are also largely produced. Within the past twenty years, the growing of alfalfa has become one of the chief agricultural industries of the state, and large quantities of alfalfa hay are shipped east. Alfalfa meal mills have been established in many places, and the product is a valuable stock food which is becoming more generally used each year. The wheat crop of 1915 was 106,588,000 bushels, second only to North Dakota; corn 172,050,000 bushels; oats 43,725,000 bushels, barley and other grains are also largely grown. Hay produced, 4,062,000 tons. The total value of the 1915 field crops was \$262,188,000. Cattle raising is a prominent industry, and sheep farming is increasing in the western part. The number of cattle in the state in 1916 was 2,707,000, 782,000 being dairy cows; of hogs, 2,815,000; of horses, 1,109,000, of mules, 245,000 and of sheep, 341,000. The total value of the live stock products of the state in 1909 was \$90,000,000, and the value of all agricultural and animal products was \$907,538,164.91. The live stock market and the packing house industry in Kansas City, Kansas, are exceeded only by Chicago. The packing house products of the state in 1909 had a value of \$165,380,516. Dairy products are increasing rapidly, and in 1909 had a value of \$12,344,099. Over 1,000,000 pounds of honey is gathered annually.

The manufacture of sugar from sugar beets and the making of glass are important industries. Manufactures are being developed, and the number of establishments is rapidly increasing, especially in the southeastern part of the state, where industrial enterprises are greatly assisted by the strong flow of natural gas, an extensive gas belt underlying that region. In 1909, 3,500 factories had a total output of over \$375,000,000.

The number of newspapers and periodicals published in Kansas is 725, including 70 daily, 9 semi-weekly, 613 weekly, 2 semi-monthly, 28 monthly and 3 quarterly. The places of publication number 468, of which 104, designated by a dagger (†), are county seats.

## KENTUCKY.

**Population \*2,350,731**  
(U. S. Census Bureau estimate for 1914).

### STATE CAPITAL, FRANKFORT.

KENTUCKY is bounded north by Ohio and Indiana, northwest by Illinois, east by West Virginia and Virginia, south by Tennessee, and west by Missouri; greatest length from east to west, 350 miles; greatest breadth, 178 miles; land area, 40,000 square miles. The surface in the east and southeast is mountainous, being broken by numerous parallel ranges of the Alleghany system, with deep and fertile valleys. Northwest of this section, and in the centre of the state, is the famous blue grass region, with a gently undulating upland surface, and deep valleys at the rivers. Between the Green and Cumberland rivers the surface is level and known as the "Barrens," from the scarcity of heavy timber. The western part is generally level, with slight undulations. The soil of the whole state is remarkably fertile; that part between Lexington and the Ohio river is known as the "Garden of Kentucky."

Cereals grow to greater perfection in Kentucky than in almost any other state. The chief products are tobacco, hemp, corn, wheat, oats, rye, barley and potatoes. The corn crop for 1915 was 114,000,000 bushels, and the wheat crop 9,900,000 bushels. Hemp averages over 6,000,000 pounds. Apples, 4,170,000 barrels in 1915, are an important crop. Kentucky has acquired a world wide fame for its thoroughbred horses, shorthorn cattle, and mules. The wool clip is very large, and immense numbers of hogs are raised. The state in 1916 had 1,155,000 sheep and 1,709,000 hogs. Dairy products are very important; also sorghum, molasses, maple sugar, honey and wax; some cotton is raised in the southwest near the Tennessee line. In tobacco this state surpasses all others. In 1915 more than a third of the American crop was grown within the state. In that year Kentucky grew 356,400,000 pounds on 440,000 acres, the total value being \$27,799,000. Louisville is the greatest leaf market in the world. There are 258,742 farms in the state, averaging 86 acres.

The forests are extensive and valuable, although not more than one per cent. of the timbered land is virgin forest. There is a large quantity of valuable timber of second growth, but as it is being cut off at least twice as fast as it grows, the lumbering industry will soon be a thing of the past, unless modern methods of forestry are introduced. The growth consists chiefly of the various species of oak, with other valuable hardwoods.

In southeastern Kentucky there are 10,000 square miles underlaid with coking and bituminous coals of superior grade. The greatest known area of coking and fine cannel coals exists at the head of the Kentucky river. The total coal production in 1914, Kentucky standing fourth among the states, was 20,382,768 tons. Large quantities of so-called Red River and Oriskany ores used in the manufacture of car wheels and other fine iron products are annually mined, the product averaging over 50,000 tons annually. Petroleum and natural gas are found in various places.

The manufacturing interests are varied and important, and are carried on chiefly in the towns on the Ohio river. An extensive industry is the smelting and working of iron, while all wood manufacturing industries flourish, especially those making railroad ties, spokes, handles, staves and headings. Whiskey is an important product of the central counties. The chief manufactures, according to the 1910 census, are distilled liquors, with a product in 1909 of the value of \$44,860,000; flour and grist mill products \$22,365,000; lumber products \$21,381,000; tobacco \$18,598,000. Salt is made from springs in the mountain counties. The manufacture of cotton goods is becoming important. There were 73 looms and 9,022 spindles in 1880. In 1910 the looms had grown to 1,312, the spindles to 84,078. The total number of all factories in 1909 was 4,776, an increase of 28 per cent. in ten years, and the value of the products was \$223,754,000.

The number of newspapers and periodicals published in Kentucky is 305, including 29 daily, 3 three times a week, 25 semi-weekly, 207 weekly, 7 semi-monthly, 30 monthly, 1 bi-monthly, 2 quarterly and 1 three times a year. The places of publication number 156, of which 111, designated by a dagger (†), are county seats.
